[Third Publication.] NOTIFICATION—No. 1147.

The 21st March 1893.—The following Notification of the Government of India, in the Revenue and Agricultural Department, is published for general information.

H. H. RISLEY, Secy. to the Govt. of Bengal.

No. 545P., dated Calcutta, the 1st March 1893.

NOTIFICATION-By the Govt. of India, Revenue and Agricultural Dept.

Applications for the registration of Trade Marks as "Designs" under Part II of the Inventions and Designs Act (V of 1888) are frequently received in the Office of the Secretary appointed under the said Act. It is hereby notified for general information that the Government of India are advised that Trade Marks are not "Designs" within the meaning of the said Act and, therefore, are not capable of such registration.

NOTIFICATION.

The 3rd April 1893.—Under the provisions of section 9 of the Bengal Excise Act VII of 1878, and with the sanction of the Board of Revenue, a distillery in which spirituous liquors may be manufactured after the native process having been established at Cuttack towns in the district of Cuttack, it is hereby notified that, from and after the 1st April 1893, within the following limits which have been fixed with the sanction of the said Board of Revenue, no such liquors, unless manufactured at the said Sadar distillery, shall be introduced or sold without a pass from the Collector, and no still shall be constructed or worked, or spirituous liquors manufactured, except at the said distillery:—

Northern boundary.—A line from the Jenapur lock on the High Level Canal across the Brahmini river direct to Mantira on the left bank; thence along the left bank of the Brahmini-Khursua to Jokadia lock; thence along the west bank of the High Level Canal up to Roria on the Baitarni, where it meets the Cuttack-Balasore inter-district by which it

follows along the Baitarni river to the Bay of Bengal.

Eastern boundary.—The eastern boundary of the district.

Southern boundary.—The southern boundary of the district up to a point due south of

Western boundary.—A line commencing from the point where the southern boundary ends due south of Gail bank passing straight north-west through Gail bank to the eastern boundary of the district on the north bank of the Mahana li, which boundary it follows up to the point where it meets the boundary between the Sadar and the Jajpur sub-divisions north-west of Kalkala; thence along the latter boundary south-east to the High Level Canal; thence along the west bank of the canal up to the Jenapur lock, where the northern boundary begins.

This notification supersedes that dated the 17th March 1890 and published in the Calcutta Gazette of the 19th idem, and all notifications previously issued on the subject.

G. Stevenson, Collector.

NOTIFICATION .- No. 1827S.R.

The following orders, issued by the Government of India in the Home Department. are republished for general information.

H. J. S. COTTON, Chief Secy. to the Goot. of Bengal.

PROCLAMATION.

PUBLIC.

Calcutta, the 16th March 1893.

No. 854.—Whereas, by proclamation issued on the 17th January 1862 under the provisions of the Act 24 and 25 Vict., Cap. 67 (the Indian Councils Act, 1861), the Governor-General of India in Council extended the provisions of the said Act to the Bengal Division of the Presidency of Fort William in Bengal, and further directed, in conformity with the provisions of the said Act, that the number of Councillors whom the Lieutenant-Governor of the said Division of the Presidency of Fort William might nominate for his assistance in making Laws and Regulations should be twelve;

And whereas, by section 1, sub-section (2), of the Act 55 and 56 Vic., Cap. 14 (the

Indian Councils Act, 1892) it was provided that it should be lawful for the Governor-General in Council by proclamation from time to time to increase the number of Councillors whom the said Lieutenant-Governor may nominate for his assistance in making Laws and Regu-

lations, provided that not more than twenty should be so nominated;

It is hereby declared by the said Governor-General in Council that from and after the date of this proclamation the number of Councillors whom the said Lieutenant-Governor may nominate for the said purpose shall be twenty.

NOTIFICATION.

Public.

The 17th March 1893.

No. 359 .- The following Regulations, which have been made by the Governor-General in Council under the provisions of section 1, sub-section (4), of the Indian Councils Act, 1892, as to the conditions under which nominations of Councillors shall be made by the Lieutenant-Gove nor of the Bengal Division of the Presidency of Fort William for his assistance in making Laws and Regulations, have received the approval of the Secretary of State for India in Council and are now published for general information :-

Regulations under Section I (4) of the Indian Councils Act, 1892, for Bengal.

The Lieutenant-Governor of Bengal has been authorised by the Proclamation of the Governor-General in Council in the Home Department, No. 354, dated 16th March 1893, to nominate twenty Councillors for his assistance in making Laws and Regulations. Of these twenty Councillors, not more than ten shall be officials.

II:-The nominations to seven seats shall be made by the Lieutenaut-Governor on the recommendation of the following bodies and Associations respectively, namely:-

A.—The Corporation of Calcutta;
B.—Such Municipal Corporations or group or groups of Municipal Corporations other than the Corporation of Calcutta as the Lieutenant-Governor may from time to time prescribe by Notification in the Calcutta Gazette;

C .- Such District Boards, or group or groups of District Boards as the Lieutenant-

Governor may from time to time prescribe as aforesaid;

D .- Such Association or Associations of merchants, manufacturers or tradesmen as the Lieutenant-Governor may from time to time prescribe as aforesaid;

E.—The Senate of the University of Calcutta;

Provided that the bodies described above under A, B, C, D, and E, respectively shall each (except as hereinafter provided in Rule VII) have at least one Councillor nominated upon its recommendation, and A, D, and E, not more than one each.

III.—The Lieutenant-Governor may, at his discretion, nominate persons to such of the remaining seats as shall not be filled by officials in such manner as shall in his opinion secure a fair representation of the different classes of the community; provided that one seat shall ordinarily be held by a representative of the great landholders of the Provinces

IV.—When a vacancy occurs and is to be filled under Rule II of these Regulations. the Lieutenant-Governor shall cause the proper body or group of bodies or Association or Associations to be requested to recommend a person for nomination by the Lieutenant-

Governor.

V.—The recommendation shall be made—

- (a) in the case of a Municipal Corporation or of a District Board, or of the Senate of the University, by a majority of votes of the Corporation, Board, or Senate respectively;
- (b) in the case of Associations not established by law, in the manner laid down in their rules or articles of association for carrying resolutions or recording decisions upon questions of business brought before the Association;
- (c) in the case of a group of Municipal Corporations, District Boards, or Associations, by the majority of votes of representatives to be appointed, according to such scale as the Lieutenant-Governor may from time to time prescribe, by the Corporations, Boards, or Associations.
- VI.-It shall be a condition in the case of any person to be recommended by a Municipal Corporation or group of Municipal Corporations that he shall be a person ordinarily resident within the Municipality or the district in which it is situated, or in some one of the Municipalities constituting the group or of the districts in which they are situated. A similar condition shall also apply to persons to be recommended by District Boards.

VII .- If within two months after receiving the request of the Lieutenant-Governor as provided by Rule IV the body or Association or group of bodies or Associations fails to make a recommendation, the Lieutenant-Governor may nominate at his discretion a person belonging to the class which the body or Association or group is deemed to represent.

VIII.—If the Lieutenant-Governor shall decline to nominate any person who has been, under these Regulations, recommended for nomination, a fresh request shall be issued as provided in Rule IV, and the procedure laid down in Rules V and VII shall apply.

IX. -(2) As soon as conveniently may be after these Regulations come into force, seven of the seats held by non-official persons shall be filled up by recommendation under Rule II.

(b) If there shall not be the full number of seven vacancies available at once for this purpose, the Lieutenant-Governor shall determine at his discretion, subject always to the proviso in Rule 11, which of the bodies or groups mentioned in that Rule shall be requested to recommend the persons to fill up such vacancies as may then be available; and so whenever and as often as any further vacancies among non-official Councillors become available, until the full number of seven has been completed.

> C. J. LYALL, Secretary to the Gort. of India.

PUBLIC WORKS DEPARTMENT,—BENGAL

ESTABLISHMENT.

The 3rd April 1893.

No. 97.—The following notification issued by the Government of India, in the Public Works Department, is republished for information:

No. 128, dated the 25th March 1893.—Mr. J. D. Davies, Executive Engineer, 1st grade, is, at his own request, permitted to retire from the service of Government, with effect from the 26th April 1893.

RAILWAY.

The 4th April 1893.

No. 99.—Notification.—Whereas it appears to the Lieutenant-Governor of Bengal that land is likely to be required to be taken by Government at the public expense for

a public purpose, viz., for a railway from Nilphamari to Joyganj, it is hereby declared that for the above purpose, survey parties are about to take the field to survey a line of railway through the undermentioned villages in the districts of Rangpur and Dinajpur, parganas Kazirhat and Panjrah :-

Villages.					•

This declaration is made, under the provisions of section 4, Act X of 1870, to all whom it may concern, and is in substitution of notification No. 72, dated 20th March 1833, which was published at page 231, Part I of the Calcuita Gazette of the 22nd idem.

No: 101.-Declaration .- Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the extension of the Manihari Ghât line of the Eastern Bengal State Railway at mauzas Manihari, Kazeegaon, and Mirzapur, pargana Kankjoul, zilla Furnea, it is hereby declared that for the above purpose a strip of land about 3 miles in length, varying in width from 25 feet to 150 feet, measuring, more or less, 90 bighas 9 cottahs and 3 chitaks of standard measurement, previously occupied as B class land for season 1890-91, is required within the aforesaid mauzas of Manihari, Kazeegaon and Mirzapur, to be permanently acquired as "A" class.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all

whom it may concern.

COMMUNICATIONS.

The 4th April 1893.

No. 103 .- Declaration .- Whereas it appears to the Lioutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the construction of a rest-house at Ramganj, in the village of Augraparah, pargana Bhuluah, zilla Noakhali, it is hereby declared that for the above purpose a nece of land measuring, more or less, odd bighas 18 cottahs and 10 chitaks of standard measurement, bounded on the west by the drain on the east of a village road and the Ramgani public road; and on the north, east and south by Bakshi Patwari's cultivated lands, is required within the aforesaid village of Augraparah.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

> F. J. JOHNSTONE, Secy to the Govl. of Bengal.

IRRIGATION.

The 4th April 1893.

No. 98 .- Notification .- The following rules, having reference to all the lines of navigation included in the following canal systems, viz., the Orissa Canals, the Midnapore Canal with branch to Narainghar, the Hijili Tidal Canal, the Orissa Coast Canal, and the Sone Canals, are passed by the Lieutenaut-Governor under the provisions of sections XI and XII of the "Canals Act, 1864," No. V (B.C.), in supersession of those now in force. They will come into effect from the 1st July 1893.

A draft of these rules as proposed was published in this Department Notification No. 35, 15th and 22nd February, and 1st, 8th, dated the 14th February 1893, for a period of six weeks, in 15th and 22nd March 1893. the Culcutta Gazette of the dates noted in the margin.

1. Every vessel, entering or passing along any of the above lines of navigation, shall be liable to measurement for the purpose of ascertaining the amount of toll the vessel should pay according to the schedule of rates authorized by Government to be charged on the line of

navigation.

2. The tonnage of every vessel, except loose timber and raft, whether laden or empty, shall, for the purposes of the "Canals Act, 1864," and of these rules, be determined by the

following measurements:-

The product of half the length of the vessel, measured along the water-line and round the contour of the vessel from contre of stem to centre of (a) stern-post, multiplied by the interior greatest breadth of the vessel or by the greatest breadth of the cargo, should this overhang, or, as in the case of logs, be lashed alongside, multiplied by the greatest interior depth from the water-line to the bottom of the vessel, is to be taken as equal to the number of maunds upon which toll shall be levied.

The measurement of the length is to be made in feet, rejecting fractions of a foot, (b)and the measurement of the breadth and depth in feet and quarters of feet,

rejecting portions of less than a quarter of a foot.

In calculating the amount of toll to be levied, any portion of 100 maunds less than 10 maunds is to be omitted.

calculating the amount of toll to be levied on steamers, an allowance of onethird the total maundage as found under clauses a, b, and c is to be made for engine space.

3. Every vessel entering or passing along any of the above lines of navigation shall be furnished with a ticket on paying the prescribed toll. The ticket shall specify the station at which it has been issued, the name of the person in charge of the vessel, the date on which the voyage commenced, the point to which the vessel may proceed on the line of navigation, the maundage of the vessel, the amount of toll charged, the number of days allowed for the voyage, and the date of such last day. The number of days so allowed without additional payment shall be calculated at the rate of one day for every eight miles, or portion of eight miles, to be traversed together with one day for every two hundred maunds of ment. In the case of rafts, one day for every five miles shall be allowed.

Toll may be paid at the first station, either for the entire number of toli-stations. measurement.

on the line of navigation, or for any less number of stations.

The tickets thus given may be demanded for inspection by any duly authorised navigation officer, and must be kept on board and at hand for that purpose. They must be shown at each toll-station the vessel has to pass, as a passport that no further payment of

toll is to be demanded. The tickets shall be delivered up at the last toll-station.

Navigation officers shall have authority to check-measure vessels whenever they consider it necessary, and if the toll due according to the check-measurement exceeds that originally paid, the difference shall be payable at the toll station of check-measurement, or at the next toll-station which the vessel may arrive at, if the check-measurement was made at some point other than a toll-station. The officer collecting the difference shall endorse the ticket, showing the measurements, and noting the amount recovered in excess of the toll originally paid.

Owners or hirers of vessels may compound, by the payment of a fixed sum, for the use of the whole or portion of any of the above lines of navigation for any period that may be agreed upon, not exceeding one year. Each vessel so compounded for shall be furnished with a ticket showing the amount of toll paid, the period for which the toll has been compounded for, and the limits of the line of navigation within which the vessel may pass. Such ticket shall be kept on board the vessel, and shall be produced when required under Rule 5, but shall be given up only on the date of the expiry of the period for which granted, and at the station from whence issued.

7. Duplicates of lost tickets, of which the numbers and dates of entry can be satisfactorily established, will be granted by the officers in charge of toll-stations on payment of a

fee of one rupee.

8. Every vessel which does not complete its voyage within the number of days allowed by Rule 3 shall, for each day or part of a day in excess, be liable to an extra charge equal to the full amount of toll as determined by Rule 2. No charge for demurrage under this rule shall exceed rupees ten per month for any boat. The Superintending Engineer may at his discretion exempt any boats on any line of navigation, or any portion of a line of navigation,

from the payment required by this rule.

9. The Superintending Engineer in charge of the Circle in which the line of navigation is situated shall fix such places as he may consider necessary at which vessels may remain while waiting for cargo or otherwise without any charge. Any vessel which on the completion of a voyage or on entering the canal remains for a period of 24 hours or more at any place in the line of navigation other than one so fixed shall be liable to an extra charge per

diem as provided in rule 8, which shall be recoverable as toll.

10. The Superintending Engineer in charge of the Circle shall notify at what places on the line of navigation vessels may be ordinarily loaded or unloaded. Permission to load or unload at places other than those so notified may be granted in special cases by the navigation officers. Should any vessel be loaded or unloaded at any place other than those notified by the Superintending Engineer, and without the permission specified above having been obtained, the person in charge of the vessel and the consignor or consignee of the goods shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 10 for each offence.

Except with the written permission of a navigation officer, no goods or cargo may be deposited on any bank, berm, or land apportaining to the canal at places other than those notified by the Superintending Engineer of the Circle as available for such a purpose. Any person depositing goods in contravention of the above rule shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs. 50.

12. Navigation officers may order consignors or consignees or owners to remove their goods from the places notified as available for depositing cargo under rule 11. Goods not finally removed within a period of six days from the receipt of such order shall be liable to a charge of four annas per 100 maunds for each day or part of a day after the expiry of the six days until finally removed.

No vessel of dimensions exceeding those which shall be notified for each line of navigation by the Superintending Engineer in charge of the Circle will be allowed to enter

such line of navigation or to pass along it.

14. It will not be compulsory for the locks to be opened to single vessels of less than 500 maunds burden, except in the case of mail or despatch boats or passenger or cargo boats n tow of steam-vessels; but the locks shall be opened for the passage of boats at least twice day.

Mooring.—All vessels stopping at night must be moored head and stern to the

bank of the channel or wherever specially ordered.

Only one line of vessels shall be allowed to pass along a canal or to make fast along and in a line with the canal banks or along and in a line with the banks of the river entrances to the locks, and no vessel shall be made fast, or be placed outside of vessels so secured, without the permission of a navigation officer. No vessel shall, however, be placed in such a position as to endanger the safety of other vessels, to obstruct their passage, or to impede the

navigation.

16. Rule of the Road.—When under sail, vessels are to keep in the centre of the channel. When being tracked, vessels are, wherever practicable, to keep to starboard or right side of the charinel. Vessels meeting in a canal, except when being tracked, must keep to their right when passing, and when one vessel overtakes another, the former must pass on the left.

Vessels, one of which is sailing and the other steaming, meeting in a canal, the sailing vessel to keep to the leeward. A steamer passing any vessel is bound to go at a speed not

greater than half speed.

Lights and Signals -All vessels, whether travelling or moored in a line of navigation, must between sunset and sunrise carry a white light, in a lantern on the forepart of the vessel where it can be distinctly seen from ahead. All steam-vessels in motion shall carry the lights prescribed by the Board of Trade Regulations. Barges or boats attached to a • steam-vessel, whether in motion or moored, shall carry the white light prescribed above.

Where signals are used no vessel shall enter or attempt to enter the entrance channel of a lock when a red flag or red light is displayed at the end of the lock next her. Steamvessels approaching a lock shall whistle when a mile distant, and shall continue to whistle at intervals until the signal intimating that the lock is open or closed is displayed, or, if no signals are used, until arrival.

18. Crews and attendants.—Every vessel when stationary shall be securely fastened, and shall at all times have some person in attendance on board. Every vessel in motion shall

have a sufficient crew.

19. Fittings - Vessels must have their masts, high awnings, and funnels fitted so that they can be let down with case and speed, and no bamboos or poles shall be erected

on or by vessels when at anchor.

20. Conduct of natigation.—Vessels are prohibited from making fast to any portion of the lockgates or gearing, and steamers are prohibited from making fast the tow lines of their boats until the latter are clear of the locks. Steamers are prohibited from lashing boats or barges alongside while proceeding within locks. Towing ropes of a greater length than 50 feet are not to be used in a canal. The throwing of cinders into any canal is prohibited;

they are to be deposited on the banks.

In every case of wreck or obstruction of the channel by sunken vessels, the Supervisor of the line of navigation or of a part of it may call upon the person in charge of the vessel to remove the same without delay, and shall give every reasonable assistance towards But should the owner of the vessel or raft be not forthcoming, or should he not use reasonable expedition in removing the obstruction, or should be decline or fail to use proper assistance which may be offered to him by the Supervisor, this officer may, under the provisions of section XIV of the Act, undertake the removal of the obstruction himself at the cost of the owner of the boat, recovering the expense in the manner laid down in section IX of the "Canals Act, 1864."

22. If the Supervisor be unable to ascertain the name and place of business or of abode of the owner of the cargo of any vessel or boats seized under the "Canals Act," he

shall notify the soizure in the most public manner available.

23. In the event of any damage or injury being occasioned to the canal works by wilfulness or negligence on the part of any person in charge of a vessel, the navigation officers may detain the vessel at any point within the canal for a period not exceeding 48 hours; provided that, within that period, the navigation officers shall lodge a complaint against such person in charge of the vessel before a Magistrate under section XVI of the "Canals Act."

24. For any contravention of rules 15, 16, 17, 18, 19 and 20, the person in charge of

the vessel shall, on conviction before a Magistrate, be liable to a fine not exceeding Rs 50.

25. All offences against the provisions of these rules shall be punishable as provided for in section XVIII of the "Canals Act, 1864," and all fines imposed may be recovered in the manner mentioned in section XVII of the same Act.

The term "navigation officers" as used in the foregoing rules shall include the persons alluded to in section VIII of the "Canals Act, 1864," and all Public Works Officers

or Subordinates in charge of the canal not below the grade of sub-overseer.

27. The canals may be closed once a year for effecting the necessary repairs to them on one month's notice of the intention so to close them being given; but in the event of any sudden emergency, the canals may be closed at any time without prior notice, and no claim in such case by owners of vessels or others for compensation on account of detention shall be entertained.

No. 100.—Notification.—Notice is hereby given that the Lieutenant-Governor of Bengal proposes, under the provisions of section 6 of Act II (B.C.) of 1882, to declare that clause (b) of section 76 of that Act shall take effect over a tract of country on each side of the Ganges between Rampur Boalia and a point on the river opposite the village of Dharmpur and extending inland for two miles on either side of the river Ganges between these points, in the districts of Rajshahi, Pabna, Nadia and Murshidabad. The erection

of any new embankment or any addition to an existing embankment, or the obstruction or diverson of any water-course within the tract above deflued, without the previous permission of the O llector or Collectors concerned, is probibited.

ESTABLISHMENT.

The 4th April 1893.

No. 102.—With reference to Notification No. 44, dated the 27th February 1893, Rai Bahadur Prosunno Coomar Daneary, Executive Engineer, having joined the Puri Division on the forenoun of the 4th March 1898, the unexpired portion of his leave is hereby cancelled.

C. W. ODLING, , Secy. to the Gopt. of Bengal.

[Third Publication.]

DEART REVISED WATER-RATE RULES FOR THE MIDNAPORE CANAL. The 20th March 1893. •

No. 75.—Notification.—In exercise of the powers conferred on him by sections 99 and 78 of Act III (B.C.) of 1876, the Hon'ble the Lieutenant-Governor proposes to make the following rules and to fix the undermentioned rates to be charged for water supplied from the Midnapore Canal. These rules and rates will supersede those now in force.

> C. W. ODLING, Secretary to the Govt. of Bengal.

nal Officer is responsible for maintaining the canal in an efficient g drainage channels where necessary, and generally for all engineering work involved in its management, as well as for the distribution of water to lessees. The word "canal" is here used as defined in section 3 of the Act.

2. The Deputy Collector is responsible for the assessment and collection of water-rates

accruing to Government from the canal.

3. Water shall not be distributed otherwise than on the application of a lessee, or to a person in whose favour a provisional license under rule 15 has been issued. Such application may be made verbally or in writing to any subordinate in charge of that part of the canal from which water is required.

If any lessee apply for water to the Deputy Collector or one of his subordinates verbally, he shall be directed to address himself to an irrigation officer or subordinate. If he makes such an application in writing, his petition shall be forwarded direct by the zilladar, to whom it is addressed, to the Sub-divisional Canal Officer in charge of that part of the canal

from which the petitioner's village is supplied.

5. The Divisional Canal Officer shall map out the irrigable area into blocks in accordance with the natural features of the ground, and so determine that the whole block shall be irrigable from one outlet, or from one set of outlets. So far as may be practicable, the

blocks shall be separated by drainage lines.

6. Each block determined as above shall be numbered and recorded with its irrigable area in registers to be maintained by the Divisional Canal Officers and Deputy Collector. The blocks shall also be marked on maps to be maintained by the same officers.

- 7. Leases for not more than five years may be granted for the whole irrigable area of a block, or, subject to the provisions of Rule 13, for definite parts of a block, under the following conditions:
 - I.-Ordinarily the whole irrigable area of any village, so far as situated within the block, must be included in the lease.

II -All leases within one block shall be granted, so that they shall expire on the same date.

III.—In order to equalise the areas to be dealt with in each year, the date of expiry of the leases in each block shall be determined by the Divisional Canal Officer in consultation with the Deputy Collector, so that, as far as practicable, one-fifth of the total area usually irrigated may fall out of lease in each year.

IV.—No permit shall be granted, when the supply of water must of necessity be delivered across an unleased area, unless a village-channel exists, which, in the opinion of the Sub-divisional Canal Officer, will deliver water without waste across the unleased area.

The rates to be charged for water supplied between June and November, whether by flow or lift, to lessees on application shall be-

For a term of five years—Re. 1-8 per acre for each season,
For one year or for water supplied on a provisional license for which a permit for a term

of years is not subsequently issued, Rs. 3 per acre.

Provided that the leases, whether new or renewals, required for shorter terms than five years in order to develope the system of blocks as explained above, shall be charged Re. 1-8 per acre only. Otherwise, in addition to the rate of Re. 1-6 mentioned above, an extra rate of 12 annas per sere shall in the first year only be charged on leases for less than five and more than one year.

- 9. For the supply of water, when available, for winter crops, a rate of Rs. 2-8 per acre per season shall be charged.
- 10. For the unauthorized use of canal water a rate of Rs. 5 per sore, or such less rate as may be sanctioned by the Deputy Collector, shall be charged.
- 11. Application for water-leases under section 74 of the Act shall be presented to the zilladar of the division in which the applicant's land lies.
 - 12. Every application for a water-lease shall contain the following particulars:—
 - 1.—Name and residence of applicant.
 - Name of pargana, mahal and village in which the land to be irrigated is situated.
 - 3.—Total area for the irrigation of which the application is made and its boundaries, and if the lands to be irrigated lie in separate chaks, the name of each chak.
 - 4.2—Names of the raiyets whose lands are to be irrigated, and the quantity of and held by each.
 - •5 -Name of the canal and number of distributary from which water is required.
 - 6.—Signatures of the applicants.

A separate application must be presented for lands in each village, but tehsilalaida or other lands lying within the village boundary at the time of survey may be included.

14. Before a permit for a term of years is granted, the written consent of the Divisional *Canal Officer shall be obtained, but permits for one year only and provisional licenses may be issued with the written assent of the Sub-divisional Canal Officer. The Deputy Collector shall on the day of issue forward a copy of all permits granted to the Divisional Canal Officer.

15. When a water-lease is granted, a kabuliyat shall be taken in a form approved by Government, and a "permit" shall be given to the lessee or lessees in a form similar to that prescribed in Schedule C of the Act. Pending the completion of a lease, the zilladar may

issue a provisional license for the supply of water to an area covered by an application.

16. On the issue of a permit or provisional license, the zilladar shall forward to the Sub-divisional Canal Officer direct a requisition requesting him to supply water to the lessee on application. This requisition shall be kept by the Canal Officer till January 1st next following, and shall then be returned to the Deputy Collector. On the back should be returned to the return of the return of the return of the several dates on which the village was supplied with motor. be noted the several dates on which the village was supplied with water. A fresh requisition shall be issued on or before June 1st, and returned on or before January 1st, each year, till

the lease expires.

17. When it comes to the knowledge of the Sub-divisional Canal Officer that canal. water has been taken without authority, he shall hold a local investigation and transmit the Separate proceedings shall be taken in the case of record thereof to the Deputy Collector.

each village irrigated without authority.

18.. On receipt of the record mentioned in Rule 17, and after hearing any objection which may be raised, the Deputy Collector shall determine whether water-rates can be legally charged, and if so, he shall proceed to assess, at the rate provided in rule 10, the

land irrigated without authority.

19. The statements of the amounts demandable for water-rates leviable under the rules in force shall be prepared under the supervision and signature of the Deputy Collector in such form as shall from time to time be sanctioned by the Lieutenant-Governor. Persons charged under rule 10 or 18 shall be served, by post or otherwise, with a statement showing the amounts charged to enable them to lodge an appeal to the Collector under section 91 of

the Act if they desire to do so.

20. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted, or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer, with the concurrence of the Collector, to direct that the lease shall be cancelled with effect from the 1st of June next following.

21. The rates for water supplied from June to November shall in each season fall due on the 1st January following, but the Deputy Collector may require one-half of the rates due on applications filed after the 1st of September to be paid in advance, and may refuse to issue a permit for more than one year. The rates for water supplied for winter crops shall fall due on the 1st April following.

Water-rates imposed under rule 10 or 18 shall fa'l due as soon as the assessment

is made, and shall be realized at once.

- The Superintending Canal Officer may, with the concurrence of the Collector, direct the Deputy Collector to -
 - I.—Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realizing water-rates until all the arrears of water-rates due are paid up, and also, if specially so ordered, unless half the amount due under new applications is paid in advance. An order under this rule shall be in force for the time stated therein, which shall not exceed three years.

II.--Gancel any five years lease if on the 1st of June of any year water-rates to the extent of half the demand for one year are in arrears.

24. Remission of water-rates, either in whole or part, as the case may require, shall be granted by the Deputy Collector for—

I.—Errors in the assessment of rates.

II.—Injury to the crop on a leased area caused by deficient supply of water.

Provided a written application for remission has been made 15 days at least before the crop is cut.

In regard to applications under II, the written opinion of the Divisional Canal Officer

shall be obtained and form part of the record of the case.

25. The Deputy Collector, with the written consent of the Divisional Canal Officer, may grant remissions of water-rates, either in whole or part, for injury to the crops on leased areas caused by excess of water due to deficient drainage.

26. The Deputy Collector may, with the written assent of the Divisional Canal Officer, commute rates charged under rules 10 and 18 to those chargeable for water supplied on application, provided that a lease either for a term of years or for the season has been subse-

quently executed for the lands in question.

27. Remissions on other grounds than the above require the sanction of Government.
28. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is non-realizable may be written off as irrecoverable on the authority of the Collector.

29. Before awarding compensation under section 16 of the Act, or making a reference under section 17 of the Act, the Collector shall obtain the written opinion of the Superintending Canal Officer, and his written opinion shall form part of the record of the proceedings.

30. The Deputy ollector may distribute amongst village mookhyas, who give efficient assistance in collecting water-rates, and generally in his operations under Act III (BC.) of 1876, a commission calculated in such manner as he may think fit, provided the total amount paid shall not exceed 6 pies in the rupee on the total water-rates collected during the year.

GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

The 30th March 1893.

No. 23 Marine .- Under the provisions of section 15 of the Calcutta Port Act, 1890, Mr. G. A. Grierson is appointed to act as a Commissioner of the Port of Calcutta, during the absence, on leave, of Mr. H. Lec.

No. 24 Marine. Under the provisions of section 7 of Act IV (B.C.) of 1887, the Lieutenant-Governor is pleased to re-appoint Mr. E. Good to be a Commissioner of the Port Mr. Good is also re-appointed to be Vice-Chairman of the Commissioners. of Chittagong.

The 3rd April 1893.

No. 25 Martic. — It is hereby notified that under the provisions of section 10 of the Calcutta Port Act, 1890, the Houble Mr. J. L. Mackay has been re-elected by the Bengal Chamber of Commerce to be a Commissioner of the Port of Calcutta.

No. 26Marine.—The following telegram, dated the 1st April 1893, from the Government

of Bombay, is published for general information : -

C. W. ODLING, Secretary to the Government of Bengol.

Copy of a telegram, dated the 1st April 1893 from the Government of Bombay to the Secretary to the Government of Bengal, Marine Department.

Consul-General, Bagdad, telegraphs yesterday-Quarantine against Persian Gulf ports been removed from 28th March.

The 4th April 1893.

No. 27 Marine - In accordance with section 5 of the Indian Ports Act (X of 1889), and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of Bengal is pleased to alter the limits of the Port of Calcutta, and to declare that the precise extent of the limits of the said port, and of the navigable river and channels in which the said Act is in force leading to the said port, shall in future be as follow:-

The Port of Calcutta.

On the North .- A line drawn from the boundary pillar at the Cossipore Gun Foundry Ghat to a point on the opposite side at Ghoosery.

On the South. - A line drawn from a masonry pillar placed at the mouth of the Budge-Budge khal to a pillar on the Howrah side of the River Hooghly, bearing north-west of the

first named pillar.

The limits of the port include to the east and west (a) so much of the River Hooghly and the shores thereof as are within 50 yards of high water mark at spring tides; (b) all lands comprised in the area occupied by the Kidderpore Dooks and the adjoining works constructed for the purposes of such docks; (c) that portion of Tolly's Nala which has between Hastings Bridge and the entrance to the Kidderpore Dock Canal; and (d) so much of Tolly's Nala as lies to the west of a line drawn across the Nala, 25 feet to the west of Hastings Bridge.

The Navigable River and Channels leading to the Port of Caloutta.

On the North .- The Port of Calcutta as above defined.

On the South .- A line drawn east and west from the Eastern Channel Floating lightvessel.

The limits of the said river and Channels include all parts of the Navigable Channels called the Eastern and Western Channels, and of the River Hooghly between the northern and southern limits and below high water mark at spring tides.

Notification No. 71 (Marine), dated the 2nd August 1892, is hereby cancelled.

2. Notification No. 71 (Marine), dated the 2nd August 1892, is hereby cancelled.

N. B.—Within the above limits the port and the navigable River and Channels leading to the Port are subject to the jurisdiction of the Commissioners for the Port of Calcutta, under the powers conferred upon them by the Lieutenant-Governor of Bengal by an order published in the Calcutta Gazette of the 5th April 1875, which vested them with the powers of Conservators of the Port, and by an order dated the 29th November 1881, which vested them with the powers of Conservators of the Navigable River and Channels leading to the Pert.

C. W. ODLING. Secy. to the Govt. of Bengal, Marine Dept.

[Second Publication.] The 22nd March 1893.

No. 18 Marine.—The following bye-laws, which have been framed by the Commissioners of the Port of Calcutta, under sections 126 and 127 of the Calcutta Port Act, 1890, for regulating the working of the Kidderpore Docks, are published for general information. They will be taken into consideration on the expiry of a month after their first publication in the Gazette, and the Lieutenant-Governor will consider any suggestions or observations which may be made by any person within that period.

C. W. ODLING, Secy. to the Gott. of Bengal.

Bye-laws made by the Commissioners in Meeting under Act III of 1890 (B.C.), sections 126 and 127.

1. No stages, planks, poles or any article provided by the Commissioners for vessels loading or discharging shall be used without a written order from the Dock or Jetty Superintendent, and when the discharging or loading is completed, they shall be replaced on the quay or Jetty alongside the vessels.

All stages, planks, poles, or other articles, not provided by the Commissioners, after use in discharging or loading, shall be removed within 24 working hours from the Dock or

Jetty premises.

- 2. All the quays, sheds, gates, and the land within the Dock or Jetty fence shall be in charge of the Dock or Jetty Superintendent, who will manage all operations connected with the landing and shipping of goods, storage in the sheds and open. He will be responsible for the proper custody of all goods within the euclosure and exclusion of improper characters, and will take whatever steps may be necessary for the proper maintenance of order on the premises.
- The allotment of a berth shall be entirely at the discretion of the Commissioners, but as a general rule vessels will be accommodated in the order of their arrival at the Dock entrance or off the Jetties.
- 4. Masters and owners of vessels shall obey the directions of, and shall offer no obstruction to, Dock or Jetty officers in mooring, unmooring, moving or removing any vessel from one part of the Dock or Jetties to another part, or in regulating the position for loading and discharging of such vessels.

When berthed or moored in the Dock, a ship's propeller shall not be worked for trial by the main engines without due notice being given to, and permission obtained in

writing from, the Dock Superintendent.

- 6. Projections from any vessel, whilst hauling in or out of Dock or to or from the Jetties, or which interfere with another vessel's loading or discharging shall be removed on requisition by the Dock or Jetty Superintendent or other duly authorized officer of the Commissioners.
- No fender which will not float shall be used over the side of a vessel. Sails shall only be loosed with the Dock Superintendent's permission, and must be stowed at once on his order. In all cases they must be stowed before sunset.
- 8. If the Dock Superintendent considers that there is good reason why a vessel should not be admitted into the Dock, he may refer the question to the Commissioners, pending whose decision he may refuse to allot a berth.

The Owners and Master of a vessel shall-

(a) supply warping and other necessary appliances;

- (b) secure hatches when not in use, and guard against accidents to life, limb, and
- (c) keep their vessels so loaded, and ballasted as to allow of their safe removal in the event of fire or other emergency arising;
- (d) provide proper lights in those parts of a vessel where work is going on, and
- when, dwing to insufficient light, injury might result to life, limb, or property;
 (e) arrange that whilst a vessel is in Dock, or at the Jetties, the Master or some other responsible officer shall always be on board in charge to superintend and assist in carrying out all duties in connection with the vessel or its cargo, and

that there is a sufficient crew to carry out orders issued by the servants of the Commissioners in charge;

- (f) see that all exhaust steam or water-pipes from winches or other machines are led down the side of the ship to below dock wall coping by a hose or other appliance.
- 10. The Owners and Master of a vessel shall-
 - (a) at the Docks securely fix the gangway supplied by the Commissioners during the whole time the vessel remains alongside the quay, and fix between sunset and sunrise one lantern at each end of a gangway so placed;
 - (b) alongside any of the Jetties provide at least one gangway plank, not less than two feet six inches wide, and of sufficient length, thickness, and strength to form a convenient communication between the Jetty and the gangway of the vessel, and such gangway plank shall be properly and securely placed, between the gangway of the vessel and the Jetty during the whole time the vessel remains alongside the Jetty
- A preferential use of cranes shall be given in the discharge of import cargo."
- Heavy difts of over 35 cwts. shall be declared by Masters of vessels, who shall be responsible for all accidents arising owing to mis declaration of weights of such litts.

Vessels carrying heavy lifts requiring the use of the 100 fon sheers shall be moved to

the 100-ton sheers quay to make such lifts at such time as the quay is available.

13. No crane shall be hooked on to more than it is certified to lift by itself, and two cranes shall not be hooked on to one article. No crane shall be used to assist in lifting a weight, when such weight is being hoisted by the ship's own gear. Breaking out cargo with Dock or Jetty cranes is strictly prohibited.

14. Vessels requiring to carry out perty repairs may do so in the Wet Dock when a berth is available without detriment to ordinary traffic, but subject to the condition that a canvas-shoot or other safeguard be provided so as to prevent, loose material, chips, pieces

of wood or other like material falling into the water.

15. Every barge or cargo boat, if permitted to remain in the Dock more than 12 hours after having received or discharged her cargo, or 12 hours after she could have received or discharged such cargo, will be subjected to a charge, as under, for every day or part of a day while she shall so remain-

			Rs.	Α.	P.	
Cargo boat or barge up to 15 tons		•••	1	0	0	
Ditto above 15 and up to 25 tons	•••	•••	1	8	0	
Ditto shove 25 tons			2	0	O	

16. No bum-boat will be allowed into the Dock without the special sanction of the Dock Superintendent, and any bum-boat may be removed from the bock at any moment.

17. The control of barges, cargo-boats and hum-boats shall rest with the Dock Superintendent, who may prevent from entering, or turn out of the Dock any boat unless she is actually engaged for cargo, and no fires shall be allowed on them between 9 P.M. and 5 A.M.

18. Every cargo-boat, bargo, or hum-boat may be searched, at the discretion of the Dock Superintendent, before leaving Dock, either by a Dock official deputed to do so, or by the Police.

19. No person shall open, or attempt to open or shut, any dock gate, sluice or valve, nor any swing-bridge without orders from a duly authorized servant of the Commissioners.

20. The gates of the Dock or Jetty premises shall be kept open at hours fixed by the Commissioners, and ingress and egress allowed as directed by the Dock or Jetty Superintendent.

No person, unless duly permitted by the Dock or Jetty Superintendent, shall take inside the Dock or Jetty premises carpenters' tools or other instruments for opening cases, and no cooper shall be allowed to work in the sheds without a license from the Dock or Jetty Superintendent.

22. Bells must not be struck to denote the hour on board ships in Dock.

23.No vicious or dangerous animals, and no loaded gun or other firearm, shah be kept on board any vessel in Dock or at the Jettics

24. No vessel having on board more than 100 native passengers or coolies shall be allowed to enter the Wet Dock unless covered by a certificate from the Health Officer that no persons on board are suffering from infectious diseases.

25. Smoking and the use of any unprotected fire or lights in any shed or warehouse within the Dock or Jetty enclosure are strictly prohibited. No person shall smoke tobacco or other substance, or ignite lucifer matches or other imflammable articles, on any pier or quay or on board any vessel within the Dock, or at the Jetties, except in such places as may be allotted for the purpose.

26. Fires of coal, charcoal, or coke may be used in the cabins, deck-houses, forecastles and cabooses of vessels in Dock, only between 5 o'clock A.M. and 9 o'clock P.M., subject to

being prohibited (on any abuse) by the Dock Superintendent.

Fires for donkey engines, steam winches, and portable forges are also permitted during working hours and for ships engines for a reasonable period before a ship leaves and after a vossel is berthed in the Dock.

All lights, whether oil-lamps or candles, used on board vessels in Dock, except as mentioned in the following paragraph, shall be in globes or secured lanterns.

Naked lights may be used only in the engines and boilers of vessels whilst under inspec-

tion and repair, or in duties connected therewith.

While any fire or light is lighted, at least one person on board is to be specially charged with the care hereof; and no fire or light is to be left or used in so rash, careless, or negligent a manner as to risk or endanger the safety of, or to ignite any goods, property, or vessel in the Dock or on the Dock premises.

All applications for special permission to use fires at any other than the prescribed hours shall be made in writing to the Dock Superintendent before 5 o'clock P.M., and shall specify the circumstances under which the request is made; if granted, the application, after having been endorsed by the Dock Superintendent, is to be retained on board by the person charged with the care of the fire, and is to be exhibited by him to the Dock and Police officials whenever demanded, and is to be returned to the Dock Superintendent by 10 A.M. on the . following day.

27. Vessels in Dock and all parts thereof shall be held or made free and accessible to the Dock and Police officials for their inspection in regard to fires and lights whenever they

demand it.

- 28. A vessel about to come into Dock is to be trimmed, if possible, on an even keel or two to three inches by stern or head and kept upright. Side and stern ports to be shut
- 29. A vessel entering the Dock with her water ballast tanks full, the tanks must be kept in that condition during her stay in Dock. Should, however, necessity arise to empty a tank, the same can only be done with the sanction of the Dock Master and under his supervision.

30. Water ballsst tanks, while the vessel is in Dock, shall not be filled without the

previous sanction of the Dock Master.

31. No coals, cargo or ballast to be shifted in any of the holds or bunkers after the vessel is blocked, without the special permission of the Dock Master. If done, it will be at the risk and responsibility of the Commander.

32. From the time that the Dock ropes are made fast to the ship till she is secured on the blocks, all duty on board is to cease in order that the crew may be available to trim the

vessel, if required, by the Dock Master.

33. As soon as a ship is in Dock, the Commanding Officer will station his men to hook on the tackles for putting the ship fair over the blocks, both forward and aft, and to assist in pulling up the shores.

34. As the safety of the ship depends on her prompt shoring, the most particular attention is requisite to the observance of the foregoing rule. No exercious of the Dock staff

can effect this without the co-operation of the ship's crew.

85. Masters of vessels shall furnish special notice to the Commissioners before landing hazardous goods, e.g., saltpetre, acids, sulphur, matches, spirits of wine, kerosine oil, turpentine, pitch, tar, and petroleum, &c.

36. No person shall remove from the Dock or Jetties any goods other than those for

which bills-of-lading, accompanied by Agent's or Master's delivery order, Customs bill-of-

entry, and Dock or Jetty challan have been deposited with the Commissioners.

37. Every package, bale, or case sent for shipment at the Dock or the Jetties shall be entered in a cart ticket in the form prescribed, and no goods unaccompanied by this ticket will be allowed to pass into the Dock or Jetty enclosure. Every cart ticket shall contain the date, name of vessel on which the goods are to be shipped, the exporter's name, the marks, quantity, and description of articles shipped, and the current liceuse number of the cart.

38. Working hours at the Dock or at the Jetties shall be as may be notified from time to time. Wharf rent will not be charged for the days observed as holidays by the Custom House, but goods can be received and delivered on such days on payment of Custom House

feca.

39. Application to work at night or on Sundays or holidays must be made to the Commissioners, who, on production of the Custom House permission, will order all the necessary arrangements for the proper conduct of business. For work at night and on Sunday, and the holidays prescribed by the Commissioners, the extra rates fixed by the Commissioners from time to time must be paid.

40. The sanctioned holidays recognised by the Commissioners shall be-

•					Days.

^{41.} No ashes, sweepings, or rubbish of any kind are to be lauded on any part of the Dock or Jetty, premises, except under such conditions as shall be approved by the Commissioners.

Except for the purpose of enabling Masters of vessels to take measurements or weighments of goods to be shipped on board their vessels, no goods shall be permitted to be stacked on the wharves beyond the time actually necessary to convey them away.

43. During the time it is actually necessary for goods in course of landing or shipping to remain on the wharves, such goods shall be piled in places assigned for the purpose by the

Superintendents of the Wharves or their subordinates.

44. Boa's shall not be moored or anchored at the wharves, in order that the owners of the goods brought in them may sell or barter.

45. Empty boats waiting to be hired, or having discharged goods, shall anchor in the

stream, at least 150 feet off the wharves.

46. The hours for landing and shipping goods at the Inland Vessels Wharves shall be from 6 a.m. to 6 r.m., on all days, except Sundays and holidays authorised by the Commissioners; and no business shall be transacted on the wharves during the hours intervening between 6 r.m. and 6 a.m., nor on such Sundays and authorised holidays, except on payment

of overtime or extra fees respectively.

47. When goods are to be landed or shipped inward or outward, authenticated challans, showing the descriptions and exact quantities of the goods shall be tendered to the cashier by applicants for the passes. On the data furnished in these challans the passes will be drawn up and the tolls levied. In the absence of such challans, or where reasonable doubts exist with regard to their genuineness or correctness, the calculation for levying the toll shall be based on the registered tonnage of the boats or vessels from which the goods are to be landed or on which they are to be shipped.

48. No unauthorised person shall lay hold of, or get into, or upon, any engine,

carriage, or truck on the Commissioners' tramway.

49. No driver shall drive his engine over the Commissioners' tramway at a greater rate of speed than six miles an hour.

50. No person shall cross the Commissioners' tramway in front of an approaching engine, or between or under any vehicle standing or moving on the line.

- 51. No person shall remove or wilfully damage any lamp, engine, carriage, truck, fencing or any other property whatever belonging to the Commissioners.
 - 52. No person shall place any obstruction upon the Commissioners' tramway. 53. No person shall walk along the Commissioners' tramway within the fencing.
- No person shall allow cattle in his or her charge to trespass on the Commissioners' 54. tramway, nor to cross the line except at the regular crossing.

 55. No person shall smoke within any of the sheds and warehouses belonging to the

Commissioners.

Any person committing an infringement of any of the foregoing bye-laws shall be liable to a fine not exceeding Rs. 500, and, when the breach is a continuing breach, to a further fine which may extend to Rs. 200 for every day after the first during which the breach continues.

EDUCATION DEPARTMENT, BENGAL.

Subordinate Educational Service.

The 29th March 1893.—Pundit Prasanna Chandra Vidyaratna, Lecturer on Sanskrit in the Dacon College (class VI), was absent on leave for three months, under article 369 of the Civil Service Regulations, with affect from the 5th December 1892.

The leave of absence for two months and fourteen days, under article 306(b) of the Civil Service Regulations, which was, under the orders of the 18th February 1893, granted to Babu Priya Nath Ray, B.A., Head Master of the Chaibassa Zilla School (class VI), took effect from the afternoon of the 18th March 1893, instead of from the 15th February last.

• The 30th March 1893.—The orders of the 4th March 1893, granting Babu Ram Kamal Das, Head Master of the Bangamati Boarding School in the Chittagong Hill Tracts (class VII), leave of absence for one year, under article 371 of the Civil Service Regulations, in extension of that granted to him under the orders of the 4th January 1892, are cancelled.

The 3rd April 1893.—The leave of absence for two months, under article 306(b) of the Civil Service Regulations, which was, under the orders of the 28th February last, granted to Babu Rajendra Nath Banerjea, B.A., Second Master of the Ravenshaw Collegiate School, Cuttack, under orders of transfer to Balasore (class V), took effect from the 8th March 1893 instead of from the 6th idem.

Babu Karuna Sindhu Sinha, B.A., is appointed to act as Second Master of the Ravenshaw Collegiate School, Cuttack, and to officiate in class V from the date on which he joined that appointment until relieved by Babu Trailekya Nath Chakravarti.

C. A. MARTIN, Offg. Director of Public Instruction, Bengal.

The Yearly Examination of Candidates for Fourth grade Accountants.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, 5th and 6th June 1893, at 10-30 A.M.

SUBJECTS.

			Full marks.	Minimum pass marks.
Writing (neatness, clearness, and r	apidity)	•••	100	50
Dictation (spelling, punctuation, &	c.)		10 0	50 160
Arithmetic (whole course)	•••	•••	240	160
	•••	•••	60	80
Book-keeping (b) (Mercantile)	•••	•••	100	50' `
		Total	600	400

Minimum required in all papers collectively.

(a) Todhunter's Mensuration for Beginners.
(b) "Book-keeping," by Ball and Hamilton.
"Book-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted other at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burmah only.

Candidates will not be examined in any of the Calcutta offices.

2. Candidates not in Government employ, who wish to be examined at the College, must forward their applications direct to the Principal; those employed in Government offices through the head of their office, who will forward the application to the Principal.

All applications must reach the Principal 30 days before the date of examination.

3. The candidate should apply to an Examiner of Public Works Accounts not later

than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must be forwarded by the candidate, not direct to the Principal, but through the Examiner.

4. All applications must be accompanied by a fee of Rs. 10 and the following

certificates...

Certificates may be submitted in original, or true copies attested by an officer of the

Engineer or Accounts Branch, but none will be returned :-

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)

(2) Certificate that candidate is under 25 years of ago not required if candidate is in permanent Government employ, or an employé under District Boards.

(3) Certificate that the application is in candidate's handwriting.

It will rest with the Principal of the College, on a consideration of these certificates. to decide whether the candidate should be registered for the examination, or whether his application should be rejected.

5. Copies of examination papers are not procurable except those that are issued for

examination. These need not be returned.

6. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish a fresh fee and certificates.

7. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the Province or Railway under whom they may desire to be employed.

8. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

J. S. SLATER, Principal, Civil Enginering College.

SIBPUR, the 3rd April 1893.

Midnapore Collectorate, the 24th February 1893.

D. B. ALLEN, Collector.

In the Second Court of the Subordinate Judge of 24-Parganas.

EXECUTION CASE No. 63 of 1891.

Radhajibon Mastoofi, on his death his widow Nistariei Dossi, decree-holder, versus Raja Hemoda Kant Roy, judgmentdebtor.

THE judgment-debtor on mortgage of his shares in the undermentioned properties borrowed from the decree-holder one lakh of rupees, and failed to pay the same with interest, whereupon the decree-holder brought a suit (No. 179 of 1888) against him and obtained a decree of Rs. 1,60,633-14, with interest at 4 per cent. per annum, from 8th July 1889 to the date of realization. In execution of the said decree the judgment-debtor's interest in the mortgaged properties will be put up to auction sale in the 24-Parganas Judge's Court at Alipore on the 10th April 1833, at 12 o'clock, or on any subsequent date of which due notice will be given at the place of sale. The sum now due to the decree-holder from the judgment-debtor is Rs. 2,07,170-11-9.

REVENUE DEPARTMENT. REVISED ADVERTISEMENT.

A Dictionary of the Economic Products of India

BY DR. GRO. WATT, C.I.E.

Reporter on Economic Products.

Published under the authority of the Government of India in

the Revenue and Agricultural Department. Of India in the Revenue and Agricultural Department.

The first five volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the superintendent of Government their names with Printing, Calcutta.

Printing, Calcutta.

The first five volumes and Vol. VI. Part I, of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, flastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs 45 in India, and 3 goiness in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copics bound in half calf or half morocco, Rs. 6 and 8 hillings, respectively, will be charged extra for the whole set.

the Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitator source; history; properties and uses (both chemical and industrial); trade statistics; markets; &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty is a be experienced in finding the account of a product even when its scientific The Dictionary is intended to deal with the finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact

n important leature of the inclinary consists in the new that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, how-ever, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete computation of published informa-tion, but has been brought abreast of the most recent

inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 olume 1 contains the letters A and B, and consists of 55!? royal octavo pages; Vol. 11 contains the letters B, E, F and half of G, Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of O; Vol. VI, which will consist of four parts) Port I contains letters P to B. The whole Work will, it is expected, be completed in pine volumes (including Parts 11 to IV of Vol. VI) during the volumes (including Parts II to IV of Vol. VI) during the current year; but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glo-sary of the vernacular and Buropean names of the plants, animals and muerals of India, and as such will be a work of reference, which, it is hoped, may rever of considerable value. may prove of considerable value.

The period of registration of subscribers' names having

The period of registration of subscribers' names having expired on the 1st October, the price will in future be in India Rs. 45 and in England 3 unineas, payable in advance, for the complete st (exclusive of the Index, for which a separate charge will be made). An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England, at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

whole sets.

No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately.

complete, and no single volume will be sold separately.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament, 24 and 25 Vic., Cap. 67.

The Council met at the Council Chamber on Saturday, the 1st April, 1893.

Present:

The Hon'ble Sir Charles Alfred Elliott, k.c.s.i., Lieutenant-Governor of Bengal, presiding.

The Hon'ble Sir Charles Paul, K.C.I.E., Advocate-General.

The Hon'BLE T. T. ALLEN.

The Hon'ble H. J. S. Cotton, c.s.i.

.The Hon'ble H. H. Risley, c.i.e.

The Hon'ble J. Lambert, c.i.e.

The Hon'ble Dr. Mahendra Lal Sircar, c.i.e.

The Hon'BLE A. H. WALLIS.

The Hon'ble Gonesh Chunder Chunder.

The Hon'ble P. Playfair.

The Hon'ble Maulvi Syed Fazl Imam, Khan Bahadur.

NATURAL DRAINAGE OF VILLAGES.

In the absence of the Hon'ble Dr. Mahendra Lal Sircar, who came late and who had given notice of the question, the Hon'ble Babu Gonesh Chunder Chunder enquired whether Government is aware that the water-mains of the Collembra Corporation, which have been laid along the Barrackpore Trunk Road,

have materially obstructed the drainage of the villages to the east of the Road, by passing through several bridges over the water courses, which cross the road from the east to the west in the manner shown in the accompanying rough sketch of two of the bridges named therein and thus causing permanent saturation with water of the soil on both sides of the road, have aggravated the malarial condition of the villages? And that in view of the importance of the subject, whether Government is prepared to order the necessary enquiries with the object of finding and carrying out of any remedial measure or measures other than that adopted by the Corporation, namely, that of deepening the channels of the water-courses at the places crossed by the mains, and which has proved ineffectual owing to the rapid silting up of these excavations?

The Hon'ble Mr. Risley replied as follows:—"In reply to the Hon'ble Dr. Mahendra Lal Sircar's question, I have to say that two reports have been received by Government which touched on the state of things complained of The Sanitary Commissioner, Dr. Gregg, submitted a report, dated the 21st January, 1890, on the drainage, water-supply and conservancy arrangements of the group of small municipalities surrounding Calcutta on the north and east, in which he attributed the main evils from which this tract of country suffered to obstructions set up by the agricultural population impeding the natural flow of the streams and drainage channels. He also remarked, in discussing a scheme for opening up the Bagjala khal, that 'the syphons passing under the main pipes of the Calcutta Water-works do not, I understand, work properly owing to their becoming silted up occasionally, and at such times obstructing the free flow of drainage through them. These syphons should never be allowed to become silted up, even temporarily.' The memorandum in questioned was reviewed by Government in the Municipal Resolution of the 7th February, 1890, and was transferred to the Sanitary Board for further consideration and action. The other paper which Government has received was a Note by Babu Dakhina Ranjam Mukerji on the insanitary condition of the Baranagore Municipality, in which he referred to the material, though partial, blocking of the culverts in the Barrackpore Road by the construction of the Calcutta Water-works. In both these reports, the reference to this particular obstruction occupied a very subordinate place, and the larger proposals respecting compulsory drainage and oxcavation of old silted-up channels have been pending until some legal powers should be acquired by Government to intervene in such cases. When sanction was given by Government to lay the Calcutta main, it was required that the area of the drainage openings in the road should not be diminished, and it is believed that this condition has been fulfilled. The Govern

LICENSED WAREHOUSE AND FIRE-BRIGADE BILL.

The Hon'ble Mr. Cotton moved that the clauses of the Bill for the regulation of Warehouses and the maintenance of a Fire-brigade be further considered for settlement in the form recommended by the Select Committee.

The Motion was put and agreed to.

The Hon'ble Mr. Cotton said:—"The amendment which stands in my name is of a verbal character, but, in effect, it makes clear the intention of section 9 of the Bill. Under section 9, with the consent of the Chairman of the Commissioners, any Special Committee whom the Commissioners in meeting shall on that behalf appoint may exercise the powers and the discretion vested by the Act in the Chairman of the Commissioners. The particular point of my amendment is to enable the Special Committee to exercise not only the powers but all or any of the powers of the Chairman. It is desirable that this matter should be made quite clear, as there are certain powers in the way of granting licenses for warehouses which can undoubtedly much more conveniently be exercised by the Chairman in his executive capacity, and which need not be transferred to the Committee; such, for instance, as the large numbers of licenses which would be granted for warehouses for hay, straw, wood and the like. The granting or withholding of such licenses raise no question of any importance or consideration: they are purely executive matters, and it is obviously undesirable that the power of granting or withholding such licenses should be delegated to a Committee. They are powers which the Chairman

now deals with in practice, and it is convenient that this practice should continue. The proposed amendment makes it quite clear that the powers and discretion, which may be delegated to a Committee appointed under this section, may be limited to the exercise of the particular powers relating to important warehouses, such as jute warehouses and the like, or they may, if the Commissioners so decide, be general in their character. To avoid any misunderstanding, it is desirable that the clause should distinctly lay down that all or any of the powers of the Chairman may be delegated. I, therefore, move that in section 9, before the words 'the powers' the words 'all or any of' be inserted."

The Hon'ble SIR CHARLES PAUL said:—"I should have thought this amendment to be unnecessary. According to the interpretation of statutes, words in the plural number include the singular. I have no objection to the passing of the amendment, if the Hon'ble Member in charge of the Bill thinks it necessary."

The Hon'ble Mr. Allen said:—"It appears to me that the definite article used in section 9 of the Bill before the words 'powers and discretion vested in the Chairman of the Commissioners' refers to the powers conferred by the sections preceding and are limited to those powers. A subsequent section (12) imposes on the Chairman of the Commissioners other duties, and I do not understand whether the hon'ble member intends that the Committee shall exercise those powers under section 12 or shall be capable of exercising them, as well as the mere power and discretion vested for granting or withholding licenses. If the definite article is cut out of section 9 and the words 'all or any of' are introduced, clearly they will refer to all the powers given to the Chairman of the Commissioners throughout the whole Act, and possibly the adoption of this amendment may go further than the hon'ble member intends. I understand he has no intention to extend the delegation of authority to the Committee beyond the powers and discretion which refer to the granting of licenses. There might be some inconvenience in allowing the Committee to take action under section 12."

The Hon'ble the President said:—"I think the remark made by the learned Advocate-General that the words proposed to be inserted in section 9, though possibly unnecessary, can do no harm would justify us in including those words, because if they can do no harm, they may just as well be put in. There was a case quite recently—a very important case—in which the absence of those or similar words had the effect of completely vitiating the intention of the Legislature in an Act which was passed, and tied down the hands of the executive in a way which was not intended. It certainly appears to me that the words 'the powers under this Act' might include all the powers conferred under any part of the Act, and would not confine the delegation to the powers referred to in the section previous to section 9. And though the Legal Remembrancer objects that it might cause inconvenience if all the powers of the Chairman were to be exercised by the Committee, I may point out that we are merely putting the power of delegation in the hands of the Chairman, and we may rely on his exercising it in a way which will be judicious and convenient. I therefore think we can hardly do wrong in acceding to the amendment which has been proposed."

The Motion was put and agreed to.

The Hon'ble Mr. Cotton moved that the Bill for the licensing of Warchouses and the maintenance of a Fire-brigade, as settled in Council, be passed. He said:—"This Bill, after having been the subject of very considerable discussion, both in this Council and outside of it, and after having been subjected to lively opposition from extreme points of view, has at length passed between Scylla and Charybdis and arrived in port. It is only necessary for me, I think, to make one remark on this occasion, and that is, to express the obligations of the Council to the Hon'ble Mr. Woodroffe, who has vacated his seat since the Advocate-General has returned from leave, for the most valuable services which he has rendered both in the Select Committee and in this Council, in preparing the clauses of this Bill. The lion's share of the work undoubtedly fell to him, and I am sure I am no more than expressing the general opinion of the Council when I say, that we are much indebted to him for the trouble he took over this matter."

The Motion was put and also agreed to.

The Hon'ble Mr. Playfair said: - "The Bengal Provincial Services estimate has been in the hands of hon'ble members for several days, but being a mere statement of balances it is not self-explanatory, and I would venture to suggest that, in future years, it might suit the convenience of members were the Budget and the official statement by the Hon'ble Member in charge of the Budget, presented at one meeting of the Council to be brought forward for discussion at a subsequent meeting of the Council.

"Taking the estimates of receipts and expenditure for the coming year, it is in the first place to be observed that the Government of India has reduced the income estimated by the Local Government by the sum of Rs. 1,85,000, and has likewise reduced the estimated expenditure by Rs. 62,000, which alterations raise the estimated deficiency for the year from the sum of Rs. 51,000, estimated by the Local Government, to the sum of Rs. 1,74,000, estimated by the Government of India. And it naturally occurs to me to enquire whether the expenditure of the year could not be limited to the sum of Rs. 4,24,04,000 scheduled by the Supreme Government, and whether the income of Rs. 4,24,15,000, as estimated by the Local Government, could not be retained, in which case there would practically be equilibrium between income and expenditure. Under the heading of Railways, the Government of India has docked the income estimated by the Government of Bengal by 1½ lakhs of rupees, which in itself goes far to account for the estimated deficiency for the

rupees, which in itself goes far to account for the estimated denciency for the year 1893-94, and it will be interesting to know if there is any likelihood of this further receipt being obtained from this source.

"Turning to details of the estimate for the coming year 1893-94, the Hon'ble Member in charge of the Budget has explained the reduction effected under the heading 'Salt.' I should like to enquire whether the expenditure of Rs. 5,52,000 under 'Customs'—heading No. 9 of the statement—includes the cost of collecting the salt revenue; which income, I understand, is passed to the condit of the Imperial Government; and if so, whether Bengal gets credit the credit of the Imperial Government; and if so, whether Bengal gets credit the credit of the Imperial Government; and if so, whether Bengal gets credit for any portion of this cost from neighbouring provinces to which a portion of the salt passes, or from the Government of India on their behalf. Receipts under heading XII show that Rs. 1,82,000 is received on account of interest which, if taken to result from money advanced at 5 per cent., represents a capital of Rs. 36,40,000, which is not a large sum for this vast province. It would be interesting to know whether any portion of this represents loans to public hodies in Calcutta, or whether the money is lent wholly to bodies in the public series of the past heading to which I would direct attention is number XVI mufassal. The next heading to which I would direct attention is number XVI, under which Courts of Law are estimated to produce an income of Rs. 8,76,000. It has been reported that the accounts of the Calcutta Small Cause Court for the past year show a surplus approaching Rs. 1,60,000, and I beg leave to enquire if this revenue is included in the sum of Rs. 8,76,000. Turning to the Turning to the other side of the estimates, it will be seen that the expenditure under Courts of Law is placed at Rs. 85,28,000, and it would be interesting to learn what portion of the revenue from stamps, estimated at Rs. 1,17,75,000, may be considered as a credit against this debit.

"I come now to the important heading entitled 'Eastern Bengal State Railway system,' showing an estimated receipt of Rs. 32,12,000 for the year Railway system,' showing an estimated receipt of Rs. 32,12,000 for the year 1892-93, and a receipt of Rs. 33,50,000, estimated by the Local Government, and, as I have already pointed out, amended by the Government of India to Rs. 32,00,000 for the coming year 1893-94. This is apparently a net receipt, for the expenditure column under the heading 'Railways' includes the nominal charge of only Rs. 1,000. In the first place, I would venture to enquire whether this profit is arrived at after paying any interest on capital, and whether it is the whole profit of the year. Secondly, whether the reduction of one and-a-half lakh by the Government of India on the estimated income of Rs. 33,50,000 made by the Local Government represents a reduction in tariff rates, or does it imply an increase in expenditure? It is to be hoped that the Government of India may in the near future take such action as will solve the Government of India may in the near future take such action as will solve the difficulties arising from the depreciated value of silver, and that attention will be devoted forthwith to the wants of the internal trade of the country which is meanwhile suffering, and that the Local Government will, in future, desire to obtain an income from railway traffic carried in quantity at low rates rather than from a restricted traffic transported at high rates. It will be within the recollection of hon'ble members of this Council that the Government of India took over the Eastern Bengal Railway from a Company, and that Colonel Conway Gordon, who was appointed Manager, stated before a Select Committee of the House of Commons that one of the reasons for Government doing so was to protect the public from the excessive tariffs charged by the Company: it will also be remembered that the rates were lowered to the great

advantage of trade, and especially of the jute trade, during Colonel Conway Gordon's incumbency; that these were restored to the tariff of the old Company, and that although the tariff has again been modified the undertaking earns an income approaching 7 per cent. on a capital far in excess of that of the original capital of the Company. It has recently been stated in this Council that this is an expensive port, and I earnestly hope that the time will soon arrive when this Government will take into serious consideration the charge upon crops from the field to the 'tween decks of vessels lying in the port, and endeavour to lessen the present cost. And in this connection I venture now to ask whether the Local Government is in favour of the extension of the Bengal Central Railway through Singhia to Madaripore to tap the large jute-growing district, and place Calcutta in direct communication with the Chandpore terminus of the Bengal-Assam Railway, and whether the Local Government will represent to the Government of India the necessity for the construction of this section, if it has not already done so.

"I observe that the expenditure under the heading 'Irrigation' is estimated to be Rs. 30,26,000 over receipts; that the charge for interest alone, amounting to Rs. 24,48,000, is greater than the whole income of the department placed at Rs. 23,82,000. It would be interesting to have an explanation of the real

value of this expenditure.

"The last entry under the heading of 'Contributions', placed in the expenditure column by the Government of India at Rs. 10,00,000, being Rs. 13 lakhs below the sum budgeted by the Local Government, is not self-explanatory, and I beg leave to enquire to whom are those contributions made, and is it at all possible that this expenditure may be further reduced?

"Under the heading of 'Excise' the Hon'ble Member in charge of the Budget

refers to the enhanced fee for wholesale licenses, which he states, has been raised from Rs. 50 to Rs. 600 a year. I shall be glad to know that the latter sum should be stated to be Rs. 300, as notified in the Gazette. He also observes that changes have been made in the duties on retail licenses, and I beg leave to enquire whether the Government will give further consideration to the letter addressed by the Secretary to the Calcutta Wine, Spirit and Beer Association to the Secretary, Board of Revenue, under date the 2nd of March, 1893, in which it is urged that a very great hardship will be inflicted upon retailers by the enhancement of the annual license fee from Rs. 600 to Rs. 1,000 per annum."

The Hon'ble Mr. Risley said:—"I will now do my best to reply to the questions of the hon'ble member, so far as they arise out of the budget figures before us and involve points of finance only. I am, however, not prepared to deal with the larger questions of administration which the hon'ble member's remarks incidentally raise, and some of which concern the Imperial rather than

the Provincial Government.

"First, I may say that there appears to be no prima facie objection to the proposal that the financial review should be presented in future years in much the same form as it has assumed to-day, except, of course, that it will not in future be necessary to go into matters of history, and the review will therefore be much shorter. With that exception, the review will take much the same shape as it has taken to-day, and there should be no difficulty in presenting it with other explanatory papers in time to admit of the review being read one week and the discussion on it taking place in the following week. There can be no doubt that it would very materially facilitate discussion upon questions which may arise. In that case, however, I should wish to add that the task of replying impromptu to questions which may arise on the budget will not be an easy one. If the statement is circulated beforehand in the manner proposed, I think it will be a matter for consideration whether some notice, formal or informal, should not be given; otherwise it seems to me that any hon'ble member with a turn for propounding financial conundrums will have it in his power to embarrass the Financial Secretary by asking questions to which he will be unable to reply. At the same time it would, I think, be convenient to give more detailed figures showing the sub-heads subordinate to the major heads, without which the figures of the budget must

always be difficult to follow.
"Turning now to the details of the budget, as far as I could follow the hon'ble member, I may explain under the head of 'Salt' that the allotment of Rs. 1,20,000 shown in 1892-93 includes the sum of Rs. 75,000 paid to Mr. Kilby as his honorarium for inventing a most useful salt-weighing machine, and also Rs. 20,000 for improvements in the Salt Golahs at Sulkea, inclua railway siding, &c., and also certain pontoons and appliances to facilitate

landing of salt, as against Rs. 10,000 put down for the same purpose in the current year. Rs. 31,000 may be taken to represent the normal expenditure of the Salt Department. The income of Rs. 90,000 is mostly derived from salt bonded in warehouses. The income from rents of warehouses tends to decline, owing to a great change which has taken place in the salt trade. Instead of coming in saling ships and being kept a long time in bond, salt is now imported in steamers and is left only a short time in warehouses, and the Provincial revenues do not get so much in the way of rent as hitherto. No doubt it may be said that the customs revenue gains by this change; but while the Imperial revenue gains, the Provincial revenue loses to some extent.

"Then with regard to 'Customs'. The hon'ble member remarks upon the sum of Rs. 35,52,000, which includes the cost of collecting the tax on salt. As this duty belongs solely to the Imperial revenues, the Government of Bengal gets no credit from the Government of India, except so far as the customs establishment is included in the lump sum assigned by the Government of

India for provincial purposes.

"Under the head of 'Interest', the sum of Rs 1,84,000 is made up of the following items:-Interest on educational securities, Rs. 14,000; interest on arrears of public works cess, Rs. 45,000; miscellaneous interest, Rs. 2,000, and a large sum (Rs. 1,23,000) on loans under the Local Authorities Loan Act of 1879, which enables the Local Government to lend money to local bodies, and loans to cultivators, &c., and to people who want it for purposes of irrigation and cultivation on the security of their crops. That makes up by far the larger portion of the sum. A very large portion of this is granted by the Government under the Act for dealing with the water-logged portions of the country round about Calcutta, and the peculiarity of this Statute is, that the interest is not payable in such cases until the project is complete. One large project of this kind is now being carried—the Rajapur drainage scheme—and the interest will not be collected till the scheme is complete. These loans do not include any sums lent to the Municipal Corporation of Calcutta, or the Calcutta Port Commissioners, which are included in the Imperial accounts.

"Law and Justice cost Rs. 8,76,000. I may explain that this head includes only the cash receipts of the Small Cause Courts, that is to say, fees, forfeitures, &c. The Small Cause Court receipts on court-fee stamps appear under the head of 'Stamps'. It comes then to this: that we do not separate Small Cause Court receipts from other judicial receipts, and in order to make up any sort of profit and loss account, it would be necessary to have separate accounts made up. I am not in a position to say now whether we shall be able to do that or not; but at any rate, part of the receipts come under two or three or more heads of Law and Justice, and under various minor receipts under the head of Stamps; so that under these figures, as they stand, it is impossible to

say precisely what the receipts from the Small Cause Court are.

"Under the head of 'Stamps', the total receipts are 157 lakhs, of which the Provincial Government gets three-fourths. Out of this, 113 lakhs represent the receipts from court-fee stamps and 44 lakhs from what are called 'general stamps', being the large sheets of paper with an engraved stamp at the top upon which legal documents are executed. In consideration of getting three-fourths of these receipts, the Provincial revenues are required to bear the whole cost of maintaining the judicial establishments which, as the statement shows, enormously exceed the receipts under the head of 'Courts of Law'.

"Under 'Marine' I have already mentioned that the estimate of Rs. 10,37,600 includes Rs. 1,50,000 for the cost of a new pilot-vessel to replace the Coleroon, and it also includes the cost of bringing the vessel round from Bombay, and so forth.

Marine receipts vary, of course, with the tonnage of vessels visiting Calcutta.
"Under the head of 'Railway Receipts' the entry of 32 lakhs represents half the net receipts after paying the working expenses. All the interest charges are met by the Government of India and do not appear in the Provincial accounts.

"Under the head of 'Irrigation', I should explain that the origin of these works really goes back to the time of the Orissa famine. That history is given at length in the second part of this review, and it will show why it is that the receipts do not cover the charges for interest. I may further explain that there are two kinds of irrigation works—major works for which a capital account is kept, and on the capital outlay for which interest is charged, and minor works for which no interest is charged. The receipts from the major works are called direct receipts, and they consist of navigation receipts, water-rates, rents, The receipts from the minor works consist of rents from surplus lands.

"Under the head of 'Contributions', the account is somewhat puzzling. Our contribution to the necessities of the Imperial Government is shown under

the head of 'Land Revenue Adjustments', amounting to Rs. 14,39,000, which is reduced by certain sets-off to Rs. 13,50,000, as shown there. But the contribution amounting to 10 lakhs on the expenditure side of the account, to which allusion has been made, represents for the most part grants to District Boards for the maintenance of schools, ferries, pounds, dispensaries, &c., made over to their charge This is done under the Local Self-Government Act, III of 1885, which gives extensive powers for making over the administration of these matters to District Boards. The principle on which these arrangements are worked out, and out of which these charges for contribution arise, is this: certain revenues are made over to the District Boards with a stated income as compared to so much expenditure, and we get out a certain excess expenditure which was calculated in 1886, and then the Government gave them a sufficient grant to bring them into a state of equilibrium. We deal with them in the same way as the Government of India deals with us; and these 10 lakhs represent those grants. Within the last two years or so, these contributions have been increased. Not only have more roads been made over to them with corresponding grants, but also certain provincial buildings, and that has enabled the Government to effect certain economies in the way of dispensing with Public Works establishment. The deficit of Rs. 1,74,000, I may explain, will be met from the accumulated balance, which stands to the credit of the Provincial Government.

"I think the explanations I have given have covered most of the points to. which the hon'ble member drew attention. There is only one more point, as regards excise licenses, upon which I think I made a mistake in stating that it is proposed to raise it from Rs. 50 to Rs. 600. I should have said Rs. 300 a I may add that a grievance relating to the legal definition of 'a dozen,' brought to notice by Messrs. Cutler, Palmer & Co., has been referred to the Government of India, and legislation may have to be undertaken."

The Hon'ble THE PRESIDENT said: - "I think, short as the discussion has been, it has brought out two points pretty clearly. One of these points is, that we must make an endeavour, in future years, to present the Financial Statement at an earlier period and must put our accounts in a fuller form. The form in which the accounts have been put before the Council on this occasion gives only the receipts and expenditure under the major heads. I have no doubt that it will not be difficult to have the statement of accounts drawn up so as to show the receipts and expenditure under all the sub-heads of account, so that they shall contain a good deal of information which will avoid the necessity of asking questions in Council, and will also assist Hou'ble Members, while discussing them, in defining more clearly what the particular point is on which information is desired.

"There has been no desire on the part of the Government to press or to hurry on this discussion to the inconvenience of anybody. As you are aware, the Council was summoned for last Saturday, and I put it off to to-day, in order that more time might be afforded for the circulation and perusal and study of the Financial Statement. There was a miscalculation as to the amount of time that would be required. We thought there would have been ample time; and it was not seen, this being the first occasion on which discussion has taken place, that although the figures were presented to hon'ble members a week ago, the explanatory, statement could hardly have been drawn up so soon. In future, I trust this difficulty will be removed.

"The second point is that to which the Hon'ble Mr. Risley drew attention, namely, the difficulty which the Financial Member of Council will always experience if he is expected to answer questions arising out of the multifarious and complicated detail of the provincial accounts, such as those which the Hon'ble Mr. Playfair has put. In the Rules which relate to the working of the new Council, it is expressly laid down that interpellations which require answers should be presented a certain number of days beforehand, so that the answer might be prepared with accuracy. No such provision has been made with regard to financial questions. I suggest that we should follow the same practice which obtains in what I may call in parliamentary language another place, that any hon'ble member who intends to ask questions or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the hydret should not be a second or to discuss a particular point in connection with the should not be a second or to discuss a particular point in connection with the should not be a second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a particular point in the second or to discuss a or to discuss a particular point in connection with the budget, should send intimation beforehand to the Secretary of the Council or to the Member in charge of the Department concerned, so that he might be prepared to give the information which may be required, although, according to the Rules, no particular period of time is fixed for sending such intimation beforehand and for preparing the answers.

"I think the Hon'ble Mr. Risley has answered all the points of the Hon'ble Mr. Playfair's interpellations except one, and that is, with regard to the extension of the Central Bengal Railway. This is a matter in which the Bengal Government has taken considerable interest, and the year before last I expressly arranged a part of my tour during the rains, so as to visit those parts and get first-hand information, in order to ascertain how far the railway could compete with water-carriage. This has always been a point of difficulty with regard to the projects in the Eastern districts of Bengal. When the Bengal Central Railway to Khulna was first projected, it was assumed that a very large traffic might be calculated upon if the Railway carried the surplus of production of the Jessore and Khulna districts. We all know that it did not gather up that Water navigation competed successfully with it, and traffic, or anything like it. for a long time the Bengal Central Railway produced hardly any net earnings at all. It had to go to the Government of India in formá pauperis and get a guarantee given to it, and it is only within the last two or three years that it has began to earn that guarantee, or something more than it. Of course the difficulty of the Government of India in considering any project of extension is this: they say, you ask us to sanction the extension of the Railway to Madaripur or any other part of the country, as the case may be; will you not be encountering the same competition and the same financial difficulty as in the case of the first opening to Khulna? The conclusions to which I came was this, that there will always remain competition with the water traffic; but the water route in that part of the country is so circuitous and so difficult that there is good reason to think that the Railway will be able to compete successfully with it. If it is open to Madaripur, it will attract a large quantity of traffic, especially jute traffic, while it will not, to any considerable extent, rob the parent line at Goalundo of the traffic which it already possesses. It is all very well to say that a new line will take up a certain traffic, but if we are already carrying off that traffic by another route, we should lose in one hand what we gain by another; the projectors must show that there is new traffic to be got, and must not deprive the old line of the traffic which it now possesses. It is on these grounds that the Bengal Government sent up its report to the Government of India with regard to the Madaripur extension in September or October, 1891. Since then we have had a little dropping correspondence from time to time, but we have been met with the usual difficulty that, however much the Government of India may accept our arguments and our calculations, yet funds are wanting before that extension can be carried out. so many urgent and important schemes before them, relating to the opening up of partial communications throughout the whole Empire of India, that they are not able to afford funds for this particular local extension. present, then, it stands in this way: that on the whole it is favourably considered, but it is lying over for want of funds till other projects which are considered more urgent have been completed, and then it takes its place in the front rank.

"It now only remains for me to announce that the Council is adjourned sine die, and in doing so, I will draw attention briefly to the fact that this is the last occasion on which the Bengal Council meet in the same condition in which it has met for the last twenty-six years or thereabouts. The next meeting will, I hope, be a meeting of the enlarged Council, which cannot naturally be called together under a space of about two months. I hope it may be found possible for that Council to meet in July and August and take in hand the Bengal Municipal Bill, which the Select Committee has been working at so diligently and so usefully during the past few months. We all have great hopes that increased efficiency and increased good to the country will arise from a larger representation of the interests which exist in this enormous Province. But I am sure I may honestly and sincerely say that the Government cannot hope to have greater help and more loyal devotion to the public weal in that Council than they have received from the Council which I am now addressing for the last time."

The Council anjourned sine die,

CALCUTTA;
The 4th April, 1893.

C. H. REILY,

Assistant Secretary to the Govt. of Bengal,

Legislative Department.

FINANCIAL REVIEW FOR BENGAL.

Published for general information.

PART I.

The origin of Provincial Finance, and the Budget for 1893-94.

In laying before the Council the first Provincial Financial Review, I propose, with the permission of the President, to explain as briefly as possible how the system of Provincial Finance came to be introduced, and the main differences which distinguish it from the centralised financial system which it displaced. An attempt will then be made to compare Provincial Finance as understood in India with the cognate systems of Federal Finance as practised in the German Empire and the American Commonwealth. Finally I shall explain the most prominent and characteristic features of the Budget of the year 1893-94. In order to save the time of the Council, which has other business to transact, the full account of the working and results of the Provincial system has been included in the second part of this Review, which I do not propose to read to you now, though it will be published in the Gazette for the information of the public.

2. A high authority has stated that it was not until after the Mutiny in 1857 that anything deserving the name of systematic finance was introduced into India. The era of administrative development and opening up of the country which then set in gave rise to heavy expenditure in all directions, and a system of strict financial control became indispensable. In the first instance this control was necessarily vested in the Government of India, and was, as Sir John Strachey points out, of a severely repressive character. From the time of the Mutiny to the year 1871-72, when the system of Provincial Finance was brought into working, the Local Governments possessed no powers of financial control, and had no financial responsibility. The Supreme Government administered the minutest details of the public expenditure. Without its authority no official, however small his salary, could be employed at the cost of public funds, and even district roads and buildings and local works of improvement were hampered by the same onerous conditions.

3. The evils of applying this highly centralised system to an area so heterogeneous in respect of its physical conditions and the character of its inhabitants as the continent of India, became more and more apparent as time went on. As long ago as 1861-62 Mr. Laing laid stress in his Financial Statement on the defects of the then existing system:—

'If this great empire is ever to have the roads, the schools, the local police, and other instruments of civilisation which a flourishing country ought to possess, it is simply impossible that the Imperial Government can find either the money or the management. The mere repair of the roads, where anything like a sufficiency of good roads has been made, is a matter altogether beyond the reach of any central bureau. It is of the first importance to break through the habit of keeping everything in dependence on Calcutta, and to teach people not to look to the Government for things which they can do far better for themselves.

It is most desirable to break through the system of barren uniformity and pedantic

It is most desirable to break through the system of barren uniformity and pedantic centralisation, which has tended in times past to reduce all India to dependence on the bureaus of Calcutta, and to give to Local Governments the power and the responsibility of managing their own local affairs. The great branches of the expenditure, such as the army and national debt, are imperial; and while this is the case, the great branches of revenue must remain imperial also. But there is a wide field, both of revenue and expenditure, which are properly local, which in England is met by local rates, and which, in fact, must be met locally, or not at all.

- 4. At about the same time the late Sir Henry Maine wrote with reference to the same subject:—'I do not think that anybody can have observed the recent workings of our system of financial control without coming to the conclusion that, if it be not on the point of an inevitable collapse, it is at all events in great danger of going to pieces unless the strain be lightened somewhere.'
- 5. Nor were the evils complained of by any means confined to the purely financial branches of the administration. It was bad enough of course that

insufficient funds were available for local purposes, and that the utmost uncertainty prevailed as to the amounts likely to be sanctioned for Provincial expenditure. But the worst consequences were those which took effect on the administration itself, and on the relations between the Provincial and Supreme Governments. The constant scramble for the largest share of the public revenues—a scramble in which the least scrupulous were apt to come off best—brought with it serious differences of opinion as to petty details of expenditure and led to constant interference on the part of the Supreme Government in matters of which it was necessarily very ill informed. This was resented by the Local Governments, who were in touch with the facts and knew their own wants, and in this way a state of tension and conflict was brought about which added greatly to the difficulties of Indian administration.

In the Resolution of the 14th December 1870, the Supreme Government reviewed the entire question. They observed that, under the existing system, the division of responsibility was ill-defined, and that this led to conflict of opinion injurious to the public service. In order to avoid these conflicts, the obligation to find the funds necessary for administrative improvements. ought to rest upon the authority whose immediate duty it is to devise such measures. They went on to say that the Supreme Government was not in a position to understand fully local requirements, nor did it possess the knowledge necessary for the successful development of local resources. Each province had special wants of its own, and might have means for supplying them which could not be properly diverted to Imperial purposes. A tax applicable to the circumstances of one part of the country might be distant. tax applicable to the circumstances of one part of the country might be distasteful or unsuitable elsewhere, and everywhere rates might be proper for provincial or local purposes, which could not be taken for the Imperial revenue.

or local purposes, which could not be taken for the Imperial revenue.

7. In order to give effect to these principles, the Government of India accordingly made over to the Bengal Government for the year 1871-72 the financial control of the following services:—Jails, Registration, Police, Education, Medical Services (except Medical establishments), Printing, Roads and Miscellaneous Public Improvements, Civil Buildings, a certain proportion of Public Works establishments, and a certain proportion of tools and plant. The allotment given to meet these services amounted to Rs. 1,16,85,920 which was arrived at by adding up the actual charges of the year 1870-71, and taking this as the Provincial assignment, less a deduction of a rateable proportion of Rs. 3,50,000 which was resumed by the Imperial Government. By a subsequent Resolution of the 20th March 1871 a special allotment of Rs. 5,32,870 was made in order to enable the scheme to be inaugurated successfully. This sum was treated as the opening balance of the year 1871-72.

the opening balance of the year 1871-72.

8. The Government of India undertook to maintain for the future the assignments for l'rovincial services at the amounts thus fixed, unless some fiscal misfortune, such as a heavy loss in the opium revenue, or some national disaster, such as war or severe famine, should occur; and pledged itself in any case not to reduce them without previous consultation with the Governments concerned. It was left to the discretion of the Governments to distribute the total grant among the several departments for which they had become responsible, and it was laid down that any portion of the assignment made to any province that might be unspent at the end of the year would not lapse to the Imperial revenue, but would remain at the disposal of the Local Government. It was further provided that each Local Government should publish its own yearly estimates and accounts in the local gazette, together with a financial exposition (which should, where possible, be made before the local Legislative Council) analogous to that annually made in the Legislative Council of the Governor-General.

The financial control thus entrusted to the Local Government was to be exercised subject to the conditions that without the previous sanction of the Government of India no appointment on more than Rs. 250 a month should be created; that no class or grade of officers should be created or abolished; and that no addition should be made to the pay or allowances of any individual or class of officers that would lead to increase in the emoluments of any public servants doing duty in the same province whose pay and allowances are charged to Imperial revenues. No public money might be invested, and no services rendered to other departments by the transferred departments were to be diminished, nor might the latter claim increased services from other departments. The rules of the Supreme Government as to leave of absentee and absentee deputation and superannuation allowances were to be observed,

and returns, accounts and estimates were to be submitted to the Supreme Govern-

ment in such form and at such times as might be prescribed.

- 10. In addition to these conditions, which were based in the main on financial considerations, the Local Government was reminded that increased powers of financial control would be accompanied by a corresponding increase of administrative responsibility, and that in respect of general principles it must follow the main lines of policy laid down by the Imperial Government. It was added that the procedure of the departments of Registration, Jails and Police was to a large extent governed by law; and that, although no law existed on the subject of education, the policy of the Government had been declared and prescribed in despatches from the Secretary of State, the authority of which and of the rules sanctioned by the Government of India regarding grants-in-aid and other matters of general principle was not affected by the policy of decentralisation.
- 11. In introducing this far-reaching administrative reform, the Government of India expressed the belief that it would produce greater care and economy; that it would import an element of certainty into the fiscal system which had before been absent, and that it would lead to more harmony in action and feeling between the Supreme and the Provincial Governments than had formerly prevailed. Beyond all this there was a greater and wider object in view. It was felt that local interest, supervision and care were necessary to success in the management of funds devoted to education, sanitation, medical, charity and local public works. And it was hoped that the operation of the new scheme would afford opportunities for the development of self-government. for strengthening municipal institutions, and for the association of Natives and Europeans to a greater extent than before in the administration of affairs.
- 12. On looking at the system thus introduced it is impossible not to be struck by its resemblance to the systems of federal finance which prevail in the German Empire and in the American Commonwealth. In these countries the functions of the Imperial and the Local Governments are divided in much the same way as they are in India. Thus in Germany the revenues derived from Customs, the indirect taxes upon salt, tobacco, brandy, and sugar, the revenues from stamps, bills of exchange, securities and playing cards are set apart for the Imperial Budget, the expenditure side of which includes the cost of the Federal Government—the Army, Navy, Post Office, Telegraph, State Railway, Supreme Court, Imperial Bank, Pension and Invalid Funds, Currency and Debt. Any deficit which remains after the sources of revenue reserved for the Empire have been exhausted is met by contributions raised from the individual States according to their population. The actual demands under this arrangement varied in the Budget of 1892-93 from £9,405,191 levied on Prussia to £12,392 paid by the little State of Schaumburg-Lippe. In America the Federal Government raises its revenue by indirect taxation and chiefly by duties of customs and excise. Direct taxes were levied during the war, and stamp duties were also resorted to, but no stamp revenue is now collected by the National Government. The individual States on the other hand derive almost the whole of their revenue from direct taxation, as the levying of import or export duties by a State is forbidden by the Federal Constitution.
- 13. Close as these resemblances are, there is no reason to suppose that the Indian system was modelled or has been materially influenced by these Federal systems of finance. Provincial finance is a plant of natural growth, developed under the pressure of administrative necessity, and owing nothing to the example of other countries. It was in fact devised, if not actually introduced, before the German system, which it most closely resembles, had come into existence; and it was developed on lines which, though leading to substantially the same result, started from diametrically opposite directions. Both in Germany and America the individual States came first, and they were the sole repositories of sovereign power. The Federal system was created by the States stripping themselves of certain attributes of sovereignty and making them over to the Central Government. In India this order of things was reversed. All power resided in the group of departments forming the Government of India, and for a long time this central bureaucracy absorbed and exercised all the functions of Government and itself transacted all financial business from the negotiation of a State loan down to sanctioning of a chaukidar's pay. At length the burden became too heavy and the complication too great, and the Central Government transferred some

of its powers to the Local Governments to be exercised subject to the conditions stated above. Thus they arrived by an independent process of development at substantially the same results as the German Imperial Government. The main differences are, first, that in Germany the division of taxation between the Empire and the individual States is effected by reserving all indirect taxation for the former, and leaving to the States direct taxes which the Empire does not levy, and secondly; that the contributions of the States to the Empire are regulated with reference to the population concerned. In Iudia, on the other hand, no attempt is made to set apart certain kinds of taxation as exclusively Imperial, and the division is effected by assigning arbitrary fractional shares to the Provincial Governments. Similarly the amount of the contributions levied from time to time by the Imperial Government is not regulated by any intelligible. principle, but varies like the medieval benevolences according to the necessities of the moment. The Indian system, though less precise and logical than the German, is probably a good deal more elastic, and admits of being modified at intervals of five years, or even oftener, in accordance with the requirements of Imperial Finance.

14. I now turn to the current contract, which began to take effect on the 1st After a lengthy correspondence with the Government of India, the terms and conditions of this contract were finally settled on the 17th March 1892. It was then arranged that the revenue and expenditure shown in the schedule attached to the Government of India's letter of that date should be Provincial in certain specified proportions, and that, from the revenues thus assigned, a deduction of Rs. 14,39,000 should be made through the Land Revenue head. The Bengal Government has no means of knowing on what basis, or by what method of calculation, the sum of Rs. 14,39,000 was arrived at. On the receipt side of the account, the Provincial Government gets the whole of the following items:-Twelve per cent. on the Land Revenue collected from Government estates; rents of Salt Warehouses; fines and other minor receipts; Provincial rates; minor customs receipts; interest on local loans; receipts from Courts of Law, Jails, Police, Marine, Education, Medical, Botanic Gardens, Cinchona, Fairs, and Emigration and receipts in aid of superannuation; also Stationery and Printing, except the value of supplies to Railways and local bodies. and all receipts from Irrigation, Navigation, and Civil Works. It receives one-half of Assessed Taxes, Forest receipts, and Registration receipts, and of the traffic earnings on the Eastern Bengal Railway System; one-fourth of Excise and of minor Land Revenue heads, and three-fourths of the important head of Stamps. The revenue from these sources for 1893-94, excluding the opening balance, is estimated at Rs. 4,22,30,000.

15. On the expenditure side the Government of Bengal is required to meet all charges under the head of Land Revenue, except Survey and Settlement; all expenditure for Provincial rates, and the transferred heads of Customs and Salt and Interest; also charges arising under the heads Courts of Law, Jails, Police, Marine, Education, Medical, and, with certain exceptions, Political; the whole of Scientific and Minor Departments, except Census, Ancient Manuscripts and certain Veterinary charges; the whole of Stationery and Printing; working expenses of Irrigation and Navigation and Civil Works, with the exception of Imperial Buildings. It is also responsible for one-half of the expenditure under Assessed Taxes, Forest, and Registration, and for half of the working expenses of the Eastern Bengal Railway System; for three-fourths of Stamp expenditure and a quarter of Excise.

16. Concurrently with the settlement of this contract, the general rules regulating Provincial finance were republished with the modifications they had undergone up to date, and it was also laid down that, if any considerable charge of an exceptional nature, which ought ordinarily to be borne by one Province were paid in another Province, the question of a corresponding adjustment between the two would be specially dealt with. This latter provision was rendered necessary by the decision to stop inter-provincial adjustments. It was further arranged that, on the score of the technical character of the work and the necessary uniformity in the working of all State Railways, the Provincial Government should not exercise any administrative or financial powers in regard to the Eastern Bengal Railway; but in order to maintain the Local Government interests in the constructing feeder roads and in the general development

of communition in the tract served by the Railway, half the net earnings should

be Provincial; that the capital expenditure required to complete the Higili Canal should be advanced on certain terms from Imperial funds; that the expenditure on Survey and Settlement operations during the term of the contract, being in its nature liable to great variations, and difficult to reduce to a uniform yearly average, should be met by Imperial revenues; and lastly, that if the recoveries on account of the Survey and Settlement operations in Bihar should fall short of the expenditure which is recoverable from the zamindars and raiyats, the difference should be charged to Provincial revenues.

- 17. With reference to doubts which had arisen concerning the interpretation of former contracts, the Government of India took the opportunity of declaring the contract to be a consolidated one, and not a collection of separate contracts for each Provincial head. They also stated that the representations made by the Government of Bengal, regarding each separate head, had received careful consideration, and that the adjusting figure of Rs. 14,39,000 had been fixed, so as to place the revenue and expenditure in equilibrium on the basis generally of the existing stage of growth. The Local Government, it was said, would be expected to maintain all the Provincial services in a state of administrative efficiency, providing any increased expenditure necessary for that purpose either by reductions of expenditure or from increased revenue. It was added that the Bengal Government would not be entitled to assistance from Imperial revenues to meet future increases of expenditure or decreases of revenue, of whatever nature, classified under Provincial heads.
- 18. I pass on to notice in somewhat fuller detail those heads of the Budget for 1893-94 which seem to stand in need of comment or explanation.

RECEIPTS.

19. Land Revenue.—The Government of India have accepted the estimate of total collections under this head, as passed by the Local Government for 1893-94, amounting to Rs. 3,84,33,000. The estimate provides Rs. 5,07,000 for "12 per cent. on collections from Government estates." Including this amount, the Provincial share of land revenue comes to one-fourth of (Rs. 3,84,33,000—5,07,000) + 5,07,000=Rs. 99,88,000.

The debit of Rs. 13,50,000 to Provincial shown under Land Revenue

adjustment is made up as follows:-

For fixed contribution to Imperial revenues For interest on the capital advanced from Imperial revenues for remodelling the Hidgelee	Rs	Rs. 14,39,000
Tial Canal		21,000
Total deduction		14,60,000
For capital outlay on Hidgelee Tidal Canal For Imperial buildings transferred to District	1,00,000	
For Imperial buildings transferred to District Boards	10,000	1,10,000
Net deduction		13,50,000

It may be here mentioned that for reasons of account all transfers as between Imperial and Provincial revenues are effected through the head of Land Revenue under the sub-head of adjustments.

20. Stamps.—The estimate of total revenue from stamps for 1893-94 amounts to Rs. 1,57,00,000. The growth of this most important and expansive branch of Provincial revenue during the past four years has been as follows:—

		Increase.
	• Rs.	$\mathbf{R}\mathbf{s}.$
•••	1,38,16,000	•••••
	1,38,39,000	23,000
•••	1,42,38,000	3,99,000
•••	1,42,47,000	9,000
•••	1,51,00,000	8,53,000
Total	*** ****	12,84.000
	•••	1,38,16,000 1,38,39,000 1,42,38,000 1,42,47,000 1,51,00,000

The increase amounts to Rs. 12,84,000, or an average of more than three lakhs a year. The smallness of the increase in 1890-91 was due to the reduction in the rate of copying fees from 4 annas to 3 annas per folio, with effect from 1st April 1890. The revised estimate for 1892-93 amounts to Rs. 1,55,50,000, and the estimate for 1893 94 has been placed at Rs. 1,57,00,000. As the stamp duty is fixed by substantive law at rates which cannot be altered, the revenue under this head cannot be materially affected by administrative measures. All that can be done is to watch the working of the law carefully, to look out for evasions, and to see that adequate penalties are levied for breaches of the law and rules.

21. Excise.—The Accountant-General estimated the total revenue for the year 1893-94 at Rs. 1,12,00,000, against Rs. 1,10,64,413 estimated by the Board of Revenue. In Government order No. 654T.-F., dated the 24th October 1892, sanction was given to the enhancement of duty on wholesale licenses for the vend of imported liquor in the town of Calcutta from the nominal sum of Rs. 50 a year to Rs. 50 a month, or Rs. 600 a year, from 1st April 1893. Some changes have also been made in the duties on retail licenses. The effect of these orders will be to increase the revenue to a considerable extent. A substantial increase is also anticipated next year under the head "Farm of drugs," owing to the present rates of duty on all kinds of ganja being raised by one rupee per seer with effect from 1st April 1893, under the orders of the Government of India, in the Finance and Commerce Department, No. 784, dated the 23rd February 1891. It was calculated that the total increase on this and other accounts would not be less than three lakks, and accordingly the Accountant-General's estimate was raised from Rs. 1,12,00,000 to Rs. 1,15,00,000, and this has been accepted by the Government of India.

and this has been accepted by the Government of India.

22. Provincial Rates.—The head Provincial Rates represents principally the proceeds of the Public Works Cess, but it includes also the recoveries from District Funds of the proportionate cost of collecting Road Cess and the Rates for the general management of Wards' and Attached Estates. The receipts have

been as follows:—

	1887-88.	1888-89.				Revised estimate, 1892-: S.	Estimate, 1893 91.
(a) Public works cess	Rs. 38,19,860 3,13,524	Rs. 37,97,870 2,68,084	Rs. 39,11,69 3 3,12,096	Rs. 38,93,461 3,55,052	Rs. 40,79,753 8,64,355	Rs.	R«. 41,50,000 3,31,000
(c) General management of wards' and attached estates.	1,03,154	£0,369	82,235	71,420	80,419		80,000
Total	42,36,538	41,56,323	43,06,024	43,19,933		45,40,000	45,61,000

The variations under (a) were due to progress in valuation and revaluation of districts. The gross rental assessed on the introduction of the road cess was Rs. 13,11,68,432, and on the same basis the statistics furnished by the Board of Revenue show that it amounted to Rs. 14,60,45,236 in 1890-91, and Rs. 14,78,83,221 in 1891-92. Large recoveries of the arrears of rate on wards' estates were effected from the Burdwan Raj in 1887-88, and this accounts for the larger receipts under (c) in the first year of the contract. The comparatively smaller receipts under (c) in 1890-91 and 1891-92 were due to the release from Government management of a large number of estates during the course of the former year.

Head (b) is a new head of account which appeared in the Provincial Account in consequence of the introduction of the Local Self-Government Act. Prior to the extension of the Act, the charges for the collection of both the Road and Public Works Cesses were shown in the District Road accounts, the cost of collecting the Public Works Cess being paid to the District Road Committees through the adjusting head of Contribution, an assignment of Rs. 47,000 being made in the Provincial Contract under that head. The arrangement has now been reversed. The collection of the cess in the districts, where the Local Self-Government Act has been introduced is shown as a Provincial charge, and is recovered from the District Funds before the net collections of the Road Cess are made over to the District Boards.

23. Assessed Taxes.—The Accountant-General placed the estimates of total receipts for 1893-94 at Rs. 43,50,000. Looking to the steady growth of revenue under this head, the estimate was raised by this Government to Rs. 44,00,000, but this has been reduced by the Government of India to Rs. 43,30,000, with reference to the actuals of 12 months ending January 1893, which amounted to Rs. 43,28,000:

24. Forests.—The following table shows the estimates of receipts and expenditure for the year 1893-94, compared with the actuals of 1891-92 and

the sanctioned and revised estimates of 1892-93:-

BUDGET HEADS.	Actuals, 1891-92.	Sanctioned estimates, 1892-93.	Revised Estynates, 1592-93.	Budget estimates, 1838-94.

I.—Salaries	1,98,631 30,836 9,804	2,30,740 \$3,3% 6,400		
Total B—Establishments	2,39,321	2,70,000		
GRAND TOTAL OF EXPENDITURE	4,08,519.	4,81,000	4,15,000	4,81,000
Surplus	3,81.034	3,51,000	3,05,000	2,93,000

The estimates provide for a surplus of Rs. 2,93,000 at the end of 1892-94,

against Rs. 3,05,000, the latest estimate for 1892-93.

25. Registration.—The Accountant-General placed the revised estimate for 1892 93 at the same figure as the original estimate for the year, which was Rs. 13,60,000. This amount was also proposed as the estimate for 1893-94. The actuals for the twelve months ending January 1893, were Rs. 14,08,000, and the revised estimate for 1892-93 has been placed at Rs. 14,10,000, and the estimate for next year at Rs. 14,20,000. Half the receipts only are Provincial.

estimate for next year at Rs. 14,20,000. Half the receipts only are Provincial.

26. Jails.—The total receipts for 1893-94 were estimated by the Inspector-General at Rs. 9,72,000, while the Accountant-General placed them at Rs. 9,09,000, reducing the estimate under the head Jail Manufactures by Rs. 63,000. The Lieutenant-Governor considered that the probable receipts under this head had been under-estimated by the Accountant-General, and thought they might safely be placed at Rs. 9,50,000. The total estimate of

receipts was accordingly placed at Rs. 9,59,000.

27. Police.—The Accountant-General estimated the total receipts for 1893-94 at Rs. 2,46,000, against Rs. 4,60,000, the sanctioned estimate for 1892-93, and Rs. 4,48,634, the actuals of 1891-92. The decrease is due to the exclusion of receipts on account of village police in the Chota Nagpur Division, which have been transferred from Provincial to Local. The estimate has been further reduced by Rs. 27,000 on account of the transfer of fees for the inspection of steam-boilers from the Provincial account.

28. Marine.—The Accountant-General estimated the total receipts for 1893-94 at Rs. 9,28,000, against Rs. 9,68,000, the sanctioned grant for 1892-93, and Rs. 9,65,408, the actuals of 1891-92. The actual receipts, during the twelve months ending January 1893, were Rs. 9,04,000. The revised estimate for

1892-93 has accordingly been placed at Rs. 9,05,000, and the estimate for

1893-94 at Rs. 9,12,000.

29. Education.—The total receipts of the Education Department for 1893-94 are estimated at Rs. 5,71,000, against Rs. 6,10,000, the sanctioned estimate for 1892-93. The actuals of 1891-92 amounted to Rs. 5,95,123, and those of the

twelve months ending the 30th September 1892 to Rs. 5,70,758.

30. Medical.—The estimate of receipts for the year 1893-94 was placed by the Accountant-General at Rs. 1,49,000, against Rs. 1,50,000, the sanctioned estimate for 1892-93. The estimate has been raised by Rs. 2,000 as some receipts are anticipated in consequence of the circular what the Sanitary Board have issued to all municipalities laying down the rate of fees to be levied from them for the preparation of plans and estimates for drainage and water-works schemes.

31. Scientific and other Minor Departments.—The principal items of receipts under this head are from Cinchona manufacture and Emigration fees. The

total receipts are estimated at Rs. 1,62,000.

32. Civil works by Civil Officers—The Provincial receipts from ferries for the year 1893-94 are estimated at Rs. 2,27,500, and the receipts from cemeteries at Rs. 2,500, against Rs. 2,23,500 and 2,500, respectively, the amounts sanctioned for 1892-93.

EXPENDITURE.

33. Land Revenue.—The Accountant-General's estimates for 1893-94 under all the Provincial heads and sub-heads of expenditure amount to Rs. 34,19,000, as follows:—

Charges of district administration	•••	•••	$ m Rs. \ 29,43,000$
Management of Government estates	•••	•••	4,01,000
Land Records and Agriculture	•••	•••	75,000
Tota	ıl Provincial		34,19,000

The estimate was raised by this Government by Rs. 4,000 in order to provide for revision of office establishment in the Deputy Commissioner's office, Sonthal Parganas. The increased provision, however, does not appear in the estimate of the Government of India.

- 34. Salt.—The Accountant-General estimated Rs. 31,000 for expenditure of the Salt Department during 1893-94, which is the ordinary normal expenditure of the Department. A provision of Rs. 10,000 has, however, been kept in reserve to meet any further improvements that may possibly be made in order to provide increased facilities for the trade at Sulkea, Chittagong, or Narainganj, and the estimate has therefore been raised to Rs. 41,000. The revised extimate for 1892-93 amounts to Rs. 1,25,000, which includes a special provision of Rs. 75,000, the amount payable to Mr. Kilby as an honorarium for his patent salt weighing machine.
- 35. Stamps.—The total expenditure for 1893-94, of the Stamp Department, is estimated at Rs. 6,14,000, against Rs. 5,68,000, the sanctioned grant for 1892-93, and Rs. 4,51,779, the actuals of 1891-92. The actuals of 1891-92 did not include the cost of plain paper for use with Court-fee Stamps, which, under the terms of the new Provincial Contract, is charged to this head with effect from 1892-93, instead of to "Stationery and Printing." The Provincial share amounts to Rs. 4,61,000.
- 36. Excise.—The chief variations in this budget are due to the reduction of the salary of Excise Commissioner from Rs. 2,900 to Rs. 1,800, as under the orders of the Secretary of State, the Excise Commissioner will now ordinarily be a Magistrate of the second grade. Larger provision has, however, been made for the construction and completion of distillery buildings, and the total grant now stands at Rs. 7,16,000, of which the Provincial share is only one quarter, or Rs. 1,79,000.
- 37. Assessed taxes.—The total expenditure of the Income-Tax Department during 1892-03 was originally estimated at Rs. 1,90,000, and this amount was reproduced by the Accountant-General as the revised estimate for the year, while he piaced the estimate for 1893-94 at Rs. 1,89,000. It has been taken by the Government at Rs. 1,93,000, of which the Provincial share is one-half. The Accountant-General's estimates for 1893-94 include a provision

be Provincial; that the capital expenditure required to complete the Higili Canal should be advanced on certain terms from Imperial funds; that the expenditure on Survey and Settlement operations during the term of the contract, being in its nature liable to great variations, and difficult to reduce to a uniform yearly average, should be met by Imperial revenues; and lastly, that if the recoveries on account of the Survey and Settlement operations in Bihar should fall short of the expenditure which is recoverable from the zamin. dars and raiyats, the difference should be charged to Provincial revenues.

17. With reference to doubts which had arisen concerning the interpretation of former contracts, the Government of India took the opportunity of declaring the contract to be a consolidated one, and not a collection of separate contracts for each Provincial head. They also stated that the representations made by the Government of Bengal, regarding each separate head, had received careful consideration, and that the adjusting figure of Rs. 14,39,000 had been fixed, so as to place the revenue and expenditure in equilibrium on the basis generally of the existing stage of growth. The Local Government, it was said, would be expected to maintain all the Provincial services in a state of administrative efficiency, providing any increased expenditure necessary for that purpose either by reductions of expenditure or from increased revenue. It was added that the Bengal Government would not be entitled to assistance from Imperial revenues to meet future increases of expenditure or decreases of revenue, of whatever nature, classified under Provincial heads.

18. I pass on to notice in somewhat fuller detail those heads of the Budget for 1893-94 which seem to stand in need of comment or explanation.

RECEIPTS.

Land Revenue.—The Government of India have accepted the estimate of total collections under this head, as passed by the Local Government for 1893-94, amounting to Rs. 3,84,33,000. The estimate provides Rs. 5,07,000 for "12 per cent. on collections from Government estates." Including this amount, the Provincial share of land revenue comes to one-fourth of (Rs. 3,84,33,000— 5,07,000) + 5,07,000=Rs. 99,88,000.

The debit of Rs. 13,50,000 to Provincial shown under Land Revenue

adjustment is made up as follows:-

For fixed contribution to Imperial revenues For interest on the capital advanced	.:. from	Rs	Rs. 14,39,000
Imperial revenues for remodelling the H Tidal Canal			21,000
Add—• Total deduction		•••	14,60,000
For capital outlay on Hidgelee Tidal Canal For Imperial buildings transferred to	District	1,00,000	
Boards		10,000	1,10,000
Net deduction	•••		13,50,000

It may be here mentioned that for reasons of account all transfers as between Imperial and Provincial revenues are effected through the head of Land Revenue under the sub-head of adjustments.

20. Stumps.—The estimate of total revenue from stamps for 1893-94 amounts to Rs. 1,57,00,000. The growth of this most important and expansive branch of Provincial revenue during the past four years has been as follows:—

			Increase.
		Ks.	$\mathbf{R}\mathbf{s}.$
1887-88	•••	1,38,16,000	•••••
1888-89	>	1,38,39,000	23,000
1889-90	•••	1,42,38,000	
1890-91	•••	1,42,47,000	
1891-92	•••	1,51,00,000	
	Total		12,84.000
	Tom	•••	

The increase amounts to Rs. 12,84,000, or an average of more than three lakhs a year. The smallness of the increase in 1890-91 was due to the reduction in the rate of copying fees from 4 annas to 3 annas per folio, with effect from 1st April 1890. The revised estimate for 1892-93 amounts to Rs. 1,55,50,000, and the estimate for 1893-94 has been placed at Rs. 1,57,00,000. As the stamp duty is fixed by substantive law at rates which cannot be altered, the revenue under this head cannot be materially affected by administrative measures. All that can be done is to watch the working of the law carefully, to look out for evasions, and to see that adequate penalties are levied for breaches of the law and rules.

21. Excise.—The Accountant-General estimated the total revenue for the year 1893-94 at Rs. 1,12,00,000, against Rs. 1,10,64,413 estimated by the Board of Revenue. In Government order No. 654T.-F., dated the 24th October 1892, sanction was given to the enhancement of duty on wholesale licenses for the vend of imported liquor in the town of Calcutta from the nominal sum of Rs. 50 a year to Rs. 50 a month, or Rs. 600 a year, from 1st April 1893. Some changes have also been made in the duties on retail licenses. The effect of these orders will be to increase the revenue to a considerable extent. A substantial increase is also anticipated next year under the head "Farm of drugs," owing to the present rates of duty on all kinds of ganja being raised by one rupee per seer with effect from 1st April 1893, under the orders of the Government of India, in the Finance and Commerce Department, No. 784, dated the 23rd February 1891. It was calculated that the total increase on this and other accounts would not be less than three lakks, and accordingly the Accountant-General's estimate was raised from Rs. 1,12,00,000 to Rs. 1,15,00,000, and this has been accepted by the Government of India.

and this has been accepted by the Government of India.

22. Provincial Rates.—The head Provincial Rates represents principally the proceeds of the Public Works Cess, but it includes also the recoveries from District Funds of the proportionate cost of collecting Road Cess and the Rates for the general management of Wards' and Attached Estates. The receipts have been as follows:—

	1887-8%	1888-89.	1889-90.	1800-91.	1891-92.	Revised estimate, 1892-93.	Estimate, 1893-94.
(a) Public works cess (b) Proportionate cost of collecting road cess (c) General management of wards and attached estates,	Rs. 38,19,869 3,15,524 1,03,154	189. 37,97,970 2,08,084 90,869	Rs. 39,11,693 3,12,096 82,235	Rs. 38,93,461 3,55,052 71,420	Rs. • 40,79,753 3,64,355 80,419	Rs.	R4. 41,50,000 3,31,000 80,000
Totul	42,86,538	41,56,323	43,06,024	43,19,933	45,24,527	45,40,000	45,61,000

The variations under (a) were due to progress in valuation and revaluation of districts. The gross rental assessed on the introduction of the road cess was Rs. 13,11,68,432, and on the same basis the statistics furnished by the Board of Revenue show that it amounted to Rs. 14,60,45,236 in 1890-91, and Rs. 14,78,83,221 in 1891-92. Large recoveries of the arrears of rate on wards' estates were effected from the Burdwan Raj in 1887-88, and this accounts for the larger receipts under (c) in the first year of the contract. The comparatively smaller receipts under (c) in 1890-91 and 1891-92 were due to the release from Government management of a large number of estates during the course of the former year.

Head (b) is a new head of account which appeared in the Provincial Account in consequence of the introduction of the Local Self-Government Act. Prior to the extension of the Act, the charges for the collection of both the Road and Public Works Cesses were shown in the District Road accounts, the cost of collecting the Public Works Cess being paid to the District Road Committees through the adjusting head of Contribution, an assignment of Rs. 47,000 being made in the Provincial Contract under that head. The arrangement has now been reversed. The collection of the cess in the districts, where the Local Self-Government Act has been introduced is shown as a Provincial charge, and is recovered from the District Funds before the net collections of the Road Cess are made over to the District Boards.

Assessed Taxes.—The Accountant-General placed the estimates of total receipts for 1893-94 at Rs. 43,50,000. Looking to the steady growth of revenue under this head, the estimate was raised by this Government to Rs. 44,00,000. but this has been reduced by the Government of India to Rs. 43,30,000, with reference to the actuals of 12 months ending January 1893, which amounted to Rs. 43,28,000.

24. Forests.—The following table shows the estimates of receipts and expenditure for the year 1893-94, compared with the actuals of 1891-92 and

the sanctioned and revised estimates of 1892-93:—

Surplus	3,81,03 i	3,51,000	3,05,000	2,93,000

The estimates provide for a surplus of Rs. 2,93,000 at the end of 1893-94,

against Rs. 3,05,000, the latest estimate for 1892-93.

25. Registration.—The Accountant-General placed the revised estimate for 1892 93 at the same figure as the original estimate for the year, which was Rs. 13,60,000. This amount was also proposed as the estimate for 1893-94. The actuals for the twelve months ending January 1893, were Rs. 14,08,000, and the revised estimate for 1892-93 has been placed at Rs. 14,10,000, and the

estimate for next year at Rs. 14,20,000. Half the receipts only are Provincial.

26. Juils.—The total receipts for 1893-94 were estimated by the Inspector-General at Rs. 9,72,000, while the Accountant-General placed them at Rs. 9,09,000, reducing the estimate under the head Jail Manufactures by Rs. 63,000. The Lieutenaut-Governor considered that the probable receipts under this head had been under-estimated by the Accountant-General, and thought they might safely be placed at Rs. 9,50,000. The total estimate of

receipts was accordingly placed at Rs. 9,59,000.

27. Police.—The Accountant-General estimated the total receipts for 1893-94 at Rs. 2,46,000, against Rs. 4,60,000, the sanctioned estimate for 1892-93, and Rs. 4,48,634, the actuals of 1891-92. The decrease is due to the exclusion of receipts on account of village police in the Chota Nagpur Division, which have been transferred from Provincial to Local. The estimate has been further reduced by Rs. 27,000 on account of the transfer of fees for the inspection of steam-boilers from the Provincial account.

28. Marine.—The Accountant-General estimated the total receipts for 1893-94 at Rs. 9,28,000, against Rs. 9,68,000, the sanctioned grant for 1892-93, and Rs. 9,65,408, the actuals of 1891-92. The actual receipts, during the twolve months ending January 1893, were Rs. 9,04,000. The revised estimate for 1892-93 has accordingly been placed at Rs. 9,05,000, and the estimate for

1893-94 at Rs. 9,12,000...

29. Education.—The total receipts of the Education Department for 1893-94 are estimated at Rs. 5,71,000, against Rs. 6,10,000, the sanctioned estimate for 1892-93. The actuals of 1891-92 amounted to Rs. 5,95,123, and those of the

twelve months ending the 30th September 1892 to Rs. 5,70,758.

30. Medical.—The estimate of receipts for the year 1893-94 was placed by the Accountant-General at Rs. 1,49,000, against Rs. 1,50,000, the sanctioned estimate for 1892-93. The estimate has been raised by Rs. 2,000 as some receipts are anticipated in consequence of the circular what the Sanitary Board have issued to all municipalities laying down the rate of fees to be levied from them for the preparation of plans and estimates for drainage and water-works schemes.

31. Scientific and other Minor Departments.—The principal items of receipts under this head are from Cinchona manufacture and Emigration fees. The

total receipts are estimated at Rs. 1,62,000.

32. Civil works by Civil Officers—The Provincial receipts from ferries for the year 1893-94 are estimated at Rs. 2,27,500, and the receipts from cemeteries at Rs. 2,500, against Rs. 2,23,500 and 2,500, respectively, the amounts sanctioned for 1892-93.

EXPENDITURE.

33. Land Revenue.—The Accountant-General's estimates for 1893-94 under all the Provincial heads and sub-heads of expenditure amount to Rs. 34,19,000, as follows:—

Charges of district administration	***	•••	${ m Rs.} \ 29,43,000$
Management of Government estates	•••	• • •	4,01,000
Land Records and Agriculture	•••		75,000
Total	Provincial		34 19 600

The estimate was raised by this Government by Rs. 4,000 in order to provide for revision of office establishment in the Deputy Commissioner's office, Sonthal Parganas. The increased provision, however, does not appear in the estimate of the Government of India.

- 34. Salt.—The Accountant-General estimated Rs. 31,060 for expenditure of the Salt Department during 1893-94, which is the ordinary normal expenditure of the Department. A provision of Rs. 10,000 has, however, been kept in reserve to meet any further improvements that may possibly be made in order to provide increased facilities for the trade at Sulkea, Chittagong, or Narainganj, and the estimate has therefore been raised to Rs. 41,000. The revised crimate for 1892-93 amounts to Rs. 1,25,000, which includes a special provision of Rs. 75,000, the amount payable to Mr. Kilby as an honorarium for his patent salt weighing machine.
- 35. Stamps.—The total expenditure for 1893-94, of the Stamp Department, is estimated at Rs. 6,14,000, against Rs. 5,68,000, the sanctioned grant for 1892-93, and Rs. 4,51,779, the actuals of 1891-92. The actuals of 1891-92 did not include the cost of plain paper for use with Court-fee Stamps, which, under the terms of the new Provincial Contract, is charged to this head with effect from 1892-93, instead of to "Stationery and Printing." The Provincial share amounts to Rs. 4,61,000.
- 36. Excise.—The chief variations in this budget are due to the reduction of the salary of Excise Commissioner from Rs. 2,900 to Rs. 1,800, as under the orders of the Secretary of State, the Excise Commissioner will now ordinarily be a Magistrate of the second grade. Larger provision has, however, been made for the construction and completion of distillery buildings, and the total grant now stands at Rs. 7,16,000, of which the Provincial share is only one quarter, or Rs. 1,79,000.
- 37. Assessed taxes The total expenditure of the Income-Tax Department during 1892-93 was originally estimated at Rs. 1,90,000, and this amount was reproduced by the Accountant-General as the revised estimate for the year, while he piaced the estimate for 1893-94 at Rs. 1,89,000. It has been taken by the Government at Rs. 1,93,000, of which the Provincial share is one-half. The Accountant-General's estimates for 1893-94 include a provision

of Rs. 3,600 for the local allowance of Rs. 300 per month drawn by the Superintendent of Preventive Service for performing the duties of the Collector of Income-Tax, Calcutta. As Mr. Kilby, the permanent Superintendent, has retired from the service, and a whole-time Collector of Income-Tax on Rs. 700—1,000 per mensem has been appointed, a provision of Rs. 8,400 as salary, and Rs. 1,200 as house allowance, has accordingly been made under this head.

38. Judicial Courts.—The following table compares the estimates of

expenditure for 1893-94 with the sanctioned grants for 1892-93 and the actuals

of 1891-92:-

		Actuals, 1891-92.	Sunctioned estimates, 1892-93.	Estimate, 1893-94.
		Rs.	Rs.	Rs.
High Court	• • •	11,41,299	11,35,000	11,40,000
Law Officers		3,14,862	2,82,000	2,90,000
Coroner's Court	••• !	14,358	13,000	13,000
Presidency Magistrate	••• (70,430	63,000	63,000
Civil and Sessions Courts	•••	43,59,269	43,90,000	44,50,000
Courts of Small Causes	!	2, 01,489	1,82,000	1,78,000
Criminal Courts		22,44,523	22,45,000	22,56,000
Pleadership Examination of	harges	7,822	8,000	8,000
Refunds	• • • •	1,28,755	1,15,000	1,30,000
Total	•••	84,82,807	84,33,000	85,28,000

The increased provision of nearly a lakh of rupees under Civil and Session Courts on the actuals of 1891-92 represents the financial effect of the increase which has been found necessary in the number of Subordinate Judges, and Munsifs and Judicial establishments generally. There has also been sanctioned an addition to the ministerial establishment of the Civil Courts in consequence of the recommendations made in the reports of Messrs. Toynbee and Stevens, who were appointed to enquire into the subject.

The grants for 1893-94 for the Jail Department are as follows:-

	Sanctioned grant.
	Rs.
	52,836
	98,8 26
	4,93,894
	5,81,958
	1,20,457
	35,975
	13,83,946
	54
T otal	13,84,000
•	7,95,000
TOTAL	21,79,000
	•Total • • Total

The total grant amounts to Rs. 21,79,000 against Rs. 20,22,000 the actuals of 1891.92 and Rs. 20,90,000 the revised estimate for 1892-93. The increase in expenditure, which is partly counterbalanced by an increase in receipts, is necessitated by the increase of jail population, and adequate provision has to be made for the high prices of food-grains for ration expected to prevail during the year.

Police.—The total expenditure of the Police Department for 1893-94 was originally estimated at Rs. 56,80,000, from which were deducted Rs. 21,000, the charges connected with steam-boiler inspection, and Rs. 75,000 under the head of temporary transport for the South Lushai Hills. The Government of India have accepted the deduction only of the first item, so that the grant now stands at Rs. 56,59,000. The estimate under Special Police, amounting to Rs. 4,98,000, includes a lump provision of Rs. 4,46,000 for expenditure during the ensuing year under the head South Lushai Hill Force. The estimate has been accepted provisionally, subject to any modifications which Government may hereafter find it necessary to make in view of the approaching transfer of the South

Lushai territory to Assam.

40. Marine.—The difference of Rs. 10,000 under this head between the estimate of the Government of India and that of the Local Government represents the provision made by this Government for compensation payable to Captain Petley, the Port Officer, on account of his enforced retirement, which is payable by the Provincial revenues, but which does not appear to have been included in the budget passed by the Government of India. A sum of a lakh and a half required to meet the balance of the cost of the new pilot vessel to replace the Coleroon, which is now being built at the Government Dockyard at Bembay, has been provided under the head of Purchase and hire of ships and vessels.

41. Education.—The estimate provides for a total expenditure of Rs. 25,73,000 against Rs. 25,30,000, the revised estimate for 1892 93. The increase is chiefly for grants-in-aid for primary education, and for additional staff sanctioned for the Sibpur Engineering College. This heavy expenditure includes the cost of Government Colleges which accounts for Rs. 5,20,000, Government schools Rs. 5,45,000, and grants-in-aid Rs. 5,89,000. These are institutions for general education, but special or technical education is also fairly well supported—Government Professional Colleges costing Rs. 1,21,000 and Special

Government schools Rs. 1,45,000.

42. Medical.—The grant for the Medical Department for 1893-94 stands—

					Rs.
Medical Establishmen			•••		5,86,000
Hospitals and Dispen	saries		•••	• • •	3,83,000
Sanitation and Vacci		• • •	•••	•••	1,92,000
Grants for medical pu	провов		• • •	•••	3,500
Medical Schools and	Colleges	• • •	••		2,68,000
Lunatic Asylum	•••	•••	•••		1,10,000
Look Hospitals		•••	•••	•••	16,000
Chemical Examiner		•••	•••	•••	26,000
Refunds	•••	•••	•••	•••	500
•			Total		15,85,000

The total grants amount to Rs. 15,85,000 against Rs. 15,67,000 the actuals of 1891-92—Rs, 15,80,000 the revised estimate for 1892-93 proposed by this Government. and Rs. 16,00,000 the revised estimate of the Government of India. The incease on the actuals of 1891-92 is due to the normal growth of

the administrative charges.

The estimate of the Local Government includes an additional provision of Rs. 4,000 for remuneration to Civil Surgeon's clerks for doing vaccination work. The provision does not appear in the estimate of the Government of India. This additional duty forms a portion of a large scheme of reorganization which has been recently carried out, and which is expected to bring about a great extension of vaccination, and materially to enhance its efficiency in rural areas.

43. Scientific and other Minor Departments.—The following table shows the

details of the grants under this head:-

			Rs.
Provincial Museums	• • •		16,140
Donation to Scientific	Societies		14,000
Experimental cultivati	on		1 9,500
Cinchona Plantations	• • •		1,03,552
Public Exhibitions and	l Fairs		12,350
Imperial Institute	***		500
Veterinary charges			19,000
Botanic and other pub	lic gardens	3	1,10,009

-			1,700
Registration of Railwe	y Traffic	•••	2,320
Registration of River	and Kuad-b	orne Traffic	18,105
Provincial statistics	***		2,599
Examinations	•••	•••	8,000
Refunds	***		718
Charges in connection	with the I	ndian Factories Act	18,400

Total Provincial

8,64,546

The estimate for 1893-94 is Rs. 3,64,000 against Rs. 3,13,000 the actuals of 1891-92 and Rs. 3,25,000 the revised estimate for 1892-93. The increase is chiefly for the provision of two new items, veterinary charges (19,000) and charges of Indian Factories Act (18,400), which were not in existence in 1891-92.

44. Stationery and Printing.—The estimate under this head amounts to Rs. 13,05,000, but it is hoped there will be some reduction of expenditure under this head in consequence of the recent orders issued to revise each form, whenever necessary, only once in a year, and not to introduce new forms, except under special orders, till the old stock is exhausted.

• 45. Civil works by Civil officers.—The difference of Rs. 32,000 under this head between the estimate of this Government and that of the Government of India is due to the provision struck out by the Local Government for the construction

of bridges in the South Lushai Hills.

46. The closing balance, as now estimated by the Government of India, is Rs. 20,72,000, i.e., Rs. 72,000 in excess of the minimum balance, which the Provincial Government is required to maintain under the orders of the Government of India.

The foremine -

occasion

- mee introduction in 1871-72 results to me close of the mancial year 1891.92, a period of twenty years marked by great financial vicissitudes, I must refer the Council to the second part of this Review, which, as I have already stated, will be published in next Gazotte for the information of the public. It is sufficient to say here that the Bengal of the present day owes to Provincial Finance most of the facilities and conveniences which distinguish it from the Bengal of 20 years ago: its railways, its irrigation and navigation canals, many of its most important roads, and a host of administrative improvements which it would be tedious to enumerate, amongst them the Council Chamber in which we are now assembled. The period of 20 years which we have to look back upon was one, as I have already said, of many vicissitudes and public calamities. At its opening the province had hardly recovered from the shock of one famine and was soon to suffer from another. Cyclones, floods, wars and rumours of wars, a falling exchange, grave alternations of agricultural depression and prosperity, serious changes of policy affecting the revenues of the State, all these things form a series of events beyond the control of the Provincial Government, which are liable to recur at any moment, and which constantly threaten the security of the Provincial finances.

PART II.

The Working of Provincial Finance.

In attempting to gauge the results of the process of decentralisation which The contract of 1871—77. commenced in 1871-72, and to indicate the direct and tangible benefits which Bengal has derived from it, it will be convenient to follow in the main the periods at the close of which the arrangement, of late years called a contract between the Imperial and Local Governments, has been revised. The first of these periods embraced the six years, 1871-72 to 1876-77. Since then the contract has been revised at intervals of five years.

^{*} Adjustment of old error.

^{2.} Before proceeding to comment in detail on the figures of this statement, it will be convenient to recapitulate briefly the various classes of estimates and accounts with which the Provincial Government then had to deal. There were, first, the estimates and accounts of Imperial Services, that is to say, of those branches of revenue and expenditure which had not been made over to provincial control and management. In its relation to these services, the Local Government was in the same position that it held before the introduction of the Provincial Services scheme in 1871-72. Secondly, there were the estimates and accounts of Provincial Services, or of those branches of revenue and expenditure, originally Imperial, made over to the management of the Local

Government under the system of provincial contracts. Thirdly, there were the estimates and accounts of the funds constituting the Provincial Reserve, that is, of those Local Funds, the balances of which were at the disposal of the Local Government for provincial purposes. Fourthly, there were the estimates and accounts of those Local Funds (properly so called) which are by law or by their constitution devoted to particular local and limited objects. The amount of control which could be exercised over these by Government varies considerably, and might be said to be at a minimum in the case of the District Road Fund, and at a maximum in the case of the Port Funds. Both these strictly Local Funds, and those included under the Provincial Reserve, might be divided with reference to their origin into two classes, thus—

(I)—Funds supported by compulsory rating, or by payments under sanction of law, or orders having the force of law.

(II)—Funds made up of payments of the nature of rents, tolls, or fees for services or facilities rendered or privileges conferred.

Lastly, there were the accounts and estimates of Municipal Funds. These, though strictly speaking local funds, were not dealt with in the Local Funds Budget of this Government, under which only the funds of the fourth class were

treated together.

- 3. By its Resolution No. 1886, dated the 28th March 1877, the Government of India directed that the transactions of the Local Government, under the heading of 'Provincial Services,' should be re-incorporated in the general estimates and accounts. The effect of this order was to amalgamate, for the purposes of the Imperial Budget, the first and second classes of accounts and estimates described in the preceding paragraph. A later Resolution, No. 1072 of the 20th February 1878, re-incorporated with the estimates and accounts of Provincial Services "those resources recorded under 'Local Funds' which were at the free disposal of the Local Government for expenditure in any part of its jurisdiction without legal let or hindrance." The effect of this was to incorporate with the estimates of Provincial Services, and therefore with the Imperial estimates, the transactions of the funds treated in Bengal as Provincial Reserve (i.e. the third class above described).
- 4. Turning now to the statement, it must be observed first of all that the figures for the years 1871-72, 1872-73, 1873-74 include the receipts and charges of Assam, while those for the last three years of the period include the accounts for Bengal only. Secondly, it must be remembered that the Imperial assignments, originally fixed at Rs. 1,16,85,920, underwent a number of modifications, according as certain services were transferred to the management of the Government of Bengal or withdrawn from its control. The most important of these, and the only one which need be mentioned in a historical review, is the reduction of Rs. 13,30,000 on the separation of Assam. This sum was arrived at by allotting to Assam the actual average expenditure on provincial services within its limits during the last three years of its connexion with Bengal, the Bengal estimate being reduced by that sum. The average expenditure was ascertained to be Rs. 5,30,000 on provincial public works and Rs. 8,00,000 on other provincial services, and by deducting this sum the Bengal assignment was reduced in 1874-75 to Rs. 1,10,41,000, as shown in the statement. It may be added that the large increase in the allotment which appears in the year 1872-73 was due to a special grant from the Supreme Government of Rs. 8,66,677 for the price of the old Sadar Court building, and of one lakh for expenditure on the relief of the so-called Burdwan fever, which caused heavy mortality in that year.

5. Turning now to the detailed heads, we find under Jails an increase of nearly two lakhs in charges, against which we must set an increase of rather less than the same amount in receipts. Extended manufactures brought about larger sales on the one hand, and on the other involved increased purchases of raw material; establishments were to some extent increased, and in the scarcity years

1573-75, the larger jail population swelled the expenditure on diets.

6. The Registration receipts were nearly doubled owing to Sir George Campbell's liberal extension of rural sub-registry offices, but although there is no doubt that this department earned a profit on the whole, and was indeed the only

department of those transferred in 1870 in which the income was susceptible of much development, still the exact earnings cannot be stated, as the charges for buildings were provided for in the Public Works budget.

7. Owing doubtless to the transfer of the Assam districts, and probably also to some change in the form of the accounts, the *Police* figures show a reduc-

tion of nearly four lakhs under Receipts and ten lakhs under Charges.

8. Education receipts rose by nearly a lakh and the charges by nearly five lakhs, notwithstanding the transfer of territory to Assam. The increase under the head of receipts was mainly due to the large grants made to primary schools under the policy introduced by Sir George Campbell, while greater liberality in the bestowal of scholarships, larger grants to Muhammadan schools and district schools, and the strengthening of the inspecting agency which this policy involved, also contributed to the same result.

9. In the Medical Department the receipts rose from under half a lakh to about a lakh and a half, and the charges from nine lakhs to over thirteen and a half. This was due partly to the Burdwan epidemic fever, but mainly to the great extension of dispensaries and hospitals initiated by Sir G. Campbell, who admitted that in this he had not exercised so severe an economy as in other

branches of administration.

10. The figures shown under the three heads Miscellaneous, Contributions and Public Works, are greatly complicated by transactions relating to the scarcity of 1873—75. Thus the receipts under Miscellaneous rose from Rs. 98,460 in 1871-72 to Rs. 33,70,092 in 1873-74 and to Rs. 77,29,059 in 1874-75, owing to the inclusion under this head of the special famine grants of Rs. 22,89,100 and Rs. 76,38,139 made by the Government of India for expenditure on relief works. Then the heavy charges shown under Contributions represent the special grants made by the Local Government to District Road Committees for the same purpose, while the greatly enhanced expenditure of the Public Works

Department during the two years is also due to relief operations.

The same cause, unforeseen and uncontrollable expenditure on relief, accounts for the startling fluctuations which appear in the balances. In the first two years the strict economies of Sir George Campbell effected savings aggregating about seventeen lakhs of rupees under the Provincial Service heads, and the year 1872-73 opened with a balance under those heads of Rs. 22,23,126, while the balance under Provincial Reserve had risen to Rs. 16,12,440, making a grand provincial balance of Rs. 38,35,566. For the year 1872-73 very liberal grants were made under Education, Medical, Public Works, and other headings; but the closing balance under 'Service' rose to Rs. 35,58,298. This result is, however, partly to be explained, as has been mentioned above, by a special grant from the Supreme Government of Rs. 9,66,677 on account of the Sadar Court buildings, capitalization of Calcutta rents, and Burdwan fever relief. The greater part of this special grant was meant to be reserved for the crection of public offices for the Bengal Government. Under Reserve the balance fell to Rs. 9,80,683, making the aggregate provincial balance at the opening of 1873-74 Rs. 45,38,981. In 1873-74 the Local Government was called upon to face the enormous expenditure on relief works caused by the famine in Bengal and Bihar, and the year closed with a deficit of Rs. 19,037 under 'Services,' while the balance under Reserve had fallen to Rs. 5,14,704. net provincial balance at the opening of 1874-75 was thus only Rs. 4,95,667. During 1874-75 the expenditure upon relief works continued to be heavy, but a special grant of Rs. 76,38,139 was received from the Supreme Government, and the year closed with a credit balance of Rs. 23,61,287 under Services, and of Rs. 8,23,465 under Reserve, the aggregate being Rs. 32,92,752. In the year 1875-76 the final adjustment of the famine account between the Supreme and Local Governments took place. It was estimated that if all charges on account of famine had been excluded from the accounts, the closing balance under 'Services' in 1873-74 would have been Rs. 19,21,069, in 1874-75 Rs. 13,87,787, and in 1875-76 Rs 12,97,981. The balance under 1874-75 Rs. 13,87,787, and in 1875-76 Rs 12,97,981. Provincial Reserve at the end of 1875-76 being Rs. 7,21,464, that year would, famine apart, have left the Local Government with about 20 lakhs of rupees in hand. The demand of the Imperial Government on account of that portion of the relief works chargeable to the Provincial Public Works

Budget being far in excess of this sum, it was arranged that the Bengal Government should surrender to the Imperial Government about 15 lakhs of its estimated credit balance; that all outstanding famine charges beyond that amount should be debited to the Imperial Government; and that the accounts should be so adjusted as to leave to the Government of Bengal an opening balance of Rs 5,00,000 on the 1st of April 1876. Owing to some trifling discrepancies in the accounts, the actual opening balance of the year 1876-77 was Rs. 5,01,180.

With that year the scheme of decentralization, which was introduced in 1871, underwent a considerable development. Contract of 1877—82. Under the system as originally started, the Local Government was entrusted with the management chiefly of spending departments, such receipts as accompanied them being supplemented by large con-Solidated allotments for their maintenance. The only department in which the revenue outstripped the charges was Registration; Police, Jails, Education. and Medical were services under which the receipts could never be expected to bear more than a very small ratio to the charges. It was therefore chiefly with a view to economy in administration that the Government of Lord Mayo determined to make the Local Government responsible for the financial management of these branches of the Administration. In 1877 the system of decentralization took another step in advance. The Government of India, while handing over other great departments of expenditure to the Local Government, also entrusted to its use and responsibility on fixed terms of progressive payment all the principal revenues which could be deemed capable of steady expansion under careful local management. The success of the earlier measure had been sufficient to secure some extension of the principle; but the form which the extension took was in great measure determined by the decision to which the Secretary of State had come on the great question of famine relief. In his financial statement of March 1877, Sir John Strachey announced that it was the intention of the Government of India to meet charges for famine and unremunerative works out of revenue for the future. He proposed to place the Government in a position to do this, not by introducing any new Imperial faxation, but by extending the system of decentralization, and by making each Local Government responsible for the management and charges of the great multiplication which had been supplied to the management and charges of the great public works which had been constructed, and for the construction and maintenance of those to be subsequently undertaken. He declared that the fundamental principle to be pursued in regard to public works was the enforcement of Provincial responsibility only. Bengal was the only Province, however, which was then considered able to bear the whole of its own burden. The charge for interest on productive Public Works was transferred to the Provincial account, and the Lieutenant-Governor was invited to raise by taxation the funds necessary to meet existing charges, as well as to provide for new works. The Public Works Cess Act of 1877 was accordingly introduced. Provincial responsibility for all productive works, existing and future, was definitely assumed, and the policy which the Secretary of State had affirmed was in regard to this Province carried into effect.

13. The decentralizing measures of 1877 were of a threefold character—(1)

Certain departments of Revenue were made over to Provincial management, some for fixed payments, some for progressive contributions to the Imperial Treasury. (2) Certain departments of expenditure were made over to it with fixed allotments. (3) The Public Works which had been or were to have been constructed with borrowed money were made over to it without any assignment. The arrangements were mutually interdependent. The first and second were connected, because, although fixed allotments only were made for expenditure, it was well recognised that expenditure could not be fixed, but must be progressive, and it was intended that the necessary increase in charges should be met out of the profits which the Provincial Government might derive from the assigned revenues over and above the amount of its contribution. The first and third were connected, because it was similarly recognised that the large responsibilities. assumed by the Local Government in regard to Public Works should be merged in the aggregate of its ways and means. It was only reasonable, therefore, that the progressive contributions under the heads of assigned

revenue should be so fixed as to leave the Local Government a margin for the discharge of its actual responsibilities, as well as for the improvement of the Province.

14. In addition to the Departments of Police, Jails, Registration, Medical, Printing, Roads and Civil Buildings transferred by Lord Mayo's Government in December 1870, with an assignment of Rs. 1,16,85,920, which had been reduced by March 1877 to Rs. 1,11,11,574, the Local Government was further entrusted, under the contract of March 1877, with the management of the following heads of revenue:—(1) Excise; (2) Customs (Miscellaneous receipts); (3) Salt (Minor items); (4) Stamps; (5) Luw and Justice (Proper); (6) Marine, and (7) Miscellaneous, and of the following heads of expenditure:—(1) Refunds of the Assigned Revenues; (2) Land Revenue; (3) Excise; (4) Customs; (5) Salt; (6) Stamps; (7) Administration; (8) Minor Departments; (9) Law and Justice; (10) Marine; (11) Miscellaneous, and one or two smaller items. The allotment made under the heads of expenditure was Rs. 1,34,70,000, and the total, including the existing allotiment under the heads previously transferred, was. Rs. 2,45,29,000. From this was deducted a lump sum of Rs. 5,90,000, and the net consolidated grant was thus reduced to Rs. 2,39,39,000. The payments to be made on account of the assigned reductions in the first year amounted to Rs. 1,91,07,000, and this was to be increased every year by Rs. 3,75,000 under the heads of Excise, Stamps, Law and Justice. The balance represented the Imperial allotment to the Provincial revenues, which, subject to adjustments, was thus to be Rs. 48,32,000 in 1877-78, Rs. 44,57,000 in 1878-79; Rs. 40,82,000 in 1879-80; Rs. 37,07,000 in 1880-81, and Rs. 33,32,000 in 1881-82.

15. The following table shows the progress of the Provincial revenue and expenditure during the five years 1877—82. The Revenue side of the account includes the proceeds of the Public Works cess, and the receipts from Railways and Canals. On the expenditure side appear the charges for interest on the Capital expended and the cost of maintenance. The sum entered as a receipt under Assessed Taxes is simply the grant made to the Provincial revenues to meet the cost of collections and refunds on account of the License-tax.

Decrease owing to the miscellaneous refunds now being charged against the particular service heads to which they refer.
 † This is for cost of European stores included in accounts and future estimates under contingencies of the minor heads of service for which the stores are purchased.
 ‡ Includes Rs. 11,31,862 on account of 42 (now 41)—Miscellaneous Railway Expenditure.

16. Owing to short collections of the Public Works Cess in 1877-78, to the absence of any receipts under assessed taxes, the license tax not having then been introduced, and to various differences in the form of the accounts, it is only from 1878-79 that accurate comparison of the condition of the finances in the different years is possible. The gross revenue was Rs. 3,20,78,000 in 1878-79; it had risen to Rs. 3,77,61,000 by 1881-82. In other words, the revenue had increased at the rate of about 15 lakhs of rupees a year during the three years, though there had been no new taxation in the interval.

17. The progress of the revenue under Excise during this period is remarkable. While the revenue increased from 70½ lakhs in 1878-79 to 85½ in 1880-81 and 93¾ in 1881-82, the cost of collecting it declined from Rs. 2,83,000 to Rs. 2,73,000. This was the result partly of the extension of the outstill system, and partly of the great prosperity of the province during this period.

18. A succession of good harvests with high prices had provided the people

18. A succession of good harvests with high prices had provided the people with money to spend on luxuries, and among these exciseable articles, in this as in all countries, hold a high place. There was a large increase in the consumption of duty-paying liquor where the sadar distillery system had been maintained, and also in the consumption of excise opium, of piece-goods, and of everything on which prosperous peasants are disposed to spend their surplus funds. The revenue from excise opium was Rs. 12,49,000 in 1877-78, Rs. 13,35,000 in 1878-79, Rs. 13,62,000 in 1879-80, Rs. 13,95,144 in 1880-81 and Rs. 14,47,000 in 1881-82. The increased consumption of piece-goods also bore unmistakeable testimony to the increased prosperity of the country, and confirmed the view that the excise revenue had been to a great extent improved by the greater spending power of the people. The value of these goods carried to Bengal or Bihar districts by the Eastern Bengal and East Indian Railways was Rs. 6,44,31,000 in 1879-80 and Rs. 6,91,16,000 in 1880-81.

19. The excise revenue was made over to the management of the Provincial Government for a payment rising from 64 lakhs in 1877-78 to 68 lakhs in 1881-82. The gross profit made by the Bengal Government was thus roughly 4½ lakhs in the first year, 5½ lakhs in the second, 6 lakhs in the third, 18½ lakhs in the

fourth, and 25% lakhs in the fifth. The fixed grant for managing the revenue was Rs. 2,92,000. The actual cost was Rs. 3,06,000 in 1877-78. This was reduced by careful management to Rs. 2,73,000 in 1881-82. Thus in 1881-82 the excise receipts exceeded the receipts of 1877-78 by no less than twenty-five lakhs of rupees, while the expenditure for collecting the revenue and managing the department showed a reduction of Rs. 33,000.

20. Under Stamps the increase, though less rapid than under Excise was nevertheless very satisfactory and sustained. The actual receipts in 1876-77 were Rs. 95,48,000, and the revenue was made over to the Provincial Government for a payment rising by 2½ lakhs a year from Rs. 98,50,000 in 1877-78 to Rs. 1,08,50,000 in 1881-82. In 1877-78, however, there was a large increase in receipts owing to the operations under the Land Registration Act, and the actual revenue collected was Rs. 1,08,15,000. In 1878-79 the receipts were Rs. 1,07,85,000. In 1879-80 the receipts rose to Rs. 1,14,99,000, and in 1881-82 to Rs. 1,20,24,000. The increase in the estimated receipts, however, arose from a change introduced by the High Court in the procedure for obtaining copies of documents, and there was a corresponding decrease in fees formerly credited to Law and Justice, and an increase in the cost of establishments debitable to the same head. The steady and substantial increase in the Stamp Revenue from Rs. 95,48,000 in 1876-77 to Rs. 1,20,24,000 in 1881-82 was undoubtedly to a great extent the result of the increased circulation of wealth in the country, and of increased facilities for obtaining justice. But much of the increase was also due to the improved administration of the department and to the special measures taken to discover and check fraud in the use of stamps. The gross profit of the Provincial Government was roughly $9\frac{1}{9}$ lakhs in 1877-78, $6\frac{3}{4}$ lakhs in 1878-79, $11\frac{1}{3}$ lakhs in 1879-80, 8 lakhs in 1880-81, and $11\frac{3}{4}$ lakhs in 1881-82. The fixed grant for managing this department of the revenue was Rs. 2,38,000. The actual cost was Rs. 2,48,000 in 1877-78 and Rs. 2,51,000 in 1878-79. It amounted to Rs. 4,24,000 in 1881-82. The increase in the first year corresponds with the increase in the receipts. Larger sales of stamps must be attended by increased charges for discount. The increase in the later years was due to the transfer of the actual cost of the stamps from the head of "Stationery." The fixed grant under "Stationery" for both stamps and stationery was Rs. 4,98,000. The actual expenditure on both was Rs. 6,89,000 in 1878-79.

21. Under Registration the receipts steadily increased, though the progress was not so rapid in the later as it was in the earlier years. The figures from 1878-79 included Record-room receipts and Land Registration fees transferred from Land Revenue. The Registration receipts proper were Rs. 6,61,000 in 1877-78, Rs. 8,70,000 in 1878-79, Rs. 9,09,000 in 1872-80. They were only Rs. 3,66,978 in 1871-72, the first year that the revenue was under Provincial management. With increased receipts there was naturally an advance in the charges for commission on fees, by which most of the Sub-

Registrars are remunerated.

22. Law and Justice was the third of the branches of revenue surrendered in 1877 for a progressive payment. The actual receipts in 1876-77 were Rs 7,30,000. The revenue was surrendered to the Provincial Government for a payment rising by $\frac{1}{4}$ lakh a year from Rs. 7,25,000 in 1877-78 to Rs. 8,25,000 in 1881-82. The actual receipts were Rs. 8,05,000 in 1877-78, Rs. 10,52,000 in 1878-79, and Rs. 10,80,000 in 1879-80, while they rose to Rs. 17,17,000 in The increase in the revenue was chiefly under the head of Fees, and corresponded in some measure with the increase under Stamps. The falling off in the later years is explained by the new procedure already alluded to in connection with stamps. The expenditure under Law and Justice showed a large increase from Rs. 63,77,000 in 1877-78 to Rs. 87,43,000 in 1881-82. The fixed grant for this service under the five years' settlement between the Imperial and Local Government is Rs. 62,97,000. There was thus a heavy charge on Provincial Funds. It was, however, precisely in order that the Local Government might have the means of providing for improved administration, involving increased expense, that improveable revenue was made over to it. The Lieutenant-Governor was able to strengthen the Subordinate Executive Service, and to increase the number of munsifs to meet the growing wants of the country in the administration of Civil Justice.

Under Jails the receipts were Rs. 6,89,000 in 1877-78. They amounted The charges, on the other hand; rose from to Rs. 6,96,000 in 1879-80. Rs. 16,51,000 in 1877-78 to Rs. 18,41,000 in 1879-80. For 1880-81 they are

estimated at Rs. 17,00,000, and for 1881-82 at Rs. 22,52,000.

• 24. The fixed grant for the charges on account of Land Revenue made in 1877 was Rs. 22,62,000. With the charges which this was intended to cover were amalgamated others, chiefly for sub-divisional establishments, which were originally Provincial. The gross cost of all in 1876-77 was Rs. 23,53,000. The growing wants of the administration, however, since carried the expenditure far beyond this limit. A grant of Rs. 1,80,000 was made for the management of Government estates. Establishments were strengthened and made more efficient, and additions were sanctioned to the staff of Deputy Collectors.

• 25. The expenditure on Education was Rs. 19,58,000 in 1871-72. This included the charges in Assam. In 1875-76 the expenditure in Bengal amounted to Rs. 26,32,000. In the next year Sir Richard Temple under financial pressure reduced the expenditure to Rs. 24,48,000. Sir Ashley Eden was able to make full provision for the needs of this important department. He replaced one lakh of rupees reduced from the grant for Primary Education in 1876-77, and the gross expenditure allowed for 1881-82 was the liberal sum

of Rs. 27,76,000.

In the Medical administration important savings were made. The management of the Metropolitan Hospitals was reformed and much waste of public money prevented. Government aid to dispensaries in the interior no longer took the form of a free supply of expensive instruments and drugs, and careful management ensued from the responsibility thus thrown on the directing Committees. The charges which amounted to Rs. 14,86,000 in 1875-76, Rs. 13,63,000 in 1876-77, and Rs. 13,85,000 in 1877-78, were reduced to Rs. 12,31,000 in 1878-79 and Rs. 10,75,000 in 1881-82. With this reduction in cost there was an increase in the number of persons actually

receiving medical aid.

It will be convenient to consider together the figures under Public Works and the figures of the Interest payable on the capital invested in them. In 1877 the following works were made over to the management of the Government of Bengal with the responsibility for the payment of the interest charges on the capital expended on their construction:—Northern Bengal Railway, Tirhut Railway, Nalhati Railway, Orissa Canals, Midnapore High Level Canal, Hidgellee Canal, and Sone Canals. The Calcutta and South-Eastern Railway was also made over; but as this line had been making beauty sufficient to cover the working expanses no interest was charged on the barely sufficient to cover the working expenses, no interest was charged on the capital. The amount of capital expenditure on which the Provincial Government was liable for interest up to the end of 1877-78 was—

> 2,10,17,000 Railways ... 4,56,43,000 Canals

> > 6,66,60,000

The sum due for interest on this capital was Rs. 30,00,000; but in consideration of the short levy of Public Works Cess, the Government of India only took Rs. 20,00,000 in that year. In 1878-79 the capital expenditure on Railways · was Rs. 66,41,000 chiefly on the extension of the Northern Bengal line and the construction of the Patna and Gaya line. The expenditure on Canals was Rs. 25,44,393. In 1879-80 the expenditure was Rs. 22,12,000 on Railways and Rs. 16,14,000 on Canals. Of the first sum, however, Rs. 3,15,000 was provided from Provincial Funds in order to expedite the completion of the Patna-In 1881-82 the expenditure on Railways amounted to Rs. 30,34,000. chiefly for the extension of the Tirhoot line to Bettiah on the west and Peepra Ghat on the east, and Rs. 36,60,000 for expenditure on Canals.

28. In 1877-78 the receipts under Railways amounted to Rs. 7,32,000 and the charges to Rs. 6,26,000, while the charges for interest amounted to Rs. 8,26,000. The Northern Bengal line was only opened from Porada to Jalpaiguri in January 1878; and the extensions from Parbatipur to Rangpur and from Siliguri to Jalpaiguri were only ready for traffic, the former in July and the latter in November 1878. The Patna-Gaya line and the extension of

the Northern Bengal line to Kaunia on the Teesta were opened for traffic in June 1879. In 1880 the Lieutenant-Governor was permitted by the Government of India to begin, as a Provincial work, the construction of a line from Sonapore on the Calcutta and South-Eastern line to Mugra Hát, an important sonapore on the Calcutta and South-Eastern line to Mugra Hát, an important mart in the 24-Parganas district, and a sum of Rs. 2,20,000 was expended upon it from Provincial Funds. This line was constructed on the broad gauge, and was afterwards extended to Diamond Harbour. The estimates for 1881-82 included a charge of Rs. 7,50,000 for expenditure on this line. Provision was also made for the expenditure of Rs. 4,50,000 for preliminary work on a line to connect Parbutipur on the Northern Bengal Railway with the important town of Dinajpur, and of two lakks for raising and bridging the road from Mugra to Diamond Harbour to make it available for railway extension.

29. The Canals which were taken over by this Government in 1817 were financially of a very different character from railways, and there was no hope of their being in a position to pay the interest on the capital invested in them for many years to come. The construction of the Orissa, Midnapore, and Hidgelee Canals was originally undertaken in 1863 by the East Indian Irrigation and Canal Company, with the most extravagant expectations of profit. Five years after the work had been begun, the Government of India purchased the canals from the Company for Rs. 1,17,28,560, and proceeded to develop a modified scheme. Up to the present these works have been a heavy drag on Provincial resources, which have to bear the charges. The receipts from irrigation on the Orissa and Midnapore Canals, however, show a steady increase; leases are taking the place of yearly agreements; and, as the system of distributaries is extended, it is hoped that the revenue will gradually develop. The opening of the Sone Canals gave a great impetus to the extension The Canals which were taken over by this Government in 1877 develop. The opening of the Sone Canals gave a great impetus to the extension of sugarcane cultivation, and caused a considerable increase in the agricultural wealth of the tracts supplied. The Commissioner, in 1879-80, estimated the increase of profit derived from this source by the people of Shahabad at Rs. 4,73,000 per annum.

30. The following table shows the net receipts from each work during the

period 1877-82, with the interest charges payable in each year:-

		1877-78.	1878-79.		1880-81,	1881-82.
Oriesa Canals . Midnepore Halgeliee Sone	Total net receipts Interest charges	B.s. 54,970 33,730 81,730 1,51,110 2,08,080 20,68,276	Rs. 57,000 2,120 2,7610 57,010 57,010 57,00 21,20,416	B.s. 96,996. 92,522 3,500 1,74,291 1,73,614 22,04,767	Rs, 	Rs. ()1,06,000 22,000 19,000 2,79,000 2,14,000 20,75,000

31. Apart from these schemes, the Government of Sir Ashley Eden also undertook other irrigation and canal works from Provincial Funds. A sum of Rs. 6,28,000 was spent on a canal to connect the river Gunduk with the principal water-courses of the Saran district. A still more important work was the Joojooty Scheme, whereby a constant supply of pure water from the river Damoodah was poured into old channels in the Burdwan and Hooghly districts. The silting up of these channels was undoubtedly for many years the cause of much disease and suffering throughout a large tract of country, and the introduction of a copious supply of pure water for drinking and irrigation purposes was expected to have a marked effect on the health and prosperity of the people. With the admission of the river water there was an almost entire disappearance of the epidemic which so long raged among the villages situated on the banks of the silted-up channels in the Hooghly district. It was calculated that nearly nine-tenths of the inhabitants of these villages were swept away in the epidemic which prevailed before 1877. The beds of these water-courses were studded with pools of stagnant water, which, as the dry season advanced, became more and more feetid and noxious, and spread disease and death among the people who consumed the fluid. At the same time the drainage of the country was obstructed by the endeavours of the people to collect and retain water for agricultural purposes.

32. Sanction was also given to the construction, from Provincial Funds, of a navigation canal to connect the existing tidal canal in Hidgellee with the Orissa system. This was a work of the first importance. Orissa was then wholly

dependent on the sea for its communications with Bengal; the coasting trade could only be carried on by large vessels; the ports were bad; and if any serious failure of the crops occurred, it was impossible to throw a sufficient supply of food into the province. The projected canal was intended to bring Orissa into direct inland communication with Bengal, so that steamers and country boats would be able to ply at all seasons of the year, and while the province will be protected from famine, a large expansion of trade might be confidently

expected.

It is not possible to make any useful comparison of the expenditure · 33. under other Public Works before and after the contracts of 1877. The expenditure on works during the scarcity of 1874 was abnormal, the Provincial balances were exhausted, and the Government of India found it necessary to accept the outlay, and to make the local Government a net grant of five lakhs with which to begin the year 1876-77. The expenditure on Ordinary Public Works during that year was Rs. 25,59,000. In 1877-78 Sir Ashley • Eden found it necessary to proceed with extreme caution in the matter of expenditure. The charges thrown upon the Provincial revenues on account of Productive Public Works were very serious; the full outturn of the Public Works Cess could not be obtained during the year; and he recognized the necessity of securing a substantial working balance to provide for emergencies. The expenditure in this year was therefore restricted to Rs. 2512,000. In framing the revised estimates for 1878-79, the Lieutenant-Governor found it possible to make provision for various important and useful schemes that had been left in abeyance for want of funds; but in this year and the next the expenditure was, under instruction, kept down in consequence of the financial difficulties which famine, war, and adverse exchange had brought upon the Government of India. In 1879 the Government of India found itself compelled to call upon Local Governments to make all possible reductions in expenditure. The orders went so far as to direct that no new work estimated to cost more than Rs. 2,500 should be commenced, even though it might have already received the sanction of Government. In order to avoid the necessity of peremptorily putting a stop to works, the Lieutenant-Governor offered a special contribution of 20 lakhs to Imperial Funds. Under the influence of the same policy of retrenchment unduly lowestimates were made for 1880-81, but the Lieutenant-Governor was afterwards permitted by the Government of India to increase the grant by 20 lakhs, and the expenditure during the year was Rs. 47,60,000. In 1881-82, the Public Works expenditure aggregated Rs. 67,58,000, and included besides miscellar Works expenditure aggregated Rs. 67,58,000 and included, besides miscellaneous improvements on buildings, and on the construction, bridging, and metalling of Provincial roads, provision for new Court-houses at Sealdah, Jessere, Mymensingh, Dacca, Ranchi, Gaya, Darbhanga, and Motihari, for various sub-divisional buildings and Munsifs' Courts, for new Jails at Jalpaiguri, Bogra, Pabna, Gaya, Darbhanga, and Motihari, for a college at Rampur-Boalia, and a Railway school at Kurseong, and for the completion of the new Secretariat buildings and the new Obstetric Hospital at the Medical College.

34. That the system of decentralization was up to this time thoroughly successful in Bengal is sufficiently clear from the foregoing sketch. The revenues increased rapidly, independently of any new taxation: useless expenditure was curtailed; and funds were made available for improvement under all branches of the Administration. The three heads of improvement under all branches of the Administration. The three heads of improvement under all branches of the Administration. The three heads of improvement and income of 165½ lakhs in 1876.77, showed an income of not less than 213 lakhs in 1881-82. In the meanwhile, the Government was able to carry out numerous works of improvement, many of which, under the previous system, would have been indefinitely postponed. Besides making a special contribution of 20 lakhs to the Imperial treasury in time of need, means were found during these five years to increase the staff of executive and judicial officers; to provide increased facilities for the administration of justice; to increase the grant for education; to make grants-in-aid of district communications, and of works of drainage, sanitation, and municipal improvement; to build schools, colleges, and hospitals; to replace the huts in which the public business was transacted, or prisoners were confined, by substantial masonry court-houses and jails; to spend 20 lakhs on railways which have since brought in a large return, 5½ lakhs on tramways, ¾ of a lakh on a steamer service to improve communications with Assam, and 2 lakhs on a road to develop the trade with Thibet; to lay out 11 lakhs on the first portion of a work which will develop the trade of Orissa and protect it from famine;

and to devote 38½ lakhs to improving navigation and providing a supply of pure water for the people. While 77½ lakhs were thus expended on great measures of material improvement, and the expenditure on Ordinary Public Works was increased from Rs. 25,12,000 in 1877-78 to Rs. 67,58,000, exclusive of expenditure on preliminary works of railway construction, in 1881-82, and while no legitimate outlay was spared to strengthen every department of the Administration, the five years' period, which opened with a credit balance of Rs. 2,88,000 only, closed with a credit balance of Rs. 75,43,000. When it is recollected that under the system which prevailed before 1871 every new charge required the sanction of the Imperial Government, that the decision on the demands of each province took no cognizance of the extent to which it had contributed to the general Exchequer, that nothing was to be gained by economy, because money left unspent by any one Government was practically lost to it, and only went to increase the amount to be scrambled for by all, some idea may be formed of the advantages which Bengal had reaped up to this time from the control of its own finances.

The principal features of the contract of 1877 have been described above. The Local Government was allowed, as in the first contract of 1870, to appropriate the whole of the receipts under the heads of Police, Jails, Registration, Education, Medical, Printing, Roads and Civil Buildings, and received in addition a gross annual allotment of Rs. 1,10,59,000 to meet the charges on account The receipts from Excise, Stamps, and Law and Justice of these departments. (proper) were also made over to the Provincial Government in consideration of a payment to the Imperial Treasury of lump contract sums, which were to increase by one lakh per annum in the case of Excise, and 24 lakhs per annum in the case of Stamps and Law and Justice. The following heads of revenue were also made over in return for fixed contract payments, viz., Customs (miscellaneous receipts), Salt (minor items), Marine and Miscellaneous. On the expenditure side, the Local Government was entrusted with the management of the following heads of expenditure, receiving in each case an annual grant of fixed amount:—Refunds of the assigned revenues, Land Revenue, Excise, Customs, Salt, Stamps, Administration, Minor Departments, Law and Justice, Marine, Miscellaneous, and one or two smaller items. Simultaneously—and this was one of the most important elements of the contract—the gross receipts of certain railways and canals which had been, or were to be, constructed with borrowed capital were transferred to the Local Government, which also became responsible for the working expenses of the same and for the payment to the Imperial Government of the interest charges on the capital with which they had been constructed. As these interest charges were expected to exceed considerably the net earnings of the works thus provincialised, the Lieutenant Governor was authorised to impose special provincial taxation to make up the deficiency, and to this end the Public Works Cess was imposed by Act II (B.C.) of 1877. provincialisation of these charges for interest, and the introduction of the Public Works Cess, formed integral parts of Sir John Strachey's scheme of famine finance.

26. The contract of 1877 thus fell naturally into three parts—(1) in respect of the branches of service which had been provincialised by Lord Mayo, the old principle was retained: a fixed annual grant was made from Imperial revenues, which, together with the receipts of those departments, was expected to cover their expenditure, any growth of charges being provided for from the increase in the receipts. (2) In respect of the civil heads of revenue and expenditure then provincialised for the first time, a separate contract was made for each head of revenue and for each head of expenditure; the rates of increase in the payments on account of the revenue from Excise, Stamps and Law and Justice being advisedly taken at a low figure, so as to leave the Local Government a margin wherewith to meet the normal growth of civil expenditure for which no direct allowance was made. (3) In respect of public works constructed from borrowed capital, the Lieutenant-Governor was authorised to resort to local taxation to make good the deficit of interest charges in excess of net earnings.

27. The contract, which came into force in 1882, differed materially from that which it succeeded. The principles on which it proceeded were the following:—

Instead of giving the Local Government a fixed sum of money to Contract of 1882-87. The contract of 1882-87 of provincialised expenditure over provincialised receipts, a certain proportion of the Imperial revenue was devoted to this object. A few heads

were reserved as Imperial; others were divided in proportions, for the most part equal, between Imperial and Provincial; the rest were made Provincial. The balance of transfers, being against the Local Government, was rectified by a fixed percentage on its Land Revenue otherwise reserved as Imperial. At the same time a distinct declaration was made of the policy to be followed during the term of the contract. The Imperial Government was to make no demand on the Local Government, except in the case of disaster se abnormal as to exhaust the Imperial reserves and resources, and to necessitate a suspension of the entire machinery of public improvement throughout the Empire. On the other hand the Local Government was to look for no special aid from the Imperial Government, except in the case of severe-famine, and then only within the following limits:—(1) current income must have been exhausted, every avoidable expense in every department having been retrenched, and the public works grants applied to famine work to the very utmost possible; (2) savings of past years in excess of the ordinary working balance must have been drawn upon to two-thirds of their total amount; (3) the margin of Provincial surplus in normal was made be liable for the completion of works begun as relief works, and where there was no need of such completion, was to be chargeable up to one-fourth at most for payment of interest on any Imperial loans which may have been raised to meet the excess cost of the famine

in general.

The following were the principal additions made to the provincial receipts and charges under the new scheme:—This Government was admitted to a half share in the receipts from Forests and Assessed Taxes, and took all the receipts under the heads of Superannuations, Miscellaneous, and Other Public Works, except contributions from the military and medical funds; gain by exchange on Imperial transactions, premium on bills and unclaimed bills of exchange; receipts from military works; and any unspecified miscellaneous receipts exceeding Rs. 10,000. Under Forests and Assessed Taxes it was liable for half The Imperial Government only retained under Land Revenue the same percentage on charges for collection and on the cost of surveys and settlements as was retained of land revenue. To the existing provincial charges was added under Law and Justice and Medical all that was reserved as was added under Law and Justice and Medical all that was reserved as Imperial; under Stationery and Printing all except the cost of stationery purchased from central stores; and under Other Public Works, the charges for Museums, Educational Buildings, and Light-houses. On the other hand, one-half the net receipts from Excise, Stamps, and Registration, including record-room fees, was surrendered to the Imperial Government. The percentage of Land Revenue was, however, only calculated after allowing for the claim of the Government of India to share in the general improvement that had resulted to the Provincial revenues during the five years then just expired. That share the Provincial revenues during the five years then just expired. That share was fixed at 30 lakhs a year. From this the Government of India deducted three lakhs to be expended on the improvement of the Subordinate Executive and Judicial Services and the establishment of the new district of Khulna. In order, too, that the Local Government might not be embarrassed by a sudden reduction of 27 lakhs in its income, His Excellency the Governor-General in Council added a sum of 28½ lakhs to the credit balance of the Province for 1881-82.

29. The amount of percentage of Land Revenue which, under the new scheme was assigned to this Government, was calculated, as stated above, upon the basis of the regular estimate for the year 1881-82. It was fixed at 32.2284. A sum of Rs. 30,00,000 was, on account of the annual contribution to the Government of India, added to the Provincial deficit, provision being at the same time made for an additional expenditure of three lakhs for the improvement of the Subordinate Civil Service and for a new district of

Khulna.

30. The chief points in which the contract of 1882 differed from that of 1877 were the following:—First, the excess of provincialised expenditure over provincialised receipts was balanced, not by an annual allotment of fixed amount, but by a fixed percentage of the land revenue of the Province. Inasmuch as the receipts credited under Land Revenue are to some extent capable of improvement, and ordinarily show a tendency towards steady, if small, increase, this change was to the advantage of the Local Government. Secondly, the Local Government was no longer permitted to appropriate the whole of the increase in the three principal sources of improvable revenue, viz., Excise, Stamps, and Registration. Under the former contract, the increase which the Local

Government had to surrender was only one lakh of rupees per annum under Excise, 2½ lakhs per annum under Stamps (combined with Law and Justice), and nil under Registration; whereas the actual rate of increase averaged nearly six lakhs per annum under Excise, 4½ lakhs under Stamps and Law and Justice, and Rs. 90,000 under Registration. Under the old contract the whole of this profit went to the Local Government: under the new arrangement one-half went to the Government of India. This change operated greatly to the disadvantage of the Provincial revenues, whose expansive power was thereby largely diminished.

31. The third point of difference between the contracts of 1882 and 1877 lay in the extension of the interest of the Local Government to the revenue heads of Assessed Taxes and Forests, and to the receipts and expenditure under Superannuations, and certain sub-heads of branches of service of which the bulk

was already Provincial.

32. The last important point of difference was that the contract of 1882 was a consolidated contract. In other words, no attempt was made to estimate the future receipts and expenditure under separate heads and to fix distinct assignments for each. The new arrangements were applied to the revised estimates for 1881-82 as a whole; the total receipts were compared with the total expenditure; and (after making a deduction of 27 lakhs from the Revenue side, being the share of the profit on the old contract which the Imperial Government decided to appropriate) the adjusting percentage of Land Revenue was calculated so as to balance the account.

33. following statements show the actual receipts and expenditure of the period 1882-87.

35. The figures shown in the last paragraph against Land Revenue receipts are the net sum credited to Provincial after all adjustments had been made. Eliminating these, we get the following result:—

	Contract estimate.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
Land revenue proper Grant for Government estates	Rs. 1,21,34,000 1,95,000	R*. 1,22,28,000 3,94,000	Rs. 1,22,20,000 3,69,000	Rs. 1,20,60,000 3,94,000	Rs. 1,24,28,000 3,85,000	Rs. 1,24,97,000 4,25,000
Total	1,23,29,000	1,26,22,000	1,25,89,000	1,24,54,000	1,28,13,000	1,29,22,000

36. When it is remembered that only a small part of Bengal is temporarily settled, and that 1884-85 and 1885-86 were years of unfavourable harvests, the improvement seems fairly satisfactory. The improvement on the grant for the management of Government estates (which was then fixed at 10 per cent. on collections and has since been raised to 12) was much greater than in the case of Land Revenue proper. This, however, did not represent any real relief to the Provincial revenues, as the whole amount of this grant was devoted to the improvement of the estates in question.

37. The expenditure charged under Land Revenue, which was wholly Provincial (except the charge for Surveys and Settlements, which was divided in the same proportion as the receipts are divided), rose from Rs. 28,91,000 to Rs. 35,00,000, or by Rs. 6,09,000 in five years. The chief causes of increase under this head were the creation of the district of Khulna, the improvement in the pay and position of the Subordinate Executive Service (half of whose salary is shown against Land Revenue, and half against Law and Justice), and the additional expenditure on Government estates, which was balanced by the higher receipts referred to in the last preceding paragraph. The pay of the Directorship of Agriculture, which was sanctioned in 1884 temporarily for two years, was also shown under this head, as well as the Provincial share of the survey of Muzaffarpur under the Tenancy Act. These two items, which were not in existence when the contract was made, alone account for Rs. 1,12,000 of the total increase.

38. Under the head of Stamps, the development of he revenue was steady and continuous. The total receipts, which had risen from Rs. 1,08,15,000 in 1877-78 to Rs. 1,20,24,000 in 1881-82, again rose to Rs. 1,32,58,000 in 1885-86, and to Rs. 1,34,63,000 in 1886-87. The contract estimate of receipts (Provincial share) was taken at 59 lakhs, while the actuals were Rs. 61,07,000, Rs. 62,88,000, Rs. 64,96,000, Rs. 66,29,000, and Rs. 67,32,000 respectively. The profit of the Local Government on the contract under this head was therefore about 2 lakhs in the first year, $3\frac{3}{4}$ lakhs in the second, 6 lakhs in the third, $7\frac{1}{4}$ lakhs in the fourth, and $8\frac{1}{3}$ lakhs in the fifth. The increase was uniformly distributed over the whole period of the contract. There was no legislation during this period affecting the

stamp laws, but a material portion of the improvement in the revenue was undoubtedly due to the arrangements under which process-serving fees in revenue courts, and copying fees, were levied in court-fee stamps instead of in cash. the former cause at least Rs. 50,000 of the increase in 1884-85 were due, and larger sums in the following years. The remainder of the increase, of which two lakhs came under non-judicial stamps, and upwards of 10 lakhs under courtfees, was attributable to improved administration and greater facilities for fees, was attributable to improved administration and greater facilities for obtaining justice. The expenditure of this department, the contract grant for which was fixed in 1881-82 at Rs. 2,17,000, was Rs. 2,14,000, Rs. 2,20,000 Rs. 2,34,000; Rs. 2,46,000; and Rs. 2,43,000 in each year of the contract, the ultimate increase being only Rs. 26,000. More than half of this increase, small as it is, was due to the greater cost of the new description of court-fee stamps introduced during 1884-85 for greater security against fraud. The direct cost of raising the stamp revenue in Bengal was slightly over 3½ per cent.

39. Under the previous contract, the extraordinary development of the revenue from Excise, and the consequent profit to the Provincial revenues, were among the most striking features of the financial history of the period. Between 1877-78 and 1881-82 the receipts from this source rose from Rs. 68.68.000

Between 1877-78 and 1881-82 the receipts from this source rose from Rs. 68,68,000 to Rs. 93,74,000, or by close upon 25 lakhs of rupees; and the whole of this, except 4 lakhs, represented clear gain to the Local Government. Simultaneously the corresponding charges were reduced by improved administration from Rs. 3,06,000 to Rs. 2,73,000. This remarkable increase was due partly to the outstill system, the general adoption of which dates from the first year of Sir Ashley Eden's government and also to the bumper harvests, the activity of trade, and the general prosperity of the country which marked the three years 1879-80, 1880-81, and 1881-82.

A serious check in the excise revenue was anticipated by Sir Ashley Eden, and his anticipations were fulfilled to the letter. The flood tide of commercial and agricultural prosperity reached high-water mark in 1883, and the cbb was swift and extreme. The rainfall in that year was deficient and unevenly distributed; and though no actual distress occurred at that time, the advance in the price of food and the recession in the wages of labour in the western districts injuriously affected the settlements of the outstills, which are highly sensitive to seasonal influences. The revenue from country spirits in 1884-85 fell short of that of the previous year by Rs. 1,13,000 (the decrease being almost entirely in the Patna Division), and this would have been more than doubled but for a large apparent increase of Rs. 1,28,000 in Calcutta, which represented advance payments for the triennial period 1884-87. In 1884 and 1885 the rainfall was again unfavourable in quantity and distribution, and the failure the crops was so serious in parts of the Burdwan, Presidency, and Rajshahi Divisions as to exhaust the reserves of the villagers and necessitate Rajshahi Divisions as to exhaust the reserves of the villagers and necessitate the opening of relief works by Government. In 1883, a Commission was appointed under the presidency of Mr. Edgar. c.s.t., to enquire into the working of the outstill system and its chief recommendations were approved by Government and carried into effect. The Sadar distillery system was re introduced into all considerable towns where country liquor is the principal alcoholic drink of the people. These include Patna, Gaya, Arrah, Chapra, Bettiah, Muzaffarpur, Darbhanga, Monghyr, Jamalpore, Bhagalpur, Murshidabad, Berhampore, Burdwan and Dacca. The hours of working and sale were contracted. The sale of liquor to children was rigidly prohibited. District officers were instructed to allow District and Municipal Boards a voice in the selection of sites and other matters of local interest; and a large addition was selection of sites and other matters of local interest; and a large addition was made to the supervising and detective staff including ten Special Deputy Collectors, who were selected for their knowledge of and aptitude for excise work, and who were employed on that work alone. The increase of expenditure incurred in giving effect to these proposals was considerable.

41. The head of *Provincial Rates*, which is wholly Provincial, represents

principally the proceeds of the Public Works Cess, but it includes also the rates for the general management of Wards' and Attached estates, and from October 1886 the recoveries from District Funds of the proportional cost of collecting Road The contract estimate of receipts was taken in 1881-82 at Rs. 35,40,000, and the actuals in each year were Rs. 36,07,000, Rs. 38,15,000, Rs. 37,65,000, Rs. 38,71,000, and Rs. 39,95,000. The profit of the Local Government was therefore Rs. 67,000 in 1852-83, Rs. 2,75,000 in 1883-84, Rs. 2,25,000 in 1884-85, Rs. 3,31,000 in 1885-86, and Rs. 4,55,000 in 1886-87. This increase was due to revaluations which were in progress in almost every

district during the period of the contract.

42. The head of Assessed Taxes, which was wholly Imperial under the former contract, and was equally divided between Imperial and Provincial in the contract of 1882, represents the receipts of the abolished Licensetax. The Income-tax was at first wholly Imperial; and the figures shown under this head for 1886-87 merely represent the grants made by the Supreme Government—of amounts equal to those credited to Provincial in 1885-86—to avoid the disturbance of the contracts. The depression of trade, which marked the greater part of the period 1832—87, and which was intensified for Bengal by special causes, such as the through opening of the Rajputana-Malwa State Railway in the latter part of 1881, and the consequent diversion of a part of the trade of Northern India to Bombay, injuriously affected the receipts from this source. The contract of 1882 was framed on the basis of a revenue of Rs. 8,25,000 (Provincial share) from this source, whereas the actuals were Rs. 7,60,000, Rs. 7,59,000, Rs. 7,48,000, Rs. 7,67,000, and Rs. 7,67,000, respectively. The aggregate loss to the Provincial revenues exceeded therefore 3½ lakhs of rupees during the currency of the contract, notwithstanding that special efforts were made to ensure the accuracy of the assessments, and to prevent the escape of persons legally liable.

43. The Public Works Cess and the License-tax represent the taxation imposed in Bengal (the former being peculiar to the province) in connection with the scheme of "famine finance," with which the name of Sir John Strachey is associated. That scheme proposed to improve the financial position of the Empire to the extent of two crores of rupees a year, of which 50 lakhs were to be regarded as a normal working surplus, while 150 lakhs were to be devoted to famine insurance, being expended either on actual relief, on reduction of debt, or on the construction of remunerative works calculated to prevent or mitigate the severity of famine. Part of this sum it was proposed to provide by new taxation (i.e. by the License tax), and part by throwing additional charges on the Provincial Governments; but as far as Bengal is concerned, the whole contribution paid towards the so-called Famine Fund was raised by additional taxation; for the charges thrown on Provincial by the Contract of 1877, which consisted mainly of the interest on provincialized railways and canals, were met by the imposition of the Public Works Cess, which, as already stated, is peculiar to Bengal. The total net sum contributed by Bengal in each year since

1878-79 under these two heads was as follows:-

Net contribution (receipts, less conceipts, less conceipts).		1878-79.	1879-80,	1880-51.	1881-82.	1882-83.	1883-81.	1581-85.	1885-86.	1986-87.
Assensed taxes Provincial rates Total	::	Rs. 17,21,000 35,33 0 0 53,14,000	Rq. 20,83,000 85,67,000 56,55,000	R4, 12,18,000 84,63,000 46,86,000	R4, 15,43,000 35,03,600 50,46,000	Rs. 14 26,000 35 60,000 49,86,000	Rs. 14,22,000 37,68,000 51,90,000	R9, 15,02,000 ; 7,18,000 f 1,20,000	168. 14, 66,000 38,01,000 42,50,000	Rs. *14,46,000 88,59,000

* The substitution of the lineme-tax for the License-fax makes it impossible to determine the correct contribution to be paid in 1886-87. But it may be assumed that the License-tax, if continued, would have yielded the same amount as in 1885-86.

44. In 1880-81 the minimum assessable limit was raised to Rs. 500, with the result of exempting about 66,567 assessees of the poorest classes, and giving up about 5½ lakhs of net revenue. These figures show that since 1878-79, the first year in which the new taxes were in full operation, the prople of Bengal paid rather more than half a million sterling per annum as an insurance against famine. During this period the only expenditure in the province on actual relief of famine of the construction of protective works was as follows:—

	1878-79.	1879-80.	1880-81	1881-82.	1882-83.	1883-54.	16 4-85.	1885-86.	1986-87.	Total.
Famine Relief	Rs.	Rs.	Rs.	Rs-	Rs. 62,940 Nil. Nil. 62,940	Rs. 12,760 N.1. 3,00,000 3,12,760	14.84t N:1. 4.00,000 4,14,841	Rs. 1,23,840 Nii. Nii. 1,23,840	Rs. Nil. Nil. Nil. Nil.	Re. 2,14,381 7,60,060 U,14,381

45. Under the heads of Forests and Registration, the following figures compare the net revenue in each year with the contract estimate:—

Forests.—(1	Imperial	and I	Provincial

46. The Forest Department in Bengal is of comparatively little importance from a revenue point of view; and during 1882-87 the depression of trade caused a slackness in the demand for timber, especially for railway sleepers. The operations of the five years resulted in a small aggregate profit of Rs. 38,000. From 1883-84 revenue record-room receipts and charges were transferred from Registration to Land Revenue. These averaged about Rs. 85,000 and Rs. 70,000 a year respectively, so that the net revenue under Registration was really about Rs. 15,000 a year more than appears from the above statement. Allowing for this, it will be seen that the net revenue from this source increased in five years from Rs. 3,83,000 to Rs 4,91,000, or by over 28 per cent., while the profit of the Provincial Government amounted to Rs. 2,22,000 during the whole period of the contract. These satisfactory results were due to the steady introduction of rural in place of official agency, and to the increase of registrations consequent on the passing of the Bengal Tenancy Act.

47. Under the heads of Law and Justice (proper) and Juils the contract worked very unfavourably for the Local Government. On the receipt side the

worked very unfavourably for the Local Government. On the receipt side the contract estimate was taken at 9 lakhs and 7 lakhs, respectively, the former including an item of 8 lakhs under the subhead of general fines, fees, and forfeitures, while the latter was almost wholly composed of the sale proceeds of jail manufactures. Under the latter head the estimate was realised, except in 1883-84, when the orders of Lord Ripon's Government restricting jail manufactures reduced the receipts from that source to Rs. 6,38,000. The total receipts from jails in each year were Rs. 8,47,000, Rs. 6,44,000, Rs. 7,29,000, Rs. 7,87,000, and Rs. 7,45,000, against the contract estimate of 7 lakhs. The receipts from fees and fines, however, never came up to the estimate, and the total receipts under Law and Justice (proper) were Rs. 8,23,000, Rs. 7,64,000, Rs. 7,55,000, Rs. 7,41,000, and Rs. 7,56,000, against the contract estimate of 9 lakhs. The net loss on the whole contract was about 4 lakhs of rupees. The expenditure on these two branches of the administration rose from a contract estimate (1881-82) of Rs. 88,33,000 to Rs. 96,19,000 in the last year, and the deficit which had to be made up from other sources was Rs. 4,43,000, Rs. 4,85,000, Rs. 5,76,000, Rs. 9,06,000, and Rs. 7,86,000 in each year since the contract was framed. Valuable reforms were carried out in the

Jail Department, including the reorganisation and complete equipment of the personnel of the superior staff, the development of the Central Jails at Dacca and Midnapore, the establishment of a district jail at Khulna, the introduction of warder guards in place of police, the establishment of a new Juvenile Reformatory at Hazaribagh, and the large development of that at Alipore. These measures cost nearly 1½ lakhs per annum. The rise in the price of food increased the expense of dieting prisoners by an equal sum though the jail population steadily diminished in numbers. During the five years, the pay of the Subordinate Judicial Service was improved at a cost of about 1½ lakhs a year. Seven Subordinate Judges and 12 munsifs were added to the permanent staff, while numerous temporary officers were appointed. Three additional Judges were temporarily appointed to clear off arrears in the High Court. For the rest, the increase in litigation caused a steady continuous increase in the charges for ministerial establishments, for the service of processes, and for the copying of judicial documents.

48. Under the head of *Police* the contract grant was fixed at Rs. 41,32,000, and the actual expenditure in 1881-82 was Rs. 40,87,000. From the beginning of 1882-83, however, the cost of police in mufassal municipalities was assumed by Government, and a charge of about 4½ lakhs per annum, for which the terms of the contract made no provision, was thus added to the Provincial burdens. There was a set off against this of about one lakh under Medical, and half a lakh under Education, on account of various charges which were simultaneously transferred to Municipal Boards; and the net cost of this reform was about 3 lakhs a year since the beginning of the contract. This was increased by Rs. 61,000 a year from the beginning of 1884-85, when by Act IV (B.C.) of 1884 a similar measure of relief was extended to the Howrah and Suburban Municipalites, which since then paid only Rs. 49,000 a year for police, instead

of Rs. 1,10,000 a year as formerly.

49. Under *Marine* the net receipts and charges in each year since 1882-83 were as follows:—

Samuel Administration of the Control		Contract esti- mate.	1882-83.	1883-84.	1884-85.	1885-86.*	1886-87.
Gross receipts* Charges	•••	Rs11,09,000 10,97,000	Rs. 10.17,000 9,51,000	Rs. 9,61,000 8,69,000	Rs. 8,37,000 8,47,000	Rs. 9,16,000 8,29,000	Rs. 9,62,000 8,53,000
Net receipts Net charges	•••	12,000	66,000	92,000	10,000	87,000	1,09,000

Includes in each year a special allotment of Rs. 65,000 for the cost of the Undawsted, credited under cand Revenue.

The falling off in receipts was wholly due to the stagnation of trade. In 1881-82, the last year of Sir Ashley Eden's administration, the number of vessels which entered the Port of Calcutta was 1,074, with a total tonnage of 1,808,005, while the number of clearances was 1,058, with a total tonnage of 1,774,084. In both cases the number of vessels and the aggregate tonnage reached the highest figure ever recorded at Calcutta. By 1884-85 the shipping had fallen to 903 entries with a tonnage of 1,729,874, and 923 clearances with a tonnage of 1,745,271, representing the smallest aggregate trade that has visited Calcutta in any year since the opening of the Suez Canal.

Calcutta in any year since the opening of the Suez Canal.

Except in respect of pilotage the Bengal Marine Department is of little importance. The only matters of note during the five years 1882-87 were the grant of a subsidy of Rs. 35,000 a year to Messrs. Macneill and Company since 1883-84 for a rapid steamer service between Dhubri and Dibrughar; and a grant of Rs. 10,000 a year to the same firm, for a similar service to Sylhet. In both cases the subsidies were supplementary of similar grants made by the

Chief Commissioner of Assam.

50. The expenditure on Education was taken in the contract estimates at Rs. 26,77,000. The actual expenditure in each year was Rs. 30,16,000 Rs. 31,55,000, Rs. 34,00,000, Rs. 52,95,000, and Rs. 33,54,000. Up to 1884-85 it was possible to provide annually increasing allotments for this branch of service, but since then the demands of other Departments swallowed up

the scanty increments of the Provincial revenues, and educational expenditure remained stationary. Efforts were, however, made to give effect to the recommendations of the Education Commission. The inspecting staff was strengthened by the appointment of two new Inspectors of Schools, four Joint and Assistant Inspectors, three Deputy Inspectors, and 16 Sub-Inspectors, while the pay of the latter class of officers was raised to Rs. 50 wherever it was less than that sum. These measures were carried out at a cost of Rs. 60,000 a year. The primary grant was gradually raised from 5 lakhs, at which it stood at the close of Sir Ashley Eden's term of office, to $7\frac{1}{2}$ lakhs; while the annual provision for grants in-aid of schools managed by independent agency was simultaneously raised by upwards of $1\frac{1}{2}$ lakhs. The transfer of police charges to Government enabled Municipal Boards to increase their expenditure on education by upwards of Rs. 60,000 a year. The limited resources at the disposal of Government made it impossible to do much in the way of developing technical education, but it was not altogether neglected. The Engineering College at Sibpur was enlarged and developed, and the School of Art in Calcutta was sedulously encouraged, and made rapid strides in the number of its students and the quality of the instruction imparted.

51. The operation of the contract was more keenly felt in the Public Works Department than in any other branch of the public service. The Government of India originally proposed to settle the terms of the contract on the basis of a normal expenditure of 75 lakhs a year for public works of all kinds, including the maintenance, repair, and working expenses of all railways and canals, the construction of new works, and the construction, maintenance and repair of civil roads and buildings, but exclusive of interest charges. Sir Ashley Eden strenuously urged that the grant should not be less than 99 lakhs, the average of the preceding three years, but eventually the offer of the Government of India was accepted with the modification that a lump sum of 15 lakhs,

equivalent to 3 lakhs a year, was credited to the Local Government.

52. The following table shows the actual expenditure incurred in each year since 1881-82:-

The second secon	1881-82.	1882-33.	1883-84.	1884-85.	1885-86.	1886-87.
State Railways (Capital).	Rs. 11,32,000	Rs. 18,49,000	Rs. 8,27,000	Rs. 1,32,000	• Rs. 51,000	Rs. 58,000
Subsidised Railways Irrigation (Capital) Civil works	22,09,000. 66,8 7, 000	11,000 17,18,000 66,82,000	40,000 5,03,000 45,75,000	58,000 2,02,000 27,15,000	26,000 3,77,000 27,27,000	1,000 2,18,000 38,85,000
Total	1,10,28,000	1,02,60,000	59,45,000	31,07,000	31,81,000	41,62,000

The dwindling of the grants under every head was most striking. During the first two years of the contract funds were provided, though with difficulty, for the Dinajpur branch of the Northern Beugal State Railway, and for the completion of the Diamond-Harbour branch of the Calcutta and South-Eastern Railway, the whole cost of which was found from Provincial revenues. With the completion of these works, the construction of railways from Provincial funds was entirely suspended, the small sums shown in 1884-85 and subsequent years being merely on account of the Kaunia-Dhurlla State Railway which is a Provincial work. In respect of irrigation works, the course of events was almost precisely similar. No new work of any kind was undertaken during the term of the 1882-87 contract, and it was with the utmost difficulty that funds were provided for the improvement of the Calcutta canals, and the prosecution of the Orissa Coast Canal, both of which works had been undertaken during Sir Ashley Eden's term of office. The Orissa Coast Canal, designed to place Orissa in inland communication with Bengal, and likely to be of the highest value in the event of famine, was begun in 1881. The final opening of the canal was delayed in consequence of unexpected difficulties in locking the Burrabulong river, and of the damage done by the cyclone of September 1885, which also caused the estimates to be exceeded. This work was admittedly protective in its nature, and its

importance chiefly consists in the security it is calculated to afford against Yet the only assistance which the Bengal Government received in its construction from the Famine grants consisted of two grants of three and four lakhs respectively, given on the condition that the Imperial Government should share proportionately in the receipts. The whole of the remainder of the cost, which was expected to amount to nearly 40 lakhs, was provided from Provincial Funds, and nearly 20 lakhs of this were found during the currency of the contract.

54. During the first two years of his administration, Sir Rivers Thompson endeavoured to provide for the completion of works in progress and to meet the demand for new works to the full extent of the balance at credit of the The offices of the Bengal Government in Calcutta were completed, court-houses were completed or constructed at Jessore, Mymensingh, Faridpur. Pabna, Gaya, Ranchi, and Darbhanga; jails at Dacca, Midnapore, Buxar, Gaya, Ranchi, Darbhanga, Bogra, Mymensingh and Purulia; the Secretariat offices at Darjeeling since converted into the Deputy Commissioner's Court were begun; numerous sub-divisional court-houses and munsifis were constructed, and a variety of miscellaneous public improvements carried out. By the end of 1883-84, however, the Provincial balances had been reduced to Rs. 6,87,000, and at this juncture the Secretary of State issued orders that they should not ordinarily be allowed to fall below 20 lakhs. The Public Works grant for 1884-85 including Civil Works in charge of Civil Department was therefore restricted to 30 lakhs; and that for 1885-86 was, under pressure of the complications on the North-West frontier, cut down to Rs. 27,85,000.

55. Sir Rivers Thompson's power of making contributions from the Provin-

cial revenues in aid of public objects was greatly circumscribed by financial pressure. The expenditure in no one year exceeded Rs. 3,20,000, and averaged about $2\frac{1}{2}$ lakhs a year; and when it is remembered that nearly $1\frac{1}{2}$ lakhs a year represent compulsory payments of an official nature, the available balance is seen to be exceedingly small. Nevertheless, it was found possible to give grants of Rs. 50,000 each to the municipalities of Burdwan, Bhagalpur, and the Suburbs of Calcutta in aid of local schemes of water-supply; of Rs. 46,000 to the District Road Committee of the 24-Parganas; of Rs. 55,000 to that of Champaran; and of Rs. 20,000 to that of Nadia, for feeder roads; of Rs. 30,000 to the Darjeeling Municipality for the construction of a market, a wire tramway for the removal of rubbish, and other local works; of Rs. 10,000 for the improvement of the town of Chittagong; of Rs. 15,000 for drainage works in Scrampore; and of numerous smaller amounts to District Road Committees and Municipal Boards for miscellaneous objects. The Lieutenant-Governor also and Municipal Boards for miscellaneous objects. The Lieutenant-Governor also gave large grants from the balance of the Wahabee Fund for the improvement of the town and district of Patna, including a sum of Rs. 30,000 for a much needed road from the city chowk to the Railway Ferry Ghat, and a grant-inaid of Rs. 10,000 towards the Anglo-Arabic School established for the special encouragement of Muhammadan education.

The following table shows the net financial result of the working of all Provincial Railways and Canals, whether technically classed as Productive

Public Works or not, during each year from 1831-82 to 1886-87.

RAILWAYS

		TVX1.	UWALD.

By the end of 1881-82, when the contract of 1877 came to an end, the total capital expenditure on State Railways in Bengal (exclusive of the East Indian Railway and private lines) amounted to 427 lakhs of rupees, and the mileage of lines open for traffic was 467. Interest, however, was payable only on 336 lakhs, the remainder consisting of Provincial contributions and the capital of the Calcutta and South-Eastern Railway. The principal lines which were then under the control of the Government of Bengal were the Northern Bengal State Railway with an open mileage of 230, the Tirhoot State Railway with 85 miles, the Patna-Gaya with 57 miles, the Calcutta and South-Eastern Railway with 33, and the Kaunia-Dharla (a Provincial railway) with 40. During the five years 1882-87, 19 miles were added to the Northern-Bengal State Railway by the opening of the branch to Dinajpur; the Tirhoot system was practically completed by the construction of branches to Bettiah, Jhinjarpur, and Hajipur, aggregating about 160 miles; a branch of the Calcutta and South-Eastern State Railway was constructed to Diamond Harbour; and an entirely new line, 85 miles in length, was constructed connecting Narainganj, Dacea, and Mymensingh. A swift daily steamer service was started between Narainganj and Goalundo on the Eastern Bengal State Railway, and the chief districts of Eastern Bengal were thus placed in close communication with Calcutta. These works cost 147½ lakhs of rupers, of which upwards of 124 lakhs bore interest at 4 per cent., the remainder having been provided from the Provincial revenues. Seventy-eight lakhs and a half were spent on the Assam Bihar State Railway, designed to link the Tirhut and Northern Bengal systems, and including the important bridge across the Gunduck to connect the Tirhut line with the Bengal and North-Western Railway. The early part of the contract of 1882-87 witnessed unusual activity in the construction of railways by private agency. Short branch lines were constructed by private bodies and firms connecting Tarkessur with Scoraphuli on the East Indian Railway and Baidyanath with Deoghur and Rohini. The Central Bengal Railway Company constructed lines aggregating 125 miles in length, connecting Ranaghat on the Eastern Bengal State Railway with Bongong and Khulna; and the Bengal and North-Western Company, receiving a guarantee from the Imperial Government, constructed a valuable and most successful railway, 460 miles in length, from the North-Western Provinces to Sonepore on the Ganges opposite Patna.

57. The table given in the last-preceding paragraph shows that while the gross receipts on the State Railways rose from Rs. 32,70,000 to Rs. 53,02,000 (or, excluding the Calcutta and South Eastern Railway, from Rs. 31,10,000 to Rs. 52,72,000), this improvement was accompanied by so heavy an increase of working expenses and interest that the net loss to the Provincial Government during the five years covered by the contract was Rs. 4,65,000. A considerable part of this was due to the locking up of capital on lines not yet open for traffic, or still in their infancy. For instance, close upon 90 lakhs of rupees was spent upon the Assam-Bihar line. The Bengal Government had to pay 4 per cent. per annum on this capital, which of course represented so much dead weight to be carried by the open lines. Similarly, 64 lakhs were spent on the Dacca State Railway, which, though certain to yield a handsome retu n ultimately, could do little more during the contract than pay its working expenses. For similar reasons part of the capital expended on the Tirhoot State Railway was only partially

productive. But much of the retrogression was undoubtedly due to the stagnation of trade in the years succeeding 1883-84, combined with the failure of the food grain harvests in parts of Bihar, and of the jute crop in Bengal. The only Provincial railways of importance which were open sufficiently long for a fair comparison are the Northern Bengal, the Patna-Gaya, and the Tirhoot State Railways. The following table shows the capital outlay on each of these lines (both Imperial and Provincial), the gross receipts, working expenses, net earnings, and percentage of earnings to capital, in each year from 1881-82 to 1885-86:—

NORTHERN BENGAL STATE RAILWAY.

58. The net results of the working of the canals under the Bengal Government fluctuated less, chiefly for the reason that deficient rainfall, which tends to contract the traffic on railways, stimulates the demand for water for irrigation purposes. The works managed by the Bengal Government included the Orissa and Midnapore Canals, the Hidgeliee Tidal Canal, and the Sone system, which are classed as Productive Public Works; and the Orissa Coast Canal, the Calcutta and Eastern Canals, the Nuddea works, and the Saran and Damoodar Canals, which are not classed as productive.

59. The general financial result of the contract of 1882 may be summarised thus—the revenue, which was estimated at Rs. 3,93,21,000, averaged

Rs. 4,15,52,000, giving an increase of Rs. 22,31,000; the expenditure, which was estimated at Rs. 4,48,53,000, averaged only Rs. 4,26,61,000, being a reduction of Rs. 21,92,000; and the deficit, which averaged Rs. 11,09,000, was.met by drawing upon the accumulated balances of the province to the extent of Rs. 55,44,000. The chief branches of revenue which contributed to the increase in receipts were Stamps, Provincial Rates, and Registration; while the reduction in expenditure was almost wholly confined to the Public Works Department, in which the grants for civil works, for capital expenditure on railways and canals, and for irrigation (net charges) were cut down so as not merely to balance the account, but to provide for a large increase of expenditure on Revenue establishments, Judicial Courts, Jails, Police, Education, Superamnuations, and the net charges of Provincial State Railways. The contract closed with a credit balance in the Imperial Treasury of only Rs. 19,99,000, which was short by Rs. 1,000 only of the minimum working balance of twenty

lakhs which had been prescribed by the Secretary of State.

From these figures, and from what has gone before, it may readily be perceived how different was the task imposed on Sir Rivers Thompson from that which fell to the lot of his predecessor. Sir Ashley Eden enjoyed the advantage of a contract, which secured to the province under his control the entire benefit accruing from improved administration, and which in the event yielded financial results surpassing all anticipation. His term of office was favoured with entire immunity from famine and other forms of natural disaster; the commercial torpor then paralysing the industries of the civilized world had not yet spread to India; and a succession of splendid harvests raised the cultivating classes almost into temporary affluence. The ample resources thus unexpectedly brought within his reach he liberally employed in improving many branches of the machinery of Government and in supplying the province with railways, canals, public buildings and other permanent improvements, of which the want had long been admitted. During the five years 1882-87, the financial history of Bengal was altogether different the five years 1882-87, the financial history of Bengal was altogether different. The contract of 1877 was succeeded by a settlement, which left little scope for the development of the Provincial revenues, and which speedily necessitated a serious contraction in the scale of Provincial expenditure. at last succumbed to the influences which had produced universal stagnation in the commercial world of Europe and America, and its languishing vitality was promptly reflected in many branches of the public exchequer. A scanty and uneven rainfall in three years in succession swallowed up the profits of five years of plenty, and although actual distress was nowhere so acute as to call for the intervention of the State, except on a small and partial scale, in many districts the resources of the poorer classes were wholly exhausted, and no margin whatever left for expenditure on luxuries. It was often difficult to provide adequately for the ordinary requirements of the public service, and it was necessary rather to seek for opportunities of effecting economies than of introducing administrative reforms. The chief measures of Sir Rivers Thompson's Government of Bengal were of the class to which large financial resources are not indispensable. The Bengal Tenancy Act, the prosecution of the Kidderpore Docks for which the capital was found by the Government of India, the grant of an elective constitution to Municipal the Government of India, the grant of an elective constitution to Municipal Boards, the inauguration of self-government in the interior, the introduction of competitive examinations for appointment to the Subordinate Civil Service, the appointment of the Commission for the revision of ministerial salaries, and the re-arrangement of work and authority in district and divisional offices—all these are measures whose importance is mainly economic and political and which leave little trace on the financial history of the time. Nevertheless funds were provided for certain reforms and improvements which the progress of the province had rendered more than ordinarily pressing. The establishment of an Agricultural Department supplied a want to which in other provinces a much higher degree of priority had been attached, and which the revision of the law of landlord and tenant in Bengal had forced into immediate prominence. The increase to the salaries of the Subordinate Executive and Judicial Services improved the prospects of a deserving body of public servants. The appointment of additional judicial officers supplied the means of a swifter, and therefore of a better, administration of justice. The progressive additions to

the grant for primary education kept pace with the downward filtration among the masses of the desire for mental improvement. The Calcutta Exhibition of 1883-84 was instrumental in spreading a wider knowledge of the raw products of India among the manufacturers of Europe, and in acquainting the native population of this country with the capabilities of European machinery. In taking over and carrying on the Iron-works at Barrakur, the Lieutenant-Governor kept alive the embers of an industry which cannot fail to have a great future before it, when the mineral wealth of Chota Nagpur and Central India shall have been adequately exploited. The Orissa Coast Canal was a work of supreme importance for the security of the province of Orissa, and its speedy completion forms the only safeguard against a repetition of the calamity of 1865-66.

61. The following comparative statements show the results under receipts and expenditure according to the contract assignment with the Government of India for the five years 1887-92 compared with the actuals of the subsequent years:—

^{62.} The contract of 1887 between the Government of India and the Government of Bengal was based on arrangements made by the Finance Committee. No material advance in the system of decentralisation was made, but by a redistribution of the shares of the Imperial and Provincial Governments in the three principal heads of Land Revenue, Stamps and Excise, and by certain reductions in expenditure which were considered feasble, a general standard of normal revenue and expenditure was obtained, which was adopted as the "Ruling account." The surplus of this account,

amounting to Rs. 6.89,000, was appropriated by the Government of India through the Land Revenue head, leaving the province with a Revenue and Expenditure exactly equal. Under this arrangement the Government of Bongal was admitted to a quarter share in the land revenue collections, except those from Government estates, whilst under Stamps and Excise its share was changed from one-half to three-fourths and one-fourth respectively. The proportion of charges under Stamps and Excise followed the proportion of receipts. The cost of surveys and settlements and the maintenance of agricultural works and embankments was made entirely Provincial. Refunds and drawbacks followed the proportions assigned for the revenues. The Patna-Gaya State Railway was made Imperial, and the Eastern Bengal State Railway System Provincial, with this reservation that any excess over 30 lakhs in the net revenue from the Eastern Bengal State Railway proper would be credited to Imperial revenues, and that any deficiency below 20 lakhs would be made good by Imperial to Provincial. The interest on funds provided for outlay on State Railways and Irrigation Major Works was borne by the Provincial revenues and calculated on the entire capital outlay, including loss by exchange, from the commencement of operations, but excluding the amount advanced from Provincial revenues during the term of the contract.

The only important change made since the contract was finally settled was the transfer of the management of the Tirhoot State Railway to the Bengal and North-Western Railway Company from 1st July 1890. This change did not, however, materially affect the resources of the Provincial Government, although its accounts were swollen by the inclusion of the receipts and working expenses of the Railway, and the payment of the Company's share of the net receipts

from the entire undertaking.
63. The first year of the contract, 1887-88, was a period of comparative prosperity. The receipts under the principal heads of revenue were highly favourable. Railways showed a great advance above the contract estimate, and at the same time there was a large reduction of expenditure in the Civil Department. To a considerable extent this reduction was fictitious, as the savings under the head of Education were adjusted by corresponding grants made to District Boards. But these adjustments were not completed within the year, and while the accounts closed with a small increase of expenditure over the contract assignment of only Rs. 3,90,189, the increase in receipts was Rs. 17,00,256. The net surplus of

the year was Rs. 13,10,067 and the closing cash balance Rs. 33,08,991.

64. The year 1888-89 opened accordingly under favourable conditions. But the harvest generally was a poor one, and the clasticity of the revenues which had been marked under several years of prosperity suffered a severe check. For the first time for many years the stamp revenue receded. But the income from railways continued to show a satisfactory increase. It was from this cause mainly that the total receipts of the year were about 61 lakhs of rupees more than they were in 1887-88. The expenditure side showed, however, an increase of nearly 26 lakhs. This was largely due to the increased grant for civil works of about 11 lakhs. This grant was made when it was known that the credit opening balance of the year was more than 33 lakhs, and financial prospects in other directions were generally good. The additional grant was urgently required and was very profitably expended. There was an unavoidable increase in expenditure under Railways, under Contributions to District Boards, and an augmented outlay under most heads of general administration. The net financial results of the year were, however, less unsatisfactory than was at one time anticipated. The accounts closed with an increase of expenditure over the contract assignment of Rs. 29,88,922, and an increase in the receipts of Rs. 23,31,003. The net deficit was Rs. 6,57,919, and the closing cash balance was reduced to Rs. 26,51,072.

65. The receipts of the year 1889-90 were generally satisfactory. The principal heads of revenue showed a large increase, of which, however, about 2½ lakhs were due to special assignments from the Government of India to the Local Government for special works, principally the Orissa Coast and Hijili Tidal Canals which, under the rules in force, are shown under the head of Land Revenue, and a grant of Rs. 1,91,423 was made under the same head for a new pilot brig. A grant of two lakes was also made to the Provincial Government with effect from that year on account of the cost of the Metropolitan

Stamps, Provincial rates, Assessed taxes, Forests and Registration all showed an increase. The item of Land Revenue proper was augmented by the payment of large arrears of revenue due from the Burdwan Raj estate for the preceding year. The receipts from Railways increase I by nearly eight lakes of rupees. On the other hand, there was a falling off in Excise, and the prospects of the year, which would otherwise have been very avourable, were clouded by bad harvests and distress in Bihar and Orissa. The increase in expenditure under ordinary heads was not more than mu t be expected under a progressive administration. A larger outlay was necessary to ensure a larger revenue. The increase under Police was principally due to the conve sion of the entire cost of the Calcutta and Suburban Police as a Provincia' charge with effect from the 1st April 1889, and under Marine to the purchase of the steamer The outlay on Famine Relief was of a special nature. The expenditure on Civil Works was curtailed. The accounts closed with an increase of expenditure over the contract assignment of Rs. 39,62,030, and an increase in the receipts of Rs. 49,87,505. The net surplus of the year was Rs. 10,25,475, and the closing cash balance amounted to Rs. 36,76,547.

66. The financial position of the year 1890-91 was primarily affected by the payment of ten lakhs of rupees, which was transferred under the orders of the Government of India from Provincial to Imperial revenues. This payment was adjusted under the head of Land Revenue. The large increase under Railways was principally due to the inclusion of the gross receipts of the Bengal and North-Western Railway for the last nine months of the year. There was a corresponding increase on the expenditure side, and the net surplus was discounted by a credit for 10½ lakhs taken by the Government of India under the head of Land Revenue on account of the estimated net earnings of the Company for the nine months, from July 1890 to March 1891, which were not paid during the year. A credit for Rs. 3,17,000 was taken under Civil Works, being the estimated value of a portion of land in the Custom House premises made over to the East Indian The financial position of the year 1890-91 was primarily affected by the portion of land in the Custom House premises made over to the East Indian Railway Company for the extension of their office building. The ordinary heads of revenue showed but little expansion, while the expenditure, on the contrary, showed a tendency to increase under almost all heads. There was a large increase under Land Revenue on account of Surveys and Settlement; under Law and Justice on account of the increase in Civil Courts; under Railways as already explained; and also under Irrigation and Civil Public Works. A special grant of four lakhs was made from Provincial Revenues to the Public Works Department to undertake urgent works, and especially to detray the cost of repairs and maintenance of the roads in the Darjoeling district, which had been much damaged by heavy rains, and to construct new feeder roads to the Railway in Chota Nagpur.

67. For the year 1891-92, the last year of the contract, the total revenue under all heads of account amounted to Rs. 5,78,01,983, which was Rs. 1,13,54,983 in excess of the figures in the contract assignment. But at the same time the expenditure had increased in a still larger proportion, and amounted to Rs. 5,79,21,326 or Rs. 1,14,74,326 in excess of the assignment.

The following table shows the receipts under the principal heads of revenue according to the contract assignment, and the receipts under the same heads for 1891-92:-

01 1001 041	Contract	Actuals, 1891-92.	It crease.
	Rs.	Rs.	\mathbf{Rs}
Land Revenue (proper)	98,53,000	1,00,21,000	1,68,000
Ditto adjustment .	()6,89,000	+13,81,000	20,70,000
Salt	1,00,000	1,11,000	11,000
Stamps	1,00,87,000	1,13,25.000	12,38,000
Excise	24,82,000	• 27,83,000	3, 01,000
Provincial rates (proper).	39,20,000	41,60,000	2,40,000
Ditto (recoveries of ce	88		
collection charges from	m		
District Boards) .		3,65.000	3,65,000
Customs	57,000	57,0 00	Nil.
Assessed Taxes .	17,84,000	21,54,000	3,70,000
Forests	3,50,000	3,95,000	45,000
Registration	5,38,000	6,67,000	1,29,000
Total .	2,84,82,000	3.34,19,000	49,87,000

69. The large increase under Land Revenue was due to special assignments from Imperial to Provincial Funds, which are adjusted under this head. The other increases arose from the natural expansiveness of the revenues, especially under the head of Stamps and Assessed Taxes. The increase under Provincial Rates was principally due to a change in procedure under which the cost of collecting the Road and Public Works cesses is adjusted under Provincial Rates, the share debitable to district funds being shown as receipts under the same head. After eliminating adjustments and transfers of account, the real increase credited to the Provincial revenues under principal heads during the last year of the contract came to Rs. 25,02,000.

70. Under Railways there was an extraordinary increase during the same

70. Under Railways there was an extraordinary increase during the same period of from Rs. 1,00,19,000 to Rs. 1,60,40,000, or nearly 60½ lakhs of rupees, of which nearly half was nominal and due to the inclusion of the receipts of the Bengal North-Western Railway, while the remainder was a real Provincial asset derived from the successful administration of the Eastern Bengal

Railway System.

71. A comparative statement of the expenditure under Revenue heads is also shown in detail—

			Contract assignment.	Actuals, 1891-92.
₩			$\mathbf{Rs.}$	${f Rs.}$
Refunds and drawbacks	•••		1,55,000	1,54,000
Assignments and compen	sation		1,68,000	1,66,000
Land Revenue	` • •		34,08,000	41,14,000
Salt	•••	•••	11,000	52,000
Stamps	•••		3,75 ,000	8,39,000
Excise	•••	•••	96,000	1,66,000
Provincial rates	•••		*****	4,34,000
Customs	•••	•••	4,97,000	5,19,000
Assessed taxes	•••		85,000	90,000
Forests	•••	• • •	2,25,000	2,10,000
Registration	•••	•••	2,95,000	3,42,000
•	Total	•••	53,15,000	65,86,000

72. The increase in round numbers amounted to 123 lakks of rupees. The increase under Land Revenue was principally due to surveys and settlements. The increase of expenditure under Excise was the necessary accompaniment of the important changes which were made in the administration of this Department. The new charge shown under Provincial Rates is a matter of account only, and represents the cost of collecting the cesses in the districts to which the Local Self-Government Act has been extended. The other returns do not seem to call for explanation.

73. The items which compose the major head of Salaries and Expenses of the Civil Department may be compared as follows:—

•	-	•	C	ontract assignment.	Actuals. 1891-92.
				$\mathbf{Rs.}$	${f Rs.}$
General Adminis	stration	•••	•••	15,62,000	16,16,000
Judicial Courts	•••			80,11,000	84,83,000
Jails		•••		17,28,000	20,22,000
Polico		•••	•••	47,48,000	59,62,000
Marine		•••		7,81,000	9,42,000
Education	•••		•••	32,46,000	25,52,000
M.cdical	•••	•••	•••	14,59,000	15,67,000
Political	•••		•••		34,000
Scientific and ot	her Minor	Departments	•••	3,30,000	3,13,000
		Total		2,18,65,000	2,34,91,000

74. Under some of these heads the increase in expenditure was very large. The increase of nearly 4½ lakhs under Judicial Courts represents the financial effect of the increase which was found necessary in the number of Subordinate Judges and Munsifs and judicial establishments generally. The increase under Jails was on account of the large outlay on machinery and manufactures, and was in a measure

counterbalanced by a corresponding increase in receipts. The increase in the cost of Police amounts to nearly 12 lakhs of rupees. This was partly due to the cost of the Metropolitan Police, which was provincialised, partly to the large expenditure incurred in connection with subjugation of the South Lushai country and the formation of the South Lushai Hill District, and partly to the improvements effected in the Police Department in consequence of the recommendations made by the Police Commission. The reduction under Education is fictitious only. A great portion of the expenditure under this head has ceased to be departmental, but is incurred by District Boards to which an equivalent grant is made for the purpose under the head of Contributions. A portion of the increase under the head of Medical was due to the establishment of a Sanitary Board.

75. Miscellaneous expenditure increased from Rs. 26,61,000 to Rs. 32,31,000. There was, however, a decrease under Miscellaneous (proper), and the real increase under this heading was due to Superannuation or pensionary charges, which rose from Rs. 12,54,000 to Rs. 16,00,000, and also to increased charges under Stationery and Printing, mainly on account of the census operations.

76. The expenditure on Railways increased from Rs. 87,63,000 to

Rs. 1,42,64,000; of this amount the major portion was due to the inclusion of the working expenses of the Bengal and North-Western Railway and the Company's share of net receipts.

77. Irrigation expenditure increased from Rs. 45,69,000 to Rs. 53,32,000. The Interest charge rose from Rs. 22,94,000 to Rs. 24,03,000, and the remainder was due to expenditure on works. A large share of the expenditure on the Orissa Coast and Hidgilee Tidal Canals was contributed by the Government of India and credited under the head of Land Revenue.

The increase in expenditure on Civil Works from Rs. 31,14,000 provided in the contract to Rs. 40,25,000 in 1891-92 was unavoidable with

reference to the necessities of so large a province.

The increase under Contributions from Rs. 1,59,000 to Rs. 8,79,000 was due to the development of Local Self-Government and the assignments it was necessary to make to local bodies in order to maintain an equilibrium between their receipts and the expenditure imposed on them.

H. H. RISLEY,

Secretary to the Government of Bengal.

The 1st April 1893.

RETIREMENT OF LIEUTENANT PETLEY, RN., FROM THE APPOINTMENT OF PORT OFFICER, CALCUTTA.

No. 834 Marine.

GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

Dated Calcutta, the 4th April 1893.

RESOLUTION.

READ-

Letter No. 132 of 30th January 1893, from the Government of India, Marine Department.

Letter No. 1175 of 1st April 1893, from Captain B. P. Creagh, R.I.M., reporting taking over charge of the appointment of Port Officer, Calcutta, from Lieutenant E. Petley, R.N., on the forenoon of the 1st of April 1893.

THE Lieutenant-Governor desires to record his appreciation of the valuable services rendered to this Government by Lieutenant E. Petley, R.N., during the five years during which he has held the appointment of Port Officer. Calcutta.

five years during which he has held the appointment of Port Officer, Calcutta.

During Lieutenant Petley's tenure of office, he has, with the approval of Government, effected changes which have proved to be of much advantage to the junior officers of the Hooghly Pilot Service, of which he has been a respected and efficient administrator. Further, Lieutenant Petley's excellent relations with the commanders of merchant vessels frequenting the port, has enabled him to give the Lieutenant-Governor much useful information on difficult Marine questions. Sir Charles Elliott is glad that the Port of Calcutta will continue to benefit by Lieutenant Petley's knowledge and experience, as he retains the appointment of Deputy Conservator under the Port Commissioners.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,
Secretary to the Govt. of Bengal.

DISTRICT ROAD FUND.

No. 2115R.C.

GOVERNMENT OF BENGAL-PUBLIC WORKS DEPARTMENT.

Road Cess.

Dated Calcutta, the 4th April 1893.

RESOLUTION.

READ-

Letter from the Accountant-General, Bengal, No. 934L.F., dated 24th March 1893, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st December 1892.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the third quarter of the year 1892-93 be published in the Calcutta Gazette and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the Calcutta Gazette.

Ordered also, that a copy of this Resolution and of the abstract referred to, be forwarded to the Commissioners of the Rajshahi, Bhágalpur, Chittagong and Chota Nagpur Divisions; to the Superintending Engineers of the Northern and Western Circles; to the Inspector of Works, Eastern Circle; and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE, Secretary to the Govt. of Bengal.

Baplemeston. indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when as less!

OALCUTTA, the 4th April 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 1st OF APRIL 1893.

At the close of the previous week fine settled weather with an entire absence of rainfall obtained over the whole province; the distribution of pressure was also fairly normal for the hot season, though winds were more strongly westerly than usual, while temperature was still decidedly below the normal for the period. Practically also throughout the present week ordinary and fairly settled hot weather conditions have obtained, and the meteorological changes generally have been of comparatively little importance except that the unusual defection the temperature, which has been so prominent a feature for a considerable period, has been slowly but fairly steadily decreasing in amount. On the 26th of March a moderately rapid but fairly equal fall of pressure had taken place over the whole province, and the distribution of pressure became nearly normal for the day. On the 27th pressure was almost unaltered, but temperature had rison by about one or two degrees, while winds were becoming more southerly, and generally south-westerly winds were reported. On the 28th a further moderate fall of pressure had occurred, and slight defects from the normal were generally reported, while temperature had again risen by about 2° and winds were still southwesterly except in the north and north-east of the province, where a large number of stations reported north-easterly winds. There was hence a small amount of interaction in the reported north-easterly winds There was hence a small amount of interaction in the north and east of the province between these two opposing wind systems, and this resulted in the formation of a few local storms with rain over these areas, and thus on the morning of both the 28th and 29th of March a few rain showers were reported from some of the districts in East Bengal and in those of North Bengal near the hills These falls were generally not heavy, but amounts of half an inch and upwards were reported from Buxa, Noakhali, Ramganj, Munshiganj, Chandpur, Nasirnagar, and Daudkandi. The rapid fall of pressure on the 28th appears to have been connected with the advance of a feeble barometric depression from North-West India over Bengal, but on the 29th a rapid increase of pressure took place, the increase equalling from 0.08" to 0.10" at the western and central stations, and the depression entirely filled up, though it still left a slight tendency to a wind circulation over parts of East and South-East Bengal. A dry westerly and north-westerly wind had. however, set in over the greater part of the province, and from this day again fine settled weather set in. In connection with the advance of this feeble depression on the 28th and 29th, temperature changed rather considerably, and the mean temperature over South-East and parts of Central Bengal became in excess of the normal, while a moderate fall of temperature was taking place at the western stations, and the mean temperature became in defect of the normal by more than 5° over the western half of the province. On the 30th the increase of pressure continued at some of the northern stations, while a fall had set in over the remainder of the province, and the effects of the depression having passed away, the mean temperature became in defect of the normal over practically the whole province. On the 31st pressure was falling at the western and south-western stations and an increase was reported elsewhere, and the whole province showed a pressure in excess of the normal by amounts ranging up to a tenth of an inch in North-East Bengal, while temperature remained from about 2° to 6° below the normal. Finally on the 1st of April a moderate increase of pressure had taken place over the whole province, and an excess above the normal of about 0 03" to 0 06" was recorded, but a slight comparative defect was registered at Saugor Island and Calcutta. Temperature had also risen very rapidly, and the defect of the mean temperature over the province had been reduced to about 2°. Winds were a little abnormal and showed a slight fendency to circulite round the north-west angle of the Bay in connection with the low pressure, and generally over the north of the province winds were rather strongly easterly. For the greater part of the week, therefore, weather has been fine and settled, though conditions were very slightly abnormal in South Bengal at its close.

Pressure.—The mean pressure for the week has been in excess of the normal in all districts. The usual excess has equalled from 0.03" to 0.05," but the variations at neigh-

bouring stations have been a little irregular.

Temperature.—The mean temperature for the week for the whole province has again been in defect of the normal by 4°. The smallest defects, equal to about 2°, have been recorded in Orissa and East Bengal while, on the other hand, in Bihar and Chota Nagpur defects of about 5° to 6° have been registered: The mean temperature of the week under review, though still in defect of the normal, is about 3° higher than the mean temperature of the previous week. Notwithstanding also this considerable defect, there has been a steady increase of pressure almost throughout the week, and thus while on the first day of the week the mean temperature was from 7° to 9° in defect, on the last day the defect was only equal to about 2°.

The distribution of temperature for the week and its variation from the normal value are best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the period. It will be seen that both day and night temperatures

have been considerably in defect of the normal.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 26th March to 1st April 1893.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 74.

[Second Publication.]

AUSTRALIA-CAIRNS HARBOUR.

Tide signals.

The Portmaster, Brisbane, has given notice (No. 6 of 1893) that vessels arriving at the fairway off the bar to Cairns harbour may have the depth of water available signalled to them at night if they have advised Cairns of the probable time of arrival.

Signals are made with the front leading light as follows, viz:-

The light will be obscured one minute to draw attention, then the number of flashes made at 5-second intervals denotes the number of feet over 10 feet, e.g., two flashes at 5-second intervals denote 12 feet, three flashes 13 feet, and so on. Odd inches are denoted by the number of flashes in quick succession.

The signals will be repeated until answered by a flare light from the vessel.

Flood tide is denoted by a red light shown from the platform of the outer leading light.

EATON W. PETLEY, Port Officer of Calcutta.

Published for general information.

[Second Publication.]
AUSTRALIA—MARY AND BURNETT RIVERS.

Decrease in depths in channels.

The Portmaster, Brisbane, has given notice (No. 7 of 1893) that in the Mary river the depth in the channel at the Horse Shoe bend has decreased to six feet; and in the channel through the Middle flats below Rocky point the depth has decreased to five and-a-half feet at low-water springs.

In the Burnett river the bar has silted up, and there is only three feet with the leading beacons in line. A narrow channel with five feet at low water exists round the South Head, which is being marked off.

EATON W. PETLEY, Port Officer of Calcutta.

Published for general information.

K. H. Stephen, Under-Secretary, Marine Department.

NOTICE TO MARINERS-No. 76. [Second Publication.]

CHINA-SOUTH-EAST COAST.

KAIPONG ISLANDS-HONG KONG APPROACH.

. Fog signals at Gap rock light-house.

With reference to Notice to Mariners, No. 64, dated 20th March 1892, issued by this office, the British Admiralty has given further notice (No. 107 of 1893) that a fog signal has been established at Gap rock (Man mi Chau) light-house, the south-west of the Kaipong islands, and in the approach to Hong-Kong from the southward:—

Gap rock fog signal is an explosive signal, which during thick or foggy weather will give a report similar to a gun every ten minutes.

Approximate position, lat. 21° 48′ 50″ N., long. 118° 56′ 20″ E.

K. H. STEPHEN, Under-Secretary, Marine Department

GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 68.

[Third Publication.]

· AUSTRALIA—BRISBANE RIVER.

Buoys and beacons away from position—Victoria bridge destroyed—Floating magazine and Hospital hulk "Beatrice" away from moorings.

THE Portmaster, Brisbane, has given notice (No. 3 of 1893) that, as a result of the late disastrous flood, all the buoys and a number of the beacons marking the channels of the Brisbane river are away from their positions, and all the dredged cuttings must be navigated with the utmost caution, as, until examined, no reliance can be placed on their original depths.

The buoys and beacons will be replaced as soon as practicable.

The northern half of Victoria bridge having been swept away, vessels are cautioned against navigating that portion of the river until an examination of the bottom has been made, when the best navigable channel will be marked. As soon as practicable, a red light will be exhibited at night time at the broken end of the bridge.

The Floating Magazine recently moored at Eagle Farm is now above Lytton, well over

on the South shore.

The Hospital hulk Beatrice is at present moored in the Fairway above the Naval stores. Both these vessels will be removed at the earliest opportunity.

EATON.W. PETLEY, Port Officer of Culcutta.

NOTICE TO MARINERS-No. 72.

[Third Publication.]

AUSTRALIA, NORTH COAST-TORRES STRAIT APPROACH.

Sunken rocks reported near Proudfoot shoal and retention of light-vessel.

THE British Admiralty has given notice (No. 99 of 1893) that a diver, named Mapplebeck, has reported the existence of a pinnacle rock, with 10 feet on it at low water spring tides, lying with Proudfoot shoal light-vessel, bearing approximately from W. N. W. to N.W., distant about 9 miles.

Position, to be considered doubtful, lat. 10° 873′ S., long. 141° 843′ E.

Mr. Smith, Master of the schooner Sketty Belle, also reports a sunken rock, with 16 feet on it at low water spring tides, lying with Proudfoot shoal light-vessel bearing West, distant about 8 miles.

Position, to be considered doubtful, lat. 10° 82½° S., long. 141° 85½° E.

CAUTION.—Mariners should use the greatest care when navigating in the vicinity of Proudfoot shoal, and should keep well to the southward of the abovementioned dangers, for

which a careful search is being made.

Also, with reference to Notice to Mariners No. 437 of 1892—That in consequence of the above reports, Proudfoot shoal light-vessel will be retained in her station until further notice.

Approximate position, lat. 10° ?% 1' S., long. 141° 271' E.

OFFICE OF THE ACCOUNTANT-GENERAL, BENGAL;

BOOK DEPARTMENT, The 3rd April 1893. O. T. BARROW,

Accountant-General.

JUDICIAL DEPARTMENT.

No. 30A.

The 6th April 1893 .- Mr. Abul Hassan, Barrister-at-Law, substantive pro tempore Additional Judge, Court of Small Causes, Calcutta, is a lowed leave for fifteen days, under article 307 of the Civil Service Regulations, with effect from the 10th April 1893, or any subsequent date on which he may avail himself of it.

The 7th April 1893.—The undermentioned gentlemen are appointed to be Honorary Magistrates of the Bench at Chanduria, in the district of Khulna, and are vested with the powers of a Magistrate of the third class:—

Babu Hari Prasanna Roy. Babu Jogendra Nath Roy. Potit Pabon Roy.

. ,, maripado Missra. | ,, Potit Pabon Roy.

Under the authority conferred on him by section 185 A, sub-section 1 of the Code of Civil Procedure, the Lieutenant-Governor directs that evidence in cases in which an appeal lies shall be taken down by Babu Augore Nath Ghose, Subordinate Judge of Birbhum, with his own hand in the English language.

Babu Mookund Deb Mookerjee, Deputy Magistrate and Deputy Collector, Meherpur, Nadia, is vested with the power to try summarily the offences mentioned in section 230 of

the Code of Criminal Procedure.

Babu Joy Gopal Sinha, Subordinate Judge, is appointed to be Subordinate Judge of Purnea, but to be on deputation as an Additional Subordinate Judge of the 24-Parganas.

This cancels so much of the order of the 28th March 1893 as relates to Babu Joy

Gopal Sinha's appointment as Subordinate Judge of Backergunge.

This also cancels the order of the 28th March 1893 appointing Babu Rakhal Chandra Bose, Subordinate Judge of Backergunge, to be Subordinate Judge of Purnea, but to be ondeputation as an Additional Subordinate Judge of the 21-Parganas.

Babu Girindra Nath Bhaduri is appointed to be an Honorary Magistrate of the

Independent Bench at Shahazadpur, in the district of Pabna, and is vested with the powers

of a Magistrate of the third class.

The 8th April 1893.—The Lieutenant-Governor accepts the resignation tendered by Babu Krist na Kumar Misra of his appointment as an Honorary Magistrate of the Kurigaon Bench in the district of Rangpur.

The 10th April 1893 — Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Babu Rash Behari Ray, an Honorary Magistrate of Lilganj Bench, in the district of Muz iffarpur, to take down evidence in criminal cases in the English language.

Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lientenant-Governor empowers Babu Ramapati Chatterji, Officiating Deputy Magistrate and Deputy Collector, Midnapore, to take down

evidence in criminal cases in the English language.

The 11th April 1893.—Babu Nuffer Chandra Bhatta, Subordinate Judge, Hooghly, is allowed leave for the 18th and 19th February 1893, under article 306 (b) of the Civil Service Regulations, in extension of the leave granted to him under the order of the 7th February 1893.

Babu Purno Chunder Mitter, Deputy Magistrate and Deputy Collector, Kushtia, Nadia, is vested with the powers of a Magistrate of the first class and with powers under section 110 of the Code of Criminal Procedure. He is also vested with power to try summarily the

offences mentioned in section 260 of the Code.

Babu Gogan Behary Chowdhuri, B.L., is appointed to act as a Munsif in the district of Cuttack, to be ordinarily stationed at Balasore, during the absence, on leave, of Babu Bidhu Bhusan Chakravarty, or until furth r orders.

The undermentioned gentlemen are appointed to be Honorary Magistratos of the Independent Bench at Daudnagar, in the district of Gaya, and are vested with the powers of a Magistrate of the third class:

J.—Mr. John Charles Hewitt. II .- Maulvi Syed Abdul Jaleel.

Babu Sosi Bhuson Banerji is appointed to be an Honorary Magistrate of the Independont Bench at Satkhira, in the district of Khuina, and is vested with the powers of a Magistrate of the third class.

Babu Gopal Chander Mukerji is appointed to be an Honorary Migistrate of the Independent Bench at Colgoug, in the district of Bhagalpur, and is vested with the powers of a Magi-trate of the third class.

Babu Baikanta Nath Roy, B.L., is appointed to be an Honorary Magistrate of the Independent Bench at Vishnupur, in the district of Bankura, and is vested with the powers

of a Magistrate of the third class.

The Lieutenant-Governor accepts the resignation tendered by the undermentioned gentlemen of their appointments as Honorary Magistrates of the Daudnagar Independent Bench in the district of Gaya:—

II .- Babu Mati Lal. I.—Mr. P. G. Jacobs.

The Lieutenant-Governor accepts the resignation tendered by Maulvi Abdul Ghani of his appointment as an Honorary Magistrate of the Bhusna Independent Bench in the district of Faridpur. .

Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Babu Hem Chandra Chatterjee, substantive pro tempore Sub-Deputy Collector, Meherpur, to take down evidence in criminal cases in the English language.

Babu Atul Chandra Chatterjee, Deputy Magistrate and Deputy Collector, Burdwan, is

vested with powers under section 183 of the Code of Criminal Procedure.

Mr. H. D. de M. Carey, Assistant Magistrate and Collector, Patna, is vested, under section 32 of the Code of Criminal Procedure, with powers to pass sentence of whipping.

ping.

Mr. J. D. Cargill, Assistant Magistrate and Collector, Shahabad, is vested, under section 32 of the Code of Criminal Procedure, with powers to pass sentence of whipping.

GRANT OF LEAVE TO MUNSIFS.—The 27th March 1893.—Babu Aswini Kumar Guha, Munsif of Dinajpur, is allowed leave for one month and fifteen days, viz., six days under article 309 of the Civil Service Regulations, and the remaining period under article 306(b) of the same Regulations, with effect from the 3rd April 1893, or from the date on which he may avail himself of it.

The 29th March 1893.—Babu Sarat Chundra Sanyal, late Munsif of Jamui, in the district of Bhagalpur, is allowed leave from the 10th November to the 19th December 1892, both days inclusive, viz., twenty days under article 309 of the Civil Service Regulations, and the remaining period under article 306(b) of the same Regulations, in supersession of the leave granted to him on the 21st November last.

Babu Sri Gopal Chatterjee, Munsif of Arrah, in the district of Shahabad, is allowed leave for ten days, under article 306(b) of the Civil Service Regulations, in extension of the

leave granted to him on the 8th March 1893.

Babu Mohendra Nath Ghose, Munsif of Giridib, in the district of Chota Nagpur, is allowed leave for one month, viz., eight days under article 309 of the Civil Service Regulations, and the remaining period under article 306(h) of the same Regulations, with effect from the date on which he is relieved.

Babu Purna Chundra Sarcar, Munsif of Jahanahad, in the district of Hooghly, is allowed leave for twenty-three days, under article 306(b) of the Civil Service Regulations,

with effect from the date on which he is relieved.

The 7th April 1893.—Babu Ashutosh Banerjee, Munsif of Chandpur, in the district of Tippera, is allowed leave for forty-five days, viz., nine days under article 309 of the Civil Service Regulations, and the remaining period under article 306(b) of the same Regulations, with effect from the date on which he availed himself of it.

Babu Ram Jadub Talapatro, Munsif of Katwa, in the district of Burdwan, is allowed leave for one day, under article 306(b) of the Civil Service Regulations, in extension of the

leave granted to him on the 22nd March last.

The 8th April 1893.—Babu Kalidhone Mookerjee, Munsif of Arrah, in the district of Shahabad, is allowed leave for fitteen days, viz., seven days under article 309 of the Civil Service Regulations, and the remaining period under article 306(b) of the same Regulations, with effect from the date on which he availed himself of it.

Babu Bidhu Bhusan Chuckerbutty, Munsif of Balasore, in the district of Cuttack, is allowed leave for one month, under article 306(b) of the Civil Service Regulations, with effect

from the 17th instant, or from the date on which he may avail himself of it.

II. J. S. Cotton, Chief Secy. to the Govt. of Bengal.

Dharmpur and extending inland for two miles on either side of the river Ganges between these points, in the districts of Rajshahi, Pabna, Nadia and Murshidabad. The erection of any new embankment or any addition to an existing embankment, or the obstruction or diverson of any water-course within the tract above defined, without the previous permission of the C llector or Collectors concerned, is prohibited.

C. W. ODLING, Secy. to the Gott. of Benyal.

[Fourth Publication.] DRAFT REVISED WATER-RATE RULES FOR THE MIDNAPORE CANAL. · The 20th March 1893.

No. 75.—Notification.—In exercise of the powers conferred on him by sections 99 and 78 of Act III (B.C.) of 1876, the Hon'ble the Lieutenant-Governor proposes to make the following rules and to fix the undermentioned rates to be charged for water supplied from the Midnapore Canal. These rules and rates will supersede those now in force.

> C. W. ODLING, Secretary to the Govt. of Bengal.

The Divisional Canal Officer is responsible for maintaining the canal in an efficient state of repair, for providing drainage channels where necessary, and generally for all engineering work involved in its management, as well as for the distribution of water to lessees. The word "canal" is here used as defined in section 3 of the Act.

2. The Deputy Collector is responsible for the assessment and collection of water-rates

accruing to Government from the carel.

3. Water shall not be distributed otherwise than on the application of a lessee, or to a person in whose favour a provisional license under rule 15 has been issued. Such application may be made verbally or in writing to any subordinate in charge of that part of the canal from which water is required.

4. If any lessee apply for water to the Deputy Collector or one of his subordinates verbally, he shall be directed to address himself to an irrigation officer or subordinate. If he makes such an application in writing, his petition shall be forwarded direct by the zilladar, to whom it is addressed, to the Sub-divisional Canal Officer in charge of that part of the canal from when the petitioner's village is supplied.

5. The Divisional Canal Officer shall map out the irrigable area into blocks in accordance with the natural features of the ground, and so determine that the whole block shall be irrigable from one outlet, or from one set of outlets. So far as may be practicable, the blocks shall be separated by drainage lines.

6. Each block determined as above shall be numbered and recorded with its irrigable area in registers to be maintained by the Divisional Canal Officers and Deputy Collector. The blocks shall also be marked on maps to be maintained by the same officers.

7. Leases for not more than five years may be granted for the whole irrigable area of a block, or, subject to the provisions of Rule 13, for definite parts of a block, under the following conditions:-

1.—Ordinarily the whole irrigable area of any village, so far as situated within the block, must be included in the lease.

11 -All leases within one block shall be granted, so that they shall expire on the same date.

111.—In order to equalise the areas to be dealt with in each year, the date of expiry of the leases in each block shall be determined by the Divisional Canal Officer in consultation with the Deputy Collector, so that, as far as practicable, one-fifth of the total area usually irrigated may fall out of lease in each year

1V. No permit shall be granted, when the supply of water must of necessity be delivered across an unleased area, unless a village channel exists, which, in the opinion of the Sub-divisional Canal Officer, will deliver water without waste across the unleased area.

8. The rates to be charged for water supplied between June and November, whether by flow or lift, to lessees on application shall be-

For a term of five years—Re. 1-8 per acre for each season.

For one year or for water supplied on a provisional license for which a permit for a term

of years is not subsequently issued, Rs. 3 per acre.

Provided that the leases, whether new or renewals, required for shorter terms than five years in order to develope the system of blocks as explained above, shall be charged Re. 1-8 per acre only. Otherwise, in addition to the rate of Re. 1-8 mentioned above, an extra rate of 12 annas per acre shall in the first year only be charged on leases for less than five and more than one year.

Q. For the supply of water, when available, for winter crops, a rate of Rs. 2-8 per acre per season shall be charged.

10. For the unauthorized use of canal water a rate of Rs. 5 per acre, or such less rate as may be sanctioned by the Deputy Collector, shall be charged.

- Application for water-leases under section 74 of the Act shall be presented to the zilladar of the division in which the applicant's land lies.
 - Every application for a water-lease shall contain the following particulars:—

Name and residence of applicant.

- 2.—Name of pargana, mahal and village in which the land to be irrigated is situated. 3.—Total area for the irrigation of which the application is made and its boundaries, and if the lands to be irrigated lie in separate chaks, the name of each chak.
- 4.—Names of the raiyats whose lands are to be irrigated, and the quantity of land held by each.
- 5.—Name of the canal and number of distributary from which water is required.

· 6.—Signatures of the applicants.

A separate application must be presented for lands in each village, but teheilalaida or other lands lying within the village boundary at the time of survey may be included.

Before a permit for a term of years is granted, the written consent of the Divisional *Canal Officer shall be obtained, but permits for one year only and provisional licenses may be issued with the written assent of the Sub-divisional Canal Officer. The Deputy Collector shall on the day of issue forward a copy of all permits granted to the Divisional Canal . Officer.

15. When a water-lease is granted, a kabuliyat shall be taken in a form approved by Government, and a "permit" shall be given to the lessee or lessees in a form similar to that prescribed in Schedule C of the Act. Pending the completion of a lease, the zilladar may

issue a provisional license for the supply of water to an area covered by an application.

16. On the issue of a permit or provisional license, the zilladar shall forward to the Sub-divisional Canal Officer direct a requisition requesting him to supply water to the lessee on application. This requisition shall be kept by the Canal Officer till January 1st next following, and shall then be returned to the Deputy Collector. On the back should be noted the several dates on which the village was supplied with water. A fresh requisition shall be issued on or before June 1st, and returned on or before January 1st, each year, till the lesse exprises.

the lease expires.

17. When it comes to the knowledge of the Sub-divisional Canal Officer that canal the shall hold a local investigation and transmit the water has been taken without authority, he shall hold a local investigation and transmit the record thereof to the Deputy Collector. Separate proceedings shall be taken in the case of

each village irrigated without authority.

18. On receipt of the record mentioned in Rule 17, and after hearing any objection which may be raised, the Deputy Collector shall determine whether water-rates can be legally charged, and if so, he shall proceed to assess, at the rate provided in rule 10, the land irrigated without authority.

The statements of the amounts demandable for water-rates leviable under the rules in force shall be prepared under the supervision and signature of the Deputy Collector in such form as shall from time to time be sanctioned by the Lieutenant-Governor. Persons charged under rule 10 or 18 shall be served, by post or otherwise, with a statement showing the amounts charged to enable them to lodge an appeal to the Collector under section 91 of the Act if they desire to do so.

20. Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted, or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer, with the concurrence of the Collector, to direct that the lease shall be cancelled with effect from the 1st of June next following.

The rates for water supplied from June to November shall in each season fall due on the ist January following, but the Deputy Collector may require one-half of the rates due on applications filed after the 1st of September to be paid in advance, and may refuse to issue a permit for more than one year. The rates for water supplied for winter crops shall fall due on the 1st April following.

Water-rates imposed under rule 10 or 18 shall fall due as soon as the assessment

is made, and shall be realized at once.

- The Superintending Canal Officer may, with the concurrence of the Collector, direct the Deputy Collector to -
 - I.—Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realizing water-rates until all the arrears of water-rates due are paid up, and also, if specially so ordered, unless half the amount due under new applications is paid in advance. An order under this rule shall be in force for the time stated therein, which shall not exceed three years.

II .-- Cancel any five years lease if on the 1st of June of any year water-rates to the

extent of half the demand for one year are in arrears.

Remission of water-rates, either in whole or part, as the case may require, shall be granted by the Deputy Collector for-

I.—Errors in the assessment of rates.

II.—Injury to the crop on a leased area caused by deficient supply of water.

Provided a written application for remission has been made 15 days at least before the

In regard to applications under II, the written opinion of the Divisional Canal Officer shall be obtained and form part of the record of the case.

25. The Deputy Collector, with the written consent of the Divisional Canal Officer. may grant remissions of water-rates, either in whole or part, for injury to the crops on leased

areas caused by excess of water due to deficient drainage.

26. The Deputy Collector may, with the written assent of the Divisional Canal Officer, commute rates charged under rules 10 and 18 to those chargeable for water supplied on application, provided that a lease either for a term of years or for the season has been subsequently executed for the lands in question.

27. Remissions on other grounds than the above require the sanction of Government.
28. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptoy, or absconding of the defaulter, the amount which is non-realizable may be written off as irrecoverable on the authority of the Collector.

29. Before awarding compensation under section 16 of the Act, or making a reference under section 17 of the Act, the Collector shall obtain the written opinion of the Superintending Canal Officer, and his written opiniou shall form part of the record of the proceedings.

30. The Deputy Collector may distribute amongst village mookhyas, who give efficient assistance in collecting water-rates, and generally in his operations under Act III (B.C.) of 1876, a commission calculated in such manner as he may think fit, provided the total amount paid shall not exceed 6 pies in the rupee on the total water-rates collected during the year.

GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

The 8th April 1893.

No. 28 Marine.—In exercise of the powers conferred upon him by section 22 of Act VI of 1884 (The Inland Steam-vessels Act), the Lieutenant-Governor is pleased to appoint the gentlemen named below for the purpose of examining the qualifications of persons desirous of obtaining certificates of competency as second class masters and serangs of inland steamvessels at the examination which will be held this day :-

The Port Officer of Calcutta Mr. T. Reddie, Branch Pilot ... Captain R. G. Hand, Certificated Master under the Inland Members. Steam-vessels Act ...

> C. W. ODLING, Secy. to the Govt. of Bengal.

[Third Publication.] The 22nd March 1893.

No. 18 Marine.—The following bye-laws, which have been framed by the Commissioners of the Port of Calcutta, under sections 126 and 127 of the Calcutta Port Act. 1890, for regulating the working of the Kidderpore Docks, are published for general information. They will be taken into consideration on the expiry of a month after their flist publication in the Gazette, and the Lieutenant-Governor will consider any suggestions or observations which may be made by any person within that period.

> C. W. ODLING. Secy. to the Govt. of Bengal.

Bye-laws made by the Commissioners in Meeting under Act III of 1890 (B.C.), sections 126 and 127.

1. No stages, planks, poles or any article provided by the Commissioners for wessels loading or discharging shall be used without a written order from the Dock or Jetty Superintendent, and when the discharging or loading is completed, they shall be replaced on the quay or Jetty alongside the vessels.

All stages, planks, poles, or other articles, not provided by the Commissioners, after use in discharging or loading, shall be removed within 24 working hours from the Dock or

Jetty premises.

2. All the quays, sheds, gates, and the land within the Dock or Jetty fence shall be in charge of the Dock or Jetty Superintendent, who will manage all operations connected with the landing and shipping of goods, storage in the sheds and open. He will be responsible for the manage of all goods within the enclosure and exclusion of improper sible for the proper custody of alle goods within the euclosure and exclusion of improper characters, and will take whatever steps may be necessary for the proper maintenance of order on the premises.

3. The allotment of a berth shall be entirely at the discretion of the Commissioners, but as a general rule vessels will be accommodated in the order of their arrival at

the Dock entrance or off the Jetties.

4. Masters and owners of vessels shall obey the directions of, and shall offer no obstruction to, Dock or Jetty officers in mooring, unmooring, moving or removing any vessel from one part of the Dock or Jetties to another part, or in regulating the position for loading and discharging of such vessele.

5. When berthed or moored in the Dock, a ship's propeller shall not be worked for trial by the main engines without due notice being given to, and permission obtained in

writing from, the Dock Superintendent.

6. Projections from any vessel, whilst hauling in or out of Dock or to or from the letties, or which interfere with another vessel's loading or discharging shall be removed on requisition by the Dock or Jetty Superintendent or other duly authorized officer of the Commissioners.

7. No fender which will not float shall be used over the side of a vessel. Sails shall only be loosed with the Dock Superintendent's permission, and must be stowed at once on

his order. In all cases they must be stowed before sunset.

8. If the Dock Superintendent considers that there is good reason why a vessel should not be admitted into the Dock, he may refer the question to the Commissioners, pending whose decision he may refuse to allot a berth.

9. The Owners and Master of a vessel shall—

(a) supply warping and other necessary appliances;

(b) secure hatches when not in use, and guard against accidents to life, limb, and property;

(c) keep their vessels so loaded, and ballasted as to allow of their safe removal in the event of fire or other emergency arising;

(d) provide proper lights in those parts of a vessel where work is going on, and when, owing to insufficient light, injury might result to life, limb, or property;

- (e) arrange that whilst a vessel is in Dock, or at the Jetties, the Master or some other responsible officer shall always be on board in charge to superintend and assist in carrying out all duties in connection with the vessel or its cargo, and that there is a sufficient crew to carry out orders issued by the servants of the Commissioners in charge;
- (f) see that all exhaust steam or water-pipes from winches or other machines are led down the side of the ship to below dock wall coping by a hose or other appliance.
- The Owners and Master of a vessel shall-

(a) at the Docks securely fix the gangway supplied by the Commissioners during the whole time the vessel remains alongside the quay, and fix between sunset and

sunrise one lantern at each end of a gangway so placed;

(b) alongside any of the Jetties provide at least one gangway plank, not less than two feet six inches wide, and of sufficient length, thickness, and strength to form a convenient communication between the Jetry and the gaugway of the vessel, and such gangway plank shall be properly and securely placed between the gangway of the vessel and the Jetty during the whole time the vessel remains alongside the Jetty.

 A preferential use of cranes shall be given or the discharge of import cargo.
 Heavy lifts of over 35 cwts. shall be declared by Masters of vessels, who shall be responsible for all accidents srising owing to mis-declaration of weights of such lifts.

Vessels carrying heavy lifts requiring the use of the 100 ton sheers shall be moved to

the 100-ton sheers quay to make such lifts at such time as the quay is available,

13. No crane shall be hooked on to more than it is certified to lift by itself, and two cranes shall not be hooked on to one article. No crane shall be used to assist in lifting a weight, when such weight is being hoisted by the ship's own gcar. Breaking out cargo with Dock or Jetty cranes is strictly prohibited.

14. Vessels requiring to carry out petty repairs may do so in the Wet Dock when a berth is available without detriment to ordinary traffic, but subject to the condition that a canvas-shoot or other safeguard be provided so as to prevent, loose material, chips, pieces

of wood or other like material falling into the water.

15. Every barge or cargo boat, if permitted to remain in the Dock more than 12 hours after having received or discharged her cargo, or 12 hours after she could have received or discharged such cargo, will be subjected to a charge, as under, for every day or part of a day while she shall so remain—

			Rs.	A.	P.	
Cargo boat or barge up to 15 tons	•••	•••	1	0	0	
Ditto above 15 and up to 25 tons	•••	•••	1	8	0	
Ditto above 25 tons			2	0	0	

16. No bum-boat will be allowed into the Dock without the special sanction of the Dock Superintendent, and any bum-hoat may be removed from the Dock at any moment.

17. The control of barges, cargo-boats and bum-boats shall rest with the Dock Superintendent, who may prevent from entering, or turn out of the Deck any boat unless she is actually engaged for cargo, and no fires shall be allowed on them between 9 r.m.

18. Every cargo-boat, barge, or bum-boat may be searched, at the discretion of the Dock Superintendent, before leaving Dock, either by a Dock official deputed to do so, or by the Police.

19. No person shall open, or attempt to open or shut, any dock gate, sluice or valve, nor any swing-bridge without orders from a duly authorized servant of the Commissioners.

20. The gates of the Dock or Jetty premises shall be kept open at hours fixed by the Commissioners, and ingress and egress allowed as directed by the Dock or Jetty

Superintendeut.

21. No person, unless duly permitted by the Dock or Jetty Superintendent, shall take inside the Dock or Jetty premises carpenters' tools or other instruments for opening cases, and no cooper shall be allowed to work in the sheds without a license from the Dock or Jetty Superintendent.

22. Bells must not be struck to denote the hour on board ships in Dock.
23. No vicious or dangerous animals, and no loaded gun or other firearm, shall be

kept on board any vessel in Dock or at the Jetties

- 24. No vessel having on board more than 100 native passengers or coolies shall be allowed to enter the Wet Dock unless covered by a certificate from the Health Officer that no persons on board are suffering from infectious diseases.
- *25. Smoking and the use of any unprotected fire or lights in any shed or warehouse within the Dock of Jetty enclosure are strictly prohibited. No person shall smoke tobacco or other substance, or ignite lucifer matches or other imflammable articles, on any pier or quay or on board any vessel within the Dock, or at the Jetties, except in such places as may be allotted for the purpose.

26. Fires of coal, charcoal, or coke may be used in the cabins, deck-houses, forecastles and cabooses of vessels in Dock, only between 5 o'clock a.m. and 9 o'clock r.m., subject to

being prohibited (on any abuse) by the Dock Superintendent.

Fires for donkey engines, steam winches, and portable forges are also permitted during working hours and for ships' engines for a reasonable period before a ship leaves and after a vessel is berthed in the Dock.

All lights, whether oil-lamps or candles, used on board vessels in Dock, except as men-

tioned in the following paragraph, shall be in globes or secured lanterns.

Naked lights may be used only in the engines and boilers of vessels whilst under inspec-

tion and repair, or in duties connected therewith.

While any fire or light is lighted, at least one person on board is to be specially charged with the care thereof; and no fire or light is to be left or used in so rash, careless, or negligent a manner as to risk or endanger the safety of, or to ignite any goods, property, or vessel in the Dock or on the Dock premises.

All applications for special permission to use fires at any other than the prescribed hours shall be made in writing to the Dock Superintendent before 5 o'clock r.m., and shall specify the circumstances under which the request is made; if granted, the application, after having been endorsed by the Dock Superintendent, is to be retained on board by the person charged with the care of the fire, and is to be exhibited by him to the Dock and Police officials whenever demanded, and is to be returned to the Dock Superintendent by 10 A.M. on the following day.

- 27. Vessels in Dock and all parts thereof shall be held or made free and accessible to the Dock and Police officials for their inspection in regard to fires and lights whenever they demand it.
- 28. A vessel about to come into Dock is to be trimmed, if possible, on an even keel or two to three inches by stern or head and kept upright. Side and stern ports to be shut
- 29. A vessel entering the Dock with her water ballast tanks full, the tanks must be kept in that condition during her stay in Dock. Should, however, necessity arise to empty a tank, the same can only be done with the sanction of the Dock Master and under his supervision.
- 80. Water ballsst tanks, while the vessel is in Dock, shall not be filled without the previous sanction of the Dock Master.
- 31. No coals, cargo or ballast to be shifted in any of the holds or bunkers after the vessel is blocked, without the special permission of the Dock Master. If done, it will be at the risk and responsibility of the Commander.
- 32. From the time that the Dock ropes are made fast to the ship till she is secured on the blocks, all duty on board is to cease in order that the crew may be available to trim the vessel, if required, by the Dock Master.
- 33. As soon as a ship is in Dock, the Commanding Officer will station his men to hook on the tackles for putting the ship fair over the blocks, both forward and aft, and to assist in pulling up the shores.
- 34. As the safety of the ship depends on her prompt shoring, the most particular attention is requisite to the observance of the foregoing rule. No exertions of the Dock staff can effect this without the co-operation of the ship's crew,
- 85. Masters of vessels shall furnish special notice to the Commissioners before landing hazardous goods, ϵg ., saltpetre, acids, sulphur, matches, spirits of wine, kerosine oil, turpen-
- tine, pitch, tar, and petroleum, &c.
 36. No person shall remove from the Dock or Jetties any goods other than those for which bills-of-lading, accompanied by Agent's or Master's delivery order, Customs hill-ofentry, and Dock or Jetty challen have been deposited with the Commissioners.

Every package, hale, or case sent for shipment at the Dock or the Jetties shall be entered in a cart ticket in the form prescribed, and no goods unaccompanied by this ticket will be allowed to pass into the Dock or Jetty enclosure. Every cart ticket shall contain the date, name of vessel on which the goods are to be shipped, the exporter's name, the marks, quantity, and description of articles shipped, and the current license number of the cart.

38. Working hours at the Dock or at the Jetties shall be as may be notified from time me. Wharf rent will not be charged for the days observed as holidays by the Custom to time. House, but goods can be received and delivered on such days on payment of Custom House

fees.

Application to work at night or on Sundays or holidays must be made to the Commissioners, who, on production of the Custom House permission, will order all the necessary arrangements for the proper conduct of business. For work at night and on Sunday, and the holidays prescribed by the Commissioners, the extra rates fixed by the Commissioners from time to time must be paid.

40. The sanctioned holidays recognised by the Commissioners shall be-

•				Days.

		Total	•••	20

No ashes, sweepings, or rubbish of any kind are to be landed on any part of the Dock or Jetty premises, except under such conditions as shall be approved by the Commissioners.

Except for the purpose of enabling Masters of vessels to take measurements or 42. weighments of goods to be shipped on board their vessels, no goods shall be permitted to be

stacked on the wharves beyond the time actually necessary to convey them away.

43. During the time it is actually necessary for goods in course of lauding or shipping to remain on the wharves, such goods shall be piled in places assigned for the purpose by the Superintendents of the Wharves or their subordinates.

44. Boa's shall not be incored or anchored at the wharves, in order that the owners

of the goods brought in them may sell or barter.

45. Empty boats waiting to be hired, or having discharged goods, shall anchor in the

stream, at least 150 feet off the wharves.

46. The hours for landing and shipping goods at the Inland Vessels Wharves shall be from 6 A.M. to 6 P.M., on all days, except Sundays and holidays authorised by the Commissioners; and no business shall be transacted on the wharves during the hours intervening between 6 P.M. and 6 A.M., nor on such Sundays and authorised holidays, except on payment of overtime or extra fees respectively.

- 47. When goods are to be landed or shipped inward or outward, authenticated challans. showing the descriptions and exact quantities of the goods shall be tendered to the cashier by applicants for the passes. On the data furnished in these challans the passes will be drawn up and the tolls levied. In the absence of such challans, or where reasonable doubts exist with regard to their genuineness or correctness, the calculation for levying the toll shall be based on the registered tounage of the boats or vessels from which the goods are to be landed or on which they are to be shipped.
 - 48. No unauthorised person shall lay hold of, or get into, or upon, any engine,

carriage, or truck on the Commissioners' tramway.

49. No driver shall drive his engine over the Commissioners' tramway at a greater rate of speed than six miles an hour.

50. No person shall cross the Commissioners' tramway in front of an approaching engine, or between or under any vehicle standing or moving on the line.

- 51. No person shall remove or wilfully damage any lamp, engine, carriage, truck, fencing or any other property whatever belonging to the Commissioners.
 - 52. No person shall place any obstruction upon the Commissioners' tramway. No person shall walk along the Commissioners' tramway within the fencing. 53.
- No person shall allow cattle in his or her charge to trespass on the Commissioners' tramway, nor to cross the line except at the regular crossing.

No person shall smoke within any of the sheds and warehouses belonging to the

Commissioners. 56. Any person committing an infringement of any of the foregoing bye-laws shall be liable to a fine not exceeding Rs. 500, and, when the breach is a continuing breach, to a further fine which may extend to Rs. 200 for every day after the first during which the breach continues.

JAIL DEPARTMENT.

No. 4030, dated the 5th April 1893.—Surgeon-Captain Narendra Prasanna Sinha made over charge of the Faridpur Jail to Assistant Surgeon Mothura Nath Sen on the afternoon of the 25th March 1893.

No. 4284, dated the 10th April 1893.—Assistant Surgeon Abinash Chunder Banerjee made over charge of the Barisal Jail to Surgeon-Captain J. G. Jordan on the forenoon of the 4th April 1893.

> A. D. LARYMORE, For Inspr.-Genl. of Jails, Bengal.

CIVIL MEDICAL DEPARTMENT. BENGAL.

SENATE HOUSE. The 5th April 1893. W. GRIFFITHS, Off g. Registrar.

The Yearly Examination of Candidates for Fourth grade Accountants.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, 5th and 6th June 1893, at 10-30 A.M.

SUBJECTS.

		marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity)		100	50
Dictation (spelling, punctuation, &c.)		1 0 0	50
Arithmetic (whole course)		240	160
Mensuration (a) (whole book)		60	80
Book-keeping (b) (Mercantile)		100	50

	Total	600	400

Minimum required in all papers collectively.

(a) Todhunter's Mensuration for Beginners.
(b) "Book-keeping," by Ball and Hamilton.
" "Pook-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

The marks gained by candidates who fail will not be published.

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burmah only.

Candidates will not be examined in any of the Calcutta offices.

2. Candidates not in Government employ, who wish to be examined at the College, must forward their applications direct to the Principal; those employed in Government offices through the head of their office, who will forward the application to the Principal.

All applications must reach the Principal 30 days before the date of examination.

3. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must be forwarded by the candidate, not direct to the Principal, but through the Examiner.

4. All applications must be accompanied by a fee of Re. 10 and the following

certificates.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned:—

(1) Certificate of good character signed by applicant's immediate official superior, or

- by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)
- (2) Certificate that candidate is under 25 years of age not required if candidate is in permanent Government employ, or an employe under District Boards.

(3) Certificate that the application is in candidate's handwriting.

It will rest with the Principal of the College, on a consideration of these certificates, to decide whether the candidate should be registered for the examination, or whether his application should be rejected.

5. Copies of examination papers are not procurable except those that are issued for

examination. These need not be returned.

6. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish a fresh fee and certificates.

7. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the Province or Railway under whom they may desire to be employed.

Accounts in the Province or Railway under whom they may desire to be employed.

8. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

J. S. SLATER, Principal, Civil Enginering College.

SIBPUR, the 3rd April 1893.

NOTICE.

It is hereby notified that at the next Half-yearly Departmental Examination of Assistants and Deputy Magistrates and of officers of Police, Jail, Medical and Forest Departments in the Chota Nagpur Division, two Local Committees will be convened, viz., (1) at Ranchi for officers employed in Lonardaga and Palamau, and (1) at Purulia for those employed in the districts of Manbhum and Singhuhum. The examination will be held on the 8th May 1893 and the following days.

W. H. GRIMLEY, Commissioner of Chota Nagpur.

COMMR.'s Office, Chota Nagrue, the 27th March 1893.

NOTIFICATION.

It is hereby notified that for the ensuing half-yearly Departmental Examination of Assistant Magistrates and others to be held in May 1893, two local Examination Committees will be convened in this division, viz., one at Bankipore for officers employed in the districts of Patna, Gaya, and Shahabad, and the other at Muzaffarpur for officers employed in the districts of Muzaffarpur, Darbhauga, Saran, and Champaran.

The examination will commence at 10-30 A.M. each day.

A. FORBES, Commissioner.

PATNA COMMR.'S OFFICE, BANKIPORE, the 21st March 1893.

NOTIFICATION.

The next half-yearly departmental examination of Assistant Magistrates and others employed in the Orissa Division, which will begin on Monday, the 8th May 1893, will be held in the Commissioner's Office at Cuttack.

H. G. COOKE, Offg. Commissioner.

ORISSA COMMR.'S. OFFICE, CUTTACE, the 6/h April 1893.

NOTICE

Is hereby given that for the next half-yearly Departmental Examination of Assistant Magistrates and others, which will commence on Monday, the 8th May 1893, three local centres will be formed in the Bhagalpur Division, viz., one at Bhagalpur for the examinees employed in the districts of Monghyr and Bhagalpur, one at Purnea for the examinees employed in the districts of Purnea and Maldah, and the third at Dumka for the examinees employed in the district of the Sonthal Parganas.

C. C. Quinn, Commissioner.

COMMR.'S OFFICE, BHAGALPUR, the 1st April 1893.

Nott to be a Commissioner of the Hazaribagh Municipality, vice Apothecary J. G. F. Fleming, Civil Medical Officer, transferred.

J. A. BOURDILLON. Offg. Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1303L.S.-G.—The 10th April 1893.—Whereas a notification, dated 24th September 1892, containing the rules, reproduced below, for the supply of copies of, and of information respecting, papers and documents in the offices of District and Local Boards in Bengal, was published at page 235, Part IB of the Calcutta Guzette of the 28th idem, and whereas no valid objection has been raised to the proposed rules within one month from the date of the local publication of the said notification, it is notified for general information that the Lieutenant-Governor is pleased, under section 138 (t) of the Local Self-Government Act III of 1885, to confirm the rules in question.

2. All applications for information or for copies of papers or documents shall be made at the office of the District or the Local Board to the Chairman or the Vice-Chairman between the hours of 12 and 2 P.M.

3. The applications shall be on printed forms as shown below, which may be obtained

from the office of the Board at the cost of one pice per sheet:-

Form of Application for Information.

Humber and date.	Name and residence of applicant,	ience of information		Fatra search- ing f. e deposited.	Date and (if extra fees have been paid) hour by which the information is to be ready.		Remare.
1	2	8	4	5	6	7 .	8
							· .

Form of Application for Copies.

- 3. The District or Local Board is not bound to give copies of any document required by the public. It shall rest with the Chairman or Vice-Chairman to determine in each case, on receipt of the application in the prescribed form, whether or not copies of the document applied for should be granted. Ordinarily copies of written arguments, discussions, notess opinions or reports of officers or members of the Board or of correspondence shall not be given.
 - (a) A copy of a copy shall be granted only when good grounds are shown for not taking it from the original, i.e., for not applying to the office where the original is kept. The ministerial officer in charge of the office of the District or Local Board shall be held personally responsible for the observance of this rule.
- 4. All applicants for copies shall supply blank folios at their own cost for the copies required—each folio to contain 150 words in English or 300 words in the Vernacular, four figures counting as one word. Printed forms of folios will be supplied by the Board in the form annexed (Annexure A) at the rate of one pice per folio.
- 5. Whenever a copy is refused, the folios deposited with the application for the copy shall be returned to the applicant.
- 6. All applications shall be numbered consecutively according to the number given to them in the registers to be kept for the purpose (vide rule 8 below) and filed in the office.
- 7. Applications for information should be submitted in duplicate, the applicant filling up the spaces reserved for the date, his name and residence, the particulars of the information required, and the ordinary and extra searching fees (if any) tendered by him. The officer receiving such application is to enter in the first column the consecutive number and in the seventh column his signature. He will also enter in the sixth column the date and hour, if necessary, by which the information is to be furnished. One copy of the application will be made over to the applicant with a direction to return with it at the time fixed. The other copy will be passed on to the clerk in charge, who will note in the eighth column the date and, in cases where the extra fee has been paid, the hour of receipt, and after entering in the column for remarks the necessary information, return it to the receiving officer before the time prescribed. On the applicant's reappearance, this copy bearing the information will be made over to him, and the other copy, bearing his dated receipt in the column for remarks, will be taken from him and recorded in the office. These forms will be filed in the order of their admission in a separate series for each month.
- 8. A register of applications for information is to be maintained in the following form:

Number.	Date of spplication.	Name and residence of applicant.	Nature of ir formation required.	Date on which infor- mation was supplied.	Ordinary searching fee paid.	Extra searching fee paid.	Fotal of columns 6 and 7.	Signature of the officer raceiving the appli- cation.	Bewares.
1	3	8	4	8	6	7	8	9	w
						•			

9. The ordinary searching fee shall be uniformly four annas for all cases. When this fee is paid, the time to be fixed for supplying the information required shall not, without the special orders of the Chairman or Vice-Chairman in each case, be later than 3 P.M. of the third open day after the presentation of the application, the day of presentation being exclud-

ed. The extra searching fee shall be an additional one rupes, by payment of which the applicant shall be entitled to receive the information applied for by 5 P.M. of the day on which

his application is presented.

10. Only one application need be made for copies of papers or for information required in connection with a single cause or matter, e.g., if copies are required of four separate papers in one record, only one application is necessary. When copies of, or information relating to, papers connected with different matters or causes are wanted, as many applications are necessary as the matters or causes to which they relate.

sary as the matters or causes to which they relate.

11. A uniform charge shall be made for the preparation of copies at the rate of four annas per folio to be levied in cashe; and the amount shall be credited at once to the Fund

of the District Board concerned.

- 12. All copies shall ordinarily be made by the Board's establishment, and when section-writers are employed, they shall be remunerated at the rate of two annas per folio. The other half of the charge levied represents the cost on account of the salary of the examiner. The accounts of the section-writers shall be made up monthly, and the amount due to each paid, out of the Board's funds, care being taken to see that nothing in excess of half the amount realised is paid away.
- 13. All copies must be examined and initialled by a salaried officer of the Board not being himself the writer of the copy, and shall before issue be "certified to be correct copies," the necessary endorsement being signed in full by the Chairman, Vice-Chairman, or such officer as the Chairman may appoint in that behalf; and in case of copies issued from the office of a District Board, these shall bear the seal of the District Board.

Copyists shall in no case be allowed to compare for themselves or each other.

- 14. If the quantity of paper supplied by the applicant falls short of what is required, a further supply of paper should be called for and obtained before the copies required are furnished to him. Should any applicant delay for more than a week after the period fixed for delivery of the copy to apply for the same, the fees paid by him shall be forfeited. All such orders for forfeiture shall be noted by the officer who keeps the register in the column for remarks in the register, and shall be brought to the Chairman or Vice-Chairman for signature on the day of forfeit. But nothing in this rule shall deprive the section-writers of the remuneration due to them.
- 15. Copies must be written only on one side of the sheet which must not contain more than the authorised number of words. Care should be taken to see that applicants are not imposed upon by the copyists unnecessarily spreading their writing.
 - 16. When an applicant requires his copies to be furnished on the day of application, an

* This is a fee for credit to the Board and no part of it is payable to the section-writers.

extra fee of one rupee (or, if the copies exceed four folios, of four annas for each folio*) shall be charged on all copies so furnished. Care, however, is to be taken that other applicants for copies do not materially suffer by the arrangement

If the granting of other copies be much delayed by this rule, an extra hand ought to be told off to furnish the copies urgently required

17. Under ordinary circumstances, the time for furnishing the copies required shall not be later than 3 p.m. of the third open day after the presentation of the application.

18. A register of applications for copies shall be maintained in the following form:—

Serial number.	Date of application.	Name of applicant.	Ordinary searching fee paid.	Extra searching f-e paid,	Piled with application.	700.3	Returned unused.		Date on which copy was ready for delivory.	delivery was taken.	Remarks.
1	2	8	•	5	β	7	8	9	10	11	19

19. In the case of maps and plans no general rule can be laid down. In each case a charge will have to be fixed with reference to the difficulty or intricacy of the work done, and to the cost of tracing cloth.

20. No fees are to be demanded or paid for searching for or copying papers required by public officers for public purposes. In such cases the copies are to be made by the establishment of the District or Local Board.

21. Copies of these rules in the vernacular are to be conspiciously exhibited in the offices of the District and Local Boards.

NOTIFICATION.

No. 1332M.—The 10th April 1893.—It is hereby notified for general information that, in the exercise of the power vested in the Local Government by section 13 of Bengal Act IV of 1889 (an Act to provide for the appointment of a Muhammadan Burial Board in Calcutta, and to make better provision for the interment of persons other than Christians and Muhammadans), the Lieutenaut-Governor confirms the rules set forth below which have been framed by the Muhammadan Burial Board under the said section of the Act:-

(a)—MEETINGS.

1. A meeting of the Board shall ordinarily be held on the second Monday-in each th. Three members of the Board (exclusive of the Chairman) shall form a quorum.

month. Three members of the Board (excusive of the Qualification).

2. The Chairman may summon a special meeting when he thinks fit, and shall do so

when required by three members of the Board.

3. In the absence of the Chairman at any meeting of the Board, the members present, being a quorum, shall choose one of their members to preside.

4. All questions shall be decided by a majority of votes. The Chairman of the

meeting shall have a second or casting vote.

Minutes of the proceedings of all meetings of the Board shall be kept and shall be signed by the Chairman.

6. Matters of emergency, and matters not provided for by the rules, shall be referred by the Secretary for the orders of the Chairman. All such references with the orders passed thereon shall be laid before the next meeting for confirmation.

• (b)—Pucca Graves.

1. If any pucca grave falls into a ruinous condition, the Board may call upon the friends of the deceased to repair it, and if they neglect to do so, or if they cannot be traced, the Board at their discretion may repair or remove such pucca grave.

2. The Board will undertake to keep in repair any pucca grave for the repair of which the friends of the deceased may deposit with the Board such sum as the Board may consider

to be sufficient.

(c)—FEES AND CHARGES.

The following fees shall be payable to the Board in respect of any burial in a cemetery under the charge of the Board :-

(1) For non-masonry graves-

, 3	Full size.		Medium.	Small.	
•		7×3	5 × 3	3×2	
For an ordinary funeral	•••	Rs. 2	Re. 1	8 As.	
For a pauper funeral	•••	Nil.	Nil.	Nil.	

(the poverty of the deceased being duly certified by a respectable Muhammadan of the locality where the death occurs, a medical practitioner, a Magistrate or a Member of the Board).

(2) For masonry graves-

For each grave at the rate of Re. 1 per square foot of land enclosed.

Monuments shall be charged for at 15 per cent. of cost, subject to a minimum

of Rs. 10 for each monument, and Rs. 5 for each head-stone.

3. All fees on account of masonry graves shall be payable to the Secretary to the Board, and for non-masonry graves to the person in charge of the burial ground approved by the Board.

4. All fees shall be payable in advance.

(d)

The time of interments shall be from 6 A.M. to 12 midnight.

- 2. Subject to these rules and under the general control of the Secretary or officer in charge of the cemetery, a grave may be dug by any person who has paid the proper fees and charges.
- 3. No non-masonry grave of full size shall be more than 7 feet by 3 feet, medium size 5 feet by 3 feet, and small size 3 feet by 2 feet.

4. No grave shall be less than 5 feet in depth, nor more than 8 feet in length, nor 6 feet in breadth.

5. After interment, the grave shall be properly covered with a flat roof of bamboos, or planks and carth.

- 6. All the graves shall be in regular lines. No person shall build or dig or cause to be built or dug a grave in any burial ground in any other line than that marked out by the Secretary.
- 7. In cases of new graves not less than 4 feet space shall be left between for future uses.
- 8. Between the two rows of graves there shall be a passage left of not less than 3 feet in breadth.
- 9. The Board shall have power to fix the number of grave-diggers for each cemetery.

 10. The Secretary is authorised to delay any work in which he considers inferior materials are being used and report the matter to the Chairman for orders.

11. Except for the purpose of fitting up, no stone is to be cut or chipped within the cemeteries. All rubbish is to be cleared away immediately the work is completed.

- The land used for a non-masonry grave may be re-used after a period of 10 years. OFFICERS OF THE BOARD AND THEIR DUTIES.
- 1. Officers drawing salaries of Rs. 20 and upwards per mensem shall be appointed by the Board at a meeting. Officers drawing salaries below Rs. 20 may be appointed by the Chairman. Any officer may be suspended or removed by the authority by which he was. appointed.

2.

 All servants of the Board shall receive appointment orders signed by the Chairman.
 The Secretary of the Board shall, under the Chairman, have control over all officers in charge of the cemeteries, clerks, grave-diggers and other servants of the Board, and shall report promptly to the Chairman cases in which any officer neglects his duties, and shall be responsible for the due observance of the rules and for the maintenance of the cemeteries in proper condition.

4. The Secretary may suspend or fine any of his subordinates for breach or neglect of duty, reporting his action for the approval of the Chairman. Any officer of the Board who shall accept any fee, perquisite or other gratuity than authorised salary for the perform-

ance of any duty under the Board shall be liable to immediate dismissal.

5. The Office of the Secretary shall be at No. 24, Taltolla Bazar Street, or such other place as shall be from time to time notified by the Board by public advertisement. His Office hours shall be from 10-30 A.M. to 4 P.M., except on Sundays and public holidays, and from 10-30 a.m. to 2 P.m. on Saturdays.

6. All books and registers maintained by the Secretary shall be kept at the Office.

They may be inspected by any member of the Board.

7. The Secretary shall prepare and keep plans of all the cemeteries showing the posi-

tion of existing graves on each and marking the positions of new interments.

8. No materials for graves, &c., will be allowed to enter the cometery without the sanction of the Secretary. He shall report to the Chairman the arrival of any materials which may seem to be defective.

9. The officer in charge of the cemetery shall be responsible for any irregularity or

damage committed at night.

10. No coach or other vehicle except carts employed on work, no horse or other quadruped, shall be allowed within the cemeteries.

11. No noise or other disturbance and no riotous or improper conduct shall be permit-

ted within the cemeteries.

12. The Secretary-Overseer and the Sub-Overseer shall see the rules enforced and carried out.

ACCOUNTS.

1. The Board shall submit to Government, annually, in the month of January, the budget statement of the estimated receipts and expenditure for the ensuing financial year. 2.

The Board shall submit to Government, annually, before the end of the month of

June, an account of the receipts and expenditure of the last financial year.

3. The officer in charge of each cemetery shall maintain such records and accounts as shall be from time to time prescribed by the Board, and shall submit monthly abstracts thereof to the Secretary. All such accounts and records shall be open to the inspection of the Board during office hours.

4. The Secretary shall submit at the monthly meeting of the Board a statement of the receipts and expenditure of the preceding month. He shall use vouchers with counterfoils in granting receipts for money received and keep a register, in the form prescribed, at each

5. The Secretary shall maintain an account of all moneys paid to him by private individuals for the employment of extra mallies or for providing flowers, shrubs, &c., either for the graveyard generally or for the graves of deceased friends.

A separate account shall also be kept of expenditure incurred on repairs of any pucca

grave under section (b), Rule 2.

MISCELLANEOUS.

1. The Commissioner of Police shall have power to order the exhumation of corpses whenever such exhumation is deemed necessary by him for police purposes, informing the Burial Board of his order.

2. In order cases, exhumation can only be permitted by the written order of the

• Chairman of the Board.

24. Parganas Collectorate, the 17th March 1898.

F. R. S COLLIER, Collector.

NOTICE is hereby given that the undermentioned plot of land no longer required by Government, situated along The Tirhut State Railway, in the district of Monghyr, will be put up to sale at 12 o'clock noon on Wednesday, the 26th April 1893, corresponding with the 25th Bysakh 1300 Fusli, at Begamsarai Station, Tirhut State Railway

Tirhut State Railway

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway feneing, or plough the land closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale. heing forfeited to Government, and one for again put up for sale at one risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming

the sales.

The Indian Law Reports.

Published under Authority.

The Indian Law Roports, published under the authority of the Governor-General in Council, appear in monthly ports, published as soon as possible after the first of each month at Calcutta, Madras Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series, including postag	c, Re	. 22	2-8.

FINANCIAL REVIEW FOR BENGAL.

Published for general information.

PART I.

The origin of Provincial Finance, and the Budget for 1893-94.

In laying before the Council the first Provincial Financial Review, I propose, with the permission of the President, to explain as briefly as possible how the system of Provincial Finance came to be introduced, and the main differences which distinguish it from the centralised financial system which it displaced. An attempt will then be made to compare Provincial Finance as understood in India with the cognate systems of Federal Finance as practised in the German Empire and the American Commonwealth. Finally I shall explain the most prominent and characteristic features of the Budget of the year 1893-94. In order to save the time of the Council, which has other business to transact, the full account of the working and results of the Provincial system has been included in the second part of this Review, which I do not propose to read to you now, though it will be published in the Gazette for the information of the public.

2. A high authority has stated that it was not until after the Mutiny in 1857 that anything deserving the name of systematic finance was introduced into India. The era of administrative development and opening up of the country which then set in gave rise to heavy expenditure in all directions, and a system of strict financial control became indispensable. In the first instance this control was necessarily vested in the Government of India, and was, as Sir John Strachey points out, of a severely repressive character. From the time of the Mutiny to the year 1871-72, when the system of Provincial Finance was brought into working, the Local Governments possessed no powers of financial control, and had no financial responsibility. The Supreme Government administered the minutest details of the public expenditure. Without its authority no official, however small his salary, could be employed at the cost of public funds, and even district roads and buildings and local works of improvement were hampered by the same onerous conditions.

3. The evils of applying this highly centralised system to an area so heterogeneous in respect of its physical conditions and the character of its inhabitants as the continent of India, became more and more apparent as time went on. As long ago as 1861-62 Mr. Laing laid stress in his Financial Statement on the

defects of the then existing system:—

'If this great empire is ever to have the roads, the schools, the local police, and other instruments of civilisation which a flourishing country ought to possess, it is simply impossible that the Imperial Government can find either the money or the management. The mere repair of the roads, where anything like a sufficiency of good roads has been made, is a matter altogether beyond the reach of any central bureau. It is of the first importance to break through the habit of keeping everything in dependence on Calcutta, and to teach people not to look to the Government for things which they can do far better for themselves. . . .

It is most desirable to break through the system of barron uniformity and pedantic centralisation, which has tended in times past to reduce all India to dependence on the bureaus

It is most desirable to break through the system of barren uniformity and pedantic centralisation, which has tended in times past to reduce all India to dependence on the bureaus of Calcutta, and to give to Local Governments the power and the responsibility of managing their own local affairs. The great branches of the expenditure, such as the army and national debt, are imperial; and while this is the case, the great branches of revenue must remain imperial also. But there is a wide field, both of revenue and expenditure, which is properly local, which in England is met by local rates, and which, in fact, must be met locally, or not at all.'

- 4. At about the same time the late Sir Henry Maine wrote with reference to the same subject:—'I do not think that anybody can have observed the recent workings of our system of financial control without coming to the conclusion that, if it be not on the point of an inevitable collapse, it is at all events in great danger of going to pieces unless the strain be lightened somewhere.'
- 5. Nor were the evils complained of by any means confined to the purely financial branches of the administration. It was bad enough of course that insufficient funds were available for local purposes, and that the utmost uncertainty prevailed as to the amounts likely to be sanctioned for Provincial expenditure. But the worst consequences were those which took effect on the administration itself, and on the relations between the Provincial and Supreme Governments. The constant scramble for the largest share of the public revenues—a scramble in which the least scrupulous were apt to come off best—brought with it serious differences of opinion as to petty details of expenditure and led to constant interference on the part of the Supreme Government in matters of which it was necessarily very ill informed. This was resented by the Local Governments, who were in touch with the facts and knew their own wants, and in this way a state of tension and conflict was brought about which added greatly to the difficulties of Indian administration.
- 6. In the Resolution of the 14th December 1870, the Supreme Government reviewed the entire question. They observed that, under the existing system, the division of responsibility was ill-defined, and that this led to conflict of opinion injurious to the public service. In order to avoid these conflicts, the obligation to find the funds necessary for administrative improvements ought to rest upon the authority whose immediate duty it is to devise such measures. They went on to say that the Supreme Government was not in a position to understand fully local requirements, nor did it possess the knowledge necessary for the successful development of local resources. Each province had special wants of its own, and might have means for

supplying them which could not be properly diverted to Imperial purposes. A tax applicable to the circumstances of one part of the country might be distasteful or unsuitable elsewhere, and everywhere rates might be proper for provincial

or local purposes, which could not be taken for the Imperial revenue.

7. In order to give effect to these principles, the Government of India accordingly made over to the Bengal Government for the year 1871-72 the financial control of the following services:—Jails, Registration, Police, Education, Medical Services (except Medical establishments), Printing, Roads and Miscellaneous Public Improvements, Civil Buildings, a certain proportion of Public Works establishments, and a certain proportion of tools and plant. The allotment given to meet these services amounted to Rs. 1,16,85,920 which was arrived at by adding up the actual charges of the year 1870-71, and taking this as the Provincial assignment, less a deduction of a rateable proportion of Rs. 3,50,000 which was resumed by the Imperial Government. By a subsequent Resolution of the 20th March 1871 a special allotment of Rs. 5,32,870 was made in order to enable the scheme to be inaugurated successfully. This sum was treated as the opening balance of the year 1871-72.

8. The Government of India undertook to maintain for the future the assignments for Provincial services at the amounts thus fixed, unless some fiscal misfortune, such as a heavy loss in the opium revenue, or some national disaster, such as war or severe famine, should occur; and pledged itself in any case not to reduce them without previous consultation with the Governments concerned. It was left to the discretion of the Governments to distribute the total grant among the several departments for which they had become responsible, and it was laid down that any portion of the assignment made to any province that might be unspent at the end of the year would not lapse to the Imperial revenue, but would remain at the disposal of the Local Government. It was further provided that each Local Government should publish its own yearly estimates and accounts in the local gazette, together with a financial exposition (which should, where possible, be made before the local Legislative Council) analogous to that annually made in the Legislative Council of the Governor-General.

9. The financial control thus entrusted to the Local Government was to be exercised subject to the conditions that without the previous sanction of the Government of India no appointment on more than Rs. 250 a month should be created; that no class or grade of officers should be created or abolished; and that no addition should be made to the pay or allowances of any individual or class of officers that would lead to increase in the emoluments of any public servants doing duty in the same province whose pay and allowances are charged to Imperial revenues. No public money might be invested, and no services rendered to other departments by the transferred departments were to be diminished, nor might the latter claim increased services from other departments. The rules of the Supreme Government as to leave of absentee and absentee deputation and superannuation allowances were to be observed, and returns, accounts and estimates were to be submitted to the Supreme Government in such form and at such times as might be prescribed.

10. In addition to these conditions, which were based in the main on financial considerations, the Local Government was reminded that increased powers of financial control would be accompanied by a corresponding increase of administrative responsibility, and that in respect of general principles it must follow the main lines of policy laid down by the Imperial Government. It was added that the procedure of the departments of Registration, Jails and Police was to a large extent governed by law; and that, although no law existed on the subject of education, the policy of the Government had been declared and prescribed in despatches from the Secretary of State, the authority of which and of the rules sanctioned by the Government of India regarding grants-in-aid and other matters of general principle was not affected by the policy of decentralisation.

11. In introducing this far-reaching administrative reform, the Government of India expressed the belief that it would produce greater care and economy; that it would import an element of certainty into the fiscal system which had before been absent, and that it would lead to more harmony in action and feeling between the Supremo and the Provincial Governments than had

formerly prevailed. Beyond all this there was a greater and wider object in view. It was felt that local interest, supervision and care were necessary to success in the management of funds devoted to education, sanitation, medical, charity and local public works. And it was hoped that the operation of the new scheme would afford opportunities for the development of self-government, for strengthening municipal institutions, and for the association of Natives and Europeans to a greater extent than before in the administration of affairs.

12. On looking at the system thus introduced it is impossible not to be struck by its resemblance to the systems of federal finance which prevail in the German Empire and in the American Commonwealth. In these countries the functions of the Imperial and the Local Governments are divided in much the same way as they are in India. Thus in Germany the revenues derived from Customs, the indirect taxes upon salt, tobacco, brandy, and sugar, the revenues from stamps, bills of exchange, securities and playing cards are set apart for the Imperial Budget, the expenditure side of which includes the cost of the Federal Government—the Army, Navy, Post Office, Telegraph, State Railway, Supreme Court, Imperial Bank, Pension and Invalid Funds, Currency Any deficit which remains after the sources of revenue reserved for and Debt. the Empire have been exhausted is met by contributions raised from the individual States according to their population. The actual demands under this arrangement varied in the Budget of 1892-93 from £9,405,191 levied on Prussia to £12,392 paid by the little State of Schaumburg-Lippe. In America the Federal Government raises its revenue by indirect taxation and chiefly by duties of customs and excise. Direct taxes were levied during the war, and stamp duties were also resorted to, but no stamp revenue is now collected by the National Government. The individual States on the other hand derive almost the whole of their revenue from direct taxation, as the levying of import or

export duties by a State is forbidden by the Federal Constitution.

13. Close as these resemblances are, there is no reason to suppose that the Indian system was modelled or has been materially influenced by these Federal systems of finance. Provincial finance is a plant of natural growth, developed under the pressure of administrative necessity, and owing nothing to the example of other countries. It was in fact devised, if not actually introduced, before the German system, which it most closely resembles, had come into existence; and it was developed on lines which, though leading to substantially the same result, started from diametrically opposite directions. Both in Germany and America the individual States came first, and they were the sole repositories of sovereign power. The Federal system was created by the States stripping themselves of certain attributes of sovereignty and making them over to the Central Government. In India this order of things was reversed. All power resided in the group of departments forming the Government of India, and for a long time this central bureaucracy absorbed and exercised all the functions of Government and itself transacted all financial business from the negotiation of a State loan down to sanctioning of a chaukidar's pay. At length the burden became too heavy and the complication too great, and the Central Government transferred some of its powers to the Local Governments to be exercised subject to the conditions Thus they arrived by an independent process of development at substantially the same results as the German Imperial Government. The main differences are, first, that in Germany the division of taxation between the Empire and the individual States is effected by reserving all indirect taxation for the former, and leaving to the States direct taxes which the Empire does not evy, and secondly; that the contributions of the States to the Empire are regulated with reference to the population concerned. In India, on the other hand, no attempt is made to set apart certain kinds of taxation as exclusively Imperial, and the division is effected by assigning arbitrary fractional shares to the Similarly the amount of the contributions levied from Provincial Governments. time to time by the Imperial Government is not regulated by any intelligible principle, but varies like the medieval benevolences according to the necessities of the moment. The Indian system, though less precise and logical than the German, is probably a good deal more elastic, and admits of being modified at intervals of five years, or even oftener, in accordance with the requirements of Imperial Finance.

I now turn to the current contract, which began to take effect on the 1st After a lengthy correspondence with the Government of India, the terms and conditions of this contract were finally settled on the 17th March It was then arranged that the revenue and expenditure shown in the schedule attached to the Government of India's letter of that date should be Provincial in certain specified proportions, and that, from the revenues thus assigned, a deduction of Rs. 14,39,000 should be made through the Land Revenue head. The Bengal Government has no means of knowing on what basis, or hy what method of calculation, the sum of Rs. 14,39,000 was arrived at. On the receipt side of the account, the Provincial Government gets the whole of the following items:-Twelve per cent. on the Land Revenue collected from Government estates; rents of Salt Warehouses; fines and other minor receipts; Provincial rates; minor customs receipts; interest on local loans; receipts from Courts of Law, Jails, Police, Marine, Education, Medical, Botanic Gardens. Cinchona, Fairs, and Emigration and receipts in aid of superannuation; also Stationery and Printing, except the value of supplies to Railways and local bodies. and all receipts from Irrigation, Navigation, and Civil Works. It receives one-half of Assessed Taxes, Forest receipts, and Registration receipts, and of the traffic earnings on the Eastern Bengal Railway System; one-fourth of Excise and of minor Land Revenue heads, and three-fourths of the important head of Stamps. The revenue from these sources for 1893-94, excluding the opening balance, is estimated at Rs. 4,22,30,000.

15. On the expenditure side the Government of Bengal is required to meet all charges under the head of Land Revenue, except Survey and Settlement; all expenditure for Provincial rates, and the transferred heads of Customs and Salt and Interest; also charges arising under the heads Courts of Law, Jails, Police, Marine, Education, Medical, and, with certain exceptions, Political; the whole of Scientific and Minor Departments, except Census, Ancient Manuscripts and certain Veterinary charges; the whole of Stationery and Printing; working expenses of Irrigation and Navigation and Civil Works, with the exception of Imperial Buildings. It is also responsible for one-half of the expenditure under Assessed Taxes, Forest, and Registration, and for half of the working expenses of the Eastern Bengal Railway System; for three-fourths of Stamp expenditure

and a quarter of Excise.

Concurrently with the settlement of this contract, the general rules regulating Provincial finance were republished with the modifications they had undergone up to date, and it was also laid down that, if any considerable charge of an exceptional nature, which ought ordinarily to be borne by one Province were paid in another Province, the question of a corresponding adjustment between the two would be specially dealt with. This latter provision was rendered necessary by the decision to stop inter-provincial adjustments. It was further arranged that, on the score of the technical character of the work and the necessary uniformity in the working of all State Railways, the Provincial Government should not exercise any administrative or financial powers in regard to the Eastern Bengal Railway; but in order to maintain the Local Government interests in the constructing feeder roads and in the general development of communition in the tract served by the Railway, half the net earnings should be Provincial; that the capital expenditure required to complete the Higili Canal should be advanced on certain terms from Imperial funds; that the expenditure on Survey and Settlement operations during the term of the contract, being in its nature liable to great variations, and difficult to reduce to a uniform yearly average, should be met by Imperial revenues; and lastly, that if the recoveries on account of the Survey and Settlement operations in Bihar should fall short of the expenditure which is recoverable from the zamindars and raiyats, the difference should be charged to Provincial revenues.

17. With reference to doubts which had arisen concerning the interpretation of former contracts, the Government of India took the opportunity of declaring the contract to be a consolidated one, and not a collection of separate contracts for each Provincial head. They also stated that the representations made by the Government of Bengal, regarding each separate head, had received careful consideration, and that the adjusting figure of Rs. 14,39,000 had been fixed, so as to place the revenue and expenditure in equilibrium on the basis

generally of the existing stage of growth. The Local Government, it was said, would be expected to maintain all the Provincial services in a state of administrative efficiency, providing any increased expenditure necessary for that purpose either by reductions of expenditure or from increased revenue. It was added that the Bengal Government would not be entitled to assistance from Imperial revenues to meet future increases of expenditure or decreases of revenue, of whatever nature, classified under Provincial heads.

18. I pass on to notice in somewhat fuller detail those heads of the Budget

for 1893-94 which seem to stand in need of comment or explanation.

RECEIPTS.

19. Land Revenue.—The Government of India have accepted the estimate of total collections under this head, as passed by the Local Government for 1893-94, amounting to Rs. 3,84,33,000. The estimate provides Rs. 5,07,000 for "12 per cent. on collections from Government estates." Including this amount, the Provincial share of land revenue comes to one-fourth of (Rs. 3,84,33,000—5,07,000) + 5,07,000=Rs. 99,88,000.

The debit of Rs. 13,50,000 to Provincial shown under Land Revenue

adjustment is made up as follows:-

	•	•	Rs.	$\mathbf{Rs.}$
For fixed contribution For interest on th	to Imperial revenues ne capital advanced or remodelling the Hi	from	•••••	14,39,000
Tidal Canal	··· ···		•••••	21,000
—bb A	Total deduction	•••	*** **	14,60,000
For capital outlay on	Hidgelee Tidal Canal		1,00,000	
Boards Buildi	ngs transferred to D	ristrict	10,000	1,10,000
	Net deduction	***		13.50.000

It may be here mentioned that for reasons of account all transfers as between Imperial and Provincial revenues are effected through the head of Land Revenue under the sub-head of adjustments.

20. Stamps.—The estimate of total revenue from stamps for 1893-94 amounts to Rs. 1,57,00,000. The growth of this most important and expansive branch of Provincial revenue during the past four years has been as follows:—

			•	Increase.
		\$	$\mathbf{Rs.}$	Rs.
1887-88	•••	•••	1,38,16,000	•••••
1888-89		•••	1,38,39,000	23,000
1889-90	•••		1,42,38,000	3,99,000
1890-91	•••	•••	1,42,47,000	9,000
1891-92	•••	•••	1,51,00,000	8,53,000
	Total	•••	•••••	12,84,000

The increase amounts to Rs. 12,84,000, or an average of more than three lakhs a year. The smallness of the increase in 1890-91 was due to the reduction in the rate of copying fees from 4 annas to 3 annas per folio, with effect from 1st April 1890. The revised estimate for 1892-93 amounts to Rs. 1,55,50,000, and the estimate for 1893 94 has been placed at Rs. 1,57,00,000. As the stamp duty is fixed by substantive law at rates which cannot be altered, the revenue under

this head cannot be materially affected by administrative measures. All that can be done is to watch the working of the law carefully, to look out for evasions, and to see that adequate penalties are levied for breaches of the law and rules.

21. Excise.—The Accountant-General estimated the total revenue for the year 1893-94 at Rs. 1,12,00,000, against Rs. 1,10,64,413 estimated by the Board of Revenue. In Government order No. 654T.-F., dated the 24th October 1892, sanction was given to the enhancement of duty on wholesale licenses for the vend of imported liquor in the town of Calcutta from the nominal sum of Rs. 50 a year to Rs. 50.a month, or Rs. 600 a year, from 1st April 1893. Some changes have also been made in the duties on retail licenses. The effect of these orders will be to increase the revenue to a considerable extent. A substantial increase is also anticipated next year under the head "Farm of drugs," owing to the present rates of duty on all kinds of ganja being raised by one rupee per seer with effect from 1st April 1893, under the orders of the Government of India, in the Finance and Commerce Department, No. 784, dated the 23rd February 1891. It was calculated that the total increase on this and other accounts would not be less than three lakhs, and accordingly the Accountant-General's estimate was raised from Rs. 1,12,00,000 to Rs. 1,15,00,000, and this has been accepted by the Government of India.

22. Provincial Rates.—The head Provincial Rutes represents principally the

22. Provincial Rates.—The head Provincial Rates represents principally the proceeds of the Public Works Cess, but it includes also the recoveries from District Funds of the proportionate cost of collecting Road Cess and the Rates for the general management of Wards' and Attached Estates. The receipts have

been as follows:-

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	Revised estimate, 1892-18.	Estimate, 1893-91.
(a) Public works cees (b) Proportionate cost of collecting road cees (c) General management of wards and attached estates.	1,08,154	Rs. 37,97,670 2,68,08a 90,369	Rs. 39,11,495 3,12,096 82,235	Rs. 88,93,461 8,55,052 71,420	Rq. 40,79,753 8,64,355 80,419	Ra.	Rs. 41,50,000 8,31,000 80,000
Total	42,36,538	41,56,323	43,06,024	43,19,933	45,24,527	45,40,000	45,61,000

The variations under (a) were due to progress in valuation and revaluation of districts. The gross rental assessed on the introduction of the road cess was Rs. 13,11,68,432, and on the same basis the statistics furnished by the Board of Revenue show that it amounted to Rs. 14,60,45,236 in 1890-91, and Rs. 14,78,83,221 in 1891-92. Large recoveries of the arrears of rate on wards' estates were effected from the Burdwan Raj in 1887-88, and this accounts for the larger receipts under (c) in the first year of the contract. The comparatively smaller receipts under (c) in 1890-91 and 1891-92 were due to the release from Government management of a large number of estates during the

course of the former year. .

Head (b) is a new head of account which appeared in the Provincial Account in consequence of the introduction of the Local Self-Government Act. Prior to the extension of the Act, the charges for the collection of both the Road and Public Works Cesses were shown in the District Road accounts, the cost of collecting the Public Works Cess being paid to the District Road Committees through the adjusting head of Contribution, an assignment of Rs. 47,000 being made in the Provincial Contract under that head. The arrangement has now been reversed. The collection of the cess in the districts, where the Local Self-Government Act has been introduced is shown as a Provincial charge, and is recovered from the District Funds before the net collections of the Road Cess are made over to the District Boards.

23. Assessed Taxes.—The Accountant-General placed the estimates of total receipts for 1893-94 at Rs. 43,50,000. Looking to the steady growth of revenue under this head, the estimate was raised by this Government to Rs. 44,00,000, but this has been reduced by the Government of India to Rs. 43,30,000, with reference to the actuals of 12 months ending January 1893, which amounted to

Rs. 43,28,000.

24. Forests.—The following table shows the estimates of receipts and expenditure for the year 1893-94, compared with the actuals of 1891-92 and the sanctioned and revised estimates of 1892-93:—

BUDGET HEADS.	Actuals, 1891-92.	Sanctioned estimates, 1892-93.	Revised Estimates, 1892-93,	Budget estimates, 1898-94.
Receipts.	Rs.	Ra.	Ro.	Re.
1.—Timber and other produce removed from the forests by	41.503	59,400		96,100
II.—Timber and other produce removed from the forests by	6.95.062	7.21,000	·	7.07.250
III.—Confiscated, drift and waif wood	8,210	17,000		18,180
IV Revenue from forests not managed by Government	49,778	34,600		29,470
Total	7,89,553	8,82,000	7,80,000	7,74,000
Expenditure.				•
A.—Conservancy and Works.				
I.—Timber and other produce removed from the forests by Government agency II.—Timber and other produce removed from the forests by	25,004	41,040		
consumers or purchasers	49,156	48,744		
V.—Revenue from forests not managed by Government V.—Rent of leased forests and payments to share-holders in forest	4,118	5,000		
managed by Government	85.946	26,600		!
VII.—Communications and buildings	19,841	46,400	1	
III.—Demarcation, improvement and extension of forests IX.—Miscellaneous	29,495 5,645	37,656 5,560		
Total A—Conservancy and Works	1,60,198	2,11,600		
B.—Establishments.				
1.—Salaries	1,98,631	8,50,740		
II.—Travelling allowances	30,846 9,804	\$3,500 6,400		
Total B—Establishments	2.39.321	2,70,000		
GRAND TOTAL OF EXPENDITURE	4,08,519	4,81,000	4,45,000	4,81,000
Surplus	8,81,034	8,51,000	8,05,000	2,93,000

The estimates provide for a surplus of Rs. 2,93,000 at the end of 1893-94,

against Rs. 3,05,000, the latest estimate for 1892-93.

25. Registration.—The Accountant-General placed the revised estimate for 1892-93 at the same figure as the original estimate for the year, which was Rs. 13,60,000. This amount was also proposed as the estimate for 1893-94. The actuals for the twelve months ending January 1893, were Rs. 14,08,000, and the revised estimate for 1892-93 has been placed at Rs. 14,10,000, and the estimate for next year at Rs. 14,20,000. Half the receipts only are Provincial.

26. Jails.—The total receipts for 1893-94 were estimated by the Inspector-General at Rs. 9,72,000, while the Accountant-General placed them at

26. Jails.—The total receipts for 1893-94 were estimated by the Inspector-General at Rs. 9,72,000, while the Accountant-General placed them at Rs. 9,09,000, reducing the estimate under the head Jail Manufactures by Rs. 63,000. The Lieutenant-Governor considered that the probable receipts under this head had been under-estimated by the Accountant-General, and thought they might safely be placed at Rs. 9,50,000. The total estimate of

receipts was accordingly placed at Rs. 9,59,000.

27. Police.—The Accountant-General estimated the total receipts for 1893-94 at Rs. 2,46,000, against Rs. 4,60,000, the sanctioned estimate for 1892-93, and Rs. 4,48,634, the actuals of 1891-92. The decrease is due to the exclusion of receipts on account of village police in the Chota Nagpur Division, which have been transferred from Provincial to Local. The estimate has been further reduced by Rs. 27,000 on account of the transfer of fees for the inspection of steam-boilers from the Provincial account.

28. Marine.—The Accountant-General estimated the total receipts for 1893-94 at Rs. 9,28,000, against Rs. 9,68,000, the sanctioned grant for 1892-93, and Rs. 9,65,408, the actuals of 1891-92. The actual receipts, during the twelve months ending January 1893, were Rs. 9,04,000. The revised estimate for 1892-93 has accordingly been placed at Rs. 9,05,000, and the estimate for 1893-94 at Rs. 9,12,000.

29. Education.—The total receipts of the Education Department for 1893-94 are estimated at Rs. 5,71,000, against Rs. 6,10,000, the sanctioned estimate for

1892-93. The actuals of 1891-92 amounted to Rs. 5,95,123, and those of the

twelve months ending the 30th September 1892 to Rs. 5,70,758.

30. Medical.—The estimate of receipts for the year 1893-94 was placed by the Accountant-General at Rs. 1,49,000, against Rs. 1,50,000, the sanctioned estimate for 1892-93. The estimate has been raised by Rs. 2,000 as some receipts are anticipated in consequence of the circular what the Sanitary Board have issued to all municipalities laying down the rate of fees to be levied from them for the preparation of plans and estimates for drainage and water-works schemes.

31. Scientific and other Minor Departments.—The principal items of receipts under this head are from Cinchona manufacture and Emigration fees. The

total receipts are estimated at Rs. 1,62,000.

32. Civil works by Civil Officers.—The Provincial receipts from ferries for the year 1893-94 are estimated at Rs. 2,27,500, and the receipts from cemeteries at Rs. 2,500, against Rs. 2,23,500 and 2,500, respectively, the amounts sanctioned for 1892-93.

EXPENDITURE.

33. Land Revenue.—The Accountant-General's estimates for 1893-94 under all the Provincial heads and sub-heads of expenditure amount to Rs. 34,19,000, as follows:—

			Es.
Charges of district administration	•••	•••	29,43,000
Management of Government estates	•••	•••	4,01,000
Land Records and Agriculture	•••	•••	75,000
Total	Provincial	•••	34,19,600

The estimate was raised by this Government by Rs. 4,000 in order to provide for revision of office establishment in the Deputy Commissioner's office, Sonthal Parganas. The increased provision, however, does not appear in the estimate of the Government of India.

- 34. Salt.—The Accountant-General estimated Rs. 31,000 for expenditure of the Salt Department during 1893-94, which is the ordinary normal expenditure of the Department. A provision of Rs. 10,000 has, however, been kept in reserve to meet any further improvements that may possibly be made in order to provide increased facilities for the trade at Sulkea, Chittagong, or Narainganj, and the estimate has therefore been raised to Rs. 41,000. The revised estimate for 1892-93 amounts to Rs. 1,25,000, which includes a special provision of Rs. 75,000, the amount payable to Mr. Kilby as an honorarium for his patent salt weighing machine.
- 35. Stamps.—The total expenditure for 1893-94, of the Stamp Department, is estimated at Rs. 6,14,000, against Rs. 5,68,000, the sanctioned grant for 1892-93, and Rs. 4,51,779, the actuals of 1891-92. The actuals of 1891-92 did not include the cost of plain paper for use with Court-fee Stamps, which, under the terms of the new Provincial Contract, is charged to this head with effect from 1892-93, instead of to "Stationery and Printing." The Provincial share amounts to Rs. 4,61,000.

36. Excise.—The chief variations in this budget are due to the reduction of the salary of Excise Commissioner from Rs. 2,900 to Rs. 1,800, as under the orders of the Secretary of State, the Excise Commissioner will now ordinarily be a Magistrate of the second grade. Larger provision has, however, been made for the construction and completion of distillery buildings, and the total grant now stands at Rs. 7,16,000, of which the Provincial share is only one quarter, or Rs. 1,79,000.

37. Assessed taxes.—The total expenditure of the Income-Tax Department during 1892-93 was originally estimated at Rs. 1,90,000, and this amount was reproduced by the Accountant-General as the revised estimate for the year, while he piaced the estimate for 1893-94 at Rs. 1,89,000. It has

been taken by the Government at Rs. 1,93,000, of which the Provincial share is one-half. The Accountant-General's estimates for 1893-94 include a provision of Rs. 3,600 for the local allowance of Rs. 300 per month drawn by the Superintendent of Preventive Service for performing the duties of the Collector of Income-Tax, Calcutta. As Mr. Kilby, the permanent Superintendent, has retired from the service, and a whole-time Collector of Income-Tax on Rs. 700—1,000 per mensem has been appointed, a provision of Rs. 8,400 as salary, and Rs. 1,200 as house allowance, has accordingly been made under this head.

38. Judicial Courts.—The following table compares the estimates of expenditure for 1893-94 with the sanctioned grants for 1892-93 and the actuals

of 1891-92:-

14,862 2,82,000 14,358 13,000 70,430 63,000 3,59,269 43,90,000 2,01,489 1,82,000 2,44,523 22,45,000	2,90,000 18,000 63,000 44,50,000 1,78,000 22,56,000
1,28,755	1,30,000
	1,41,299 11,35,000 3,14,862 2,82,000 14,358 13,000

The increased provision of nearly a lakh of rupees under Civil and Session Courts on the actuals of 1891-92 represents the financial effect of the increase which has been found necessary in the number of Subordinate Judges, and Munsifs and Judicial establishments generally. There has also been sanctioned an addition to the ministerial establishment of the Civil Courts in consequence of the recommendations made in the reports of Messrs. Toynbee and Stevens, who were appointed to enquire into the subject.

39. Jails.—The grants for 1893-94 for the Jail Department are as fol-

lows:-

					Sanctioned grant,
Jails.					Rs.
Superintendence Presidency Jail Central Jails District ,, Lock-ups Reformatary Schools	•••	•••	90 900 900 100	••• ••• ••• •••	52,836 98,826 4,93,894 5,81,958 1,20,457 35,975
Add for rounding	,.,	***	,	***	13,83,946
Jail manufactures		. Total	•••	•••	13,84,000 7,95,000
•		GRAND TOTAL		***	21,79,000

The total grant amounts to Rs. 21,79,000 against Rs. 20,22,000 the actuals of 1891-92 and Rs. 20,90,000 the revised estimate for 1892-93.

The increase in expenditure, which is partly counterbalanced by an increase in receipts, is necessitated by the increase of jail population, and adequate provision has to be made for the high prices of food-grains for ration expected to prevail

during the year.

40. Police.—The total expenditure of the Police Department for 1893-94 was originally estimated at Rs. 56,80,000, from which were deducted Rs. 21,000, the charges connected with steam-boiler inspection, and Rs. 75,000 under the head of temporary transport for the South Lushai Hills. The Government of India have accepted the deduction only of the first item, so that the grant now stands at Rs. 56,59,000. The estimate under Special Police, amounting to Rs. 4,98,000, includes a lump provision of Rs. 4,46,000 for expenditure during the ensuing year under the head South Lushai Hill Force. The estimate has been accepted provisionally, subject to any modifications which Government may hereafter find it necessary to make in view of the approaching transfer of the South Lushai territory to Assam.

41. Marine.—The difference of Rs. 10,000 under this head between the estimate of the Government of India and that of the Local Government represents the provision made by this Government for compensation payable to Captain Petley, the Port Officer, on account of his enforced retirement, which is payable by the Provincial revenues, but which does not appear to have been included in the budget passed by the Government of India. A sum of a lakh and a half required to meet the balance of the cost of the new pilot vessel to replace the. Coleroon, which is now being built at the Government Dockyard at Bombay, has been provided under the head of Purchase and hire of ships and vessels.

42. Education.—The estimate provides for a total expenditure of Rs. 25,73,000 against Rs. 25,30,000, the revised estimate for 1892-93. The increase is chiefly for grants-in-aid for primary education, and for additional staff sanctioned for the Sibpur Engineering College. This heavy expenditure includes the cost of Government Colleges which accounts for Rs. 5,20,000, Government schools Rs. 5,45,000, and grants-in-aid Rs. 5,89,000. These are institutions for general education, but special or technical education is also fairly well supported—Government Professional Colleges costing Rs. 1,21,000 and Special Government schools Rs. 1,45,000.

43. Medical.—The grant for the Medical Department for 1893-94 stands—

					Rs.
Medical Establishmer	ıt	•••	•••		5,86,000
Hospitals and Dispen	saries	•••	•••	•••	3 ,83,000
Sanitation and Vacci			•••	•••	1,92,000
Grants for medical pr	1rposes	•••	•••	•••	3,500
Medical Schools and	Colleges	•••	••		2,68,000
Lunatic Asylum	•••	•••	•••	• • •	1,10,000
Lock Hospitals	•••	•••	•••	•••	16,000
Chemical Examiner		•••	***	•••	26,000
Refunds	***	•••	•••	•••	₹200
			Total	•••	15,85,000

The total grants amount to Rs. 15,85,000 against Rs. 15,67,000 the actuals of 1891-92—Rs, 15,80,000 the revised estimate for 1892-93 proposed by this Government. and Rs. 16,00,000 the revised estimate of the Government of India. The incease on the actuals of 1891-92 is due to the normal growth of the administrative charges.

The estimate of the Local Government includes an additional provision of Rs. 4,000 for remuneration to Civil Surgeon's clerks for doing vaccination work. The provision does not appear in the estimate of the Government of India. This additional duty forms a portion of a large scheme of reorganization which has been recently carried out, and which is expected to bring about a great extension of vaccination, and materially to enhance its efficiency in rural areas.

44. Scientific and other Minor Departments. -- The following table shows the details of the grants under this head:—

	Ra
Provincial Museums	16,140

Charges in connection with the Indian Factories Act	18,400
Total Provincial	3,64,546

The estimate for 1893-94 is Rs. 3,64,000 against Rs. 3,13,000 the actuals of 1891-92 and Rs. 3,25,000 the revised estimate for 1892-93. The increase is chiefly for the provision of two new items, veterinary charges (19,000) and charges of Indian Factories Act (18,400), which were not in existence in 1891-92.

45. Stationery and Printing.—The estimate under this head amounts to Rs. 13,05,000, but it is hoped there will be some reduction of expenditure under this head in consequence of the recent orders issued to revise each form, whenever necessary, only once in a year, and not to introduce new forms, except under special orders, till the old stock is exhausted.

46. Civil works by Civil officers.—The difference of Rs. 32,000 under this head between the estimate of this Government and that of the Government of India is due to the provision struck out by the Local Government for the construction

of bridges in the South Lushai Hills.

47. The closing balance, as now estimated by the Government of India, is Rs. 20,72,000, i.e., Rs. 72,000 in excess of the minimum balance, which the Provincial Government is required to maintain under the orders of the Government of India.

The foregoing paragraphs explain, in as full detail as is appropriate to the occasion, the figures of the Provincial Budget estimate of 1893-94. For the results of the system of Provincial Finance from its first introduction in 1871-72 to the close of the financial year 1891.92, a period of twenty years marked by great financial vicissitudes, I must refer the Council to the second part of this Review, which, as I have already stated, will be published in next Gazette for the information of the public. It is sufficient to say here that the Bengal of the present day owes to Provincial Finance most of the facilities and conveniences which distinguish it from the Bengal of 20 years ago: its railways, its irrigation and navigation canals, many of its most important roads, and a host of administrative improvements which it would be tedious to enumerate, amongst them the Council Chamber in which we are now assembled. The period of 20 years which we have to look back upon was one, as I have already said, of many vicissitudes and public calamities. At its opening the province had hardly recovered from the shock of one famine and was soon to suffer from another. Cyclones, floods, wars and rumours of wars, a falling exchange, grave alternations of agricultural depression and prosperity, serious changes of policy affecting the revenues of the State, all these things form a series of events beyond the control of the Provincial Government, which are liable to recur at any moment, and which constantly threaten the security of the Provincial finances.

Statement showing the Bengal Provincial Services Estimate for 1893-94 and the Revised Estimate for 1892-95

	Revised estimate for 1892-35 as reported to the Government of India, Funance and Cour- morce Department, in better No. 1848, dated 9th March 1893.	Bevised estimate for 1898-93 as passed by the Government of India.	Estimate for 1805-54 as arbmitted by the Government of Bengal to the Government of India.	Betimate for 1893-94 as passed by the Government of India.	BEPREDITURE.	Revised estimate for 1899-33 as reported to the Government of India, Finance and Com- merce Department, in letter No. 1948F., dated 9th March 1893.	Revised estimate for 1802-38 as passed by the Government of India.	Estimate for 1895-99 as submitted by the Government of Bengal to the Government of India.	Betimate for 1803.04 as passed by the Government of India.

PART II.

The Working of Provincial Finance.

In attempting to gauge the results of the process of decentralisation which 'The contract of 1871-77. commenced in 1871-72, and to indicate the direct and tangible benefits which Bengal has derived from it, it will be convenient to follow in the main the periods at the close of which the arrangement, of late years called a contract between the Imperial and Local Governments, has been revised. The first of these periods embraced the six years, 1871-72 to 1876-77. Since then the contract has been revised at intervals of five years.

Accounts of Provincial Services from 1871-72 to 1876-77.

• * Adjustment of old error.

2. Before proceeding to comment in detail on the figures of this statement, it will be convenient to recapitulate briefly the various classes of estimates and accounts with which the Provincial Government then had to deal. There were, first, the estimates and accounts of Imperial Services; that is to say, of those branches of revenue and expenditure which had not been made over to provincial control and management. In its relation to these services, the Local Government was in the same position that it held before the introduction of the Provincial Services scheme in 1871-72. Secondly, there were the estimates and accounts of Provincial Services, or of those branches of revenue and expenditure, originally Imperial, made over to the management of the Local

Government under the system of provincial contracts. Third/y, there were the estimates and accounts of the funds constituting the Provincial Reserve, that is, of those Local Funds, the balances of which were at the disposal of the Local Government for provincial purposes. Fourthly, there were the estimate and accounts of those Local Funds (properly so called) which are by law or by their constitution devoted to particular local and limited objects. The amount of control which could be exercised over these by Government varies considerably, and might be said to be at a minimum in the case of the District Road Fund, and at a maximum in the case of the Port Funds. Both these strictly Local Funds, and those included under the Provincial Reserve, might be divided with reference to their origin into two classes, thus-

(I)—Funds supported by compulsory rating, or by payments under sanction of law, or orders having the force of law.

(II)-Funds made up of payments of the nature of rents, tolls, or fees for services or facilities rendered or privileges conferred.

Lastly, there were the accounts and estimates of Municipal Funds. These, though strictly speaking local funds, were not dealt with in the Local Funds Budget of this Government, under which only the funds of the fourth class were

treated together.

By its Resolution No. 1896, dated the 28th March 1877, the Government of India directed that the transactions of the Local Government, under the heading of 'Provincial Services,' should be re-incorporated in the general estimates and accounts. The effect of this order was to amalgamate, for the purposes of the Imperial Budget, the first and second classes of accounts and estimates described in the preceding paragraph. A later Resolution, No. 1072 of the 20th February 1878, re-incorporated with the estimates and accounts of Provincial Services "those resources recorded under 'Local Funds' which were at the free disposal of the Local Government for expenditure in any part of its jurisdiction without legal let or hindrance." The effect of this was to incorporate with the estimates of Provincial Services, and therefore with the Imperial estimates, the transactions of the funds treated in Bengal as Provincial Reserve

(i.c. the third class above described).

4. Turning now to the statement, it must be observed first of all that the figures for the years 1871-72, 1872-73, 1873-74 include the receipts and charges of Assam, while those for the last three years of the period include the accounts for Bengal only. Secondly, it must be remembered that the Imperial assignments, originally fixed at Rs. 1,16,85,920, underwent a number of modifications, according as certain services were transferred to the management of the Government of Bengal or withdrawn from its control. The most important of these, and the only one which need be mentioned in a historical review, is the reduction of Rs. 13,30,000 on the separation of Assam. This sum was arrived at by allotting to Assam the actual average expenditure on provincial services within its limits during the last three years of its connexion with Bengal, the Bengal estimate being reduced by that sum. The average expenditure was ascertained to be Rs. 5,30,000 on provincial public works and Rs. 8,00,000 on other provincial services, and by deducting this sum the Bengal assignment was reduced in 1874-75 to Rs. 1,10,41,000, as shown in the statement. It may be added that the large increase in the allotment which appears in the year 1872-73 was due to a special grant from the Supreme Government of Rs. 8,66,677 for the price of the old Sadar Court building, and of one lakh for expenditure on the relief of the so-called Burdwan fever, which caused heavy mortality in that year.
5. Turning now to the detailed heads, we find under Jails an increase of

nearly two lakks in charges, against which we must set an increase of rather less than the same amount in receipts. Extended manufactures brought about larger sales on the one hand, and on the other involved increased purchases of raw material; establishments were to some extent increased, and in the scarcity years

1873—75, the larger jail population swelled the expenditure on diets.
6. The Registration receipts were nearly doubled owing to Sir George Campbell's liberal extension of rural sub-registry offices, but although there is no doubt that this department earned a profit on the whole, and was indeed the only department of those transferred in 1870 in which the income was susceptible of much development, still the exact earnings cannot be stated, as the charges for buildings were provided for in the Public Works budget.

7. Owing doubtless to the transfer of the Assam districts, and probably also to some change in the form of the accounts, the *Police* figures show a reduc-

tion of nearly four lakhs under Receipts and ten lakhs under Charges.

8. Education receipts rose by nearly a lakh and the charges by nearly five lakhs, notwithstanding the transfer of territory to Assam. The increase under the head of receipts was mainly due to the large grants made to primary.schools under the policy introduced by Sir George Campbell, while greater liberality in the bestowal of scholarships, larger grants to Muhammadan schools and district schools, and the strengthening of the inspecting agency which this policy involved, also contributed to the same result.

In the Medical Department the receipts rose from under half a lakh to about a lakh and a half, and the charges from nine lakhs to over thirteen and a half. This was due partly to the Burdwan epidemic fever, but mainly to the great extension of dispensaries and hospitals initiated by Sir G. Campbell, who admitted that in this he had not exercised so severe an economy as in other

branches of administration.

The figures shown under the three heads Miscellaneous, Contributions and Public Works, are greatly complicated by transactions relating to the scarcity Thus the receipts under Miscellaneous rose from Rs. 98,460 in 1871-72 to Rs. 33,70,092 in 1873-74 and to Rs. 77,29,059 in 1874-75, owing to the inclusion under this head of the special famine grants of Rs. 22,89,100 and Rs. 76,38,139 made by the Government of India for expenditure on relief works. Then the heavy charges shown under Contributions represent the special grants made by the Local Government to District Road Committees for the same purpose, while the greatly enhanced expenditure of the Public Works Department during the two years is also due to relief operations.

The same cause, unforeseen and uncontrollable expenditure on relief, accounts for the startling fluctuations which appear in the balances. In the first two years the strict economies of Sir George Campbell effected savings aggregating about seventeen lakhs of rupees under the Provincial Service heads, and the year 1872-73 opened with a balance under those heads of Rs. 22,23,126, while the balance under Provincial Reserve had risen to Rs. 16,12,440, making a grand provincial balance of Rs. 38,35,566. For the year 1872-73 very liberal grants were made under Education, Medical, Public Works, and other headings; but the closing balance under 'Service' rose to Rs. 35,58,298. This result is, however, partly to be explained, as has been mentioned above, by a special grant from the Supreme Government of Rs. 9,66,677 on account of the Sadar Court buildings, capitalization of Calcutta rents, and Burdwan fever relief. The greater part of this special grant was meant to be reserved for the erection of public offices for the Bengal Government. Under Reserve the balance fell to Rs. 9,80,683, making the aggregate provincial balance at the opening of 1873-74 Rs. 45,38,981. In 1873-74 the Local Government was called upon to face the enormous expenditure on relief works caused by the famine in Bengal and Bihar, and the year closed with a deficit of Rs. 19,037 under 'Services,' while the balance under Reserve had fallen to Rs. 5,14,704. net provincial balance at the opening of 1874-75 was thus only Rs. 4,95,667. During 1874-75 the expenditure upon relief works continued to be heavy, but a special grant of Rs. 76,38,139 was received from the Supreme Government, and the year closed with a credit balance of Rs. 23,64,287 under Services, and of Rs. 8,23,465 under Reserve, the aggregate being Rs. 32,92,752. In the year 1875-76 the final adjustment of the famine account between the Supreme and Local Governments took place. It was estimated that if all charges on account of famine had been excluded from the accounts, the closing balance under 'Services' in 1873-74 would have been Rs. 19,21,069, in 1874-75 Rs. 13,87,787, and in 1875-76 Rs.12,97,981. The balance under Provincial Reserve at the end of 1875-76 being Rs. 7,21,464, that year would, famine apart, have left the Local Government with about 20 lakhs of rupees in hand. The demand of the Imperial Government on account of that portion of the relief works chargeable to the Provincial Public Works Budget being far in excess of this sum, it was arranged that the Bengal Government should surrender to the Imperial Government about 15 lakhs of its estimated credit balance; that all outstanding famine charges beyond that amount should be debited to the Imperial Government; and that the accounts should be so adjusted as to leave to the Government of Bengal an opening balance of Rs 5,00,000 on the 1st of April 1876. Owing to some trifling discrepancies in the accounts, the actual opening balance of the year 1876-77 was Rs. 5,01,180.

12. With that year the scheme of decentralization, which was introduced in 1871, underwent a considerable development. Contract of 1877—82 Under the system as originally started, the Local Government was entrusted with the management chiefly of spending departments, such receipts as accompanied them being supplemented by large consolidated allotments for their maintenance. The only department in which the revenue outstripped the charges was Registration; Police, Jails, Education, and Medical were services under which the receipts could never be expected to bear more than a very small ratio to the charges. It was therefore chiefly with a view to economy in administration that the Government of Lord Mayo determined to make the Local Government responsible for the financial management of these branches, of the Administration. In 1877 the system of decentralization took another step in advance. The Government of India, while handing over other great departments of expenditure to the Local Government, also entrusted to its use and responsibility on fixed terms of progressive payment all the principal revenues which could be deemed capable of steady expansion under careful local management. The success of the earlier measure had been sufficient to secure some extension of the principle; but the form which the extension took was in great measure determined by the decision to which the Secretary of State had come on the great question of famine relief. In his financial statement of March 1877, Sir John Strachey announced that it was the intention of the Government of India to meet charges for famine and unremunerative works out of revenue for the future. He proposed to place the Government in a position to do this, not by introducing any new Imperial taxation, but by extending the system of decentralization, and by making each Local Government responsible for the management and charges of the great public works which had been constructed, and for the construction and maintenance of those to be subsequently undertaken. He declared that the fundamental principle to be pursued in regard to public works was the enforcement of Provincial responsibility only. Bengal was the only Province, however, which was then considered able to bear the whole of its own burden. The charge for interest on productive Public Works was transferred to the Provincial account, and the Lieutenant-Governor was invited to raise by taxation the funds necessary to meet existing charges, as well as to provide for new works. The Public Works Cess Act of 1877 was accordingly introduced. Provincial responsibility for all productive works, existing and future, was definitely assumed, and the policy which the Secretary of State had affirmed was in regard to this Province carried into effect.

The decentralizing measures of 1877 were of a threefold character—(1) Certain departments of Revenue were made over to Provincial management, some for fixed payments, some for progressive contributions to the Imperial Treasury. (2) Certain departments of expenditure were made over to it with fixed allotments. (3) The Public Works which had been or were to have been constructed with borrowed money were made over to it without any assignment. The arrangements were mutually interdependent. The first and second were connected, because, although fixed allotments only were made for expenditure, it vas well recognised that expenditure could not be fixed, but must be progressive, and it was intended that the necessary increase in charges should be met out of the profits which the Provincial Government might derive from the assigned revenues over and above the amount of its contribution. and third were connected, because it was similarly recognised that the large responsibilities assumed by the Local Government in regard to Public Works should be merged in the aggregate of its ways and means. It was only reasonable, therefore, that the progressive contributions under the heads of assigned

revenue should be so fixed as to leave the Local Government. a margin for the discharge of its actual responsibilities, as well as for the improvement of the Province.

14. In addition to the Departments of Police, Jails, Registration, Medical, Printing, Roads and Civil Buildings transferred by Lord Mayo's Government in December 1870, with an assignment of Rs. 1,16,85,920, which had been reduced by March 1877 to Rs. 1,11,11,574, the Local Government was further entrusted, under the contract of March 1877; with the management of the following heads of revenue:—(1) Excise; (2) Customs (Miscellaneous receipts); (3) Salt' (Minor items); (4) Stamps; (5) Luw and Justice (Proper); (6) Marine, and (7) Miscellaneous, and of the following heads of expenditure:—(1) Refunds of the Assigned Revenues; (2) Land Revenue; (3) Excise; (4) Customs; (5) Salt; (6) Stamps; (7) Administration; (8) Minor Departments; (9) Law and Justice; (10) Marine; (11) Miscellaneous, and one or two smaller items. The allotment made under the heads of expenditure was Rs. 1,34,70,000, and the total, including the existing allotment under the heads previously transferred, was Rs. 2,45,29,000. From this was deducted a lump sum of Rs. 5,90,000, and the net consolidated grant was thus reduced to Rs. 2,39,39,000. The payments to be made on account of the assigned reductions in the first year amounted to Rs. 1,91,07,000, and this was to be increased every year by Rs. 3,75,000 under the heads of Excise, Stamps, Law and Justice. The balance represented the Imperial allotment to the Provincial revenues, which, subject to adjustments, was thus to be Rs. 48,32,000 in 1877-78, Rs. 44,57,000 in 1878-79; Rs. 40,82,000 in 1879-80; Rs. 37,07,000 in 1880-81, and Rs. 33,32,000 in 1881-82.

15. The following table shows the progress of the Provincial revenue and expenditure during the five years 1877—82. The Revenue side of the account includes the proceeds of the Public Works cess, and the receipts from Railways and Canals. On the expenditure side appear the charges for interest on the Capital expended and the cost of maintenance. The sum entered as a receipt under Assessed Taxes is simply the grant made to the Provincial revenues to meet the cost of collections and refunds on account of the License-tax.

16. Owing to short collections of the Public Works Cess in 1877-78, to the absence of any receipts under assessed taxes, the license tax not having then been introduced, and to various differences in the form of the accounts, it is only from 1878-79 that accurate comparison of the condition of the finances in the different years is possible. The gross revenue was Rs. 3,20,78,000 in 1878-79; it had risen to Rs. 3,77,61,000 by 1881-82. In other words, the revenue had increased at the rate of about 15 laking of rupees a year during the three years, though there had been no new taxation in the interval.

The progress of the revenue under Excise during this period is remarkable. While the revenue increased from 70½ lakhs in 1878-79 to 85½ in 1880-81 and 93¾ in 1881-82, the cost of collecting it declined from Rs. 2,83,000 to Rs. 2,73,000. This was the result partly of the extension of the outstill system, and partly of the great prosperity of the province during this period.

A succession of good harvests with high prices had provided the people with money to spend on luxuries, and among these exciseable articles, in this as in all countries, hold a high place. There was a large increase in the consumption of duty-paying liquor where the sadar distillery system had been maintained, and also in the consumption of excise opium, of piece-goods, and of everything on which prosperous peasants are disposed to spend their surplus funds. The revenue from excise opium was Rs. 12,49,000 in 1877-78, Rs. 13,35,000 in 1878-79, Rs. 13,62,000 in 1879-80, Rs. 13,95,144 in 1880-81 and Rs. 14,47,000 in 1881-82. The increased consumption of piece doods also here unmistakeable in 1881-82. The increased consumption of piece-goods also bore unmistakeable testimony to the increased prosperity of the country, and confirmed the view that the excise revenue had been to a great extent improved by the greater spending power of the people. The value of these goods carried to Bengal or Bihar districts by the Eastern Bengal and East Indian Railways was Rs. 6,44,31,000 in 1879-80 and Rs. 6,91,16,000 in 1880-81.

The excise revenue was made over to the management of the Provincial Government for a payment rising from 64 lakhs in 1877-78 to 68 lakhs in 1881-82. The gross profit made by the Bengal Government was thus roughly 41 lakhs in the first year, 51 lakhs in the second, 6 lakhs in the third, 181 lakhs in the

fourth, and 25% lakhs in the fifth. The fixed grant for managing the revenue was Rs. 2,92,000. The actual cost was Rs. 3,06,000 in 1877-78. This was reduced by careful management to Rs. 2,73,000 in 1881-82. Thus in 1881-82 the excise receipts exceeded the receipts of 1877-78 by no less than twenty-five lakhs of rupees, while the expenditure for collecting the revenue and managing the

department showed a reduction of Rs. 33,000.

20. Under Stamps the increase, though less rapid than under Excise was nevertheless very satisfactory and sustained. The actual receipts in 1876-77 were Rs. 45,48,000, and the revenue was made over to the Provincial Government for a payment rising by 2½ lakhs a year from Rs. 98,50,000 in 1877,78 to Rs. 1,08,50,000 in 1881-82. In 1877-78, however, there was a large increase in receipts owing to the operations under the Land Registration Act, and the actual revenue collected was Rs. 1,08,15,000. In 1878-79 the receipts were Rs. 1,07,85,000. In 1879-80 the receipts rose to Rs. 1,14,99,000, and in 1881-82 to Rs. 1,20,24,000. The increase in the estimated receipts, however, arose from a change introduced by the High Court in the procedure for obtaining copies of documents, and there was a corresponding decrease in fees formerly credited to Law and Justice, and an increase in the cost of establishments debitable to the same head. The steady and substantial increase in the Stamp Revenue from Rs. 95,48,000 in 1876-77 to Rs. 1,20,24,000 in 1881-82 was undoubtedly to a great extent the result to Rs. 1,20,24,000 in 1881-82 was undoubtedly to a great extent the result of the increased circulation of wealth in the country, and of increased facilities for obtaining justice. But much of the increase was also due to the improved administration of the department and to the special measures taken to discover and check fraud in the use of stamps. The gross profit of the Provincial Government was roughly 91 lakhs in 1877-78, 62 lakhs in 1878-79, 111 lakhs in 1879-80, 8 lakhs in 1880-81, and 112 lakhs in 1881-82. The fixed grant for managing this department of the revenue was Rs. 2,38,000. The actual cost was Rs. 2,48,000 in 1877-78 and Rs. 2,51,000 in 1878-79. It amounted to Rs. 4,24,000 in 1881-82. The increase in the first year corresponds with the increase in the receipts. Larger sales of stamps must be attended by increased charges for discount. The increase in the later years was due to the transfer of the actual cost of the stamps from the head of "Stationery." The fixed grant under "Stationery" for both stamps and stationery was Rs. 4,98,000. grant under "Stationery" for both stamps and stationery was Rs. 4,98,000. The actual expenditure on both was Rs. 6,89,000 in 1878-79.

21. Under Registration the receipts steadily increased, though the progress was not so rapid in the later as it was in the earlier years. The figures from 1878-79 included Record-room receipts and Land Registration fees transferred from Land Revenue, The Registration receipts proper were Rs. 6,61,000 in 1877-78, Rs. 8,70,000 in 1878-79, Rs. 9,09,000 in 1879-80. They were only Rs. 3,66,978 in 1871-72, the first year that the revenue was under Provincial management. With increased receipts there was naturally an advance in the heards for commission on fees by which most of the Suban advance in the charges for commission on fees, by which most of the Sub-

Registrars are remunerated.

22. Law and Justice was the third of the branches of revenue surrendered in 1877 for a progressive payment. The actual receipts in 1876-77 were Rs 7,30,000. The revenue was surrendered to the Provincial Government for a payment rising by 1 lakh a year from Rs. 7,25,000 in 1877-78 to Rs. 8,25,000 in 1881-82. The actual receipts were Rs. 8,05,000 in 1877-78, Rs. 10,52,000 in 1878-79, and Rs. 10,80,000 in 1879-80, while they rose to Rs. 17,17,000 in 1881-82. The increase in the revenue was chiefly under the head of Fees, and corresponded in some measure with the increase under Stamps. The falling off corresponded in some measure with the increase under Stamps. The falling off in the later years is explained by the new procedure already alluded to in connection with stamps. The expenditure under Law and Justice showed a large increase from Rs. 63,77,000 in 1877-78 to Rs. 87,43,000 in 1881-82. The fixed grant for this service under the five years' settlement between the Imperial and Local Government is Rs. 62,97,000. There was thus a heavy charge on Provincial Funds. It was, however, precisely in order that the Local Government might have the means of providing for improved administration, involving increased expense, that improveable revenue was made over to it. The Lieutenant-Governor was able to strengthen the Subordinate Executive Service, and to increase the number of munsifs to meet the growing wants of the country in the administration of Civil Justice. Under Jails the receipts were Rs. 6,89,000 in 1877-78. They amounted

23. Under Jails the receipts were Rs. 6,89,000 in 1877-78. They amounted to Rs. 6,96,000 in 1879-80. The charges, on the other hand, rose from Rs. 16,51,000 in 1877-78 to Rs. 18,41,000 in 1879-80. For 1880-81 they are estimated at Rs. 17,00,000, and for 1881-82 at Rs. 22,52,000.

24. The fixed grant for the charges on account of Land Revenus made in 1877 was Rs. 22,62,000. With the charges which this was intended to cover were amalgamated others, chiefly for sub-divisional establishments, which were originally Provincial. The gross cost of all in 1876-77 was Rs. 23,53,000. The growing wants of the administration, however, since carried the expenditure far. beyond this limit. A grant of Rs. 1,80,000 was made for the management of Government estates. Establishments were strengthened and made more efficient, and additions were sanctioned to the staff of Deputy Collectors.

The expenditure on Education was Rs. 19,58,000 in 1871-72: included the charges in Assam. In 1875-76 the expenditure in Bengal amounted to Rs. 26,32,000. In the next year Sir Richard Temple under financial pressure reduced the expenditure to Rs. 24,48,000. Sir Ashley Eden was able to make full provision for the needs of this important department. He replaced one lakit of rupees reduced from the grant for Primary Education in 1876-77, and the gross expenditure allowed for 1881-82 was the liberal sum

of Rs. 27,78,000.

In the Medical administration important savings were made. management of the Metropolitan Hospitals was reformed and much waste of public money prevented. Government aid to dispensaries in the interior no longer took the form of a free supply of expensive instruments and drugs, and careful management ensued from the responsibility thus thrown on the directing Committees. The charges which amounted to Rs. 14,86,000 in 1875-76, Rs. 13,63,000 in 1876-77, and Rs. 13,85,000 in 1877-78, were reduced to Rs. 12,31,000 in 1878-79 and Rs. 10,75,000 in 1881-82. With this reduction in cost there was an increase in the number of persons actually receiving medical aid.

receiving medical aid.

27: It will be convenient to consider together the figures under Public Works and the figures of the Interest payable on the capital invested in them. In 1877 the following works were made over to the management of the Government of Bengal with the responsibility for the payment of the interest charges on the capital expended on their construction:—Northern Bengal Railway, Tirhut Railway, Nalhati Railway, Orissa Canals, Midnapore High Level Canal, Hidgellee Canal, and Sone Canals. The Calcutta and South-Eastern Railway was also made over; but as this line had been making berely sufficient to cover the working expenses no interest was charged on the barely sufficient to cover the working expenses, no interest was charged on the capital. The amount of capital expenditure on which the Provincial Government was liable for interest up to the end of 1877-78 was—

> 2,10,17,000 Reilways 4,56,43,000 6,66,60,000

The sum due for interest on this capital was Rs. 30,00,000; but in consideration of the short levy of Public Works Cess, the Government of India only took Rs. 20,00,000 in that year. In 1878-79 the capital expenditure on Railways was Rs. 66,41,000 chiefly on the extension of the Northern Bengal line and the construction of the Patua and Gaya line. The expenditure on Canals was Rs. 25,44,393. In 1879-80 the expenditure was Rs. 22,12,000 on Railways and Rs. 16,14,000 on Canals. Of the first sum, however, Rs. 3,15,000 was provided from Provincial Funds in order to expedite the completion of the Patna-Gaya line. In 1881-82 the expenditure on Railways amounted to Rs. 30,34,000. chiefly for the extension of the Tirhoot line to Bettish on the west and Peepra Ghat, on the east, and Rs. 36,60,000 for expenditure on Canals.

28. In 1877.78 the receipts under Railways amounted to Rs. 7,32,000 and the charges to Rs. 6,26,000, while the charges for interest amounted to Rs. 8,26,000. The Northern Bengal line was only opened from Porada to Jalpaiguri in January 1878; and the extensions from Parbatipur to Rangpur Jalpaiguri in January 1878; and the extensions from Parbatipur to Rangpur and from Siliguri to Jalpaiguri were only ready for traffic, the former in July and the latter in November 1878. The Patna-Gaya line and the extension of the Northern Bengal line to Kaunia on the Teesta were opened for traffic in June 1879. In 1880 the Lieutenant-Governor was permitted by the Government of India to begin, as a Provincial work, the construction of a line from Sonapore on the Calcutta and South-Eastern line to Mugra Hát, an important mart in the 24-Parganas district, and a sum of Rs. 2,20,000 was expended upon it from Provincial Funds. This line was constructed on the broad gauge, and was afterwards extended to Diamond Harbour. The estimates for 1881-82 included a charge of Rs. 7,50,000 for expenditure on this line. Provision was also made for the expenditure of Rs. 4,50,000 for preliminary work on a line to connect Parbutipur on the Northern Bengal Railway with the important town of Dinajpur, and of two lakhs for raising and bridging the road from Mugra to Diamond Harbour to make it available for railway extension.

29. The Canals which were taken over by this Government in 1877 were financially of a very different character from railways, and there was no hope of their being in a position to pay the interest on the capital invested in them for many years to come. The construction of the Orissa, Midnapore, and Hidgelee Canals was originally undertaken in 1863 by the East Indian Irrigation and Canal Company, with the most extravagant expectations of profit. Five years after the work had been begun, the Government of India purchased the canals from the Company for Rs. 1,17,28,560, and proceeded to develop a modified scheme. Up to the present these works have been a heavy drag on Provincial resources, which have to bear the charges. The receipts from irrigation on the Orissa and Midnapore Canals, however, show a steady increase; leases are taking the place of yearly agreements; and, as the system of distributaries is extended, it is hoped that the revenue will gradually develop. The opening of the Sone Canals gave a great impetus to the extension of sugarcane cultivation, and caused a considerable increase in the agricultural wealth of the tracts supplied. The Commissioner, in 1879-80, estimated the increase of profit derived from this source by the people of Shahabad at Rs. 4,73,000 per annum.

30. The following table shows the net receipts from each work during the

period 1877-82, with the interest charges payable in each year:

						1877-78.	1676-79,	1879-80.	1880-81.	1881-62.

Apart from these schemes, the Government of Sir Ashley Eden also undertook other irrigation and canal works from Provincial Funds. A sum of Rs. 6,28,000 was spent on a canal to connect the river Gunduk with the principal water-courses of the Saran district. A still more important work was the Joojooty Scheme, whereby a constant supply of pure water from the river Damoodah was poured into old channels in the Burdwan and Hooghly districts. The silting up of these channels was undoubtedly for many years the cause of much disease and suffering throughout a large tract of country, and the introduction of a copious supply of pure water for drinking and irrigation purposes was expected to have a marked effect on the health and prosperity of the people. With the admission of the river water there was an almost entire disappearance of the epidemic which so long raged among the villages situated on the banks of the silted-up channels in the Hooghly district. It was calculated that nearly nine-tenths of the inhabitants of these villages were swept away in the epidemic which prevailed before 1877. The beds of these water-courses were studded with pools of stagnant water, which, as the dry season advanced, became more and more feetid and noxious, and spread disease and death among the people who consumed the fluid. At the same time the drainage of the country was obstructed by the endeavours of the people to collect and retain water for agricultural purposes.

32. Sanction was also given to the construction, from Provincial Funds, of a navigation canal to connect the existing tidal canal in Hidgellee with the Orissa system. This was a work of the first importance. Orissa was then wholly

dependent on the sea for its communications with Bengal; the coasting trade could only be carried on by large vessels; the ports were bad; and if any serious failure of the crops occurred, it was impossible to throw a sufficient supply of food into the province. The projected canal was intended to bring Orissa into direct inland communication with Bengal, so that steamers and country boats would be able to ply at all seasons of the year, and while the province will be protected from famine, a large expansion of trade might be confidently

expected. 33: It is not possible to make any useful comparison of the expenditure under other Public Works before and after the contracts of 1877. The expenditure on works during the scarcity of 1874 was abnormal, the Provincial balances were exhausted, and the Government of India found it necessary to accept the outlay, and to make the local Government a net grant of five lakes with which to begin the year 1876-77. The expenditure on Ordinary Public Works during that year was Rs. 25,59,000. In 1877-78 Sir Ashley Eden found it necessary to proceed with extreme caution in the matter of expenditure. The charges thrown upon the Provincial revenues on account of Productive Public Works were very serious; the full outturn of the Public Works Cess could not be obtained during the year; and he recognized the necessity of securing a substantial working balance to provide for emergencies. The expenditure in this year was therefore restricted to Rs. 25, 12,000. In framing the revised estimates for 1878-79, the Lieutenant-Governor found it possible to make provision for various important and useful. schemes that had been left in abeyance for want of funds; but in this year and the next the expenditure was, under instruction, kept down in consequence of the financial difficulties which famine, war, and adverse exchange had brought upon the Government of India. In 1879 the Government of India found itself compelled to call upon Local Governments to make all possible reductions in expenditure. The orders went so far as to direct that no new work estimated to cost more than Rs. 2,500 should be commenced, even though it might have already received the sanction of Government. In order to avoid the necessity of peremptorily putting a stop to works, the Lieutenant-Governor offered a special contribution of 20 lakhs to Imperial Funds Under the influence of the same policy of retrenchment unduly low estimates were made for 1880-81, but the Lieutenant-Governor was afterwards permitted by the Government of India to increase the grant by 20 lakhs, and the expenditure during the year was Rs. 47,60,000. In 1881-82, the Public Works expenditure aggregated Rs. 67,58,000 and included, besides miscellaneous improvements on buildings, and on the construction, bridging, and metalling of Provincial roads, provision for new Court-houses at Sealdah, Jessore, Mymensingh, Dacca, Ranchi, Gaya, Darbhanga, and Motihari, for various sub-divisional buildings and Munsifs' Courts, for new Jails at Jalpaiguri, Bogra, Pabna, Gaya, Darbhanga, and Motihari, for a college at Rampur-Boalia, and a Railway school at Kurseong, and for the completion of the new Secretariat buildings and the new Obstetric Hospital at the Medical College.

34. That the system of decentralization was up to this time thoroughly successful in Bengal is sufficiently clear from the foregoing sketch. The revenues increased rapidly, independently of any new taxation; useless expenditure was curtailed; and funds were made available for improvement under all branches of the Administration. The three heads of improveable revenue made over to the management of the Provincial Government, with an income of 165½ lakhs in 1876-77, showed an income of not less than 213 lakhs in 1881-82. In the meanwhile, the Government was able to carry out numerous works of improvement, many of which, under the previous system, would have been indefinitely postponed. Besides making a special contribution of 20 lakhs to the Imperial treasury in time of need, means were found during these five years to increase the staff of executive and judicial officers; to provide increased facilities for the administration of justice; to increase the grant for education; to make grants-in-aid of district communications, and of works of drainage, sanitation, and municipal improvement; to build schools, colleges, and hospitals; to replace the huts in which the public business was transacted, or prisoners were confined, by substantial masonry court-houses and jails; to spend 20 lakhs on railways which have since brought in a large return, 5½ lakhs on transways, ¼ of a lakh on a steamer service to improve communications with Assam, and 2 lakhs on a road to develop the trade with Thibet; to lay out 11 lakhs on the first portion of a work which will develop the trade of Orissa and protect it from famine;

and to devote 38½ lakhs to improving navigation and providing a supply of pure water for the people. While 77½ lakhs were thus expended on great measures of material improvement, and the expenditure on Ordinary Public Works was increased from Rs. 25,12,000 in 1877-78 to Rs. 67,58,000, exclusive of expenditure on preliminary works of railway construction, in 1881-82, and while no legitimate outlay was spared to strengthen every department of the Administration, the five years' period, which opened with a credit balance of Rs. 2,88,000 only, closed with a credit balance of Rs. 75,43,000. When it is recollected that under the system which prevailed before 1871 every new charge required the sanction of the Imperial Government, that the decision on the demands of each province took no cognizance of the extent to which if had contributed to the general Exchequer, that nothing was to be gained by economy, because money left unspent by any one Government was practically lost to it, and only went to increase the amount to be scrambled for by all, some idea may be formed of the advantages which Bengal had reaped up to this time from the control of its own finances.

The principal features of the contract of 1877 have been described above. The Local Government was allowed, as in the first contract of 1870, to appropriate the whole of the receipts under the heads of Police, Jails, Registration, Education, Medical, Printing, Roads and Civil Buildings, and received in addition a gross annual allotment of Rs. 1,10,59,000 to meet the charges on account The receipts from Excise, Stumps, and Law and Justice of these departments. (proper) were also made over to the Provincial Government in consideration of a payment to the Imperial Treasury of lump contract sums, which were to increase by one lakh per annum in the case of Excise, and 23 lakhs per annum in the case of Stamps and Law and Justice. The following heads of revenue were also made over in return for fixed contract payments, viz., Customs (miscellaneous receipts), Salt (minor items), Marine and Miscellaneous. On the expenditure side, the Local Government was entrusted with the management of the following heads of expenditure, receiving in each case an annual grant of fixed amount:—Refunds of the assigned revenues, Land Revenue, Excise, Customs, Salt, Stamps, Administration, Minor Departments, Law and Justice, Marine, Miscellaneous, and one or two smaller items. Simultaneously—and this was one of the most important elements of the contract—the gross receipts of certain railways and canals which had been, or were to be, constructed with borrowed capital were transferred to the Local Government, which also became responsible for the working expenses of the same and for the payment to the Imperial Government of the interest charges on the capital with which they had been constructed. As these interest charges were expected to exceed considerably the net earnings of the works thus provincialised, the Lieutenant Governor was authorised to impose special provincial taxation to make up the deficiency, and to this end the Public Works Cess was imposed by Act II (B.C.) of 1877. provincialisation of these charges for interest, and the introduction of the Public Works Cess, formed integral parts of Sir John Strachey's scheme of famine finance.

36. The contract of 1877 thus fell naturally into three parts—(1) in respect of the branches of service which had been provincialised by Lord Mayo, the old principle was retained: a fixed annual grant was made from Imperial revenues, which, together with the receipts of those departments, was expected to cover their expenditure, any growth of charges being provided for from the increase in the receipts. (2) In respect of the civil heads of revenue and expenditure then provincialised for the first time, a separate contract was made for each head of revenue and for each head of expenditure; the rates of increase in the payments on account of the revenue from Excise, Stamps and Law and Justice being advisedly taken at a low figure, so as to leave the Local Government a margin wherewith to meet the normal growth of civil expenditure for which no direct allowance was made. (3, In respect of public works constructed from borrowed capital, the Lieutenant-Governor was authorised to resort to local taxation to make good the deficit of interest charges in excess of net earnings.

37. The contract, which came into force in 1882, differed materially from that which it succeeded. The principles on which it proceeded were the

following:-

Instead of giving the Local Government a fixed sum of money to make good any excess of provincialised expenditure over provincialised receipts, a certain proportion of the Imperial revenue was devoted to this object. A few heads

were reserved as Imperial; others were divided in proportions, for the most part equal, between Imperial and Provincial; the rest were made Provincial. The balance of transfers, being against the Local Government, was rectified by a fixed percentage on its Land Revenue otherwise reserved as Imperial. At the same time a distinct declaration was made of the policy to be followed during the term of the contract. The Imperial Government was to make no demand on the Local Government, except in the case of disaster so abnormal as to exhaust the Imperial reserves and resources, and to necessitate a suspension of the entire machinery of public improvement throughout the Empire. On the other hand the Local Government was to look for no special aid from the Imperial Government, except in the case of severe famine, and then only within the following limits:—(1) current income must have been exhausted, every avoidable expense in every department having been retronched, and the public works grants applied to famine work to the very utmost possible; (2) savings of past years in excess of the ordinary working balance must have been drawn upon to two-thirds of their total amount; (3) the margin of Provincial surplus in normal was made be liable for the completion, was to be chargeable up to one-fourth at most for payment of interest on any Imperial loans which may have been raised to meet the excess cost of the famine in general.

The following were the principal additions made to the provincial receipts and charges under the new scheme:—This Government was admitted to a half share in the receipts from Forests and Assessed Taxes, and took all the receipts under the heads of Superannuations, Miscellaneous, and Other Public Works, except contributions from the military and medical funds; gain by exchange on Imperial transactions, premium on bills and unclaimed bills of exchange; receipts from military works; and any unspecified miscellaneous receipts exceeding Rs. 10,000. Under Forests and Assessed Taxes it was liable for half The Imperial Government only retained under Land Revenue the charges. the same percentage on charges for collection and on the cost of surveys and settlements as was retained of land revenue. To the existing provincial charges was added under Law and Justice and Medical all that was reserved as Imperial; under Stationery and Printing all except the cost of stationery purchased from central stores; and under Other Public Works, the charges for Museums, Educational Buildings, and Light-houses. On the other hand, onehalf the net receipts from Excise, Stamps, and Registration, including recordroom fees, was surredered to the Imperial Government. The percentage of
Land Revenue was, however, only calculated after allowing for the claim of the
Government of India to share in the general improvement that had resulted to the Provincial revenues during the five years then just expired. That share was fixed at 30 lakhs a year. From this the Government of India deducted three lakhs to be expended on the improvement of the Subordinate Executive and Judicial Services and the establishment of the new district of Khulna. In order, too, that the Local Government might not be embarrassed by a sudden reduction of 27 lakhs in its income. His Excellency the Governorsudden reduction of 27 lakhs in its income, His Excellency the Governor-General in Council added a sum of $28\frac{1}{2}$ lakhs to the credit balance of the Province for 1881-82.

39. The amount of percentage of Land Revenue which, under the new scheme was assigned to this Government, was calculated, as stated above, upon the basis of the regular estimate for the year 1881-82. It was fixed at 32.2284. A sum of Rs. 30,00,000 was, on account of the annual contribution to the Government of India, added to the Provincial deficit, provision being at the same time made for an additional expenditure of three lakhs for the improvement of the Subordinate Civil Service and for a new district of Khulna.

40. The chief points in which the contract of 1882 differed from that of 1877 were the following:—First, the excess of provincialised expenditure over provincialised receipts was balanced, not by an annual allotment of fixed amount, but by a fixed percentage of the land revenue of the Province. Inasmuch as the receipts credited under Land Revenue are to some extent capable of improvement, and ordinarily show a tendency towards steady, if small, increase, this change was to the advantage of the Local Government. Secondly, the Local Government was no longer permitted to appropriate the whole of the increase in the three principal sources of improvable revenue, viz., Excise, Stamps, and Registration. Under the former contract, the increase which the Local

Government had to surrender was only one lakh of rupees per annum under Excise, 2\frac{3}{4} lakhs per annum under Stamps (combined with Law and Justice), and nil under Registration; whereas the actual rate of increase averaged nearly six lakhs per annum under Excise, 4\frac{3}{4} lakhs under Stamps and Law and Justice, and Rs. 90,000 under Registration. Under the old contract the whole of this profit went to the Local Government; under the new arrangement one-half went to the Government of India. This change operated greatly to the disadvantage of the Provincial revenues, whose expansive power was thereby largely diminished.

41. The third point of difference between the contracts of 1882 and 1877 lay in the extension of the interest of the Local Government to the revenue heads of Assessed Taxes and Forests, and to the receipts and expenditure under Superannuations, and certain sub-heads of branches of service of which the bulk

was already Provincial.

- 42. The last important point of difference was that the contract of 1882 was a consolidated contract. In other words, no attempt was made to estimate the future receipts and expenditure under separate heads and to fix distinct assignments for each. The new arrangements were applied to the revised estimates for 1881-82 as a whole; the total receipts were compared with the total expenditure; and (after making a deduction of 27 lakhs from the Revenue side, being the share of the profit on the old contract which the Imperial Government decided to appropriate) the adjusting percentage of Land Revenue was calculated so as to balance the account.
- 43. following statements show the actual receipts and expenditure of the period 1882-87.

45. The figures shown in the last paragraph against Land Revenue receipts are the net sum credited to Provincial after all adjustments had been made. Eliminating these, we get the following result:

The second secon	Contract	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
Land revenue proper	Rs. 1,21,34,000	Rr. 1,22,28,000	Rs. 1,22,20,000	Rs. 1,20,60,000	Rs. 1,21,28,000	Rs. 1,24,97,000
Grant for Government estates	1,95,700	3,94,000	3,49,000	8,94,000	3,85,000	4,25,000
Total	1,23,29,000	1,26,22,000	1,25,89,000	1,24,54,000	1,28,13,000	1,29,22,000

46. When it is remembered that only a sma'l part of Bengal is temporarily settled, and that 1884-85 and 1885-86 were years of unfavourable harvests, the improvement seems fairly satisfactory. The improvement on the grant for the management of Government estates (which was then fixed at 10 per cent. on collections and has since been raised to 12) was much greater than in the case of Land Revenue proper. This, however, did not represent any real relief to the Provincial revenues, as the whole amount of this grant was devoted to the improvement of the estates in question.

47. The expenditure charged under Land Revenue, which was wholly Provincial (except the charge for Surveys and Settlements, which was divided in the same proportion as the receipts are divided), rose from Rs. 28,91,000 to Rs. 35,00,000, or by Rs. 6,09,000 in five years. The chief causes of increase under this head were the creation of the district of Khulna, the improvement in the pay and position of the Subordinate Executive Service (half of whose salary is shown against Land Revenue, and half against Law and Justice), and the additional expensiture on Government estates, which was balanced by the higher receipts referred to in the last preceding paragraph. The pay of the Directorship of Agriculture, which was sanctioned in 1884 temporarily for two years, was also shown under this head, as well as the Provincial share of the survey of Muzaffarpur under the Tenancy Act. These two items, which were not in existence when the contract was made, alone account for Rs. 1,12,000 of the total increase.

48. Under the head of Stamps, the development of he revenue was steady and continuous. The total receipts, which had risen from Rs. 1,08,15,000 in 1877-78 to Rs. 1,20,24,000 in 1881-82, again rose to Rs. 1,32,58,000 in 1885-86, and to Rs. 1,34,63,000 in 1886-87. The contract estimate of receipts (Provincial share) was taken at 59 lakhs, while the actuals were Rs. 61,07,000, Rs. 62,88,000, Rs. 64 96,000, Rs. 66,29,000, and Rs. 67,32,000 respectively. 'The profit of the Local Government on the contract under this head was therefore about 2 lakhs in the first year, 3\frac{3}{4} lakhs in the second, 6 lakhs in the third, 7\frac{1}{4} lakhs in the fourth, and 8\frac{1}{4} lakhs in the fifth. The increase was uniformly distributed over the whole period of the contract. There was no legislation during this period affecting the

stamp laws, but a material portion of the improvement in the revenue was undoubtedly due to the arrangements under which process-serving fees in revenue courts, and copying fees, were levied in court-fee stamps instead of in cash. To the former cause at least Rs. 50,000 of the increase in 1884-85 were due, and larger sums in the following years. The remainder of the increase, of which two lakhs came under non-judicial stamps, and upwards of 10 lakhs under court-fees, was attributable to improved administration and greater facilities for obtaining justice. The expenditure of this department, the contract grant for which was fixed in 1881-82 at Rs. 2,17,00, was Rs. 2,14,000, Rs. 2,20,000 Rs. 2,34,000; Rs. 2,46,000, and Rs. 2,43,000 in each year of the contract, the ultimate increase being only Rs. 26,000. More than half of this increase, small as it is, was due to the greater cost of the new description of court-fee stamps introduced during 1884-85 for greater security against fraud. The direct cost of raising the stamp revenue in Bengal was slightly over $3\frac{3}{4}$ per cent.

49. Under the previous contract, the extraordinary development of the revenue from Excise, and the consequent profit to the Provincial revenues, were among the most striking features of the financial history of the period. Between 1877-78 and 1881-82 the receipts from this source rese from Rs. 68,68,000 to Rs. 93,74,000, or by close upon 25 lakhs of rupees; and the whole of this, except 4 lakhs, represented clear gain to the Local Government. Simultaneously the corresponding charges were reduced by improved administration from Rs. 3,06,000 to Rs 2,73,000. This remarkable increase was due partly to the outstill system, the general adoption of which dates from the first year of Sir Ashley Eden's government and also to the bumper harvests, the activity of trade, and the general prosperity of the country which marked

the three years 1-79-80, 1880 81, and 1881-82.

A serious check in the excise revenue was anticipated by Sir Ashley Eden, and his anticipations were fulfilled to the letter. The flood tide of commercial and agricultural prosperity reached high-water mark in 1883, and the ebb was swift and extreme. The rainfall in that year was deficient and unevenly distributed; and though no actual distress occurred at that time, the advance in the price of food and the recession in the wages of labour in the western districts injuriously affected the settlements of the outsells, which are highly sensitive to seasonal influences. The revenue from country spirits in 1884-85 fell short of that of the previous year by Rs. 1,13,000 (the decrease being almost entirely in the Patna Division), and this would have been more than doubled but for a large apparent increase of Rs. 1,28,000 in Calcutta, which represented advance payments for the triennial period 1884-57. In 1884 and 1885 the rainfall was again unfavourable in quantity and distribution, and the failure the crops was so scrious in parts of the Burdwan, Presidency, and Rajshahi Divisions as to exhaust the reserves of the villagers and necessitate the opening of relief works by Government. In 1883, a Commission was appointed under the presidency of Mr. Edgar, c.s.i., to enquire into the working of the outstill system and its chief recommendations were approved by Government and carried into effect. The Sadar distillery system was re introduced into all considerable towns where country liquor is the principal alcoholic drink of the people. These include Patna, Gaya, Arral, Chapra, Bettiah, Muzaffarpur, Darbhanga, Monghyr, Jamalpore, Bhagalpur, Murshidabad, Berhampore, Burdwan and Dacca. The hours of working and sale were contracted. The sale of liquor to children was rigidly prohibited. District contracted. officers were instructed to allow District and Municipal Poards a voice in the selection of sites and other matters of local interest; and a large addition was made to the supervising and detective staff including ten Special Deputy Collectors, who were selected for their knewledge of and aptitude for excise work, and who were employed on that work alone. The increase of expenditure incurred in giving effect to these proposals was considerable.

51. The head of Provincial Rates, which is wholly Provincial, represents principally the proceeds of the Public Works Cess, but it includes also the rates for the general management of Wards' and Attached estates, and from October 1886 the recoveries from District Funds of the proportional cost of collecting Road Cess. The contract estimate of receipts was taken in 1881-82 at Rs. 35,40,000, and the actuals in each year were Rs 36,07,000, Rs. 38,15,000, Rs. 37,65,000, Rs. 38,71,000, and Rs. 39,95,000. The profit of the Local Government was

therefore Rs. 67,000 in 1882-83, Rs. 2,75,000 in 1883-84, Rs. 2,25,000 in 1884-85, Rs. 3,31,000 in 1885-86, and Rs. 4,55,000 in 1886-87. This increase was due to revaluations which were in progress in almost every

district during the period of the contract.

52. The head of Assessed Taxes, which was wholly Imperial under the former contract, and was equally divided between Imperial and Provincial in the contract of 1882, represents the receipts of the abolished Licensetax. The Income-tax was at first wholly Imperial; and the figures shown under this head for 1886-87 merely represent the grants made by the Supreme Government—of amounts equal to those credited to Provincial in 1885-86—to avoid the disturbance of the contracts. The depression of trade, which marked the greater part of the period 1882—87, and which was intensified for Bengal by special causes, such as the through opening of the Rajputana-Malwa State Railway in the latter part of 1881, and the consequent diversion of a part of the trade of Northern India to Bombay, injuriously affected the receipts from this source. The contract of 1882 was framed on the basis of a revenue of Rs. 8,25,000 (Provincial share) from this source; whereas the actuals were Rs. 7,60,000, Rs. 7,59,000, Rs. 7,48,000, Rs. 7,67,000, and Rs. 7,67,000, respectively. The aggregate loss to the Provincial revenues exceeded therefore 31 lakhs of rupees during the currency of the contract, notwithstanding that special efforts were made to ensure the accuracy of the assessments, and to prevent the escape of persons legally liable.

53. The Public Works Cess and the License-tax represent the taxation imposed in Bengal (the former being peculiar to the province) in connection with the scheme of "famine finance," with which the name of Sir John Strachey is associated. That scheme proposed to improve the financial position of the Empire to the extent of two crores of rupees a year, of which 50 lakhs were to be regarded as a normal working surplus; while 150 lakhs were to be devoted to famine insurance, being expended either on actual relief, on reduction of debt, or on the construction of remunerative works calculated to prevent or mitigate the severity of famine. Part of this sum it was proposed to provide by new taxation (i.e. by the License tax), and part by throwing additional charges on the Provincial Governments; but as far as Bengal is concerned, the whole contribution paid towards the so-called Famine Fund was raised by additional taxation; for the charges thrown on Provincial by the Contract of 1877, which consisted mainly of the interest on provincialized railways and canals, were met by the imposition of the Public Works Cess, which, as already stated, is peculiar to Bengal. The total net sum contributed by Bengal in each year since

1878-79 under these two heads was as follows:—

Net contribution (receipts, less cost collection).		1878-79.	1870-80.	1880-81.	1881-82.	1882-83.	1883-84.	1984-85.	1885-86.	1886-87.
Assessed taxes Provincial rates Total	:::	Rs. 17,21,600 85,93,000 53,14,000	Rs. 20,83,000 85,67,000 56,55,000	Rn, 12,18,000 84,68,000 46,86,000	Rs. 15,43,000 35,03,000 -	Rs. 14,26,000 55,60,000 49,86,000	Rs. 14,22,000 • 37,68,000 51,90,000	Rs. 14,02,000 37,18,000 51,20,000	Rs. 14,46,000 88,04,000 42,50,000	Rs. *14,45,000 38,59,000 53,05,000

^{*} The substitution of the Income-tax for the License-tax makes it impossible to determine the correct contribution to be paid in 1886-87. But it may be assumed that the License-tax, if continued, would have yielded the same amount us in 1885-86.

54. In 1880-81 the minimum assessable limit was raised to Rs. 500, with the result of exempting about 66,567 assessees of the poorest classes, and giving up about $5\frac{1}{2}$ lakes of net revenue. These figures show that since 1878-79, the first year in which the new taxes were in full operation, the people of Bengal paid rather more than half a million sterling per annum as an insurance against famine. During this period the only expenditure in the province on actual relief of famine or the construction of protective works was as follows:—

5	1878-70.	1879-80.	1860-81.	1881-89.	1882-83.	1883-84.	1684-85.	1885-86.	1886-87.	Total.

REGISTRATION.—(Imperial and Provincial.)

		Contract estimate.	1882-83.	188 3- 84.	1884-85.	1885-86.	1886-87.
Receipts Expenditure		Rs. 9,92,000 6,09,000	Rs. 10,40,000 6,28,000	Rs. 9,82,000 5,58,000	Rs. 10,82,000 5,94,000	Rs. 10,94,000 6,01,000	Rs. 10,38,000 5,62,000
Net revenue Provincial share	•••	3,83,000 1,91,000	4,12,000 2,06,000	4,24,000 2,12,000	4,88,000 2,44,000	4,93,000 2,47,000	4,76,000 2,38,000

from a revenue point of view; and during 1882-87 the depression of trade caused a slackness in the demand for timber, especially for railway sleepers. The operations of the five years resulted in a small aggregate profit of Rs. 38,000. From 1883-84 revenue record-room receipts and charges were transferred from Registration to Land Revenue. These averaged about Rs. 85,000 and Rs. 70,000 a year respectively, so that the net revenue under Registration was really about Rs. 15,000 a year more than appears from the above statement. Allowing for this, it will be seen that the net revenue from this source increased in five years from Rs. 3,83,000 to Rs 4,91,000, or by over 28 per cent., while the profit of the Provincial Government amounted to Rs. 2,22,000 during the whole period of the contract. These satisfactory results were due to the steady introduction of rural in place of official agency, and to the increase of registrations consequent on the passing of the Bengal Tenancy Act.

57. Under the heads of Law and Justice (proper) and Jails the contract worked very unfavourably for the Local Government. On the receipt side the

worked very unfavourably for the Local Government. On the receipt side the contract estimate was taken at 9 lakhs and 7 lakhs, respectively, the former including an item of 8 lakhs under the subhead of general fines, fees, and forfeitures, while the latter was almost wholly composed of the sale proceeds of jail manufactures. Under the latter head the estimate was realised, except in 1883-84, when the orders of Lord Ripon's Government restricting jail manufactures reduced the receipts from that source to Rs. 6,38,000. The total receipts from jails in each year were Rs. 8,47,000, Rs. 6,46,000, Rs. 7,29,000, Rs. 7,87,000, and Rs. 7,45,000, against the contract estimate of 7 lakhs. The receipts from fees and fines, however, never came up to the estimate, and the total receipts under Law and Justice (proper) were Rs. 8,23,000, Rs. 7,64,000, Rs. 7,55,000, Rs. 7,41,000, and Rs. 7,56,000, against the contract estimate of 9 lakhs. The not loss on the whole contract was about 4 lakhs of rupees. The expenditure on these two branches of the administration rose from a contract estimate (1881-82) of Rs. 88,33,000 to Rs. 96,19,000 in the last year, and the deficit which had to be made up from other sources was Rs. 4,43,000, Rs. 4,85,000, Rs. 5,76,000, Rs. 9,06,000, and Rs. 7,86,000 in each year since the contract was framed. Valuable reforms were carried out in the

Jail Department, including the reorganisation and complete equipment of the personnel of the superior staff, the development of the Central Jails at Dacca and Midnapore, the establishment of a district jail at Khulna, the introduction of warder guards in place of police, the establishment of a new Juvenile Reformatory at Hazaribagh, and the large development of that at Alipore. These measures cost nearly 1½ lakhs per annum. The rise in the price of food increased the expense of dieting prisoners by an equal sum though the jail population steadily diminished in numbers. During the five years, the pay of the Subordinate Judges and 12 munsifs were added to the permanent staff, while numerous temporary officers were appointed. Three additional Judges were temporarily appointed to clear off arrears in the High Court. For the rest, the increase in litigation caused a steady continuous increase in the charges for ministerial establishments, for the service of processes, and for the copying of judicial documents.

58. Under the head of Police the contract grant was fixed at Rs. 41,32,000, and the actual expenditure in 1881-82 was Rs. 40,87,000. From the beginning of 1882-83, however, the cost of police in mufassal municipalities was assumed by Government, and a charge of about 4½ lakes per annum, for which the terms of the contract made no provision, was thus added to the Provincial burdens. There was a set off against this of about one lake under Medical, and half a lake under Education, on account of various charges which were simultaneously transferred to Municipal Boards; and the net cost of this reform was about 3 lakes a year since the beginning of the contract. This was increased by Rs. 61,000 a year from the beginning of 1884-85, when by Act IV (B.C.) of 1884 a similar measure of relief was extended to the Howrah and Suburban Municipalites, which since then paid only Rs. 49,000 a year for police, instead

of Rs. 1,10,000 a year as formerly.

59. Under Marine the net receipts and charges in each year since 1882-83 were as follows:—

Contract ceti- mate.		1882-83. 1883-84.		1884-85. 1885-86.		1886-87.	
Gross receipts*	•••	Rs. 11,09,000 10,97,000	Rs. 10,17,000 9,51,000	Rs. 9,61,000 8,69,000	Rs. 8,37,000 8,47,000	Rs. 9,16,000 8,29,000	Rs. 9,62,000 8,53,000
Net receipts Net charges	•••	12,000	66,000	92,000	10,000	87,000	1,09,000

Includes in each year a special allotment of Rs. 65,000 for the cost of the Undaunted, credited under Land Revenue.

The falling off in receipts was wholly due to the stagnation of trade. In 1881-82, the last year of Sir Ashley Eden's administration, the number of vessels which entered the Port of Calcutta was 1,074, with a total tonnage of 1,808,005, while the number of clearances was 1,058, with a total tonnage of 1,774,084. In both cases the number of vessels and the aggregate tonnage reached the highest figure ever recorded at Calcutta. By 1884-85 the shipping had fallen to 903 entries with a tonnage of 1,729,874, and 923 clearances with a tonnage of 1,745,271, representing the smallest aggregate trade that has visited Calcutta in any year since the opening of the Suez Canal.

Except in respect of pilotage the Bengal Marine Department is of little importance. The only matters of note during the five years 1882-87 were the grant of a subsidy of Rs. 35,000 a year to Messrs. Macneill and Company since 1883-84 for a rapid steamer service between Dhubri and Dibrughar; and a grant of Rs. 10,000 a year to the same firm, for a similar service to Sylhet. In both cases the subsidies were supplementary of similar grants made by the

Chief Commissioner of Assam.

60. The expenditure on Education was taken in the contract estimates at Rs. 26,77,000. The actual expenditure in each year was Rs. 30,16,000 Rs. 31,55,000, Rs. 34,00,000, Rs. 32,95,000, and Rs. 33,54,000. Up to 1884-85 it was possible to provide annually increasing allotments for this branch of service, but since then the demands of other Departments swallowed up

the scanty increments of the Provincial revenues, and educational expenditure remained stationary. Efforts were, however, made to give effect to the recommendations of the Education Commission. The inspecting staff was strengthened by the appointment of two new Inspectors of Schools, four Joint and Assistant Inspectors, three Deputy Inspectors, and 16 Sub-Inspectors, while the pay of the latter class of officers was raised to Rs. 50 wherever it was less than that sum. These measures were carried out at a cost of Rs. 60,000 a year. The primary grant was gradually raised from 5 lakhs, at which it stood at the close of Sir Ashley Eden's term of office, to $7\frac{1}{2}$ lakhs; while the annual provision for grants in-aid of schools managed by independent agency was simultaneously raised by upwards of $1\frac{1}{2}$ lakhs. The transfer of police charges to Government enabled Municipal Boards to increase their expenditure on education by upwards of Rs. 60,000 a year. The limited resources at the disposal of Government made it impossible to do much in the way of developing technical education, but it was not altogether neglected. The Engineering College at Sibput was enlarged and developed, and the School of Art in Calcutta was sedulously encouraged, and made rapid strides in the number of its students and the quality of the instruction imparted.

Works Department than in any other branch of the public service. The Government of India originally proposed to settle the terms of the contract on the basis of a normal expenditure of 75 lakhs a year for public works of all kinds, including the maintenance, repair, and working expenses of all railway's and canals, the construction of new works, and the construction, maintenance and repair of civil roads and buildings, but exclusive of interest charges. Sir Ashley Eden strenuously urged that the grant should not be less than 99 lakhs, the average of the preceding three years, but eventually the offer of the Government of India was accepted with the modification that a lump sum of 15 lakhs, equivalent to 3 lakhs a year, was credited to the Local Government.

62. The following table shows the actual expenditure incurred in each

year since 1881-82:-

	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
State Railways	11,32,000	18,49,000	8,27,000	1,32,000	51,000	58,000
(Capital).						
Subsidised Railways		1 1,000	40,000	58,000	26,000	1,000
Irrigation (Capital)	22,09,000	17.18,000	5.03.000	2,02,000	3,77,000	2,18,000
Civil works	66,87,000	66,82,000	45,75,000	27,15,000	27,27,000	3 8,85,000
Total	1,10,28,000	1,02,60,000	59,45,000	31,07,000	31,81,000	41,62,000

The dwindling of the grants under every head was most striking. During the first two years of the contract funds were provided, though with difficulty, for the Dinajpur branch of the Northern Bengal State Railway, and for the completion of the Diamond-Harbour branch of the Calcutta and South-Eastern Railway, the whole cost of which was found from Provincial revenues. With the completion of these works, the construction of railways from Provincial funds was entirely suspended, the small sums shown in 1884-85 and subsequent years being merely on account of the Kaunia-Dhurlla State Railway which is a Provincial work. In respect of irrigation works, the course of events was almost precisely similar. No new work of any kind was undertaken during the term of the 1882-87 contract, and it was with the utmost difficulty that funds were provided for the improvement of the Calcutta canals, and the prosecution of the Orissa Coast Canal, both of which works had been undertaken during Sir Ashley Eden's term of office. The Orissa Coast Canal, designed to place Orissa in inland communication with Bengal, and likely to be of the highest value in the event of famine, was begun in 1881. The final opening of the canal was delayed in consequence of unexpected difficulties in locking the Burrabulong river, and of the damage done by the cyclone of September 1885, which also caused the estimates to be exceeded. This work was admittedly protective in its nature, and its

importance chiefly consists in the security it is calculated to afford against famine. Yet the only assistance which the Bengal Government received in its construction from the Famine grants consisted of two grants of three and four lakks respectively, given on the condition that the Imperial Government should share proportionately in the receipts. The whole of the remainder of the cost, which was expected to amount to nearly 40 lakks, was provided from Provincial Funds, and nearly 20 lakks of this were found during the currency of the contract.

64. During the first two years of his administration, Sir Rivers Thompson endeavoured to provide for the completion of works in progress and to meet the demand for new works to the full extent of the balance at credit of the Province. The offices of the Bengal Government in Calcutta were completed, court-houses were completed or constructed at Jessore, Mymensingh, Faridpur, Pabna, Gaya, Ranchi, and Darbhanga; jails at Dacca, Midnapore, Buxar, Gaya, Ranchi, Darbhanga, Bogra, Mymensingh and Purulia; the Secretariat offices at Darjeeling since converted into the Deputy Commissioner's Court were begun; numerous sub-divisional court-houses and munsifis were constructed, and a variety of miscellaneous public improvements carried out. By the end of 1883-84, however, the Provincial balances had been reduced to Rs. 6,87,000, and at this juncture the Secretary of State issued orders that they should not ordinarily be allowed to fall below 20 lakhs. The Public Works grant for 1884-85 including Civil Works in charge of Civil Department was therefore restricted to 30 lakhs; and that for 1885-86 was, under pressure of the complications on the North-West frontier, cut down to Rs. 27,85,000.

Sir Rivers Thompson's power of making contributions from the Provincial revenues in aid of public objects was greatly circumscribed by financial pressure. The expenditure in no one year exceeded Rs. 3,20,000, and averaged about $2\frac{1}{2}$ lakhs a year; and when it is remembered that nearly $1\frac{1}{2}$ lakhs a year represent compulsory payments of an official nature, the available balance is seen to be exceedingly small. Nevertheless, it was found possible to give grants of Rs. 50,000 each to the municipalities of Burdwan, Bhagalpur, and the Suburbs of Calcutta in aid of local schemes of water-supply; of Rs. 46,000 to the District Road Committee of the 24-Parganas; of Rs. 55,000 to that of Champaran; and of Rs. 20,000 to that of Nadia, for feeder roads; of Rs. 30,000 to the Darjeeling Municipality for the construction of a market, a wire tramway for the removal of rubbish, and other local works; of Rs. 10,000 for the improvement of the town of Chittagong; of Rs. 15,000 for drainage works in Scrampore; and of numerous smaller amounts to District Road Committees and Municipal Boards for miscellaneous objects. The Lieutenant-Governor also gave large grants from the balance of the Wahabee Fund for the improvement of the town and district of Patna, including a sum of Rs. 30,000 for a much needed road from the city chowk to the Railway Ferry Ghat, and a grant-inaid of Rs. 10,000 towards the Anglo-Arabic School established for the special encouragement of Muhammadan education.

66. The following table shows the net financial result of the working of all Provincial Railways and Canals, whether technically classed as Productive Public Works or not, during each year from 1881-82 to 1886-87.

RAILWAYS.

	1		1			
`	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
Gross receipts Working expenses	Rs. 32,70,000 19,03,000	Rs. 37,88,000 20,40,000	Rs. 41,24,000 . 25,00,000	Rs. 43,10,000* 30,72,000	Rs. 45,03,000 30,39,000	Rs. 53,02,000 31,43,000
Net earnings Interest	13,67,000 12,86,000	17,48,000 14,14,000	16,24,000 15,94,000	12,38,000 17,15,000	14,64,000 19,07,000	21,59,000 20,68,000
Net profit Net loss	81,000	3,34,000	30,000	4,77,000	4,43,000	91,000

^{*} From the 1st July 1884, the Calcutta and South Eastern Railway was resumed by the Imperial Government, and its receipts and charges disappear from the Provincial account. A lump sum of Rs. 22,500 for 1884-35, and of Rs. 30,000 for each succeeding year (credited on this account under Land Revenue) is here added to gross earnings, and the interest charges are also diminished by the amount credited to Provincial on this account.

CANALS.

,	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
Gross receipts Working expenses	Rs. 19,55,000 14,51,000	Rs. 20,72,000 17,97,000	Rs. 19,62,000 17,44,000	Rs. 20,85,000 17,93,000	Rs. 26,17,000 18,39,000	Rs. 22,26,000 18,05,000

Net loss	15,71,000	18,41,000	19,43,000	19,21,000	14,71,000	18,52,000

By the end of 1881-82, when the contract of 1877 came to an end, the total capital expenditure on State Railways in Bengal (exclusive of the East Indian Railway and private lines) amounted to 427 lakks of rupees, and the mileage of lines open for traffic was 467. Interest, however, was payable only on 336 lakhs, the remainder consisting of Provincial contributions and the capital of the Calcutta and South-Eastern Railway. The principal lines which were then under the control of the Government of Bengal were the Northern Bengal State Railway with an open mileage of 230, the Tirhoot State Railway with 85 miles, the Patna-Gaya with 57 miles, the Calcutta and South-Eastern Railway with 33, and the Kaunia-Dharla (a Provincial railway) with 40. During the five years 1882-87, 19 miles were added to the Northern-Bengal State Railway by the opening of the branch to Dinajpur; the Tirhoot system was practically completed by the construction of branches to Bettiah, Jhinjarpur, and Hajipur, aggregating about 160 miles; a branch of the Calcutta and South-Eastern State Railway was constructed to Diamond Harbour; and an entirely new line, 85 miles in length, was constructed connecting Narainganj, Dacca, and Mymensingh. A swift daily steamer service was started between Narainganj and Goalundo on the Eastern Bengal State Railway, and the chief districts of Eastern Bengal were thus placed in close communication with Calcutta. These works cost 147½ lakhs of rupees, of which upwards of 124 lakhs bore interest at 4 per cent., the remainder having been provided from the Provincial revenues. Seventy-eight lakhs and a half were spent on the Assam Bihar State Railway, designed to link the Tirhut and Northern Bengal systems, and including the important bridge across the Gunduck to connect the Tirhut line with the Bengal and North-Western Railway. The early part of the contract of 1882-87 witnessed unusual activity in the construction of railways by private agency. Short branch lines were constructed by private bodies and firms connecting Tarkessur with Scoraphuli on the East Indian Railway and Baidyanath with Deoghur and Rohini. The Central Bengal Railway Company constructed lines aggregating 125 miles in length, connecting Ranaghat on the Eastern Bengal State Railway with Bongong and Khulna; and the Bengal and North-Western Company, receiving a guarantee from the Imperial Government, constructed a valuable and most successful railway, 460 miles in length, from the North-Western Provinces to Sonepore on the Ganges opposite Patna.

67. The table given in the last-preceding paragraph shows that while the gross receipts on the State Railways rose from Rs. 32,70,000 to Rs. 53,02,000 (or, excluding the Calcutta and South Eastern Railway, from Rs. 31,10,000 to Rs. 52,72,000), this improvement was accompanied by so heavy an increase of working expenses and interest that the net loss to the Provincial Government during the five years covered by the contract was Rs. 4,65,000. A considerable part of this was due to the locking up of capital on lines not yet open for traffic, or still in their infancy. For instance, close upon 90 lakhs of rupees was spent upon the Assam-Bihar line. The Bengal Government had to pay 4 per cent. per annum on this capital, which of course represented so much dead weight to be carried by the open lines. Similarly, 64 lakhs were spent on the Dacca State Railway, which, though certain to yield a handsome return ultimately, State Railway, which, though certain to yield a handsome return ultimately, could do little more during the contract than pay its working expenses. For similar reasons part of the capital expended on the Tirhoot State Railway was only partially

productive. But much of the retrogression was undoubtedly due to the stagnation of trade in the years succeeding 1883-84, combined with the failure of the food-grain harvests in parts of Bihar, and of the jute crop in Bengal. The only Provincial railways of importance which were open sufficiently long for a fair comparison are the Northern Bengal, the Patna-Gaya, and the Tirhoot State Railways. The following table shows the capital outlay on each of these lines (both Imperial and Provincial), the gross receipts, working expenses, net earnings, and percentage of earnings to capital, in each year from 1881-82 to 1885-86:—

NORTHERN BENGAL STATE RAILWAY.

•		Capital to end of year.	Gross receipts.	Working expenses.	Net earnings.	Percentage of earnings on capital.
		Rs.	Rs.	Rs.	Rs.

68. The net results of the working of the canals under the Bengal Government fluctuated less, chiefly for the reason that deficient rainfall, which tends to contract the traffic on railways, stimulates the demand for water for irrigation purposes. The works managed by the Bengal Government included the Orissa and Midnapore Canals, the Hidgellee Tidal Canal, and the Sone system, which are classed as Productive Public Works; and the Orissa Coast Canal, the Calcutta and Eastern Canals, the Nuddea works, and the Saran and Damoodar Canals, which are not classed as productive.

69. The general financial result of the contract of 1882 may be summarised thus—the revenue, which was estimated at Rs. 3,93,21,000, averaged

Rs. 4,15,52,000, giving an increase of Rs. 22,31,000; the expenditure, which was estimated at Rs. 4,48,53,000, averaged only Rs. 4,26,61,000, being a reduction of Rs. 21,92,000; and the deficit, which averaged Rs. 11,09,000, was met by drawing upon the accumulated balances of the province to the extent of Rs. 55,44,000. The chief branches of revenue which contributed to the increase in receipts were Stamps, Provincial Rates, and Registration; while the reduction in expenditure was almost wholly confined to the Public Works Department, in which the grants for civil works, for capital expenditure on railways and canals, and for irrigation (net charges) were cut down so as not merely to balance the account, but to provide for a large increase of expenditure on Revenue establishments, Judicial Courts, Jails, Police, Education, Superannuations, and the not charges of Provincial State Railways. The contract closed with a credit balance in the Imperial Treasury of only Rs. 19,99,000, which was short by Rs. 1,000 only of the minimum working balance of twenty

lakhs which had been prescribed by the Secretary of State.

From these figures, and from what has gone before, it may readily be perceived how different was the task imposed on Sir Rivers Thompson from that which fell to the lot of his predecessor. Sir Ashley Eden enjoyed the advantage of a contract, which secured to the province under his control the entire benefit accruing from improved administration, and which in the event yielded financial results surpassing all anticipation. His term of office was with entire immunity from famine and other forms of natural disaster; the commercial torpor then paralysing the industries of the civilized world had not yet spread to India; and a succession of splendid harvests raised the cultivating classes almost into temporary affluence. The ample resources thus unexpectedly brought within his reach he liberally employed in improving many branches of the machinery of Government and in supplying the province with railways, canals, public buildings and other permanent improvements, of which the want had long been admitted. During the five years 1882-87, the financial history of Bengal was altogether. The contract of 1877 was succeeded by a settlement, which left little scope for the development of the Provincial revenues, and which speedily necessitated a serious contraction in the scale of Provincial expenditure. Trade at last succumbed to the influences which had produced universal stagat last succumbed to the influences which had produced universal stagnation in the commercial world of Europe and America, and its languishing vitality was promptly reflected in many branches of the public exchaquer. A scanty and uneven rainfall in three years in succession swallowed up the profits of five years of plenty, and although actual distress was nowhere so acute as to call for the intervention of the State, except on a small and partial scale, in many districts the resources of the poorer classes were wholly exhausted, and no margin whatever left for expenditure on luvuries. It was exhausted, and no margin whatever left for expenditure on luxuries. It was often difficult to provide adequately for the ordinary requirements of the public service, and it was necessary rather to seek for opportunities of effecting economies than of introducing administrative reforms. The chief measures of Sir Rivers Thompson's Government of Bengal were of the class to which large financial resources are not indispensable. The Bengal Tenaucy Act, the prosecution of the Kidderpore Docks for which the capital was found by the Government of India, the grant of an elective constitution to Municipal Boards, the inauguration of self-government in the interior, the introduction of competitive examinations for appointment to the Subordinate Civil Service, the appointment of the Commission for the revision of ministerial salaries, and the re-arrangement of work and authority in district and divisional offices—all these are measures whose importance is mainly economic and political and which leave little trace on the financial history of the time. Nevertheless funds were provided for certain reforms and improvements which the progress of the province had rendered more than ordinarily pressing. The establishment of an Agricultural Department supplied a want to which in other provinces a much higher degree of priority had been attached, and which the revision of the law of landlord and tenant in Bengal had forced into immediate prominence. The increase to the salaries of the Subordinate Executive and Judicial Services improved the prospects of a deserving body of public servants. The appointment of additional judicial officers supplied the means of a swifter, and therefore of a better, administration of justice. The progressive additions to

the grant for primary education kept pace with the downward filtration among the masses of the desire for mental improvement. The Calcutta Exhibition of 1883 84 was instrumental in spreading a wider knowledge of the raw products of India among the manufacturers of Europe, and in acquainting the native population of this country with the capabilities of European machinery. In taking over and carrying on the Iron-works at Barrakur, the Lieutenant-Governor kept alive the embers of an industry which cannot fail to have a great future before it, when the mineral wealth of Chota Nagpur and Central India shall have been adequately exploited. The Orissa Coast Canal was a work of supreme importance for the security of the province of Orissa, and its speedy completion forms the only safeguard against a repetition of the calamity of 1865-66.

71. The following comparative statements show the results under receipts

Ontract of 1887—92. and expenditure according to the contract assignment with the Government of India for the five years

1887-92 compared with the actuals of the subsequent years:—

72. The contract of 1887 between the Government of India and the Government of Bengal was based on arrangements made by the Finance Committee. No material advance in the system of decentralisation was made, but by a redistribution of the shares of the Imperial and Provincial Governments in the three principal heads of Land Revenue, Stamps and Excise, and by certain reductions in expenditure which were considered feasble, a general standard of normal revenue and expenditure was obtained, which was adopted as the "Ruling account." The surplus of this account,

amounting to Rs. 6,89,000, was appropriated by the Government of India through the Land Revenue head, leaving the province with a Revenue and Expenditure exactly equal. Under this arrangement the Government of Bengal was admitted to a quarter share in the land revenue collections, except those from Government estates, whilst under Stamps and Excise its share was changed from one-half to three-fourths and one-fourth respectively. The proportion of charges under Stamps and Excise followed the proportion of receipts. The cost of surveys and settlements and the maintenance of agricultural works and embankments was made entirely Provincial. Refunds and drawbacks followed the proportions assigned for the revenues. The Patna-Gaya State Railway was made Imperial, and the Eastern Bengal State Railway System Provincial, with this reservation that any excess over 30 lakhs in the net revenue from the Eastern Bengal State Railway proper would be credited to Imperial revenues, and that any deficiency below 20 lakhs would be made good by Imperial to Provincial. The interest on funds provided for outlay on State Railways and Irrigation Major Works was borne by the Provincial revenues and calculated on the entire capital outlay, including loss by exchange, from the commencement of operations, but excluding the amount advanced from Provincial revenues during the term of the contract.

Provincial revenues during the term of the contract.

The only important change made since the contract was finally settled was the transfer of the management of the Tirhoot State Railway to the Bengal and North-Western Railway Company from 1st July 1890. This change did not, however, materially affect the resources of the Provincial Government, although its accounts were swellen by the inclusion of the receipts and working expenses of the Railway, and the payment of the Company's share of the net receipts

from the entire undertaking.

73. The first year of the contract, 1887-88, was a period of comparative prosperity. The receipts under the principal heads of revenue were highly favourable. Railways showed a great advance above the contract estimate, and at the same time there was a large reduction of expenditure in the Civil Department. To a considerable extent this reduction was fictitious, as the savings under the head of Education were adjusted by corresponding grants made to District Boards. But these adjustments were not completed within the year, and while the accounts closed with a small increase of expenditure over the contract assignment of only Rs. 3,90,189, the increase in receipts was Rs. 17,00,256. The net surplus of

the year was Rs. 13,10,067 and the closing cash balance Rs. 33,08,991.

74. The year 1888-89 opened accordingly under favourable conditions. But the harvest generally was a poor one, and the elasticity of the revenues which had been marked under several years of prosperity suffered a severe check. For the first time for many years the stamp revenue receded. But the income from railways continued to show a satisfactory increase. It was from this cause mainly that the total receipts of the year were about 6½ lakhs of rupees more than they were in 1887-88. The expenditure side showed, however, an increase of nearly 26 lakhs. This was largely due to the increased grant for civil works of about 11 lakhs. This grant was made when it was known that the credit opening balance of the year was more than 33 lakhs, and financial prospects in other directions were generally good. The additional grant was urgently required and was very profitably expended. There was an unavoidable increase in expenditure under Railways, under Contributions to District Boards, and an augmented outlay under most heads of general administration. The net financial results of the year were, however, less unsatisfactory than was at one time anticipated. The accounts closed with an increase of expenditure over the contract assignment of Rs. 29,88,922, and an increase in the receipts of The net deficit was Rs. 6,57,919, and the closing cash balance Rs. 23,31,003. was reduced to Rs. 26,51,072.

75. The receipts of the year 1889-90 were generally satisfactory. The principal heads of revenue showed a large increase, of which, however, about 2½ lakhs were due to special assignments from the Government of India to the Local Government for special works, principally the Orissa Coast and Hijili Tidal Canals which, under the rules in force, are shown under the head of Land Revenue, and a grant of Rs. 1,91,423 was made under the same head for a new pilot brig. A grant of two lakhs was also made to the Provincial Government with effect from that year on account of the cost of the Metropolitan

Police. Stamps, Provincial rates, Assessed taxes, Forests and Registration all showed an increase. The item of Land Revenue proper was augmented by the payment of large arrears of revenue due from the Burdwan Raj estate for the preceding year. The receipts from Railways increased by nearly eight lakes of rupees. On the other hand, there was a falling off in Excise, and the prospects of the year, which would otherwise have been very favourable, were clouded by bad harvests and distress in Bihar and Orissa. The increase in expenditure under ordinary heads was not more than must be expected under a progressive administration. A larger outlay was necessary to ensure a larger revenue. The increase under Police was principally due to the conversion of the entire cost of the Calcutta and Suburban Police as a Provincial charge with effect from the 1st April 1889, and under Mariae to the purchase of the steamer Guide. The outlay on Famine Relief was of a special nature. The expenditure on Civil Works was curtailed. The accounts closed with an increase in the receipts of Rs. 49,87,505. The net surplus of the year was Rs. 10,25,475, and the closing cash balance amounted to Rs. 36,76,547.

The financial position of the year 1890-91 was primarily affected by the payment of ten lakhs of rupees, which was transferred under the orders of the Government of India from Provincial to Imperial revenues. This payment was adjusted under the head of Land Revenue. The large increase under Railways was principally due to the inclusion of the gross receipts of the Bengal and North-Western Railway for the last nine months of the year. There was a corresponding increase on the expenditure side, and the net surplus was discounted by a credit for $10\frac{1}{2}$ lakes taken by the Government of India under the head of Land Revenue on account of the estimated net earnings of the Company for the nine months, from July 1890 to March 1891, which were not paid during the year. A credit for Rs. 3,17,000 was taken under Civil Works, being the estimated value of a portion of land in the Custom House premises made over to the East Indian Railway Company for the extension of their office building. The ordinary heads of revenue showed but little expansion, while the expenditure, on the contrary, showed a tendency to increase under almost all heads. There was a large increase under Land Revenue on account of Surveys and Settlement; under Law and Justice on account of the increase in Civil Courts; under Railways as already explained; and also under Irrigation and Civil Public Works. A special grant of four lakhs was made from Provincial Revenues to the Public Works Department to undertake urgent works, and especially to defray the cost of repairs and maintenance of the roads in the Darjeeling district, which had been much damaged by heavy rains, and to construct new feeder roads to the Railway in Chota Nagpur.

77. For the year 1891-92, the last year of the contract, the total revenue under all heads of account amounted to Rs. 5,78,01,983, which was Rs. 1,13,54,983 in excess of the figures in the contract assignment. But at the same time the expenditure had increased in a still larger proportion, and amounted to Rs. 5,79,21,326 or Rs. 1,14,74,326 in excess of the assignment.

78. The following table shows the receipts under the principal heads of revenue according to the contract assignment, and the receipts under the same heads for 1891-92:—

or 1891-92:—	Contract	Actualr,	Increase.
•	assignment. Rs.	1891-92. Rs .	$\mathbf{Rs}.$
Land Revenue (proper) Ditto adjustment Salt Stamps	(—)6,89,000 1,00,000 1,00,87,000	1,00,21,000 +13,81,000 1,11,000 . 1,13,25,000	1,68,000 20,70,000 11,000 12,38,000
Excise Provincial rates (proper) Ditto (recoveries of cess	24,82,000 39,20,000	27,83,000 41,60,000	3,01,000 2,40,000
collection charges from District Boards) Customs Assessed Taxes Forests Registration	17,84,000 3 50 000	3,65.000 57,000 21,54,000 3,95,000 6,67,000	3,65,000 Nil. 3,70,000 45,000 1,29,000
Total	2,84,82,000	3,34,19,000	49,37,000

79. The large increase under Land Revenue was due to special assignments from Imperial to Provincial Funds, which are adjusted under this head. The other increases arose from the natural expansiveness of the revenues, especially under the head of Stamps and Assessed Taxes. The increase under Provincial Rates was principally due to a change in procedure under which the cost of collecting the Road and Public Works cesses is adjusted under Provincial Rates, the share debitable to district funds being shown as receipts under the same head. After eliminating adjustments and transfers of account, the real increase credited to the Provincial revenues under principal heads during the last year of the contract came to Rs. 25,02,000.

80. Under Railways there was an extraordinary increase during the same period of from Rs. 1,00,19,000 to Rs. 1,60,40,000, or nearly 60½ lakhs of rupees, of which nearly half was nominal and due to the inclusion of the receipts of the Bengal North-Western Railway, while the remainder was a real Provincial asset derived from the successful administration of the Eastern Bengal

Railway System.

81. A comparative statement of the expenditure under Revenue heads is also shown in detail—

	Contract assignment.	Actuals, 1891-92.
	$\mathbf{R}\mathbf{s}.$	Rs.
Refunds and drawbacks	1,55,000	1,54,000
Assignments and compensation	1,68,000	1,66,000
Land Revenue	34,08,000	41,14,000
Salt	11,000	52,000
Stamps	3,75,000	3,39,000
Excise	96,000	1,66,000
Provincial rates	*****	4,31,000
Customs	4,97,000	5,19,000
Assessed taxes	85,000	90,060
Forests	2,25,000	2,10,000
Registration	2,95,000	3,42,000
Total	53,15,000	65,86,000

82. The increase in round numbers amounted to 12\frac{3}{4} lakhs of rupees. The increase under Land Revenue was principally due to surveys and settlements. The increase of expenditure under Excise was the necessary accompaniment of the important changes which were made in the administration of this Department. The new charge shown under Provincial Rates is a matter of account only, and represents the cost of collecting the cesses in the districts to which the Local Self-Government Act has been extended. The other returns do not seem to call for explanation.

83. The items which compose the major head of Salaries and Expenses of the Civil Department may be compared as follows:—

		•	(Contract assignment.	Actuals. 1891-92.
¥				. Rs.	${f R}_{f s}.$
General Admini	stration	•••	•••	15,62,000	16,16,000

Scientific and ot	her Minor	Departments	•••	3,30,000	3,13,000
		Total	•••	2,18,65,000	2,34,91,000

84. Under some of these heads the increase in expenditure was very large. The increase of nearly 43 lakhs under Judicial Courts represents the financial effect of the increase which was found necessary in the number of Subordinate Judges and Munsifs and judicial establishments generally. The increase under Julis was on account of the large outlay on machinery and manufactures, and was in a measure

counterbalanced by a corresponding increase in receipts. The increase in the cost of Police amounts to nearly 12 lakhs of rupees. This was partly due to the cost of the Metropolitan Police, which was provincialised, partly to the large expenditure incurred in connection with subjugation of the South Lushai country and the formation of the South Lushai Hill District, and partly to the improvements effected in the Police Department in consequence of the recommendations made by the Police Commission. The reduction under Education is fictitious only. A great portion of the expenditure under this head has ceased to be departmental, but is incurred by District Boards to which an equivalent grant is made for the purpose under the head of Contributions. A portion of the increase under the head of Medical was due to the establishment of a Sanitary Board.

85. Miscellaneous expenditure increased from Rs. 26,61,000 to Rs. 32,31,000. There was, however, a decrease under Miscellaneous (proper), and the real increase under this heading was due to Superannuation or pensionary charges, which rose from Rs. 12,54,000 to Rs. 16,00,000, and also to increased charges under

Stationery and Printing, mainly on account of the census operations.

86. The expenditure on Railways increased from Rs. 87,63,000 to Rs. 1,42,64,000; of this amount the major portion was due to the inclusion of the working expenses of the Bengal and North-Western Railway and the Com-

pany's share of net receipts.

87. Irrigation expenditure increased from Rs. 45,69,000 to Rs. 53,32,000. The Interest charge rose from Rs. 22,94,000 to Rs. 24,03,000, and the remain. der was due to expenditure on works. A large share of the expenditure on the Orissa Coast and Hidgilee Tidal Canals was contributed by the Government of India and credited under the head of Land Revenue.

The increase in expenditure on Civil Works from Rs. 31,14,000 provided in the contract to Rs. 40,25,000 in 1891-92 was unavoidable with

reference to the necessities of so large a province.

89. The increase under Contributions from Rs. 1,59,000 to Rs. 8,79,000 was due to the development of Local Self-Government and the assignments it was necessary to make to local bodies in order to maintain an equilibrium between their receipts and the expenditure imposed on them.

H. H. RISLEY,

Secretary to the Government of Bengal.

The 1st April 1893.

SURVEY AND SETTLEMENT OF THE GOVERNMENT ESTATE OF BANKI IN CUTTACK.

BEVENUE DEPARTMENT-LAND REVENUE

Calcutte, the 11th April 1895.

RESOLUTION No. 1791.

READ-

Letter No. 180A., dated 21st February 1893, from the Board of Revenue, with enclosures, submitting the final report on the survey and settlement of the Government estate of Banki in Cuttack.

Banki was formerly a Tributary State, the property of the Raja of Banki.

The Raja was dethroned in 1839 for misconduct,
and his territory was confiscated by Government.

From 1839 to 1882 Banki was under the management of the Superintendent of

the Tributary Mahals, but in 1882 it was annexed to the Cuttack district, and it has since been treated as a Government estate, and has been managed by a Sub-Deputy Collector. It was settled in '1844 after measurement for ten years, and again after measurement for 14 years from 1854. The period of the second settlement was extended to 1888 in consequence of the Orissa

famine of 1866.

The survey-settlement, which is the subject of the report now sub-Agency employed on survey mitted, was begun in 1888 and completed in 1891 under Act VIII (B.C.) of 1879. The survey was carried out by a detachment from the Survey of India under Mr. R. B. Smart, Surveyor. An attempt was made to utilize local agency for the field survey and record-writing, and a number of sarbarahkars, or managers of villages, and their relatives were trained in survey schools opened for the purpose at different centres. By these means the sarbarahkars were enabled to understand the operations and to render valuable assistance; but, generally speaking, the work was done by outsiders, the sarbarahkars being found as a class unequal to the task. The settlement was carried out by Babu Balaram Das, Sub-Deputy Collector, who explains that the delay in the completion of the work was due (1) to his being in charge of the estate as Sub-divisional Officer, in which capacity he had the tahsil and criminal case work to attend to; (2) to the failure of the rice crop in 1888-89, and the consequent increase of work in other directions; (3) to difficulties met with in determining the rent of holdings; (4) to the fact that after the preliminary enquiries had been made, and the principles on which the settlement was to be concluded were decided, 5,730 objections were received and had to be disposed of; and (5) to the re-arrangement of the sarbarahkari circles. The draft jamabandi was published in March 1891, when the Settlement Officer ceased to draw the special settlement allowance of Rs. 100 per mensem, though some work still remained to be done, which delayed the submission of the final report. That report is dated 7th April 1892. and did not reach Government till the end of February 1893. The delay occurred chiefly in the office of the Director of Land Records, time being lost in printing the report and the Director being absent on tour and having much other work to engage his attention.

3. The total area of the estate is 74,530 acres or 117 square miles. The cost of the operations was Rs. 38,613, or a little more than eight annas an acre. Although this average rate cannot be considered low having regard to the fact that the pay of the Settlement Officer was separately met by Government and that only his special allowance of Rs. 100 per mensem was charged to the settlement, it is very cheap compared with the average rate of cost of the survey and settlement operations lately carried out in the neighbouring estate of Khurda. The gross rental was raised from Rs. 23,866 to Rs. 33,107, and the net revenue from Rs. 21,421 to Rs. 28,820, the increase (Rs. 7,399) being mainly due to the addition of 4,210 acres to the cultivated area, which has increased from 33,000

to 37,210 acres.

[·] Chandna rates.

The raiyats are locally divided into three classes, Thani, Pahi, and Chandna, all of whom enjoy occupancy rights. Thani raiyats are cultivators residing in the village, the land of which they till, while a Pahi raiyat is one who holds and cultivates land in a village other than that of his residence. Chandnadars are raiyats who have homestead lands, but no cultivation. In the above statement the term "settled raiyat" has been used by the Settlement Officer apparently as the equivalent of "thani raiyats," whose rights are greater than those of settled raiyats, as defined in the Bengal Tenancy Act, no portion of which, however, had been extended to Orissa before the completion of the settlement of Banki. The total number of holdings is 26,478, or 30,479, including under-raiyats. According to the local custom the underraiyats cannot ordinarily be ejected from their holdings except by order of the Court. Most of the raiyats under the lakhirajdars and jagirdars pay rent partly in cash and partly in kind, or in some cases in kind only. These produce rents have been recorded by the Settlement Officer. It is stated that the raiyats are eager to commute the grain into money rent, but that the tenure-holders are opposed to the change.

5. The Lieutenant-Governor desires that in the case of raiyats holding under Government division of holdings should be forbidden, as in Khurda; and His Honour directs that all transfers should, following the arrangements sanctioned in Government order No. 856L.R., dated 4th March 1892, for that estate, be registered at the head-quarters, and also recorded by the sarbarahkars. His Honour directs that the rights of Government in the dead and fallen trees in their holdings, referred to in paragraph 108 of the report of the Settlement Officer, shall be abandoned in favour of the raiyats.

- 6. The class of tenants known as mafidars, who hold homestead lands free of rent, consist chiefly of Sahars, Pans, Sanais and such like who live on the margin of subsistence and from whom the criminal population is chiefly drawn. The Lieutenant-Governor agrees with the Collector that these men should be well looked after and only allowed the privilege of holding land rent-free during good behaviour. The number of such holdings is 730, covering the small area of 93·16 acres.

 7. The uncultivated area amounts to 37,819 acres, of which 11,840 acres are culturable waste. Of the latter area, 4,034
- The uncultivated area amounts to 37,819 acres, of which 11,840 acres are culturable waste. Of the latter area, 4,034 acres are covered by mango orchards, of which only 653 acres were assessed at Rs. 166-10-5. Young orchards or orchards required for public purposes are not assessed. The remainder of the culturable waste (7,805 acres) is not brought under cultivation, chiefly because there are no means of irrigation. As to the unculturable area (25,979 acres), village sites occupy 1,083 acres, and 6,473 acres include hills and forests and other ground open for grazing purposes.

8. Another source of revenue is the fisheries, which yield Rs. 683-7. The leases granted run for 15 years, and contain clauses providing against the fishermen interfering with the use of water for the irrigation of crops.

9. It is stated that the settlement is acceptable to the raiyats and sarbarahkars, and that, though some appeals were made to the Collector, not a single suit was instituted to contest the jamabandi. There is no doubt that the settlement is lenient, as may be inferred from the rise in the selling price of raiyati holdings and in the price of food-grains, facts which appear from the following statements extracted from the Settlement Officer's report, showing (1) the average price at which raiyati holdings were sold for 15 years between 1863-64 to 1886-87, and (2) the average price of common rice during the years 1843 and 1874 to 1891:—

1881	***		29 8	1891	•••	•••	24 3
1882	•••		30 8				

The statistics in both tables are very remarkable, especially those in the former. It will be seen that the average selling price of raiyati holdings in Banki has risen by 800 per cent. within the last twenty-three years. This rise, moreover, has been virtually continuous, the price receding slightly in years of scarcity and advancing again directly prosperity was restored. No better evidence could be wished for of the steady and growing prosperity of the agri-

cultural population of this estate. The record of average prices commences with 1843, when common rice stood at 58 seers to the rupee. By 1874, communications having meanwhile been improved by the opening of the High Level Canal and the development of the Orissa ports, the price had risen to 26 seers. In 1877—79 the demand occasioned by the Madras famine sent the average price up to rates varying from 14 to 16 seers per rupee. In the period 1881—83 plentiful harvests raised the average to 27—30 seers, while in 1885-86 the cyclone, floods and failure of crops brought it down to 10.8. It now stands at 24.3, which may perhaps be assumed to represent the normal average of the area in ordinary years. The effect of the opening of the East Coast Railway and the extension of the Bengal-Nagpur line will be watched with interest, and will no doubt bring about a further rise of price. It will be observed that the rate of increase in the case of prices falls far short of that obtaining in the case of holdings. The former has risen by 100 per cent. in 50 years; the latter by 800 per cent. in less than half that time.

10. The subjoined statement, also taken from the Settlement Officer's report, gives details of the various crops and the extent to which each crop is grown in the estate; but there are no data to show the net gain to cultivators:—

11. The sarbarahkars of Banki hold the same position as those of Khurda, i.e., they are farmers and public accountants, and are responsible for the total demand due to Government, whether they collect from the raivats or not. They have no rights beyond those conferred on them by their engagements, and are liable to dismissal for misconduct under the orders of the Collector. In making appointments to the post of sarbarahkar, a relative of a deceased or rotired sarbarahkar, who has rendered good service, is preferred, provided he be otherwise qualified. Under the orders of the Board of Revenue, the number of the

sarbarahkari circles in the estate has lately been reduced from 143 to 75, and the number of sarbarahkars from 159 to 99. Compensation at the rate of one year's commission was granted to each sarbarahkar whose services were dispensed with. These arrangements are approved generally by the Lieutenant-Governor. The sarbarahkars receive a commission at the rate of from 10 to 20 per cent., and they have been allowed to take the profits of new cultivation for the term of the present settlement, which has been fixed at 15 years, from 1298 to 1312 Amli, or 1891 to 1905. The average amount of the annual commission now drawn by these officers is Rs. 32-8 a year, but 40 of them draw less than Rs. 20, and 47 draw between Rs. 20 and Rs. 50. Of the remainder 8 draw over Rs. 50 and 4 over Rs. 100. Engagements will be taken from those who agree to keep up the settlement records, copies of which have been supplied to them. As regards increase of commission, His Honour is of opinion that the capacity of the sarbarahkar to maintain the records should be clearly proved before any additional percentage is given to him. The Lieutenant-Governor therefore directs that the orders contained in Government letter No. 856L.R., dated 4th March 1892, regarding the inspection of records in Khurda, shall also apply in Banki; and His Honour authorises the grant of a reward of 5 per cent. of his collections to each sarbarahkar found to have

kept his records in proper order and up to date each year.

12. The question of improving the position of chaukidars will be considered in the Judicial Department of this Govern-Chaukidars.

The Lieutenant-Governor awaits the report promised by the Collector

on the proposed establishment of a dispensary in Banki.

14. The Settlement Officer, Babu Balaram Das, deserves commendation for his good work and for the intelligent report which he has submitted. Lieutenant-Governor sanctions the continuance to him of the special allowance of Rs. 100 a month for six months from the beginning of March 1891. The suggestion of the Director of Land Records that he should be appointed a Deputy Collector will be considered in the Appointment Department of this Office.

ORDER.—Ordered that this Resolution be published in the Calcutta Gazette, and that a copy of it be forwarded to the Board of Revenue for information and guidance.

By order of the Lieutenant Governor of Bengal,

H. H. RISLEY, Secretary to the Govt. of Bengal.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF MARCH 1893.

THE principal features in the meteorology of March 1893 have been-

1. The mean pressure for the month has been in excess of the normal over the whole ince, except, perhaps, at Darjeeling. The usual excess has varied from 0.03" to 0.05", province, except, perhaps, at Darjeeling. The usual excess has varied from 0.05" to 0.05", and it has been fairly equally distributed in all districts, except, perhaps, at the extreme western stations, such as Dehri, Hazaribagh and Ranchi, and at Chittagong, where it has varied from only 0.01" to 0.02", and at Darjeeling, where apparently a defect has been

registered.

2. The mean temperature for the month has been largely in defect of the normal, the defect usually varying from 4° to 7°. The smallest defects are recorded at the eastern and northern stations, and the largest of 5° and 6° and upwards at the central and western stations. At Silchar and Sibsagar in Assam, indeed, the defect has only equalled from 2° to 3°. The defect generally has been larger in the day than in the night temperatures; for while the mean of the day or maximum temperatures has been usually from 5° to 10° in defect, the average of the night or minimum temperatures has only shown a defect of about 3° to 4°.

3. Humidity and cloud proportion have been very decidedly in excess of the normal

for March in all districts of the province.

4. The southerly element in the wind directions, which is generally rather strongly developed in March, has been less prominent than usual in the month under review, and the general wind directions have been westerly to south-westerly, except in the extreme east and north of the province of Bengal and in Assam, where winds have been usually easterly. Indeed, the hot weather system of winds can be scarcely said to have properly estab-

lished itself in Bengal until about March 20th.

The weather in March has been most abnormal, and the hot season conditions did not establish themselves in Bengal even to a moderate extent until about the 20th instant. The weather conditions have also been much more disturbed than usual. Disturbed conditions accompanied by rain occurred from the 6th to the 8th instant, owing to the passage of a feeble barometric depression from North-Western India in an easterly direction. Disturbed conditions again existed from the 8th or 9th up till about the 17th in connection apparently with certain changes in the pressure distribution, which about this time passed from the cold weather to the hot season system of pressure in Bengal; and again from the 19th to the 23rd a series of hot weather storms or nor'-westers visited Bengal in connection with a low pressure area which developed to the west of the province, and which gradually drifted across it in an easterly direction. Hence it will be seen that the duration of fine settled weather during March was unusually short, and it was confined to the first four or five days, when ordinary cold season conditions obtained, and to the last week of the month when the conditions were of ordinary settled hot season character.

6. Owing to the very prolonged periods of disturbance the rainfall during March has been unusually heavy, and except in Bihar, where the fall is rather less than an inch, it has varied from about two to four inches. The rainfall for March has hence been very considerably in excess of the normal in all districts, and the number of rainy days has been

about twice as large as usual during the month.

The following summary will give a short description of the more important changes

which have happened during the month.

During the last week of February a rather influential barometric depression had passed through the province, and in its rear the usual wave of cool air had swept over Bengal, and a steady dry north-westerly air current was blowing during the early part of March, while temperature was in many cases nearly 10° below the normal during the first day or while temperature was in many cases nearly 10° below the normal during the first day or two of the month. This defect of temperature steadily decreased, though weather remained fine up till about the 5th or 6th instant. On the former date, however, a well-defined barometric depression entered North-Western India, moving in an easterly direction, and a secondary depression appeared near Peshawar, and on the 6th an area of low pressure existed between Sutna and Nowgong, while pressure remained relatively low over a large part of Western India. The low pressure areas then apparently moved in an easterly direction slowly filling up in their advance, and though no definite barometric depression could be traced to have passed over Bengel, nevertheless from the 6th to the 9th weather was very disturbed over the province, and very numerous rain showers were reported. The effect of the general rainfall accompanied by the heavily clouded skies was to cause a considerable fall of temperature, which again became very low. clouded skies was to cause a considerable fall of temperature, which again became very low, the defects being largest at the western stations when they ranged up to 14°. The depression disappeared about the 7th, and on the 8th and 9th of March pressure had been rising in Bengal, and on the latter date it had become in excess of the normal by about a sixth of an inch, and the pressure conditions and distribution were those which usually exist during the cold season, for the highest pressures were registered in the western districts. From this date up to about the 18th, however, these pressure conditions changed steadily. A fairly rapid fall of pressure took place during this period, and by the 18th instant pressure had become decidedly lower in Bihar and Chota Nagpur than in East Bongal, and thus the hot weather distribution of pressure had established itself. Indeed, these conditions were rather more marked than usual, for at Dehri on the 18th pressure was below the normal of the day by 0.16", while in the east of the province the defect equalled only about half this amount. Accompanying this change in the pressure conditions, there was a steady increase in the temperature, and thus while on the 12th the mean temperature was from 6° to 9° in defect, on the 18th the defect had been reduced to about 2° or 3.° During

these considerable changes also conditions remained somewhat disturbed, and numerous rain showers, frequently accompanied by local storms, occurred, and particularly on the 13th and

14th rainfall was very widely distributed.

The fall of pressure which had occurred up to the 18th was succeeded by somewhat irregular changes on the 19th, and, indeed, these irregular changes of pressure existed over the whole of Northern India, while a feeble area of low pressure was shown in North-West India near the hills. A series of the hot weather local storms called nor'-westers then set in, and fairly general rain was received in all divisions of Bengal except Orisss. On the 20th as the result of the pressure changes which has occurred, a feeble barometric depression appeared over Chota Nagpur, South Bihar, and the neighbouring districts of the North-West Provinces. Again, therefore, conditions continued disturbed, and numerous local west Provinces. Again, therefore, conditions continued disturbed, and numerous local storms occurred, and on the 21st the majority of stations, except in Orissa and parts of Bihar, reported rain. On the 21st this low pressure area had advanced slowly in an easterly direction, and a very shallow depression covered the western half of the Provinces. Frequent local storms therefore again occurred, and on the 22nd very numerous rain showers were reported. On the 22nd the shallow depression had again advanced in an easterly direction, and two feeble residual low pressure areas existed—one in Orissa and one in North Bengal and Assam. Disturbed conditions therefore continued in Bengal, local storms occurred in experience districts and on the 22nd residual low pressure areas existed. several districts, and on the 23rd rainfall was reported in Orissa and in South-West and East Bengal. On the 23rd, however, a rapid increase of pressure took place, and the low pressure areas disappeared, and from this date fine settled weather of ordinary hot season character

areas disappeared, and from this date fine settled weather of ordinary hot season character set in and continued practically without interruption up to the close of the month.

Pressure.—The variations of pressure during the month have been large. Thus at the beginning of the month it was in excess of the normal by about a tenth of an inch. For the week ending the 11th instant it was in excess of the normal by about 0.12" or 0.13". At the close of the following week pressure was largely in defect of the normal, the defect equalling about a sixth of an inch. For the week ending the 25th instant the defect equalled from 0.05" to 0.07", and at the close of the month it was in excess of the normal by amounts ranging from 0.02" in the extreme south-west of the province up to nearly a tenth of an inch at the north-eastern stations. The mean pressure for the whole month has thus been in excess of the normal by from about 0.03" mean pressure for the whole month has thus been in excess of the normal by from about 0.03" to 0.05", the excess being smallest at the extreme western and south-eastern stations. The actual average pressure for the month of April varies from about 29.95" at Silchar

to 29.90" at Dehri.

Temperature-Has been below the normal throughout practically the whole of March. At the beginning of the month it was from 4° to 6° below the normal. For the week ending At the beginning of the month it was from 4° to 5° below the normal. For the week ending the 11th the mean temperature was 4.8° in defect, for the week ending the 18th 5.4° in defect, and for the following week 5° in defect. For the last few days of the month, however, temperature rose decidedly, and on the 31st the defect was not much larger than 3° to 5°. Hence for the whole month the mean temperature for all Bengal has been 5.2° in defect of the normal, while in Assam the defect has only equalled 3.3°. The largest defects, indeed, have been registered in the western divisions, where Chota Nagpur shows a defect of 7·1°, and South Bihar and South-West Bengal defects of nearly 6°, and on the other hand the defect in East Bengal is only 4.1°. The averages of the maximum temperatures for the month show defects ranging from about 10° at Ranchi and Chaibassa to from 2° to 4° at Sibsagar, Silchar. Noakhali, Barisal, and Chittagong, and the minimum temperatures of the province have been in defect by from 5° at Gaya and Saugor Island to about 2° in North-East Bengal.

The following table shows the variation of temperature from the normal week by week for the month at nine typical stations in different districts of the province, and from this table it will also be seen that the largest defects have been recorded in the maximum or day temperatures. The figures, indeed, in this table represent a most extraordinary deficiency from the normal condition of things in March:—

									<u> </u>	<u>_</u>					

. Rainfall.—An average fall of three-and-a-half inches has occurred in East Bengal, of two Rainfall.—An average fall of three-and-a-half inches has occurred in East Bengal, of two to three inches in South-West Bengal and Orissa, of nearly two inches in Chota Nagpur and North Bengal, and of nearly an inch in Bihar. The actual falls in these divisions in March represent the following percentages of the normal falls—Orissa 238 per cent., Chota Nagpur 225 per cent., South Bihar 188 per cent., South-West Bengal 160 per cent., North Bengal 145 per cent., North Bihar 132 per cent., and East Bengal 128 per cent. The number of rainy days in March has also been generally about twice as large as usual.

Notwithstanding the general heaviness of the falls and the general excess above the normal, the falls in March have been smaller than the normal amounts in the districts of Rangpur, Darjeeling, Chittagong, Chittagong Hill Tracts, Darbhanga, Muzaffarpur, and Champaran, while in the districts of Malda, Dinajpur, Bhagalpur, Gaya, Patna, and Monghyr the falls have been only about normal in amount.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the month of March 1893:—

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore 003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1.0 lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. LITTLE,

METROROLOGICAL OFFICE, INDIA; Calcutta, the 10th April 1893.

sepleaciton.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period.
The humidity of the atmosphere is expressed as percentage, esturated air being presented by 180. A siear sty is denoted by 0 and an overeast sty by 01 regular the normal mean are the numerical means or average of the rainfall in that distrib the elemental or the results sent in by the subdivisional stations in the distribute are the number of stations. A rainty day is one of

for the week ending Sasurday, the Sch of April 1893.

Explanation.—... indicates that no rain has fullen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when as least 61 inch of rain has allen.

CALCUSTA, the 11th April 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY. THE STE OF APRIL 1893.

Ar the close of the previous week conditions were fairly normal for the hot season, except that temperature was decidedly lower than usual, and that there was a feeble tendency to disturbance over the south-west of the province in connection with a feeble low pressure area. On the 2nd of April, or the first day of the present week, the changes of meteorological conditions were small, and at the majority of stations there had been a slight fall of pressure only. while the feeble depression over Lower Bengal had disappeared and weather was fine over practically the whole province. In North-Western India, over the Punjab, however, there was still a distinct low pressure area, which was giving rise to decidedly disturbed weather. On the 3rd of April again the changes in Bengal were small, and pressure was generally rising slowly. Weather therefore continued fair in Bengal, but on this day a barometric depression was shown over part of the North-West Provinces, and the disturbed weather in connection with it had advanced in an easterly direction. On the 4th instant pressure was falling rapidly in Bihar, and moderately over the remainder of the province, and the low pressure area existed on this day over Bihar and the east of the North-West Provinces, while on the 5th, it had again advanced eastward over Bengal, though on the 6th it had filled up and disappeared. Hence the disturbed conditions accompanying the depression again advanced in an easterly direction, and numerous local storms or nor westers, usually accompanied by rain, occurred in Bengal, and on the 4th and 5th, and in some districts on the 6th also, numerous stations reported rain, the rainfall being largest in amount in North and East Bengal and in comparatively small amount in South-West Bengal and Morth Bihar. On the 7th the pressure changes in Bengal were small, and though the barometer had usually fallen, pressure was still in excess of the normal by moderate amounts. The barometric depression having however disappeared, weather had again become fine over the greater part of the province and the local storms practically ceased, except in and near the hills. On the 8th a slow to moderate fall of pressure had taken place in the west of the province, but the general condition remained unchanged, and weather continued fine over the greater part of the province except in and near the hills, where conditions were again decidedly disturbed. Winds have to a great extent remained unchanged during the week, and over the western and south-western districts they have been westerly and south-westerly and at the eastern and northern stations they have been south-easterly and easterly. The usual strengthening of the southerly winds blowing at the head of the Bay noticeable in the hot season has taken place and rather strong southerly winds have been generally reported, particularly in the second half of the week.

Pressure.—The mean pressure for the week has been in rather large excess of the normal. The general excess over the province has been from 0 07" to 0 09", but comparatively small excess pressures of about 0.05" are reported in Chota Nagpur, while in parts of North Bengal the excess has equalled a tenth of an inch.

Temperature.—The general temperature for the week has again been in defect of the normal, the defect for the whole province equalling 1.5°. During the week, however, there has been a considerable increase in the temperature, and the defects at the close of the week were much smaller than they had been for some time. Indeed on the first day of the week the mean temperature of the province was from about 2° to 4°, or 5° below the normal, while on the 8th the defect generally equalled from 1° to 2° only, and in certain parts of Chota Nagpur, Bihar, and North Bengal temperature was even in slight excess of the normal.

The distribution of temperature for the week and its variation from the normal value are best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the period. It will be seen that the principal defects from the

normal have again occurred in the maximum or day temperatures :-

Table showing the expens or defect of the actual mean temperature from the normal for the week ending 8th April 1893.

A. AMARINA STATE			Normalmean maximum temperature for the week ending 8th April.	Actual mean maximum tem- persture for the week end ing 8th April 1893.	Variation of actual mean from the normal. Rainfall.—A general fall of about one inch has occurred in North Bengal, or nearly four times as much as usual. A fall of nearly half an inch is reported in East Bengal, or practically a normal amount, and a fall of about a third of an inch in South-West Bengal, or again practically a normal fall. In North Bihar the fall has equalled only a tenth of an inch, and the remainder of the province has been nearly rainless. In North Bengal the heaviest falls are reported from the districts of Kuch Bihar, Darjiling and Rangpur; in South-West Bengal the heaviest falls have been in the Nadia and Khulna districts, while moderately heavy falls have occurred also in the following districts:—Jessore, Pabna, Backergange, Faridpur, and Purnes.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 8th of April 1893:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly

at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

a, dew; =, fog; t, thunder.

APPENDIX TO.

The Calcutta Gazette.

WEDNESDAY, APRIL 12, 1893.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 79.

[First Publication.]

AUSTRALIA-East and North coasts.

QUEENSLAND.

Storm signals at certain stations.

THE British Admiralty has given notice (No. 110 of 1893) that on 12th January 1893, storm signals, as und ermentioned, would be established at the following stations:-

	5 ,	-						_	
1.	Cape Moreton, in app	rozimately,	lat.	27°		long.,	153°	29'	E.
2.	Sandy cape	77	,,	24°	42′,	99	153°		,,
8.	Bustard head	53 .	5)	24°	1⅓′,,	"			,,
4.	Cape Capricorn	39-	"	23°	291/,,	"	151°	15'	"
5.	Flat-top island	91	"	21°	91,	"		161	"
6.	Cape Bowling Green	"	,,	19°	20′,,	"	147°	26	,,
7.	Cape Cleveland	"	99	19°	11',	"	147°	1	,,
8.	Port Douglas	"	"	16°	$28\frac{1}{2}'$,		145°		
9.	Cooktown	**	93	15°	28′ "		145°		,,
10.	Thursday island) *	"	10°	35′ "	"			"
11.	Kimberley (Karumba)))	27	17°	27′,	27	140°	56"	,,

A cone, point downwards, indicates that strong winds are probable from S.S.W. or South, through S.E. to East or E.N.E.

A ball under a cone (point downwards) indicates that strong winds are probable from W.N.W. or West, through S.W. to South or S.S.E.

A cone, point upwards, signifies that strong winds are probable from N.N.W. or North, through N.E. to East or E.S.E.

A ball under a cone (point upwards) signifies that strong winds are probable from N.N.E. or North, through N.W. to West or W.S.W.

Storm signals are made from the quarters of the yard-arm; the balls and cones are of large size, and must not be mistaken for tidal signals, which are made from the yard-arm.

NOTICE TO MARTNERS-No. 80.

[First Publication.]

JAPAN, INLAND SEA-SIMONOSEKI STRAIT.

Shoals southward of Kanabuse beacon.

The British Admiralty has given notice (No. 112 of 1893) of the existence of two shoals, each with 3½ fathoms water on it, lying southward of Kanabuse (Fisherman rock) beacon; also northward and southward respectively of the "Best track through" Simonoseki strait, as shown on the Admiralty chart:-

1.—The northern shoal lies with Kanabuse beacon bearing N.E. 1 N., distant 11 cables, or in approximately lat. 33° 58′ 20″ N., long. 130° 58′ 35″ E.

2.—The southern shoal lies with Kanabuse beacon bearing N.N.E., distant 21 cables or about one cable south of the northern shoal.

(Variation 5° Westerly in 1893.)

NOTICE TO MARINERS-No. 81.

[First Publication.]

STRAIT OF MAKASSAR.

Sunken reef south-eastward of Pamukan bay.

THE British Admiralty has given notice (No. 123 of 1893) of the existence of a dangerous sunken reef south-eastward of Pamukan bay, east coast of Borneo:—

This reef (Banda), about 11 cables long in a N.E. and S.W. direction and half a cable broad, has in some places depths of 3 to 6 feet over coral and stones, with 18 fathoms sand around. In fine weather its position is indicated by slight ripples and a discoloration of the water.

Approximate position mlat. 2° 44' S., long. 116° 45' E.

Note.—It seems possible that this is the reef the Addington grounded on, the existence of which is marked doubtful on Admiralty chart, No. 2637.

B. P. CREAGH, Comdr. R. I. M.,

Port Officer of Calcutta.

[First Publication.]

EASTERN ARCHIPELAGO-JAVA SEA.

Shoal northward of Ra-as.

THE British Admiralty has given notice (No. 124 of 1893) of the existence of a shoal northward of Ra-as, northern side of Madura strait:—

This shoal, about 4½ cables long, in a N.E. and S.W. direction, has a least depth of 4 fathoms over sand and stones on it, and lies with the west extreme of Ra-as bearing S.W. \(\frac{7}{3} \) S., distant about 7 miles; and Talango Ayer E. by S. \(\frac{1}{3} \) S.

Approximate position: lat. 7° 2\(\frac{3}{2} \) S., long. 114° 32\(\frac{1}{2} \) E.

(Variation 2° Easterly in 1893.)

NOTICE TO MARINERS-No. 83.

[First Publication.]

AUSTRALIA-BRISBANE RIVER.

Alterations in depths of Dredged Channels.

WITH reference to Notice to Mariners, No. 69, dated 20th March 1893, issued by this office, the Portmaster, Brisbane, has given further notice (No. 8 of 1893) that as a result of the last flood in the Brisbane River, additional changes have taken place in the Dredged Channels, the net depths at Low-water Springs being now as follow:-

				£t.	ins.
Outer Bar	•••	•••	•••	8	6
Inner Bar	•••	•••	•••	15	0
Pelican Bank	•••	•••	•••	12	0
Lytton Rocks	•••	•••	•••	13	0
Above Lytton	•••			15	0
Eagle Farm Flats	•••	•••	•••	6	0
Quarries Reach		•••	•••	10	0
Hamilton Reach	• • •		•••	7	6

In the Outer Bar Cutting, the shallowest water extends for a distance of about three cables, and for a half to three-quarters of a mile the depth is from 10 to 13 feet.

In the Pelican Bank Cutting, the shallowest water extends for a distance of about three cables, and in the Eagle Farm Flats Cutting, for about a cable.

The Quarries Cutting, has silted up evenly, and in the Hamilton Reach there are a series of shallow ridges throughout the whole cutting.

A detailed examination of all the cuttings is now being made, and if deeper water is discovered outside the recognised channels, due notice will be given.

NOTICE TO MARINERS-No. 85.

[First Publication.]

AUSTRALIA-BRISBANE RIVER BAR.

Alteration of Tide signals—Pile light-house.

THE Portmaster, Brisbane, has given notice (No. 10 of 1893) that on and after 1st proximo, the tide signals hitherto shown from the Pile light-house, Brisbane river bar, will be discontinued, and in lieu thereof the code in use at all other Queensland Ports (as published in December last) will be adopted.

This change is in consequence of the diminished depth of water in the various cuttings,

for which the original code does not provide.

B. P. CREAGH, Comdr. R. I. M., Port Officer of Calcutta.

[First Publication.]

INDIA, SOUTH-ORYLON COAST.

Regarding the Black and Red buoys, Batticaloa.

THE following telegraphic communication, dated 17th ultimo, received by the Colonial Covernment of Ceylon, from the Master Attendant, Batticalca, is republished for general information:—

"Buoys Black and Red not moored yet owing bad weather. Please notify in Gazette. Expect ready next week."

B. P. CREAGH, Comdr., R.L.M., Port Officer of Calcutta.

Published for general information.

T. Butler,
Offg. Under-Secretary, Marine Department.

CALCUTTA, the 4th April 1898.

GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No., 89.

[First Publication.]

BAY OF BENGAL-ORISM COAST.

Fairway buoy, entrance to Dhamra river, concerted into a Port hand-buoy.

THE Port Officer, Chandballi, has given notice that the Fairway buoy, south channel Dhamra river, has been converted into a Port hand black buoy, with apire surmounted by a cylinder, and placed 500 yards north-west of its former position, in 34 fathoms, low water.

B. P. CREAGH, Comdr., R.I.M., Port Officer of Calcutta.

Published for general information.

T. Butler,
Offg. Under-Secretary, Marine Department.

CALQUATA, the 4th April 1898.

GOVERNMENT OF BENGAL-MABINE DEPARTMENT.

NOTICE TO MARINERS-No. 74.

[Third Publication.]
AUSTRALIA—CAIRNS HARBOUR.

The Portmaster, Brisbane, has given notice (No. 6 of 1893) that vessels arriving at the fairway off the bar to Cairns harbour may have the depth of water available signalled to them at night if they have advised Cairns of the probable time of arrival.

Signals are made with the front leading light as follows, viz:—

The light will be obscured one minute to draw attention, then the number of flashes

made at 5-accord intervals denotes the number of feet over 10 feet, e.g., two flashes at 5second intervals denote 12 feet, three flashes 13 feet, and so on. Odd inches are denoted by the number of flashes in quick succession.

The signals will be repeated until answered by a flare light from the vessel.

Flood tide is denoted by a red light shown from the platform of the outer leading light.

EATON W. PETLEY, Port Officer of Calcutta.

Published for general information.

CALCUTTA, the 25th March 1893.

K. H. STEPHEN, Under-Secretary, Marine Department.

GOVERNMENT OF BENGAL-MARINE DEPARTMENT.

NOTICE TO MARINERS-No. 75.

[Third Publication.]

AUSTRALIA-MARY AND BURNETT RIVERS.

Decrease in depths in channels.

The Portmaster, Brisbane, has given notice (No. 7 of 1893) that in the Mary river the depth in the channel at the Horse Shoe bend has decreased to six feet; sind in the channel through the Middle flats below Rocky point the depth has decreased to five and-ahalf feet at low-water springs.

In the Burnett river the bar has silted up, and there is only three feet with the leading beacons in line. A narrow channel with five feet at low water exists round the South Head,

which is being marked off.

EATON W. PETLEY, Port Officer of Calcutta.

Published for general information.

CALCUTTA the ofth March 1893.

K. H. STEPHEN, Under-Secretary, Marine Department

[Third Publication.]

CHINA-South-East COAST.

KAIPONG ISLANDS-HONG KONG APPROACH.

Fog signals at Gap rock light-house.

With reference to Notice to Mariners, No. 64, dated 20th March 1892, issued by this office, the British Admiralty has given further notice (No. 107 of 1893) that a fog signal has been established at Gap rock (Man mi Chau) light-house, the south-west of the Kaipong islands, and in the approach to Hong-Kong from the southward :-

Gap rock fog signal is an explosive signal, which during thick or foggy weather will give a report similar to a gun every ten minutes.

Approximate position, lat. 21° 48′ 50″ N., long. 118° 56′ 20″ E.

EATON W. PETLEY, Port Officer of Calcutta.

Published for general information.

K. H. STEPHEN, Under-Secretary, Marine Department.

H. J. S. Cotton, Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,-(OPIUM).

NOTIFICATION .- No. 1812-O.

The 14th April, 1893.—Mr. A. B. Keunedy, Assistant Sub-Deputy Opium Agent, who was granted furlough for seven months under the orders contained in the Notification, No. 101-O., dated the 9th January, 1893, reported his departure from India per S.S. Khedive on the forenoon of the 23rd March, 1893.

H. H. RISLEY, Secy. to the Govt. of Bengal.

NOTIFICATION-No. 1855L.R.

The 17th April 1893 — Under section 101 (2)(a) of the Bengal Tenancy Act VIII of 1885, the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect of all lands comprised in kills Darpan in the district of Cuttack.

The particulars to be recorded in the survey and record of rights shall be the following :-

(a) The name of each tenant.

- (b) The class to which he belongs, viz. whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat, or under-raiyat; and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.
- (c) The situation, quantity, and boundaries of the land held by him.

(d) The name of his landlord.

(e) The rent payable.

- (f) The mode in which the rent has been fixed, whether by contract, by order of a court, or otherwise.
- (g) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.

(h) The special conditions and incidents, if any, of the tenancy.

(i) The situation, quantity, and boundaries of the proprietor's private lands.

H. H. RIBLEY, Secy. to the Govt. of Bengal.

NOTIFICATION-No. 1856L.R.

The 17th April 1893.—Under section 3 of the Bengal Survey Act V (B.C.) of 1875, the Licutenant-Governor is pleased to order that a survey shall be made of all lands in killa Darpan in the district of Cuttack, which are not included in the boundaries specified in the notification dated 14th January 1890, published at page 40, Part I of the Calcutta Gazette of 15th January 1890, and that the boundaries of estates, tenures, mauzas and fields be demarcated on the lands to be surveyed.

H. H. RISLRY, Secy. to the Govt. of Bengal.

NOTIFICATION-No. 1857L.R.

The 17th April 1893.—Under section 3 of the Bengal Survey Act V (B.C.) of 1875, the Lieutenant-Governor is pleased to order that a survey shall be made of all lands in killa Aul in the district of Cuttack, and that the boundaries of estates, tenures, mausas and fields be demarcated on the lands to be surveyed.

H. H. RISLEY, Secy. to the Govt. of Bengal.

NOTIFICATION .- No. 1881L.R.

The 17th April 1893.—Under the powers conferred upon him by section 101, sub-section 2 (a) of the Bengal Tenancy Act VIII of 1885, the Lieutenant-Governor is pleased to order that a survey shall be made and record of rights prepared in respect of the lands in mauza Latuabari, pargama Sultanpratap, in the district of Pabna.

The particulars to be recorded shall be the following:-

(1) The name of each tenant.

- (2) The class to which he belongs, that is to say, whether he is a tenure-holder, raivat holding at fixed rates, occupancy raisat, uon-occupancy raisat or under-raisat, and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.
- (3) The situation, quantity, and boundaries of the land held by him.

(4) The name of his landlord.

(5) The rent payable.

- (6) The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.
- (7) If the rent is gradually increasing rent, the time at which, and the steps by which, it increases.

(8) The special conditions and incidents, if any, of the tenancy.

H. H. RISLEY, Secy. to the Gort. of Bengal.

NOTIFICATION-No. 1882L.R.

> H. J. S. Cotton. Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 17th April 1893.—It is hereby notified for general information that the Lieutenant-Governor sanctions the abolition of the sub-divisions of Dum-Dum and Barrackpore, in the district of the 24-Parganas, and the amalgamation of their jurisdiction (subject to the exclusion of the cantonment areas specified below) with that of the Barasat sub-division in that district.

The areas which fall within the limits of the Dum-Dum and Barrackpore cantonments as defined by the notifications, dated the 18th April 1886 and 5th December 1887, published in the Calcutta Gazettees of the 21st April 1886 and 7th December 1887, respectively, will be placed under the jurisdiction of a Cantonment Magistrate, and are nereby excluded from the operation of this notification.

2. These arrangements have effect from the 1st April 1893.

H. J. S. COTTON. Chief Secy. to the Goot. of Bengal.

NOTIFICATION.

The 18th April 1893.—In continuation of the notification, dated the 13th December 1892, published at pages 1111 to 1124 of Part I of the Calcutta Gasette, dated the 14th idem, it is hereby notified that persons committing any offence against the Indian Railways Act, or any rule thereunder, at the Mahwal station on the Tirhut State Railway, in the district of Champaran, will be tried at Motihari.

H. J. S. Cotton, Chief Secy. to the Govt. of Bengal.

NOTIFICATION.

The 18th April 1893.—It is hereby notified for general information that the head-quarters of the Haridaspur Sub-Registry Office in the district of Faridpur having been removed from Haridaspur to Gopalganj, the Sub-Registry Office will henceforth be designated the Gopalganj Sub-Registry Office instead of the Haridaspur Sub-Registry Office.

H. J. S. COTTON, Chief Secy. to the Goot. of Bengal.

NOTIFICATION.

The 18th April 1893.—With refere nce to the Government Notification, dated the 28th-June 1892, published in Part I, page 676 of the Calcutta Gazette of the 29th idem, sanctioning the abolition of the Lalbagh sub-division, in the Murshidabad district, and consequent alterations in the sub-divisional jurisdictions of the district, it is hereby notified for general information that, under clause 2, section 5 of the Indian Registration Act III of 1877, the Lieutenant-Governor sanctions the transfer of thana Kalianganj from the jurisdiction of the Registration sub-district of Baluchar to that of the Registration sub-district of Kandi, and of the independent outpost of Sagardighi from the jurisdiction of the Registration sub-district. The Registration sub-district of Baluchar will henceforth be restricted to thanas Bhagwangola, Shahanagar, Manullabazar and Asanpore. This notification will take effect on and from the 1st May 1898.

H. J. S. COTTON, Chief Secy. to the Govt. of Bengal.

[Second Publication.] NOTIFICATION.

The 7th April 1893.—It is hereby notified for general information that the Local Government, in pursuance of the power conferred by section 34 of Act V of 1861 (an Act for the Regulation of Police), has extended the said section to the town of Chanduria in the district of Khulna.

H. J. S. COTTON, Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT, -BENGAL.

ESTABLISHMENT.

The 17th April 1893.

No. 107.—Mr. J. H. Toogood, Executive Engineer, 1st Calcutta Division, is granted privilege leave for three months, with effect from the 4th May 1893, or such subsequent date as he may avail himself of it.

No. 103.—Mr. M. H. Jackson, Executive Engineer, is appointed to hold charge of the 1st Calcutta Division, during the absence, on leave, of Mr. J. H. Toogood, or until further

orders.

RAILWAY.

The 18th April 1893.

No. 118.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for sanitary reason in the village of Bahadurpur, pargana Saraisa, district Darbhanga, it is hereby declared that for the above purpose a piece of land measuring, more or less,

eight bighas of standard measurement, bounded on the east by Mr. Cooney's bungalow; on the west by Rakhal Babu's house; on the north by Railway line; and on the south by Bhograj's house, is required within the aforesaid village of Bahadurpur, pargana Saraisa, zilla Darbhanga.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom

it may concern.

No. 114,—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the Tippera Section of the Assam-Bengal Railway, commencing from the river Megna at Chandpur vid Laksam up to village Champaknagar, it is hereby declared that for the above purpose a strip of land about 49 miles in length, varying in width from 200 to 400 feet, measuring, more or less, 2,000 acres, and passing through the undermentioned villages in the district of Tippera, is required.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern, and is in substitution of this Department declaration No. 841, dated the 6th December 1892, which was published at page 1083, Part I of the Calcutta Gasette of

the 7th idem :-

Villages.

Chandpur, Satani, Pachani, Satani, Tarpurchandi, Mirzapur, Maisadi, Hamankardi, Sahatali, Lodergaon, Char Bakila, Debpur, Maheshpur, Urchanga, Balakhal, Dherra, Rajapur, Enaetpur, Hatila, Kajeergaon, Matain, Shoodhooiab, Kharra, Shooidpur, Bettyapara, Satbaria, Bakila, Makimabad, Hajiganj, Taraghar, Kangaish, Rara, Bhingra, Uttar Sahapur, Ghugusal, Barailia, Anandapur, Ankilia, Baserie, l'anstokie, Chitashi, Lakhmipur, Hulura, Kakaia, Salipur, Bathakhali, Parchimgaor, Laksam, Paikpara, Dooabooa, Bainchatia, Paterpara, Uchapadua, Daulatpur, Buranpur, Chandak, Bagmara Hat, Saidpur, Tulatali, Durgapur, Sutolee, Champaknagar.

LOCAL COMMUNICATIONS. The 18th April 1893.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all

whom it may concern.

C. W. ODLING. Secy. to the Govt, of Bengal.

[Third Publication.] IRRIGATION.

The 4th April 1893.

No. 100.—Notification.—Notice is hereby given that the Lieutenant-Governor of Bengal proposes, under the provisions of section 6 of Act II (B.C.) of 1882, to declare that clause (b) of section 76 of that Act shall take effect over a tract of country on each side of the Ganges between Rampur Bealia and a point on the river opposite the village of Dharmpur and extending inland for two miles on either side of the river Ganges between these points, in the districts of Rajshahi, Pabna, Nadia and Murshidabad. The erection of any new embankment or any addition to an existing embankment, or the obstruction or diverson of any water-course within the tract above defined, without the previous permission of the Collector or Collectors concerned, is prohibited.

> C. W. ODLING, Secy. to the Govt. of Bengal.

[Fifth Publication.]

DEAFT REVISED WATER-RATE RULES FOR THE MIDNAPORE CANAL.

The 20th March 1893.

No. 75.—Notification.—In exercise of the powers conferred on him by sections 99 and 78 of Act 111 (B.C.) of 1876, the Hon'ble the Lieutenant-Governor proposes to make the following rules and to fix the undermentioned rates to be charged for water supplied from the Midnapore Canal. These rules and rates will supersede those now in force.

C. W. ODLING, Secretary to the Govt, of Bengal.

1. The Divisional Canal Officer is responsible for maintaining the canal in an efficient state of repair, for providing drainage channels where necessary, and generally for all engineering work involved in its management, as well as for the distribution of water to lessees. The word "canal" is here used as defined in section 3 of the Act.

2. The Deputy Collector is responsible for the assessment and collection of water-rates

accruing to Government from the canal.

3. Water shall not be distributed otherwise than on the application of a lessee, or to a person in whose favour a provisional license under rule 15 has been issued. Such application may be made verbally or in writing to any subordinate in charge of that part of the canal from which water is required.

4. If any lessee apply for water to the Deputy Collector or one of his subordinates verbally, he shall be directed to address himself to an irrigation officer or subordinate. If he makes such an application in writing, his petition shall be forwarded direct by the zilladar, to whom it is addressed, to the Sub-divisional Canal Officer in charge of that part of the canal

from which the petitioner's village is supplied.

5. The Divisional Canal Officer shall map out the irrigable area into blocks in accordance with the natural features of the ground, and so determine that the whole block shall be irrigable from one outlet, or from one set of outlets. So far as may be practicable, the blocks shall be separated by drainage lines.

6. Each block determined as above shall be numbered and recorded with its irrigable area in registers to be maintained by the Divisional Canal Officers and Deputy Collector. The blocks shall also be marked on maps to be maintained by the same officers.

7. Leases for not more than five years may be granted for the whole irrigable area of a block, or, subject to the provisions of Rule 13, for definite parts of a block, under the following conditions:

I.—Ordinarily the whole irrigable area of any village, so far as situated within the block, must be included in the lease.

II —All leases within one block shall be granted, so that they shall expire on the same date.

III.—In order to equalise the areas to be dealt with in each year, the date of expiry of the leases in each block shall be determined by the Divisional Canal Officer in consultation with the Deputy Collector, so that, as far as practicable, one-fifth of the total area usually irrigated may fall out of lease in each year.

- 1V. No permit shall be granted, when the supply of water must of necessity be delivered across an unleased area, unless a village-channel exists, which, in the opinion of the Sub-divisional Canal Officer, will deliver water without waste across the unleased area.
- The rates to be charged for water supplied between June and November, whether by flow or lift, to lessees on application shall be-

For a term of five years—Re. 1-8 per acre for each season.

For one year or for water supplied on a provisional license for which a permit for a term

of years is not subsequently issued, Rs. 3 per acre.

- Provided that the leases, whether new or rerewals, required for shorter terms than five years in order to develope the system of blocks as explained above, shall be charged Re. 1-8 per acre only. Otherwise, in addition to the rate of Re. 1-8 mentioned above, an extra rate of 12 and as per acre shall in the first year only be charged on leases for less than five and more than one year.
- For the supply of water, when available, for winter crops, a rate of Rs. 2-8 per acre per season shall be charged.

10. For the unauthorized use of canal water a rate of Rs. 5 per acre, or such less rate

as may be sanctioned by the Deputy Collector, shall be charged.

11. Application for water-leases under section 74 of the Act shall be presented to the zilladar of the division in which the applicant's land lies.

12. Every application for a water-lease shall contain the following particulars:--

Name and residence of applicant.

- 2.—Name of pargana, mahal and yillage in which the land to be irrigated is situated.

 3.—Total area for the irrigation of which the application is made and its boundaries, and if the lands to be irrigated lie in separate chake, the name of each chak.
- 4.—Names of the raiyats whose lands are to be irrigated, and the quantity of land held by each.
- 5.—Name of the canal and number of distributary from which water is required.

6.—Signatures of the applicants.

A separate application must be presented for lands in each village, but tehsilalaida or other lands lying within the village boundary at the time of survey may be included.

14. Before a permit for a term of years is granted, the written consent of the Divisional Canal Officer shall be obtained, but permits for one year only and provisional licenses may be issued with the written assent of the Sub-divisional Canal Officer. The Deputy Collector shall on the day of issue forward a copy of all permits granted to the Divisional Canal Officer.

15. When a water-lease is granted, a kabuliyat shall be taken in a form approved by Government, and a "permit" shall be given to the lessee or lessees in a form similar to that prescribed in Schedule C of the Act. Pending the completion of a lease, the zilladar may issue a provisional license for the supply of water to an area covered by an application.

16. On the issue of a permit or provisional license, the zilladar shall forward to the Suh-divisional Canal Officer direct a requisition requesting him to supply water to the lessee on application. This requisition shall be kept by the Canal Officer till January 1st next following, and shall then be returned to the Deputy Collector. On the back should be noted the several dates on which the village was supplied with water. A fresh requisition shall be issued on or before June 1st, and returned on or before January 1st, each year, till the lease expires.

When it comes to the knowledge of the Sub-divisional Canal Officer that canal 17. water has been taken without authority, he shall hold a local investigation and transmit the record thereof to the Deputy Collector. Separate proceedings shall be taken in the case of

each village irrigated without authority.

18. On receipt of the record mentioned in Rule 17, and after hearing any objection which may be raised, the Deputy Collector shall determine whether water-rates can be legally charged, and if so, he shall proceed to assess, at the rate provided in rule 10, the

land irrigated without authority.

19. The statements of the amounts demandable for water-rates leviable under the rules in force shall be prepared under the supervision and signature of the Deputy Collector in such form as shall from time to time be sanctioned by the Lieutenant-Governor. Persons charged under rule 10 or 18 shall be served, by post or otherwise, with a statement showing the amounts charged to enable them to lodge an appeal to the Collector under section 91 of the Act if they desire to do so.

Should it be proved, after due enquiry, that the supply of water given to any leased area is habitually wasted, or used for the irrigation of lands not under lease, it shall be competent for the Superintending Canal Officer, with the concurrence of the Collector, to direct that the lease shall be cancelled with effect from the lat of June next following.

The rates for water supplied from June to November shall in each season fall due on the 1st January following, but the Deputy Collector may require one-half of the rates due on applications filed after the 1st of September to be paid in advance, and may refuse to issue a permit for more than one year. The rates for water supplied for winter crops shall fall due on the 1st April following.

22. Water-rates imposed under rule 10 or 18 shall fall due as soon as the assessment

is made, and shall be realized at once.

The Superintending Canal Officer may, with the concurrence of the Collector, direct 23.

the Deputy Collector to -

I.—Cease to issue permits for the irrigation of lands in villages where there have been constant difficulties in realizing water-rates until all the arrears of water-rates due are paid up, and also, if specially so ordered, unless half the amount due under new applications is paid in advance. An order under this rule shall be in force for the time stated therein, which shall not exceed three years.

II.--Cancel any five years lease if on the 1st of June of any year water-rates to the

extent of half the demand for one year are in arrears.

Remission of water-rates, either in whole or part, as the case may require, shall be granted by the Deputy Collector for-

I.—Errors in the assessment of rates.

II.—Injury to the crop on a leased area caused by deficient supply of water.

Provided a written application for remission has been made 15 days at least before the crop is cut.

In regard to applications under II, the written opinion of the Divisional Canal Officer

shall be obtained and form part of the record of the case.

25. The Deputy Collector, with the written consent of the Divisional Canal Officer. may grant remissions of water-rates, either in whole or part, for injury to the crops on leased areas caused by excess of water due to deficient drainage.

26. The Deputy Collector may, with the written assent of the Divisional Canal Officer, commute rates charged under rules 10 and 18 to those chargeable for water supplied on application, provided that a lease either for a term of years or for the season has been subsequently executed for the lands in question.

27. Remissions on other grounds than the above require the sanction of Government.

28. In cases where sums due on account of water-rates cannot be collected owing to the death, bankruptcy, or absconding of the defaulter, the amount which is non-realizable may be written off as irrecoverable on the authority of the Collector.

Before awarding componsation under section 16 of the Act, or making a reference under section 17 of the Act, the Collector shall obtain the written opinion of the Superintending Canal Officer, and his written opinion shall form part of the record of the proceedings.

30. The Deputy (ellector may distribute amongst village mookhyas, who give efficient assistance in collecting water-rates, and generally in his operations under Act III (B.C.) of 1876, a commission calculated in such manner as he may think fit, provided the total amount paid shall not exceed 6 pies in the rupee on the total water-rates collected during the year.

		Total	•••	600	400

Minimum required in all papers collectively.

The marks gained by candidates who fail will not be published.

⁽a) Todhunter's Mensuration for Beginners.
(b) "Book-keeping," by Ball and Hamilton.
"Book-keeping" by double and single entry, by W. Inglis (Chambers' Educational

^{1.} The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burmah only.

Candidates will not be examined in any of the Calcutta offices.

2. Candidates not in Government employ, who wish to be examined at the College, must forward their applications direct to the Principal; those employed in Government offices through the head of their office, who will forward the application to the Principal.

All applications must reach the Principal 30 days before the date of examination.

3. The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must be forwarded by the candidate not direct to the Principal but the conduct the Examiner. must be forwarded by the candidate, not direct to the Principal, but through the Examiner.

4. All applications must be accompanied by a fee of Rs. 10 and the following

certificates.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch, but none will be returned :-

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)
(2) Certificate that candidate is under 25 years of age not required if candidate is in

permanent Government employ, or an employé under District Boards.

(3) Certificate that the application is in candidate's handwriting.

It will rest with the Principal of the College, on a consideration of these certificates, to decide whether the candidate should be registered for the examination, or whether his application should be rejected.

5. Copies of examination papers are not procurable except those that are issued for

examination. These need not be returned.

6. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish a fresh fee and certificates.

7. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the Province or Railway under whom they may desire to be employed.

8. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

NOTICE is hereby given that the undermentioned plot of land no longer required by Government, situated along the Tirhut State Railway, in the district of Monghyr, will be put up to sale at 12 o'clock noon on Wednesday, the 26th April 1893, corresponding with the 25th Bysakh 1300 Fusli, at Begamsarai Station, Tirhut State Railway

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway fencing, or plough the land closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the 16th day after the sale, reckning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sales.

the sales.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly perts, published as soon as possible after the first of each month at Calcutta, Madras Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cuses heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as tollows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance. For the complete series, including postage, Rs. 22-8.

Without With postage. pustage. Rs. A. P. Ra. A. P. For the Calcutta Series 10 0 0 2 8 0 ,, each of the Madras, Bombay, and Allahabad Series 6 0 0 7 0 0 ••• a part of the Calcutta Series pur-chased separately (inclusive of postage in India) ... 2 0 .0 ,, a part of each of the Madras Bombay, and Aliahabad Series purchased separately (inclusive of postage in Ind.a) ...

LANGUAGE AND CHARACTER TO BE USED IN COURTS AND OFFICES IN BIHAR.

GENERAL DEPARTMENT-MISCELLANEOUS No. 1178.

. Calcutta, the 24th March 1893.

RESOLUTION.

READ AGAIN-

This Government's Resolution No. 1079, dated the 12th April 1892, regarding the language and character to be used in the Courts and Offices in Bihar.

Read also the following letters on the same subject:-

Letter from the Secretary to the Bihar Landholders' Association, No. 3, dated the 25th May 1892, and its enclosure.

Letter from the Honorary Secretary to the Central National Muhammadan Associa-

tion, No. 216, dated the 13th June 1892.

Letter from the Honorary Secretary to the Bhagalpur Landholders' Association,
No. 6, dated the 13th June 1892.

Letter from the Secretary, British Indian Association, dated the 6th July 1892. Letter from the Commissioner of the Bhagalpur Division, No. 1196J., dated the 30th June 1892.

Letter from the Commissioner of the Patna Division, No. 634G., dated the 11th August 1892, and its enclosure.

Letter from the Registrar of the High Court, Calcutta, No. 2276, dated the 27th August 1892.

Letter from the Secretary to the Board of Revenue, Lower Provinces, No. 858A. dated the 22nd September 1892, and its enclosure.

Letter from the Secretary to the Board of Revenue, No. 823B., dated the 24th October 1892, and its enclosure.

Letters Nos. 311-313T.G., dated 26th October 1892, and 118-123, dated 14th January 1893, to the District and Sessions Judges in the Patna and Bhagalpur Divisions, and the Judicial Commissioner of Chota Nagpur, and their replies.

Letters Nos. 314-316T.G., dated 26th October 1892, to the Commissioners of Patna, Bhagalpur, and Chota Nagpur, and their replies.

In the Resolution cited in the preamble, the Lieutenant-Governor discussed the merits of the several proposals submitted to Government on the subject of the language and character to be used in Bihar, and arrived at the conclusion that Kaithi, as the character in use in the Courts, is slow in writing and illegible when written, and that Government might properly substitute the Roman character for Kaithi as far as registers and records are concerned, but that such documents as summonses and proclamations, &c., which are issued to the public, should be in Kaithi. Before, however, passing final orders on the point, the several officers and associations named in the preamble were requested to favour His Honour with an expression of their views on the following questions:—

(1) Whether the Roman character can be substituted for Kaithi in all registers and office records, or whether any exception should be made?

(2) What papers, other than summonses and proclamations, are required

by the public to be in the Kaithi character?

(3) Whether, when the depositions of witnesses are not recorded by the presiding officer himself in English, it is desirable that they should be recorded in the Kaithi, the Roman, or the Persian character.

- 2. After consideration of the replies received from the officers and associations consulted, the Lieutenant-Governor has decided that there should be no change in regard to the use of the Hindi language in Bihar, and no resumption of the use of the Persian character, and that the following orders on the points above referred to may properly be issued:—
- (1) The headings of all registers kept up in the Courts and Offices in Bihar are to be bi-lingual, in English and in Roman-Hindi. Entries of words in those registers and in all other office records are to be in English, if the clerk knows English, and in Hindi words and Roman character if he does not know English. If any clerk in charge of a register does not know the English (Roman) character, and is unable to learn it by the time the new registers are issued from the Stationery Office, he will be allowed to prepare a flap for his own use, writen in Nagri, and to paste it on to the register. He will also be allowed to make verbal entries in Nagri. In future no clerks are to be appointed who do not know English. Figures are invariably to be written in English (i.e., Arabic) numerals.

(2)(a) All summonses, proclamations, notices, notifications, &c., and in fact all original documents (i.e., not copies) issuing direct from the Courts and Offices to the public, and not passing through the hands of revenue agents or mukhtars, are to be in the Nagri character, whether printed or written, or

partly printed and partly written.

(b) Copies issuing from the Courts and Offices must necessarily be written in the character as well as in the language of the original documents of which

they are copies.

(c) Plaints, mukhtarnamas, petitions, &c., addressed to the Courts and Offices may be presented by an applicant or complainant in holograph, i.e., written entirely by himself in any language which he best understands; but, if presented through a revenue agent or mukhtar, they are to be written in the Nagri character, as Hindi is the language of the Courts.

(3) When the presiding officer in Revenue and Criminal Courts does not record depositions in English, he is to record them in whichever character he knows best—Nagri or Persian—the former rather than the latter if he knows

both.

3. It will be observed that, in accordance with the views expressed by the British Indian Association and others, it has been decided to adopt the Nagri character instead of Kaithi, as being more easily written and more legible than Kaithi. Printed Nagri is legible to every one who can read printed Kaithi.

. So far as the Civil Courts are concerned, these orders are to apply to

all documents except depositions.

5. These orders will entail considerable alterations in the forms now in use, but before substituting the revised forms the old stock of forms should first be exhausted.

By order of the Lieutenant-Governor of Bengal,
H. H. RISLEY,
Secretary to the Government of Bengal.

IRRIGATION OPERATIONS FOR KHARIF, 1892-93.

No. 484I.

GOVERNMENT OF BENGAL-PUBLIC WORKS DEPARTMENT.

Irrigation.

Dated Caloutta, the 18th April 1893.

RESOLUTION.

READ-

Statements Nos. I, II and III of Irrigation Operations of Canals in Bengal during the kharif season of 1892-93.

Observations.—The area irrigated during the kharif season of 1892-93, was 597,985 acres, against 552,282 acres, showing an increase of 8.2 per cent., the increase taking place mainly on the Eden Canal, which has supplied an unusually large area of land in the districts of Burdwan and Hooghly with water.

2. The rainfall on the Orissa and Midnapore Canals was less, and that on the Sone and Saran Canals was more than last year.

3. The increase or decrease in the irrigation from each canal is given in the following statement:—

	KHARIF S	eason.		_
Canals.	1891-92.	1892-93.	More.	Less.
	Acres.	Acres.	Acres.	Acres.
CTaldunda	41,570	34,379		7,191
Orissa Kendrapara	70,686	67,008		3,678
High Level, Ranges I, II and III.	61,486	55,783		5,703
Midnapore Canal	83,905	88,008	4,103	*****
Eden ,,	14,069	77,203	63,134	*****
Patna	75,037	67,351		7,686
Sone Arrah	1,29,691	1,23,002	•••••	6,689
Buxar	72,413	83,820	11,407	•••••
Saran Canal	3,425	1,431		1,994
Total	5,52,282	5,97,985	78,644	32,941

On the Midnapore, Saran, and Eden Canals the only kharif crop irrigated is rice, whilst on the Orissa and Sone Canals there are, in addition, sugarcane and hot-weather crops.

Ordered that a copy of this Resolution and of the statements Nos. I, II, and III, be submitted to the Government of India, Public Works Department, for information.

Order also that copies of this Resolution and of the statements be forwarded to the Commissioners of the Orissa, Burdwan and the Patna Divisions; the Collectors of Cuttack, Midnapore, Patna, Shahabad, Gaya and Saran; the Superintending Engineers, Orissa, South-Western and Sone Circles; and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING, Secretary to the Government of Bengal.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are anticg, the corresponding spaces in the total rainful columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least land to the column of rainy days, the definition of a rainy day is when at least CALCUTTA, the 18th April 1898.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 15th OF APRIL 1893.

At the close of the previous week weather conditions were fairly settled in Bengal, except for the fact that an area of low pressure was passing apparently through the hills except for the fact that an area of low pressure was passing apparently through the hills to the north of the province, and also for the fact that an area of relatively low pressure existed over the Gangetic plain, the centre of the low pressure being represented by such stations as Lucknow, Allahabad, Sutna, and Nowgong. The low pressure passing through the hills caused a series of severe local storms on the Saturday evening, and Dhubri, Kurseong, Darjiling, Gnatong, etc., reported severe storms with hail and rain. The changes which occurred on Sunday the 9th were generally small, and pressure was rising moderately to slowly at all except a few western and south-western stations. The latter fact was severed by the drifting of the low pressure area in an easterly direction and its centre. caused by the drifting of the low pressure area in an easterly direction, and its centre was on this day near Hazaribagh. Hence with the advance of the depression over the western districts of Bengal, conditions became decidedly disturbed. A very rapid increase of pressure took place on the 10th, but still pressure remained relatively low over South-West and West Bengal, and the disturbed conditions thus continued, and on those two days numerous local storms with rain occurred in South-West, North and East Bengal, which rainfall was reported on the mornings of the 10th and 11th. Pressure continued to rise over a considerable part of the province on the 11th, and the area of low pressure quite disappeared or had perhaps drifted over Burma, and weather again became fine in Bengal, and from the 11th to the close of the week ordinary hot season conditions obtained, and no rain fell except on the 14th and 15th in and near the hills, where a few showers were reported. During this period pressure fell on the 12th, 13th, 14th and 15th, and from being moderately in excess of the normal at the beginning of the week, it had become in slight to moderate defect at its close, the defect ranging up to a twentieth of an inch at Gaya and Dehri, though slight excess pressures were still reported in North-East Bengal. In the case of temperature also there has been a general increase during the week, and on the 15th about half the stations reported temperatures in excess of the normal and the Winds also almost throughout the week have varied from southother half slight defects westerly at the western and south-western stations, though south-easterly at the eastern stations, to easterly in the north of the province. Indeed the conditions generally during the week have been of ordinary hot weather character, and the changes which have occurred have been to make these conditions more proncunced.

Pressure.—Owing to the excessive pressure in the earlier part of the week the mean pressure has been largely in excess of the normal. This excess varies usually from 0.07° to about 0.12°, and is largest in the north-east of the province, where it averages about 0.13°,

and smallest at Hazaribagh and Ranchi, where it equals 0.05".

Temperature.—The mean temperature of the province for the week has again been below the normal, the defect averaging 1.6°, while defects of from 2° to 3° are recorded in Orissa, South-West, North and East Bengal. The distribution of temperature for the week and its variation from the normal value are best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the period. It will be seen, as in previous weeks, that the principal defects from the normal have occurred in the maximum or day temperatures:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 15th April 1893.

		Normal mean maximum temperature for the week and in a 15th April.	Actual mean maximum tem- perature for the week end- ing 18th April 1898.	Variation of actual mean from the normal,	Normal mean minimum tem- perature for the week end- ing 18th April.	Actual mean minimum tem- perature for the week end- ing 1812 April 1893. Rainfall.—The rainfall during the week has not been large. It has averaged about half an inch in South-West, North and East Rengal, but in the other districts the falls have been so small that they are quite unimportant. The falls in South-West and North Bengal are indeed a little above the normal value for the period, but elsewhere the falls have been in defect.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 15th of April 1893:—

•			Taup	BRATT	mn.		RAINFALL.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph

and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the shermometers are verified, and the readings have been corrected to a standard constructed and verified at the Chevratory.

They are exposed under a thatched shed open at the sides, and are suspended four feet that the sides is the sides of the sides. shove the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 85, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in

the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

t, thunder; <, lightning; a, dew.

EASTERN ARCHIPELAGO-Borneo, North-West COA'T-BRUNI RIVER APPROACH. Light on Brooketon Hill.

THE following Notice to Mariners, issued by the Vice-Admiral Commanding the Naval Forces in Neth. India, No. 8, dated Batavia, the 10th March 1893, is republished for general information :-

Information has been received from H. B. M. Acting Consul at "Labuan" that on 18th October 1892 a fixed white beacon light was exhibited on Brooketon Hill, west side of approach to Bruni river. The distance that his light is visible is doubtful. It is situated $2\frac{1}{10}$ miles S. & E. from Pelong rocks, in approx. lat. 5° 2' N., long. 115° 8' E.

A similar light is said to exist on Barram point, of which no definite information has

been received.

Approx. position of Barram point: lat. 4° 37' N., long. 113° 59' E. Variation 2° Easterly.

AUSTRALIA—BRISBANE RIVER.

Restoration of buoys and beacons.

THE Portmaster, Brisbane, has given notice (No. 13 of 1893) that all the aids to navigation in the Brisbane river which were removed or destroyed by the recent floods have now been restored, with the following modifications:-

The leading beacons for the Hamilton Reach Channel now lead close to the northern edge of the dredged channel marking the deepest water.

The Eagle Farm Flats leading beacons will be shifted today 150 feet east of their former position.

The magnetic bearings of the beacons in the above cuttings are unaltered.

The old iron West Beacon marking the turn between the Inner and Outer Bar leads will be replaced by a red triangular beacon on or about the 8th instant.

Mariners are advised that the deepest water in the Outer Bar is on the eastern side of the cutting.

NOTICE TO MARINERS-No. 93.

[First Publication.]

AUSTRALIA-TASMANIA, WEST COAST

Macquarie harbour-Signals from staff on west side of entrance.

THE British Admiralty has given notice (No. 130 of 1893) that a signal staff has been erected on the bluff at the west side of the entrance to Macquarie harbour, from which the following signals are made by day:

Two balls at the masthead signify: flood tide. One ball at the masthead signifies:—ebb tide.

A square flag at the eastern yard-arm signifies :-- alter course to the eastward.

4. A square flag at the western yard-arm signifies:—alter course to the westward. Approximate position on plan No. 1629: lat. 42° 11′ 45″ S., long. 145° 13′ 15″ E. Note—Sailing vessels, inward bound, should not attempt to cross the bar, on the ebb

tide, without a strong commanding breeze.

In fine weather the pilot boards vessels outside the bar, but in bad weather, when the pilot cannot cross the bar, vessels should steer in with the lighthouses on Entrance island and Bushy islet in line. If the vessel is steering a safe course no flags will be shown at the signal staff, but if necessary signal (3) or signal (4) will be hoisted. When the direction of the ship's head is sufficiently altered the flag will be hauled down.

When practicable the pilot will direct the vessel's course by flags from a boat. In this case vessels should steer direct for the boat, altering course if necessary towards the side of

the boat on which a flag is shown.

No stanger should attempt to enter Macquarie harbour at night unless on a lee shore and unable to keep outside.

(2) Prohibited anchorage near telegraph cable.

Also that a submarine telegraph cable has been laid across Macquarie harbour entrance in the vicinity of Bushy island:-

The position of the cable is marked by a diamond shaped black beacon on the northern shore and by a diamond shaped white beacon on the southern shore.

Vessels are prohibited from anchoring in the vicinity of the cable; and it is advisable that they should not anchor in the space enclosed between lines drawn from Wellington head and Bushy (Bonnet) island to the black telegraph beacon on the northern shore.

CHINA-WUSUNG RIVER.

Changes in depths on inner bar.

The British Admiralty has given notice (No. 132 of 1893) that information has been received that very considerable changes are taking place in the depths on the Inner bar, Wusung river :-

Mariners are therefore warned that Admiralty plan, Wusung river, with enlarged plan of entrance, No. 1601, cannot be implicitly relied on; and that it is necessary either to take a pilot, or obtain information as to the condition of the bar from the Custom signal station before attempting to cross it.

[First Publication.]

AUSTRALIA-BURNETT RIVER.

Restoration of buoys and beacons.

THE Portmaster, Brisbane, has given notice (No. 15 of 1893) that the channel from the bar to Bundaberg has been buoyed and marked in accordance with the alterations caused by the recent floods.

The beacons leading across the bar bear S. W. by W. 1 W. (magnetic), and the least

depth on that line is 4 feet 6 inches at low water springs.

An alteration has been made in the lead up stream from Fairymead wharf; the triangular beacons there (lighted at night) now lead over to a square white beacon near Rubyana wharf.

The minimum depth in No. 1 cutting is 8 feet 3 inches at low water springs, and a gauge showing the depth in this channel has been erected at Rubyana wharf.

AUSTRALIA-BRISBANE RIVER.

Alterations in depths of Dredged Channels.

WITH reference to Notice to Mariners, No. 69, dated 20th March 1898, issued by this office, the Portmaster, Brisbane, has given further notice (No. 8 of 1893) that as a result of the last flood in the Brisbane River, additional changes have taken place in the Dredged Channels, the net depths at Low-water Springs being now as follow:-

0.4 5	ft.	ins.
Outer Bar	8	6
Inner Bar	15	ŏ
Pelican Bank	12	Ō
Lytton Rocks	13	ŏ
Above Lytton	15	0
Eagle Farm Flats	6.	0
Quarries Reach	10	0
Hamilton Reach	7	6

In the Outer Bar Cutting, the shallowest water extends for a distance of about three

cables, and for a half to three-quarters of a mile the depth is from 10 to 13 feet.

In the Pelican Bank Cutting, the shallowest water extends for a distance of about three

cables, and in the Eagle Farm Flats Cutting, for about a cable.

The Quarries Cutting, has silted up evenly, and in the Hamilton Reach there are a series

of shallow ridges throughout the whole cutting.

A detailed examination of all the cuttings is now being made, and if deeper water is discovered outside the recognised channels, due notice will be given.

* Passed in Drawing,

W. GRIFFITHS,
Offg. Registrar.

Senate House,

The 24th April 1893.

The Yearly Examination of Candidates for Fourth grade Accountants.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, 5th and 6th June 1893, at 10-30 A.M.

SUBJECTS.

	Fu	l marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity)	•••	100	50
Dictation (spelling, punctuation, &c.)		100	.50
Arithmetic (whole course)	100	240	160
Mensuration (a) (whole book)		60	30
Book-keeping (b) (Mercantile)	••	100	50
2	Total	600	400

Minimum required in all papers collectively.

(a) Todhunter's Mensuration for Beginners.
(b) "Book keeping," by Ball and Hamilton.
"Took-keeping" by double and single entry, by W. Inglis (Chambers' Educational Course).

The marks gained by condidates who fail will not be published.

The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted either at the College or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam and Burmah only.

Candidates will not be examined in any of the Calcutta offices.

2. Candidates not in Government employ, who wish to be examined at the College, must forward their applications direct to the Principal; those employed in Government offices through the head of their office, who will forward the application to the Principal.

All applications must reach the Principal 30 days before the date of examination.

The candidate should apply to an Examiner of Public Works Accounts not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must be forwarded by the candidate, not direct to the Principal, but through the Examiner.

4. All applications must be accompanied by a fee of R. 10 and the following

certificates.

Certificates may be submitted in original, or true copies attested by an officer of the

Engineer or Accounts Branch, but none will be returned :-

- (1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application.)
- (2) Certificate that candidate is under 25 years of age not required if candidate is in permanent Government employ, or an employé under District Boards.

(3) Certificate that the application is in candidate's handwriting.

It will rest with the Principal of the College, on a consideration of these certificates, to decide whether the candidate should be registered for the examination, or whether his application should be rejected.

5. Copies of examination papers are not procurable except those that are issued for

examination. These need not be returned.

6. Each examination is complete in itself. A candidate who has failed in an examination, and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish a fresh fee and certificates.

7. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts in the Province or Railway under whom they may desire to be employed.

8. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

J. S. SLATER, Principal, Civil Enginering College.

SIBPUR, the 3rd April 1893.

TREASURY NOTICES.

UNCOVENANTED DEPUTY COLLECTOR BABU ATUL CHANDRA CHATTERJEE has been placed in charge of the Burdwan Treasury and authorized to draw bills on other treasuries.

A. POWER, Commissioner.

BABU GAGAN CHANDRA DAS, Deputy Collector, has been placed in charge of the Mymensingh Treasury from 11th April 1893, and is authorized to draw bills on other treasuries.

H. L. Johnson, Commissioner.

UNCOVENANTED DEPUTY COLLECTOR MAULVI SYED KARAM HOSSEIN has been placed in charge of the Champeran Treasury, and is authorized to draw bills on other treasuries.

A. A. WACE, Addl. Commissioner.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 711B.

Notice is hereby given that the Sixth Sale of Opium, the Provision of 1891-92, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Thursday, the 1st June 1893, at 11 A.M., and will comprise 3,642 chests, viz.—

Opium manufa Ditto	actured at the	e Patna Factory Ghazeepore Factory		•••	1,927 1,715
		\mathbf{T}	otal		3,642

2nd.—The general conditions of the sale now advertized will be the same as usual. They may be ascertained by reference to the Notification issued on the 24th November 1892, and published in the Government and Exchange Gazettes, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 6th and 16th June 1893, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes or other Public Securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room will be received after 3-30 p.m. of Tuesday, the 6th June 1893, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 p.m. of Friday, the 16th June 1893.

4th.—In addition to the quantity above advertized for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazeepore Factories will be brought to sale down to December next about the dates specified below. The Board of Revenue, however, reserve to themselves the right of altering these dates should circumstances render it expedient to do so:—

Dates.	Manufactured at the Patna Fac- tory; about chests	Manufactured at the Ghazeepore Factory; about chests	Total; about chests
On or about Monday, 8rd July 1893 On or about Wednesday, 2nd August On or about Friday, 1st September On or about Thursday, 5th October On or about Wednesday, 1st November On or about Friday, 1st December	1,927 1,927 1,927 1,927 1,927 1,927	1,715 1,715 1,715 1,715 1,715 1,715	3,642 3,642 3,642 3,642 3,642 8,642

The arrears entered in columns 3 and 9 represent the Government revenue, the latest day for payment of which was 25th February 1893. Chittagong Collectorate, the 8th April 1893. F. A. SLACK, Collector.

NOTICE is hereby given that the undermentioned plot of land no longer required by Government, situated along the Tirhut State Railway, in the district of Monghyr, will be put up to sale at 12 o'clock noon on Wednesday, the 26th April 1893, corresponding with the 25th Bysakh 1300 Fusli, at Begamsarai Station, Tirhut State Railway.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway fencing, or plough the land closer than 3 feet from its foundation.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the list day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidders.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sales.

Revised Rules framed by the District Board, Mymensingh, under Section 32 of the Local Self-Government Act III (B. C.) of 1885.

MEETINGS.

1. If the Chairman is temporarily absent from his duties, or if the office of Chairman is temporarily vacant, the duties of the Chairman under these rules shall be performed by the Vice-Chairman, or, in the absence of both Chairman and Vice Chairman, by the President elect under Rule 70 of the general rules.

2. Meetings shall be either ordinary or special.
3. The ordinary meeting of the District Board shall be called once at least every month by a written notice which shall specify the date, hour, the place and the items of business to be transucted at it. The notice shall be circulated among the local members by the District Board peon, and it shall be sent by post to the other members residing outside the town.

4. A special meeting of the District Board may be called at any time by the Chairman by a similar

notice:

Subjects referred to in Rule 65, Part IV of the general rules and in section 29 of the Act, shall be dealt with at special meetings only.

6. All other subjects which come within the province of the District Board may be dealt with at

either ordinary or special meetings.

7. The Chairman shall be bound to call a special meeting on a requisition signed by at least one-fourth of the members. The requisition shall state the business for which the meeting is wanted to be called.

8. In case the Chairman or Vice-Chairman refuse to call a special meeting on such requisition, it may be called by the requisitionists by a notice as aforesaid.

9. Notices of motions accompanied by verbatim dra

- 9. Notices of motions accompanied by verbatim drafts must be sent to the Chairman, or in the case of there being a Secretary, to the Secretary, in time to be included in the list of business for the next meeting. Notices received too late shall be inserted in the list of business of the next succeeding meeting.
- 10. A notice book shall be kept by the Head Clerk of the Board, in which all notices of motions shall be entered. All such notices shall be dated and numbered as received. Such an amount of business should be set down as may be conveniently disposed of in one sitting. 11. An adjourned meeting is not competent to transact any business save that which the original meeting left unfinished.

An adjourned meeting, being merely a continuation of the original meeting, does not require any 12. fresh notice.

13. The meeting shall be held at the office of the District Board or at such place as the Chairman from time to time may determine.

CONDUCT OF PROCEEDINGS AT MEETINGS.

At ordinary meetings the business shall be conducted in the following order:

(a) The minutes of the last ordinary meeting and of any special meeting held since shall be read and if approved shall be signed by the Chairman of such meeting. If the wording of any resolution is decided to be maccurate, the necessary correction shall be made in the minute

(b) Business postponed from the last ordinary meeting shall then be considered.

(c) A progress report of the works shall be laid before the Board.

(d) Letters and reports of Committees shall be read, and accounts and statements shall be considered and passed.

- (c) Motions of which due notice has been given shall be discussed.

 (f) Any matter not in the list of business may be proposed and discussed if the meeting by a majority of votes resolve to do so.
- 15 At a special meeting only the business for which the meeting was called shall be considered; provided that with the consent of the majority of the members present any other business may be considered.
- 16. When, any matter not in the notice is considered in a meeting and a decision recorded or resolution adopted about such matter, a special notice of such decision or resolution should be given to the members absent from that meeting along with the usual notice of the next meeting.
- 17. Unless by permission of the majority of the meeting, all subjects shall be discussed in the order in which they appear in the notice.

OF MOTIONS AND AMENDMENTS.

- 18. Every motion and amendment duly moved must be seconded, and until seconded no debate can take place.
- 19. Every motion and amendment after being reduced to writing under Rule 74 of general rules shall be signed by the proposer and seconder before being put to the vote.
- 20. The President of the meeting may, for reasons to be recorded in writing, and entered in the minutes of the proceedings -

(a) rule that a motion or amendment is illegal or out of order; and

- (b) make such alteration in a motion or amendment as may in his opinion render it legal and in ordef; and may in case (a) refuse to put the motion or amendment to the meeting, and in case (b) refuse to put the motion or amendment to the meeting unless and until the proposer and seconder accept and sign the alterations so made. And the decision of the President shall be final.
- After a motion has been moved and seconded, an amendment may be moved at any stage of the debate thereon.
- 22. After the conclusion of a discussion, if several amendments have been proposed, the President shall put the the last amendment to the vote first; if it is negatived, he shall put the last preceding one; and lastly the first amendment, and if all amendents are lost, the original proposition shall be put to the vote.
- 23. When a motion or an amendment has been put from the Chair, and declared by the President to have been duly carried, no further proposals for amending the motion or the amendment can be entertained.

OF THE RIGHT TO SPEAK.

24. The President may require members to rise when they address the meeting.

- 26. The member who first addresses the meeting shall be entitled to be heard first, and should more than one member rise to address the meeting at the same time, the order of precedence shall be determined by the President.
- 26. Any member shall be at liberty to call the attention of the President to a point of order even when a member is speaking. On a point of order being raised, the member addressing the meeting shall resume his seat until the question has been decided by the President. After the decision of the President, the same point of order cannot be raised again. Except as provided by this rule, no member shall interrupt a speaker in possession of the meeting.
- 27. Except as provided in last preceding rule, no member shall speak except to move or second a motion or amendment or to support or oppose a motion or amendment which has been duly moved and seconded.
- 28. A speaker who has exhausted his right to speak on an original motion may speak on any amendment being moved, as that raises a new question.
- 29. The mover of a motion or amendment shall in all cases have a right of reply, but otherwise no member shall speak more than once on the same motion or amendment unless in explanation of some part of his original speech.

MISCELLANEOUS.

- 30. Unless at least two-thirds of the members of the Board consent by signing a requisition, no subject once finally disposed of can be reconsidered within six months.
- 31. When any business of which notice has not been given is considered at a meeting, the decision recorded or resolution adopted at such meeting shall be of no effect unless it is confirmed at the next succeeding ordinary meeting, or at a special meeting called expressly for the purpose.
- 32. For the purpose of taking into consideration any subject involving many details, the meeting may resolve itself into a Committee of the whole body. When this has been determined on, the rule prohibiting any person from speaking more than once on the same question shall be deemed suspended until the meeting resumes.
- 33. When a motion or amendment is put to the vote, the President shall record against it first the names voting for it and then the names of those voting against it.

 34. Voting by proxy is prohibited, and no member may vote upon any motion or amendment unless he be present in person at the time when it is put to the vote

 35. The minutes shall contain a brief abstract of the discussion preceding each resolution.

OF PROTESTS AND DISSENTS.

- 36. Protests must be limited to a concise and definite statement of the motives which prompted the
- votes of members who voted in the minority on a given question.

 37. Protests must be handed to the Chairman before the conclusion of the meeting at which a resolution protested against was passed.

 38. Protests duly made shall be appended to and published with the minutes.

OF ADJOURNMENTS.

- 39. It shall be competent to any member to move the adjournment of a debate or of the meeting in a speech not exceeding five minutes in duration.
- 40 When a motion for the adjournment of the meeting or of a debate is made, it shall be seconded without a speech, and put by the Chairman to the vote without debate or amendment.

 41. No motion for the adjournment of the meeting or of a debate shall be admissible which proposes
- an adjournment beyond the next ordinary meeting.

- The common seal shall remain in the custody of the Chairman or Vice-Chairman.
- 43. The common seal shall be affixed to the following documents:
 - (a) All deeds of sale or purchase executed by or on behalf of the District Board, and whether relating to moveable or immoveable property.

 - (b) All written contracts entered into by the District Board.
 (c) The minutes of the proceedings of the Board.
 (d) The notices of the meetings of the Board.
 (e) All receipts for money granted under the authority of the Board.
 (f) All notices to the public issued under the Act or the general rules.

DIVISION OF DUTIES

- 44. There shall be three general Committees of the District Board-
 - I. The Finance Committee. II. The Education Committee. 1

III. The Public Works Committee.

- Each of these Committees will be composed of not less than five members who will be elected by the District Board.
- 46. Each of these Committees may elect one of its members as President or Secretary or both, provided that if the Vice-Chairman be a member of any of these Committees, he shall be considered ex-officio President of the said Committee.
- 47. In the absence of the President from any meeting of the Committee, the members may elect one of their own number as Chairman.
 - 48. The quorum of the Committee shall be three. 49. The duties of the Education Committee are—
 - - (a) Granting leave to teachers.
 (b) Confirming appointments made by Secretaries of grant-in-aid schools and making recommend-

 - ations with regard to the appointment of teachers of other schools.

 (c) Dismissing or otherwise punishing teachers.

 (d) Prescribing standards for middle schools according to paragraphs 6 and 9 (3) of the revised Education Rules framed by Government.
 - (c) Any other matter relating to education which the Board or the Chairman may delegate. The duties of the Finance Committee are—
 (a) To prepare the annual budget.

 - (b) To pass monthly accounts.
 (c) To discuss any matters or questions relating to accounts and finance which may be referred or delegated to it by the District Board or the Chairman.

- The duties of the Public Works Committee are
 - (a) To prepare in consultation with the District Engineer a list of the works original and repair to be executed during the year.

 (b) To consider the District Engineer's quarterly progress report of works.

 (c) To receive tenders and to consider and arrange them for the Board.

 (d) To consider estimates.

 - (e) To consider any other matter in connection with Public Works which the Chairman or the District Board may delegate.
- 52. The acts of all Committees must be submitted to the District Board for approval unless the District Board authorises them to dispose of any matters under a special resolution.
- 53. Members of the Education Committee failing to attend six consecutive meetings and members of other Committees failing to attend four consecutive meetings shall thereby cease to be members, and the Committee concerned will apply to the District Board to fill up the vacancy.
- 54 The members of the general Committees shall hold office for one year only, but shall be eligible for re-appointment.
- 55. The District Board may, from time to time, delegate to one or more of its members the duty of inspecting any work which is being carried out under its orders or any institution under its control and management.
- 56. All meetings of the general Committees shall be called by the Secretary or the President, as the case may be, by written notice which shall specify the date, hour, and place of the meeting, and shall set forth the business to be transacted at it. Notices of meetings shall in every case be served at least three days before the date of the meetings.

PROCEEDINGS OF COMMITTEES.

- 57. A Committee may meet and adjourn as it thinks proper.
- 58. A Committee may elect a Chairman of its meetings,
- 59. If no Chairman is elected, or if the Chairman elected is not present at the time for holding any meeting, the members present shall choose one of their number to be the Chairman.
- 60. Every question at a meeting shall be determined by a majority of the votes of the members. present and voting on that question.
 - 61. In case of an equal division of votes the Chairman shall have a second or casting vote.

POWERS OF CHAIRMAN.

- 62. The Chairman of the Board is empowered to enter into contracts relating to works and expenditure sanctioned by the Board in respect of sums or involving values not exceeding its. 500.
- 63. The general superintendence and control of the establishment maintained by the District Board shall vest in and be exercised by the Chairman.
- 64 Subject to any resolutions which the District Board may from time to time pass, the general power of control and administration which are vested or may be vested in the Board under Part III, Chapter I of the Act, shall be exercised by the Chairman.
- 65. Subject to any resolution which the Board may pass from time to time, the general powers of control over the preceedings of inferior local authorities conferred on the District Board by the Act may be exercised by the Chairman.
- 66. The powers of the Vice-Chairman shall be such as the Chairman may by an order in writing delegate to him from time to time. Such powers may at any time be withdrawn or modified by an order similarly made. Provided that nothing done by the Vice-Chairman with the express or implied consent of the Chairman shall be invalid for want of such written order.
- 67. Receipts for money received under the Act shall be signed by the Chairman or Vice-Chairman.
 68. Subject to the scale of establishment laid down by the District Board, the Chairman may appoint and dismiss all officers whose salary is less than Rs. 50 per month. Provided that all dismissals must be received to the next ordinary meeting for confirmation.
- 69. Except as otherwise provided in the Act or the General Rules, the appointment and dismissal of officers and servants of the Board employed on a salary of Rs. 50 or upwards shall rest with the District Board.
- 70. Except as otherwise provided in the General Rules, the Chairman may suspend any officer or servant of the Board for misconduct or incompetence. Provided that the matter shall be laid before the Board for orders at the next ordinary meeting.
- Casual leave for a poried not exceeding seven days at any one time or 15 days in '2 m aths and leave of any other kind for any period not exceeding three mouths may be granted by the Chauman with or without pay and with or without the appointment of a substitute to any officer or servant of the Board. All other leave must be granted by the Board at a meeting.
- 72. Except as otherwise provided by the Act and the General Rules, all persons employed by the Board whose services may be no longer required shall be liable to discharge after the receipt of one month's notice, or one month's pay in lieu of notice, and no such person shall withdraw from the duties of his office without chaving given previous notice for the period of one month on pain of forfeiture of a month's salary.
- 73. The Board shall have power to inflict a fine not exceeding one month's pay upon any officer or servant employed by them for neglect of duty. This power shall be exercised by the Chairman provided that the order of the Chairman inflicting a fine on an officer drawing Rs. 50 per mensem or upwards shall be submitted for the confirmation of the Board at its next ordinary meeting.
- 74. All officers and servants employed by the District Board shall, if required, furnish such security as the Board may from time to time fix.
- 75. Any member of the Board may inspect and examine any account and proceedings of the Local Board, provided that the member shall merely keep notes for communication to the Chairman of the Board and shall not enter his inspection remarks in any book.
- 76. The Chairman or the Vice-Chairman of the Board shall be competent to expend any sum or port of any sum provided in the year's budget estimate sanctioned by the District Board for the purpose to which it has been therein assigned.

The Indian Law Reports.

Published under Authority.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the lat January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of th Reports from 1876:—

Terms of subscription payable annually in advance.

RESOLUTION ON THE REPORT ON THE LUNATIO ASYLUMS IN BENGAL FOR THE YEAR 1892.

MUNICIPAL DEPARTMENT-MEDICAL.

No. 1487 Med.

Calcutta, the 20th April 1893.

RESOLUTION.

READ-

The Report on the Lunatic Asylums in Bengal for the year 1892. Read again—

The Report for the year 1891 and the Resolution recorded upon it.

There was a slight decrease in the population of the five Native Asylums in the year under review. The number of persons under detention on the 1st January 1892 was 963. During the year 158 persons were admitted and 28 re-admitted, giving a total of 1,149 treated against 1,234, the figures of the previous year. The discharges (cured and otherwise) were 71 and 43 respectively, and 84 patients died, leaving 951 persons in confinement at the close of the year against 963 persons at the close of 1891. The number of criminal lunatics in confinement at the close of the year was the same as in the previous year, the decrease of 12 in the total population occurring in the non-criminal class.

2. The number of admissions and re-admissions fell from 213 in the previous year to 186. Of this number, 98 were criminals and 88 non-criminals.

against 91 criminals and 122 non-criminals in 1891. The Lieutenant-Governor is glad to observe this decrease in the admissions of non-criminals, which is attributed to the instructions contained in Government Circular No. 42, dated the 3rd December 1891, prescribing the exercise of greater discrimination in admitting patients to a lunatic asylum. While a falling off of 39 is shown in the number of admissions, it is remarkable that the number of re-admissions, which increased by 12, should be the highest recorded during the last ten years for which figures are given in the report. In last year's Resolution it was observed that the increase in the number of persons discharged was remarkable and its cause a little obscure, and the Inspector-General should now inquire whether the increase in the number of re-admissions in 1892, for which no explanation has been offered, may not to some extent be due to premature dis-

charges in the previous year.

3. The Inspector-General of Civil Hospitals observes that the criminal population was in excess of that in any of the previous nine years, except 1890 and 1891, and seems inclined to think that the increase may be due to the effect of the rules for the treatment of recovered criminal lunatics confined in asylums and for their discharge, issued with Government Resolution of 21st August 1888, which, in his opinion, cause the detention of a larger proportion of these lunatics than heretofore. The Lieutenant-Governor is unable to concur in this opinion, which is opposed to the view taken last year, when part of the decrease in the number of criminal lunatics in 1891 was ascribed to the effect of those rules. The table of criminal lunatics given in the report shows that, with the exception of 1887, when there was a slight decrease, there has been a continuous increase in the number remaining under confinement at the close of each year up to 1890, and that since then there has been a decrease. It is therefore obvious that the causes of the increase must be some other than the rules of 1888.

4. During the year under review, the only asylum at which the total number of inmates at any time exceeded the capacity was that at Dacca, but the overcrowding was slight and no inconvenience was felt, nor was the health of the inmates affected. The extension of the Asylum at Berhampore will, when completed, largely increase the capacity for patients, and be the means

of affording relief to other asylums which may be overcrowded.

In Statement No. VII, the causes of insanity in 53 out of the total of 186 admissions in 1892 are stated to be ganja-smoking and the use of bhang against 54 in 1891. The Lieutenant-Governor desires that the Inspector-General of Civil Hospitals, when inspecting the asylums, will enquire into some of the cases attributed to ganja-smoking, and ascertain upon what data this It is to be observed that in Statement No. VI only 40 diagnosis is based. of the admissions are shown to belong to the types of insanity caused by ganja-The suggestion has been made that it is as smoking and the use of bhang. reasonable to suppose that excessive ganja-smoking may be due to insanity, as

that insanity may be due to excessive use of ganja.

The number of admissions into hospital was 595 against 717 in These figures indicate a less severe incidence of sickness in the asylums taken together, although at Dallanda and Patna there were more admissions into hospital than in the previous year. The increase at Dallanda is attributed to the occurrence of chicken-pox and to several cases of pneumonia which were absent in 1891, and to the prevalence of bowel-complaints to a greater extent than in the year before. There were 29 cases of chicken-pox and 10 of pneumonia, while the admissions for bowel-complaints were 22 against 7 in 1891. At Patna the increase is said to be due to fever and desentery and to disorders, which these diseases leave in their train. dysentery, and to disorders which these diseases leave in their train. As the jail population at Patna and Alipore suffered similarly in 1892 from bowelcomplaints, pneumonia, and other disorders, it is inferred that the incidence of sickness in the Dallanda and Patna Asylums must be ascribed to general rather than to local influences. It is remarkable that, notwithstanding the outbreak of cholera in the jail at every station where an asylum is situated except Cuttack, the disease did not appear among the lunatios. There were 84 deaths against 80 in 1891, the death ratio to the daily average strength being 8:74 per cent. against 8.02 in the previous year. The increase in the death-rate is small compared to what has been reported from the jails, where it has advanced

from 30.9 in 1891 to 43.9 per mille in 1892. The reported mortality in the province generally has also increased from 26.94 in 1891 to 31.92 per mille in 1892.

- 7. The record of injuries and accidents is very small, the total number of cases being 11 against 16 in 1891. At Dallanda there were three injuries; at Dacca there were two accidents and one injury; at Patna there was one accident, and at Berhampore there were four cases of contusion. The Lieutenant-Governor notices with satisfaction that only two of the injuries, one of which was merely a contusion, were caused by the violent treatment of the patients by their keepers, and that in both cases the warders were punished with
- 8. There were three escapes—one from each of the Asylums at Dallanda, Patna, and Dacca—against two in the previous year. The lunatics who escaped from Dallanda and Patna were recaptured, but no trace could be found of the other. The warders through whose carelessness the escapes occurred were adequately punished.

9. The following statement shows the income and expenditure of the past

two years:-

GRAND TOTAL	*****				94,780 12 1	86,298 0 1

The only item of expenditure calling for special notice is "diet. Under this head the increase, which took place in all the asylums except Cuttack, where the number of inmates was unusually low, amounted to Rs. 2,875-4-11, and was due to the high prices that prevailed in 1892. The following statement compares the average cost of each lunatic on account of diet during the years 1891 and 1892:—

-			1891.	1 89 2.
,			Rs. A. P.	Rs. A. P
Dullunda	•••	•••	37 14 1	42 13 -2
Dacca	•••	•••	3 6 13 2	40 13 2
-Patna	•••	•••	81 10 0	34 7 8
Cuttack		•••	27 15 1	36 6 5
Berhampore	•••	•••	3 3	37 1 2 3

The average cost of each lunatic, calculated on the actual expenditure incurred, was Rs. 67-10-5 against Rs. 65-15-7 in 1891.

10. During the year, the Government of India suggested that the practicability of establishing dairy farms in connection with the Lunatic

Asylums in Bengal might be taken into consideration. At Dallanda a dairy has been in successful operation since 1889, and steps are now being taken to extend it. The only other asylum with a dairy attached to it is the Dacca Asylum. The Superintendent of the Patna Asylum having reported that want of space will not admit of a dairy being opened there, and that a dairy farm is not likely to be profitable, owing to the cheap rate at which milk sells in the bazaar, the project of establishing a dairy in connection with that asylum will be abandoned. Efforts will be made to start this experiment in the remaining asylums, the result of which should be described in some detail in future

reports:

11. The total population of the European Lunatic Asylum at Bhawanipur rose from 50 in 1891 to .61 during the year under review. Of this number 35 were under detention on the 1st January 1892, and 26 were subsequently admitted, including nine criminal lunatics. During the year 17 patients were discharged cured, one was despatched to Europe under the Merchant Shipping Act, four were transferred to the care of friends, one was deported to Europe as still insane, one was discharged, and two died, leaving 35 under detention at the close of the year, the same number as at the close of the previous year. There was no want of accommodation either in the male or in the female wards, and the health of the patients was good throughout the year. There was one accident, but no case of injury or escape. The expenditure amounted to Rs. 22,831 against Rs. 25,370 in 1891, the decrease of Rs. 2,539 occurring under the heads of Public Works and Rates and taxes.

12. In paragraph 8 of the Resolution on the report for 1891, it was stated that the question of abolishing the Bhawanipur Asylum and transferring the patients to the Dallanda Asylum had been referred to a Special Committee. This Committee was unable to suggest any practicable and economical arrangement and the proposal was therefore abandoned, leaving the asylums to be managed

as at present.

13. The rules for the control and management of Lunatic Asylums in Bengal were last revised in 1878. Since then a new Code of Criminal Procedure has been passed, the Acts relating to Lunatic Asylums have been amended on several points, and a large number of executive orders have been issued on the subject. A Committee was accordingly appointed during the year under review to undertake the revision of the rules and to lay down a clear and distinct procedure for the admission and discharge of both criminal and non-criminal lunatics, and for the treatment and disposal of recovered criminal lunatics. The report of the Committee is still awaited.

14. A set of rules was also prepared and submitted during the year by the Committee appointed in 1891 to examine the system of guarding lunatics in force in the Dallanda Lunatic Asylum, and to suggest improvements, and also to draw up for adoption in all lunatic asylums in Bengal special rules for the care and custody of criminal lunatics. On receipt of the Committee's report, the Inspector-General of Civil Hospitals was requested to obtain the opinion of the Superintendents of Asylums on their proposals, and to submit a comprehensive report on the subject. His reply has not yet been

received, but it is shortly expected.

15. The report is submitted by Surgeon Colonel J. G. Pilcher, who assumed charge of the office of Inspector-General of Civil Hospitals, Bengal, in November 1892. The thanks of the Lieutenant-Governor are due to Dr. Pilcher for the report and for the punctuality with which it has been submitted. His Honour is glad to observe that the Inspector-General is able to speak in favourable terms of the work of the Superintendents of the Asylums and of their subordinates.

By order of the Lieutenant-Governor of Bengal,
J. A. BOURDILLON,

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 22nd April 1893.

The average fall of the corresponding period for 24 years, S.-G.'s Office The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph d from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the armometers are verified, and the readings have been corrected to a standard constructed and verified at the w Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet ove the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in

Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph,

The mouth of the rain-gauge is one foot above the ground.

A, dew; t, thunder; <, lightning; o, overcast; d, drizzling rain.

C. LITTLE,

implementon.—Summary.—The normal means of air pressure andisembershire are the arithmetical average or means of the residue; the sines of the residue of the atmosphere is expressed at percentage, saturated at being presented by 100. A clear aty is denoted by 0 and an overease at the humidity of the atmosphere is expressed at percentage, saturated at being presented by 100. A clear aty is denoted by 0 and an overease at the humidity of the atmosphere is expressed at percentage of the rainfall in that district determined from the returns sent in by the subdivisional rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A takey day is determed the return sent in the district sending in returns divided by the number of stations.

for the week ending Saturday, the 22nd of April 1893.
